Kansas City Provision Review.

KANSAS CITY, Sept. 20.—Irregular price changes were noted in the provision market in Kansas City, the better grades of fresh meats showing a slight advance, while the cheaper grades and smoked products closed the week with losses. A fair to good demand prevailed. Fresh pork loins moved in liberal volume to the East, the market showing an advance of ½c to 1c for the week. Local demand for fresh pork was fair, though warm weather was a restricting influence. Butts were off ½c, and trimmings and leaf lard were unchanged. Harvest activity in the South is increasing the demand for dry salt and heavy smoked meats. These grades were off 1c. Lard was unchanged, while cooking oil and other substitutes receded about 1c. Fancy hams and bacons were unchanged to ½c lower, with a fair demand prevailing.

Summary of Livestock Markets.

Highest prices on hogs in the leading markets for the week, as compiled by the *Daily Drovers' Journal*, follow:

	Mon.	Tues.	Wed.	Thur.	Fri.	Sat.
Chi.	$18.50	$18.00	$18.10	$18.10	$18.30	$18.25
K. City	17.25	17.50	17.40	17.50	17.60	17.40
Omaha	17.25	16.75	16.75	17.25	17.25	17.30
St.Louis	18.25	18.25	18.00	18.25	18.30	18.30
St. Joe.	17.25	17.40	17.40	17.50	17.75	17.55

Cattle prices in outside markets were lower and closed as follows:

	Beef steers	Cows and heifers.
Chicago	$12.50@17.70	$5.00@15.50
Kansas City	8.75@16.80	5.00@11.75
Omaha	8.80@16.25	5.10@11 90
St. Louis	8.85@15.50	5.00@11.85
St. Joseph	8.90@15.00	4.90@11.70
Sioux City	8.60@15.00	5.00@11.50
St. Paul	8.50@14.75	4.85@11.30

Sheep and lambs were in large supply and lower, closing as follows:

	Lambs.	Sheep and yearlings.
Chicago	$7.00@14.75	$2 00@10.75
Kansas City	7 50@14.50	2.75@ 7.60
Omaha	7.00@14.00	3.00@ 7.65
St. Louis	7.25@14 00	3.00@ 7.25
St. Joseph	7.50@14.00	3.00@ 7.00
East Buffalo	11.00@15.00	3.90@ 9 00
Pittsburgh	10.00@14.50	4.00@ 9.00
Jersey City	11.00@15 50	5.00@ 9.50
Louisville	8.00@13.00	4.25@ 8.00
Cleveland	8.00@14.50	3.75@ 8.00

Receipts at Twenty Markets.

Combined receipts of cattle, hogs and sheep at the seven leading western markets and thirteen other points today and for the week thus far, with comparisons; also totals for 1919, to date as compiled by the *Drovers Journal:*

	Cattle.	Hogs.	Sheep.	All kinds.
Today	12,600	28,100	11,500	52,200
Wk. ago	13,200	27,900	31,300	72,40
Yr. ago	21,500	33,800	32,300	87,600
This wk.	413,600	393,000	710,100	1,516,700
Pre.wk.	383,000	461,400	680,700	1,525,100
Yr. ago	498,500	472,600	606,800	1,577,900
*1919	10,612,100	26,333,200	11,841,000	48,789,300

*Totals for 1919 to date.

Export of Hog Products.

The past week's export clearance of hog products, compared with corresponding time last year:

	Sept. 20, 1919.	Sept. 13, 1919.	Sept. 21, 1918.
Pork, bbls.	775	3,155	970
Pork, lbs.	147,250	599,450	184,300
Meats, lbs.	16,437,000	14,364,000	18,891,000
Total meat	16,584,250	14,963,450	19,075,300
Lard	8,329,000	7,998,000	2,245,000
Total products.	24,913,250	22,961,450	21,320,300

Hog Slaughterings.

Special reports to THE PRICE CURRENT-GRAIN REPORTER show the number of hogs packed since March 1, 1919, at undermentioned places, compared with previous year:

	To Sept. 20, 1919.	To Sept. 21, 1918.
Chicago	3,646,200	3,678,700
Kansas City	1,480,109	1,450,000
South Omaha	1,369,300	1,274,100
St. Louis	1,273,700	1,288,100
S. St. Joseph	873,000	919,000
Indianapolis	833,000	639,800
Milwaukee	211,100	206,100

Oklahoma City	179,600	228,600
Above and all others.	16,115,000	16,022,000
For the week	344,000	423,000
Preceding week	415,000	382,000

Weights are reported as follows: 231, 195, 236, 224, 208, 250, 290, 184, 225, 185. Reports of quality: Five "good," two "fair."

Cash Meats.

On Monday although there was a generally unsettled feeling prevalent in the hog products market the undertone was considerably stronger, especially at the close and gains were recorded. Considerable interest centered in the deferred deliveries. Shipping demand is rather poor and buyers are said to be cautious. Quotations Sept. 22 follow:

Live Stock Market

CHICAGO LIVE STOCK.

CHICAGO, September 22.—The market was in a more healthy during the week and the fluctua less drastic, the market having stability than for several weeks Opening prices were around the with a good break on Tuesday fol by sharp reactions, the top price $18.50 and the lowest top of the was $18. The average on Saturda $17.30, or 60c higher than a wee and compared with $19.65 last Saturday's top price was $18.25.

Packers bought 85,100 hogs fo week, compared with 104,400 the ous week and 95,000 last year. Th mour interests took 22,900, Swift 2 Morris 7,200 and Wilson 5,700. Av weight for the week was 249 lbs lightest in weeks, compared wit lbs. the previous week and 243 lbs year. Pigs were in good demand feeders with a fair supply on the ket and the range at the last wa @16, depending upon weight. Re here for the week were 86,600, sh than the previous week and com with an average of 92,000 for the seven weeks.

The cattle market was a peculi fair, no two buyers apparently bei the same mind as to values of a percentage of the supply and bi times were $1 apart. For good showing quality and some of the heavy loads, prices were little cha while on others the market was 25 to 50c lower. The top price o steers was $17.70 and the average $ or 25c lower than the previous wee 90c under last year's. The rang $13 to $17. Yearlings were o more freely and attracted increas tention and sold well up towar top prices for beef steers.

Butchers' stock sold on a stable basis. Supplies of good to cows and heifers were small an demand good. Average for the was $9.35, or 15c lower than the ious week and $2.30 under the point in the first week in April, was the top of the season. The was around $6.50 to $15.50 with fancy at more. Bulls were in fai ply and sold well for the better but the others were neglected. range was $7 to $7.50 for sh stock and about 25c higher for the

Sheep declined 75c to $1 with ewes $6.50 to $7.50 and wethers to $9.50 and yearlings $9 to $10.50 average was $8.25, compared with the previous week and $11.90 last The top price for the week was or 25c under the previous week. were $1.50 to $2.50 lower at the for fat natives, with the range $13.50. Western range lambs w lower at $14.65 to $14.75 at the las the top $15.50. Average was $1 loss of 75c for the week and of from last year. Feeder lambs wer sale at $1.50 to $3 decline, rang $7 to $12.25. Receipts of 165,43 15,000 more than the previous while at the twenty markets there 710,100, against 680,700 the pr week and 606,800 last year.

Oklahoma City Live Stock Ma

Thusnelda Haehnke, Correspond

Oklahoma City, Sept. 20.—Cattle r have been fairly liberal this wee majority of the run consisting of stuff with not very many good v steers. The steer market is call lower for the week. Killers hav hard to interest and they would pay prices when made to toe the mar any opportunity to squeeze was gra the big operators. The majority of have been common to fair with $10 for several loads averaging aroun pounds. Quite a few loads averagi tween 1,000 and 1,050 sold from $10.50.

Quite a display of jackpots amo fat and stock cows. In the butch partment packers refused to pay for right good grass cows. Shippe were from 10@15c lower, with canne

ers steady. Bulls are hard sellers
igh scarce, $6@6.75 for bulk and $7
ld stop the best and they are selling
teady prices for the close of the week.
re were few calves in with Monday's
ine satisfying the buying end, $12.50@
) for vealers and $7@9 for medium to
d heavies catching the range of prices.
the close of the week the market
ved a $2 advance over the close of last
k with a few bunches of light calves
ng up to 15c. The general top on good
es, carload lots, is $14.25@14.50. A very
ng demand for calves exists with the
ply not equal to the requirements.
gs Monday made a cut of 25@40c
h gave even the $17 top a close shave.
ipts were pretty fair. Tuesday 1,800
l coming, against 1,714 a week ago and
a year back. Quality was average
with weighty butchers in good enough
to make $17.25 as top. The reason for
decline in the hog market is being laid
he absence of European demand of
consequence. Receipts have been
r this week than they have been for
time, the top being $19.70 with a
y fair quality.

Omaha Live Stock Market.

Bruce McCulloch, Correspondent.

naha, Sept. 20.—Two new records in
e receipts were made here this week.
former marks for a single day were
en Monday when 29,763 head were
ived, and the week's supply of 64,400
also tops the former high mark by
ral thousand. Very few good corn-
were included in the offerings, and
s were not quotably changed. Best
lings still sell up to $17@18 with choice
y steers as high as $16@17. Good to
e grass beeves slumped 25@50c dur-
he week, and plainer kinds are off 50c
extremes $1. Most of the break was
rced in the record run Monday. Good
rime steers are now selling at $10.50@
, with common to good at $6@10, and
icans at $6@9. Butcher stock is a big
r lower than a week ago, and by far
lowest of the season. Good to choice
are being bought at $7.50@8.50, with
a few of the prime heavies up to $9
better. Canners are going around
@5.25. Bulls are 50c lower for the
, bolognas closing at $5.25@6. Calves
largely unchanged, bulk of all weights
selling at $7@14.
was the biggest week of the season
tockers and feeders. A total of over
0 head were sent out, and good to
e kinds held largely steady despite
record receipts. The only good cattle
sold any lower were the extremely
hty ones. Plainer grades were slow
)c or more lower. Most of the good
rs are selling at $9.50@11, with only
e heavy kinds higher, $12@12.50 is
t the limit on them.
g values have been more stable this
than for some time. Receipts were
only 20,700 head for the week, while
t was fairly broad, and general trend
ices was stronger. Values are closing
$1 higher than a week ago. There
no violent changes, values appreciat-
gradually from day to day. At the
bulk of the offerings is selling at
0@17, with the top at $17.30.
eders made up fully three-fourths of
week's sheep and lamb run. Receipts
slightly smaller than for the previous
, totaling 181,000 head, but were heavy
gh to push values down on all classes
stuff. Fat lambs, while relatively
e, slumped 75c during the week, and
ar declines were enforced in all classes
ed sheep. Depreciation in quality as
season advances is partly responsible
he break. Fair to choice lambs are
bought at $13.50@14.50, with year-
at $9.25@9.75, wethers at $8.25@8.75,
fair to best ewes at $6@7. While the
's offerings of feeders cleared fairly
trade was sticky most of the time,
feeding lambs broke $1.75@2 during
week. Choice feeding lambs are sell-
t $11@11.50, while $10@10.75 stops fair
od kinds. Feeding ewes are bringing
.50.

Ft. Worth Live Stock Market.

T. O. Walker, Correspondent.

Worth, Tex., Sept. 20.—Receipts for
week in the cattle divisions show no
ed gain or losses from those of the
ding' week. Grown cattle exhibit
500 gain, calves a loss of 1,200. The
in grown cattle lies on the side of the
ier stock, steers having shown up in
quantity and chiefly in the native
on.
tle totals for the week are: Mature
16,000; calves, 11,343.
market has been droopy and gen-
lower almost every day, steers clos-
5c to $1 lower than at the close of
week; cows and stockers with about
same loss; calves are 50@75c lower
at the beginning of the week.
run of south Texas cattle has prac-
y ceased. A few calves and still fewer
and heifers are making their appear-
but the bulk of cattle offerings comes
e native division.
statistics show a gain in receipts,
his is more apparent than real, since
half of the week's total, 6,500, were
ed direct from Nashville, Tenn. The
narket is closing the week practically
steady basis, Monday's top being
and the top at the close $17.45
has averaged for the week between
and $17.30. Shipping pigs have de-
50c for the week, the best closing
.50@15.

Sheep and goat receipts are about the same as last week, 4,300 against 4,200. Market steady on fat stuff. Packers bringing in muttons and lambs from other markets. Good demand for breeding ewes, draggy situation on all other stockers. Fat goats in good demand; butchers and common sort hardly saleable.

St. Louis National Stock Yards.

H. L. Wyatt, Correspondent.

National Stock Yards, Ill., Sept. 20.—The cattle receipts this week were a little below normal for the fall movement. The bulk of the offerings in the steer department runs to the medium and grassy kinds. A large percentage this week of the ordinary killing cattle came from Oklahoma and Kansas. There was nothing strictly choice at all from our native territory, the top on heavy steers being $16.50 and on yearlings $16.75. Any real prime stuff, either heavy or light, would have established a considerably higher top. The market on good cattle while slightly lower was not far from steady, considering the quality of the offerings. Medium and plain steers were slow and draggy all week and show a decline of 50@75c. Butcher cattle declined about the same as in beef steers while cows are perhaps a full dollar lower than a week ago.

Considering the sharp and frequent fluctuations in the hog market for the past several weeks, the market this week so far as prices are concerned is unique. It has held to a steady, even basis during the entire period and the extent of the fluctuations are entirely covered within a quarter of a dollar a hundred. A top of $18.25 has been maintained all week with the exception of the last two days when the top has advanced to $18.35. The quality of the offerings generally has been fair to good and with the light runs the clearances have been fair. The week's closing quotations are: Mixed and butchers, $17.35@18.25; good heavies, $17.50@18.15; rough, $13.50@15; light, $17.75@18.25; pigs, $13.50@17; bulk, $17.50@18.25.

A sharp decline is noted in the sheep house. Fat mutton sheep are off around 50c and lambs $1.50 lower for the week. The lamb top early in the week was $15.50 but at the close it is doubtful whether the same grade would bring within $1.25 of this price.

Kansas City Live Stock Market.

Sanders Sosland, Correspondent.

Kansas City, Sept. 20.—Weakness in cattle continued the outstanding feature of the trade in live stock in Kansas City this week. Depression in the cattle market bordered on the point of demoralization in the stocker and feeder department. Receipts increased, but were still less than a year ago, due perhaps entirely to the lack of cars. There was a small decrease in sheep and hog receipts, but the sheep arrivals continued in excess of a year ago. Hogs improved in price but the upturn is considered only temporary.

In the hog market there was a better tone in the heavy and mixed grades than on the lights. In consequence, the spread between heavies and lights narrowed as compared with a range of as much as $2 recently. The market closed 50c to $1 higher, with the top $17.50 compared with $20.65 a year ago. There was an improved shipping demand for light hogs. Stock hogs sold surprisingly well, although they were affected by the recent declines in finished porkers. Still, stock hogs sold up to $17.25, with Illinois and Iowa the best buyers.

Prices of cattle receded mostly 50c to $1, with stockers and feeders showing the principal recessions. Plain quality predominated, and the bulk of the grass steers sold to packers at $8@10. The top on corn-fed steers was $17.75, compared with $19.40 a year ago. Cows sold as low as $4.25 for canners, and grassers ruled below $8. Some sales of the best fed cows were at $11, but these were exceptional. Veal calves sold up to $17, but plain, heavy grades were as low as $6. Large accumulations of stockers and feeders were carried over from day to day and the disappointing demand weakened the entire market, reducing competition which frequently confronts packers. Stockers ruled between $5.50 to $10 and feeders at $8 to $11.50. However, very few sales were above $10 and some good feeders went out at $9. Stock cows and heifers sold at $5 to $6.75.

Losses of as much as $60 a head on the season's grazing operations were reported on cattle sold from Kansas pastures this week. It is reported that some large holders are arranging to carry their stock over until next spring in Texas and New Mexico, shipping out of Kansas. But liberal supplies are still in prospect. Northwest drouth shipments and nervousness over high cost of living agitation is hurting the stocker and feeder trade.

Sheep and lambs slumped 50c to $2 and closed weak with top lambs at $14.

Canadian Livestock.

Montreal, Sept. 19.—The hog market was without interest during the week, receipts were light which kept the price steady at $18 for selects. Heavier receipts on Thursday contributed to the hope that sales could be expected at $17.50, but sellers remained firm and buyers had to meet their views. Offerings of cattle were heavy during the week but nevertheless the trades were hard to make. Best steers sold at $11 with good butchers' stuff at $8.50@10.

Movement of Hogs.

Weekly receipts and shipments of hogs at western centers the week of Sept. 20, and totals with comparisons for corresponding time last year compiled by THE PRICE CURRENT-GRAIN REPORTER:

The Price Current-Grain Reporter

Exponent of Trade Interests in Grain, Hay, Crops, Provisions, Live Stock, Etc.

Vol. LXXXII. No 14 Weekly | CHICAGO, OCTOBER 1, 1919 | $3.00 a Year. Single Copies 10 Cents

BUSINESS AND TRADE CONDITIONS

THE steel strike of course dominates all other factors in the business world. The failure of the strike has been assumed by the business d from the first, and it begins to look as though predictions of investors, who have been buying l Corporation stock all through the progress of strike, would be justified. The disorder created ne interminable succession of walkouts is getting ne nerves of those who are trying to maintain ssessed state of mind and to live like honest and nal beings, and no sympathy is being extended to well-paid men who quit their jobs at the call of who have little interest in their welfare after nization fees have been paid. The steel men least l are the objects of sympathy; men whose wages e at pretty regular intervals from $4.44 to $60 a can hardly be said to justify the organizers' ment that "the standard of life of the average worker is below the pauper."

us far there has been nothing given as a reason ne strike save what Mr. Gompers has said to the e committee: that the men are entitled to say what conditions they shall work. This is his form of begging the question. The mills all shop unions which regulate these matters, and r as the public can know, they have done so actorily in the past. The strike, which has been urse of promotion by the Federation of Labor ore than a year, when Fitzpatrick and Foster made the executives of an organization propa- by the Federation, with a hundred paid or- ers, is one for power—Federation control of the try and ultimately of all industries by the "One Union." The work has been most successful among the foreign and alien element in the men the most easily persuaded to quit work, ally when told, as they were at Pittsburgh, that nion would eventually control the mills and the s would hand out all jobs, which the payment initiation fee of $3 would insure to men now rk, while later on the price would be $25!

strike indeed seems to have been inspired by me feeling which animates the railway em- of Great Britain, all of whom, including the men of the urban car lines, 'bus drivers, etc., w out. The only object of the English strike to be the purpose to force "socialization," state ship and operation, of all transportation facili- s the English coal miners had previously de- d the nationalization of the mines. T. J. Vind, l organizer of the Federation at Chicago, ad- ng the strikers at Gary, Ind., said: "The strike stop until the steel workers [and the miners e ore-carriers' hands?] become the lawmakers shington." As there has been as yet no sugges- a valid grievance which could not have been without a strike, save only the "open shop" of the Steel Corporation, Mr. Vind's frank rev- of the purpose in view may be accepted as te one and as a challenge.

England and the United States are seemingly the situation which obtained in France after ebruary Revolution" of 1848, when the nation- n of industry was not only demanded by "la- ut actually inaugurated in the city of Paris "workingmen's parliament." Then as now the ment admitted the so-called "right to labor" the other devices of politicians and boudoir ers who in their mahogany laboratories invent es for the Almighty's doom upon man to work, the necessity to which all are born. Work is not a "right" but a necessity which every man escapes as soon as he can. The national workshop was then the workingman's solution, as it is now, for the problem how to secure a larger income and more consumable goods with less work or with no work at all. In 1848 the "national" workshops of Paris rapidly developed into complete idleness of the employes and no production and within a few weeks had to be suppressed by the government which after the June insurrection came into the hands of the middle class upon whom in the last analysis the duty of maintaining public order and continuing the progress of civilization has in all ages fallen.

It is the leaders of these men who realize, as smaller men cannot, because they do not think but only talk, that "the progress which men have made in developing the possibilities of human existence have never been made by jumps and strides. It has never resulted from the schemes of philosophers and reformers"—never from the plans of ignorant radicals and politicians. The country faces now therefore the greatest task it has had before it since those days in the late 1780's when Hamilton and Madison and Washington were pleading with a narrow-minded and selfish and stiff-necked, jealous people to adopt the Constitution which made of the Colonies a Nation. Now, the Country is facing the dure question, whether as a people we shall return to our former allegiance to natural economic laws which during the war the Administration, following the lead of Lloyd George in England, who took his cue from Germany before and during the war, tried to set aside in favor of bureaucratic socialization of the national industries "for war," which quite naturally the unthinking now assume should be good in time of peace if it were good in time of war. But natural law was not set aside during the war period; only the effort to set it aside was made. It was and always is at work. Before the war it was accomplishing the very ends sought by the agitators of today, but doing so in the only natural and efficient way those ends can be achieved, by using agents unidentified for the most part but reaching new and better arrangements which in the past have come imperceptibly through the natural effort of all to make the best of actual circumstances. The safeguard of civilization is the sound instincts and strong sense of the common people, the sane middle class and the more intelligent and self-asserting members of the working class so-called, who, although they may not reason closely can reject instinctively. It is through these that the laws and customs of the past, which permitted the acquisition of property without industry, by cunning and by force, have been one after another swept away and which still offer some field for further reform because reform would lie in the direction of still greater security for the right of property and the liberty of the individual. It has been well said that "whatever assails that right, or goes in the direction of making it still more uncertain whether the industrious man can dispose of the fruits of his industry for his own interests exclusively, tends directly toward violence, bloodshed, poverty and misery." This is what radicals like Fitzpatrick and Foster and Vind and Plumb and all their disciples are aiming at; and should they succeed in their projects of spoliation, either by violence or the forms of law, they certainly would destroy our civilization as that of Europe was once destroyed by the irruptions of the Germans and other barbarians into the Roman Empire.

It was said by Bismarck once that several times in his official life events in the United States had seemed to him about to disrupt and ruin the Nation; but always the common sense of the American people had asserted itself; the "ship of state" righted itself and proceeded on even keel. Just now some working people, not yet recovered from their orgy of unexampled prosperity and thriftlessness, triumphant for the moment under the leadership of radicals, seem to have started on the road to having their own way in spite of consequences to all others, their own class included, forgetting that human progress has never yet been guided through a set program, much less one which defies human instincts, and the fact that progress is based absolutely on two circumstances, "public order and private property." But they will not succeed. There have always been men who defied both conditions, and in so far as they have succeeded they have stopped the march of civilization and brought untold misery upon the poor, until natural law could reassert itself. Then this natural law, working more or less freely, maintained public order and sustained the right of private property and personal liberty; and so gradually, not instantly, has enabled men decade by decade to get more and more of their just deserts. It will be so again. The English and the American people are for the time being wallowing in the froth of demagogic radicalism just as the French wallowed in it in 1789, 1848 and 1871; but out of the welter of those days came a new day, better indeed and with a sun shining upon a world again obedient to natural law of progress and withal progressing slowly but surely in the patient way toward those better things which come as the reward of sobriety, industry, thrift and well-doing; and these will come in spite of the labor leaders who get their radicalism from Germany and the politicians who at all times give emphasis to the observation of Ives Guyot that, "When we look impartially at human history we see that 'the state' has been the chief hindrance to economic progress," and therefore to human betterments and contentment.

The railways report for the week an increased tonnage; and in the Chicago district the walkout of steel workers and ship builders is counterbalanced for the time being by the resumption of work by the building trades, with more than $125,000,000 of work in sight in Chicago alone. Retail trade continues brisk, the natural result of ample prices for farm products and of high wages to the workers. Naturally the farmers are more thrifty, careful of their money, than workers in the towns, but even the farmers are achieving the spending habit, which in large part goes to explain the discontent which certain of their volunteer leaders attribute to insufficient income and meager profits. Everywhere farmers are reported holding their grain and hay for better prices, although the hay crop at least is the greatest ever known in this country. The returns of foreign trade for August, given elsewhere, somewhat contradict inferences drawn from July returns. The August export total was 604 millions or 34 greater than in July, while imports totaled 308 millions, a decline of 36 vs. an increase of 51 in July over June; so that the belief that the June and July movements represented a reversal of the movement of foreign trade is not sustained; it simply represented strike conditions at home. The outgo will aparently continue abnormally large and the inflow moderate only until Europe can accumulate a real surplus of products to send this way. The financing of the movement continues in spite of the very proper reluctance of Congress to make the treasury the financing banker of the export trade, which will take care of itself if left alone.

THE ST. LOUIS CONVENTION

THE next event in the grain world is the annual meeting of the National Association at St. Louis, the preliminary program of which appears on another page of this number. As to the probable attendance and the program, President Goodrich and Sec'y Quinn have each something to say, to which the reader is referred. Intending attendants should not neglect making hotel reservations at once.

St. Louis as always will be on hand with the "glad hand of welcome." It is always a delight to be in this hospitable city which for more than a hundred years has been and still is distinctive in the Great Mississippi Valley. Great accumulated wealth has not spoiled her people; it has only added to their power and disposition to entertain their invited guests in generous and fitting manner as becomes the gentlemen of this age.

St. Louis is one of the half dozen great grain markets of the Continent. Sec'y Eugene Smith of the Merchants' Exchange has been kind enough to supply us with data as to the business done in St. Louis and how it is done, which appears on other pages and to which we call the reader's attention. The subject matter is valuable to western grain shippers aside from its immediate interest as an outline of the study of the city which all visitors should make before going there; no one brings so much home from travel as he who takes much with him.

Cheap politicians have done their worst in the past to meddle with the service the receivers of the St. Louis Merchants' Exchange would render to their clients, but not their worst has been able in any way to lessen the quality of the service which St. Louis receivers stand ready at all times to give and are daily giving their principals. The "old fellows" can remember when St. Louis was characterized as "conservatively" slow. That day has gone by. Now St. Louis is safely and sanely and surely up-to-the-minute always in business as well as in the broad measure of her people's hospitality and thoughtful consideration for her guests.

PRICES AND WAGES

David F. Houston, Secretary of Agriculture, does not assent to the theory that the prices of farm products should fall before the prices of manufactured commodities fall. He makes this clear in replying to a recent communication in which it was stated that, "There must be a drop in prices before there is a drop in wages, and it would seem that the farmer is the man who is going to be first hit."—News Letter of Agr. Dept.

THE Secretary further contends that, "This is clearly an unjust contention—it manifestly would not do to ask farmers to produce, buying everything that they have to buy from manufacturers at high prices, with the assurance to them that their products will fall in price, and that then manufacturers will consider what they will do with reference to their own prices. Obviously, manufacturers must be willing to make at least a contemporaneous decrease in their prices," etc.

With all due respect to so exalted a source, one cannot escape the conviction that the thought quoted is mere persiflage—nonsense. Prices of agricultural products have little or no dependence on wages or on the prices of manufactured products; nor have wages on food prices. The repeal of the English corn laws in 1846 demonstrated that the argument, that cheap food means low wages and high food prices high wages, which the English landlords relied upon as their main defense of an indefensible tax on the people's bread, was not true. For it was found that when the corn laws were repealed the prices for wheat immediately fell and generally remained low until 1915, but wages, even of farm laborers, in the interval advanced steadily in England as they did in America where grain prices were even lower. Wages depend on the volume of the output, not on the price of food. Wages may be high and food prices low; generally in the past sixty years this has been the fact. At the same time, as wages advanced, production being what it should be (and was until radical and ignorant labor leaders began to force slack production), prices of commodities fell while wages rose. This is not a paradox but a simple fact which any one can understand who can think of production and wages in terms of commodities and not in terms of money, which is not the true wage but only the means of converting labor into commodities for the laborers' or consumers' uses.

Of all the flood of sophistry that has proceeded out of the mouth of the Agricultural Department in recent years, nothing is more inexcusable than the reiteration of the notion that department palaver about marketing and ethics or other things than supply and demand can fix prices of farm products; that combinations of farmers, or moral influences such as the Secretary raises in the second paragraph, or legislation for farmers' sole benefit, can maintain prices of farm products in the face of ample supplies throughout the world or that consumers by any sort of verbal or legislative hocus pocus can secure low prices for foods in the face of general scarcity and insistent and extravagant demand such as now obtains. The distinguishing record of the present administration of the Department, when it shall have gone into history, will be the story of this Sisyphean labor of trying to teach farmers that they can, by willing to do it, set aside the natural law of prices.

The farmers of this country produce more grain and meat and other raw foodstuffs than Americans will consume. As soon as Europe regains her old status of production prices of American farm products will fall to that level which other countries will be willing to pay for such parts of our surplus as they desire to use. And no power we can exert will be able to make them pay more. Our farmers ought to be made to understand this now that they may prepare themselves for the near future. But farmers and their uninformed advisers and sycophantic legislators can do much to curtail their foreign markets and destroy the machinery of the domestic markets by means of which farmers' prices are at all times adjusted to the world's best prices for grain and its products. Instead of throwing wrenches into this machinery and multiplying the financial, physical and legal difficulties involved in handling products that leave the farm, the farmers and their advisors should be insistent that trade shall be relieved of every hindrance or obstruction, natural or artificial, physical or legal, so that their surplus products can more cheaply and quickly be sent to the places where they are needed and can be sold to the best advantage. But that is the last thing farmers' self-appointed leaders now intend to do. The first thing they propose to destroy is this free competitive market; and the Agricultural Department is throwing out no warnings of the inevitable results of such a program to the farming industry as an industry.

THE FEEDING GAME

THE late demand for feeders at the yards has not been as brisk as usual, and the more recent receipts of cattle show a decidedly unfinished condition. As happened a few months ago, however, the demand for beef has been such that the packers have been paying prices for this unfinished stuff that have been quite out of proportion to values normally. As usual, too, the live stock journals are replete with shippers' comments that the feeding game is "on the blink."

The probable truth is that the raid of the K. K. K. senators on the packing industry and the demand of the Government for lower prices and no accumulation of product are at the bottom of the disquiet in the yards and feed lots, where the uncertainty of the future has taken the "pep" out of the game. In the Southwest money also for the feeding season is harder to get, not because money is scarce, but because bankers, playing safe, as they needs must as custodians—borrowers—of other people's money, can not take chances with a commodity, the ultimate marketing of which may be materially affected by the idiosyncracies of some bureau clerk of the $1500 grade whose expertness in directing the conduct of a 1,000-million dollar industry may be open to some doubtful questioning.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures fr various statistical exhibits appearing weekly in detail "The Price Current-Grain Reporter," these figures rep senting the past week, the preceding week and cor sponding time last year, here assembled for ready ref ence:

	Sept. 27.	Sept. 20.	Sept. 28.
Wheat—			
Primary receipts	15,203,000	15,534,000	17,026,
Primary shipments	9,697,000	9,657,000	6,378,
Receipts since July 1	177,852,000	162,649,000	192,034
Visible	81,683,000	77,677,000	90,623,
Available, Sept. 20	85,524,000	79,964,000	84,302,
Canadian vis., Sept. 20	15,850,000	12,240,000	8,136,
Exports, U. S.	7,526,000	10,285,000	5,783,
Exports, world's	10,842,000	15,940,000	8,772,
Corn—			
Primary receipts	2,519,000	3,537,000	5,330,
Primary shipments	1,407,000	1,948,000	2,741,
Receipts since Nov. 1	169,142,000	166,623,000	272,638,
Visible	2,050,000	1,750,000	5,511,
Exports, U. S.	70,000	137,000	366
Exports, world's	1,528,000	4,104,000	1,503,
Oats—			
Primary receipts	4,638,000	4,894,000	5,975
Primary shipments	3,392,000	3,227,000	6,322
Receipts since Aug. 1	45,056,000	40,418,000	82,060
Visible	20,260,000	20,928,000	26,157

Receipts, 6 markets	263,000	298,000	390
Shipments, 6 markets	130,000	147,000	168
Hogs—			
Receipts, 9 markets	357,000	308,000	360
Shipments, 9 markets	82,000	82,000	84
Sheep—			
Receipts, 16 markets	596,000	591,000	623
Shipments, 16 markets	373,000	362,000	331
Exports—			
Meat, lbs.	14,238,000	16,584,000	26,965
Lard, lbs.	3,190,000	8,329,000	9,335
Hog Slaughterings—			
For the week	410,000	344,000	406
Since March 1, 1919	16,525,000	16,115,000	16,428
Livestock prices, Chicago—			
Cattle	$15.60	$15.25	$1
Hogs	17.00	16.95	1
Sheep	8.20	8.25	1
Lambs	14.50	14.75	1
Hogs, av. wt., Chicago	256	249	
Closing prices—			
Pork, September	$41.50	$41.50	$40.
Lard, September	27.05	23.85	26.
S. R. Sides, Sept.	19.40	18.57½	23.
Corn—			
September	$1.43¼	$1.47	$.
December	1.25⅞-1.26	1.22¼-½	
May	1.23¾	1.20⅜-¾	
Oats—			
September	$0.68¾	$0.66¼	$0.72⅜
December	.70⅞-71	.68½-⅝	
May	.73⅛-⅜	.70¾-⅞	

When men are philosophical, however, and not mind to be stampeded by newspaper alarms of profit and the permanency of official exposive ac ties, the feeding game looks good. Hay is more p tiful than ever before and is receding in price. feed manufacturers also are doing their part as as circumstances allow, and both the straight g feed and the by-products producers are lending t aid to a successful feeding campaign. An old and perienced Missouri feeder expressed the situation by saying that "the old ways of fattening cattle n be revised, and new feeds, and new methods mus put in use." His own marketings "were fed a ra of corn and molasses meal." The corn and meal w self-fed and as for putting on fat, "I never had ca do better."

EDITORIALETTES

THE shipper is again for the innumerableth t reminded that he should not neglect to no receivers of shipments made and give all tails. It helps the receiver to protect your inter on arrival.

WHEAT handlers remember of course that they entitled to interest on money invested in wheat insurance on wheat which must be held in the vator—7/20th of a cent per bushel per week. I up the terms in your contract with the Grain Co ration.

THE railway car service is again breaking d just as the fall run of grain begins. Cars p tically everywhere are hard to get. And wha more, under Government control, the service is ting steadily worse as box cars wear out and not replaced.

THE Railroad Administration is again urging coöperation of shippers to obtain prompt unloa and loading of cars to "carrying capacity." Ship are urged also not to order cars that cannot be immediately.

THREE DOLLARS a year in the United States and Mexico; $4.00 a year for Canada, $5.00 United Kingdom, the Continent of Europe, Australia, and other countries in the Universal Postal Union. Less than a year at the same rate. Single copy 10 cents.

LETTERS on subjects of interest to those engaged in the grain trade, news items, reports of crops, grain movement, new grain firms, new grain elevators, contemplated improvements and cars leaking grain in transit are solicited.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain elevator men is unquestioned. The character and number of advertisements in its columns tell its worth. If you would be classed with the leading firms catering to the grain trade, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

ADVERTISEMENTS of meritorious grain elevator machinery and supply houses and of responsible grain firms who seek to serve grain dealers are solicited.

CHICAGO, OCTOBER 1, 1919.

GRAIN TRADE REVIEW

Corn prices seem to have reached an excellent fighting level, judging from the action of the market the past week. Many months ago there was a large number of men in the trade who expected that corn would decline to $1.25 for the December delivery. The drastic break, due to the propaganda for a lowering of the cost of high living and the readjustment from an old to a new top basis, carried values somewhat lower, as the market had immense momentum; but taking it in all a good part of the trading the past week was around that level, with buyers taking hold rather freely whenever it dipped below that figure, while on the swells there was plenty of grain for sale. While the general economic conditions throughout the world are regarded as one too favorable for a higher price, at the same time the producer is not inclined to sell his new grain as yet and shows every indication of being willing to hold it with the chance of either getting what to him seems a more profitable figure or else taking a heavy loss. New England is speculating on the future price of corn and has been a good buyer for deferred shipment, paying a small premium for grain that will not reach them until next May to October, with considerable taken for December-January. This buying ahead in volume is a factor in the situation that sooner or later will have an effect on the price, as it will mean larger distribution whether the price advances or does not. The is this constant speculating that helps greatly to stabilize the market. Farmers (in spite of the published nonsense of some of their leaders) are apparently becoming more familiar with the use of grain futures as a price insurance proposition, and there has been a large amount of December sold against standing crops which will move later in the season. In many instances the producer will secure a price for his grain in this manner far above the prevailing level.

Labor unrest is increasing rather than decreasing, but seems to be mainly in the basic industries. While many people have spent a good part of their war savings, there are still many others who have a lot of money to use for the purchase of non-essentials and luxuries, and this tends to keep general business good. The shortage in many lines of commodities has not been made up as yet. This could scarcely be expected to take place within a year after the armistice and before the peace treaty is signed. Whether or not the sentimental effect of the signing of the latter will be very noticeable remains to be seen. Opinions differ considerably on that point. The steel strike is regarded as practically over. Union labor has lost its first big fight, and unless its leaders commence to take cognizance of the signs of the times they promise to lose others. The end of the craze seems at hand—the public is tired and refuses to be damned. Public sentiment is now strongly against strikes of all kinds, and strikes having no backing from the consumer side rarely succeed.

Frost has occurred in some sections of the corn belt, but the crop is practically all safe; no damage of consequence would be experienced even with a killing frost now. The continued dry and warm weather promises to cause the first run of new grain to commence unusually early, and judging from the reports coming in, the quality is going to be very high. A car of new Illinois grain was shipped the past week, one of the earliest on record. Last year the first car arrived at Chicago on Oct. 9. There is more or less new Texas grain coming forward, but many millions of bushels of it will be lost on account of the shortage of cars and the ravages of weevils. Argentine corn may be used by Eastern industries for several months yet, as there is plenty to be had at comparatively low figures. A factor in the situation that has attracted little attention so far is the shortage of sugar, which in turn will increase the demand for corn syrups.

The producer still continues to hold his oats for better prices. There has been no pressure of the cash grain for some time past, and were a general export demand to spring up prices might be radically affected, although in view of the heavy offerings of Argentine grain abroad this hardly seems probable. Previous to the war the export demand was not a factor in the market. The average weight of this year's crop is so light that it has more or less effect on the futures. The trade do not desire 26-lb. No. 3 whites, although they can be delivered on contracts for future delivery. This causes the cash interests to buy what grain they need in the sample market rather than taking the futures and getting a delivery.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points the past week follow:

	Sept. 27, 1919.	Sept. 20, 1919.	Sept. 28, 1918.
Wheat	15,203,000	15,534,000	17,026,000
Corn	2,519,000	3,537,000	5,330,000
Oats	4,638,000	4,894,000	5,975,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	22,360,000	28,331,000
Preceding week	23,965,000	32,803,000
Since July 1	274,638,000	351,292,000

Corn prices are going through the period of stabilization, and while the September acted in a most erratic manner, the undertone was much firmer than the previous week. Deferred deliveries closed 3⅛@3⅝c higher after a range of 7½@8⅝c. September had a range of 19c, and closed 3¼c lower, liquidation by longs being on toward the last, due to deliveries of grain on contracts. Sentiment is decidely mixed and the general belief is that an active trading market will be witnessed for some time with the bulk of the trade around $1.25 for the December, which seems to be the accepted figure from which to base operations. A more normal market is expected as soon as the September is out of the way.

Oats were unsettled, and while the market was draggy a good part of the week, buying of futures to exchange for cash grain sold for export absorbed the surplus in the pit and the close was about the top with net gains of 2½@2⅝c after a range of 2⅞@3⅛c. September at the last was 3¾c under a year ago. Bulk of the trading was of a local character with sentiment decidedly mixed. No pressure of cash grain on the market.

Cash wheat offerings were smaller in the winter wheat markets, but larger northwest; but the demand was active and all kinds averaged higher with winters at Chicago up about ½@1c with No. 1 hard as much as 3c over the basic, the best figure in some time. Heavyweight grain was wanted by millers, shippers and elevator interests. A good part of the arrivals at Chicago and Milwaukee were Government owned grain. Choice springs are very scarce, with $2.85 paid at Chicago for dark No. 1 northern and $2.95 at Minneapolis. Farmers are holding for higher prices in many sections. Range of prices the past week follows:

			Close		
Corn—	High.	Low.	Sep.27, 1919.	Sep.20, 1919.	Sep.28, 1918.
Sept.	$1.60	$1.41	$1.43¼	$1.47	$....
Dec.	1.30¾	1.22⅛	1.26	1.22⅝	....
May	1.27⅜	1.19⅞	1.23⅝	1.20½	....

Sept. 20, '19	77,677	1,750	20,928	14,365	5,311
Sept. 13, '19	19,125	1,360	21,023	14,351	5,541
Sept. 6, '19	63,309	1,332	20,569	13,207	6,342

Farmers in the Willamette Valley of Oregon are very much disappointed that the grain elevator at Portland is not yet completed, which compels them to handle their grain in sacks as formerly. As sacks are now worth about 19c and the Government is paying only 4½c per bu. premium for sacked grain, the net cost to the farmer for sacks is 10c each or about 5c per bushel of wheat.

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to Sept. 27, 1919, with comparisons with 1918:

	1918-19.	1917-18.
Chicago	49,847,000	48,426,000
Milwaukee	2,741,000	5,448,000
Minneapolis	31,810,000	33,748,000
Duluth	2,578,000	15,994,000
St. Louis	24,692,000	28,084,000
Toledo	4,861,000	3,195,000
Detroit	832,000	574,000
Kansas City	40,620,000	37,498,000
Peoria	1,738,000	2,742,000
Omaha	12,558,000	10,821,000
Indianapolis	5,575,000	5,504,000
Total	177,852,000	192,034,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	Sept. 27, 1919.	Sept. 20, 1919.	Sept. 28, 1918.
St. Louis	1,649,000	2,083,000	528,000
Kansas City	2,361,000	1,553,000	371,000
Omaha	135,000	1,085,000	324,000
Toledo	349,000	682,000	126,000
Detroit	92,000	91,000	50,000
Indianapolis	135,000	188,000	81,000
Peoria	97,000	147,000	29,000
Chicago	4,961,000	5,097,000	3,354,000
Milwaukee	366,000	548,000	989,000
Minneapolis	3,634,000	3,393,000	4,146,000
Duluth	683,000	667,000	7,028,000
Total	15,203,000	15,534,000	17,026,000
Shipments	9,697,000	9,657,000	6,378,000

World's Wheat Exports.

Exports of wheat last week compared with previous week and year ago specially reported for this paper by George Broomhall's service:

	Sept. 27, 1919.	Sept. 20, 1919.	Sept. 28, 1918.
American	7,526,000	10,285,000	5,783,000
Indian	.....	.....	180,000
Argentine	2,504,000	3,421,000	2,105,000
Australian	736,000	2,120,000	640,000
Others	76,000	114,000	64,000
Total	10,842,000	15,940,000	8,772,000

Exports of wheat since Aug. 1, 1919, commencement of European crop year, compared for three seasons:

	1919-20.	1918-19.	1917-18.
American	76,961,000	34,504,000	49,169,000
Indian	.....	2,065,000	4,791,000
Argentine	31,071,000	25,645,000	1,856,000
Australian	17,537,000	6,600,000	12,398,000
Others	585,000	492,000	463,000
Total	126,154,000	69,306,000	68,677,000
Season	.....	529,032,000	376,524,000

World's Corn Exports.

Exports of corn last week, compared with previous week and a year ago:

	Sept. 27, 1919.	Sept. 20, 1919.	Sept. 28, 1918.
American	70,000	137,000	366,000
Argentine	1,376,000	3,825,000	1,059,000
African	82,000	142,000	78,000
Total	1,528,000	4,104,000	1,503,000

Exports of corn since Nov. 1, 1918, compared with last year and year before:

	1918-19.	1917-18.	1916-17.
American	3,934,000	27,584,000	43,535,000
Argentine	73,226,000	18,319,000	57,295,000
African	5,811,000	3,030,000	.....
Others	.....	94,000	2,997,000
Total	82,971,000	49,027,000	103,827,000
Season	.....	52,393,000	106,985,000

World's Oats Exports.

Exports of oats last week, compared with previous week and a year ago:

	Sept. 27, 1919.	Sept. 20, 1919.	Sept. 28, 1918.
American	606,000	1,487,000	2,506,000
Argentine	454,000	467,000	1,638,000
Total	1,060,000	1,954,000	4,144,000

Exports of oats since Aug. 1, 1919, and comparison for three years:

	1919-20.	1918-19.	1917-18.
American	13,495,000	17,216,000	25,288,000
Argentine	2,827,000	8,135,000	1,547,000
Total	16,322,000	25,351,000	26,835,000
Season	.....	113,272,000	140,826,000

Oat Stocks and Consumption.

Statement of the movement of oats and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Aug. 1	13,185,000	4,048,000	539,000
P. receipts to Sept. 27	51,788,000	82,060,000	75,422,000

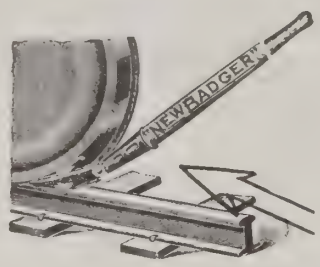
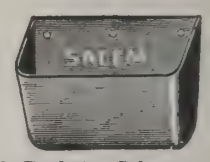
P. stocks on Sept. 27	16,302,000	21,170,000	8,873,000
P. consumpt'n to Sept. 27	16,155,000	16,260,000	17,335,000



Mr. ELEVATOR MANAGER

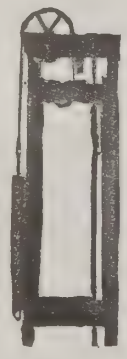
Dust Protectors

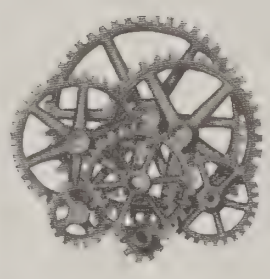
Pulleys—All Kinds



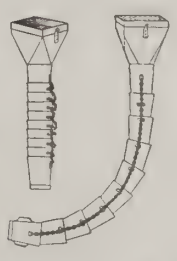
We are strictly a GRAIN ELEVATOR MACHINERY Supply House and carry a LARGE stock of ELEVATING and CONVEYING MACHINERY on hand at all times, to supply your wants without any delay.

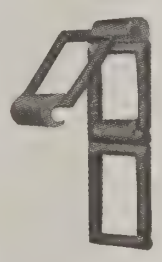
This is the kind of SERVICE you NEED. Send us your orders, large or small, and they will be shipped promptly. We illustrate a few of the articles we specialize in. Write us for prices on anything you need either for *Repairs* or *Complete* equipment for new elevators.



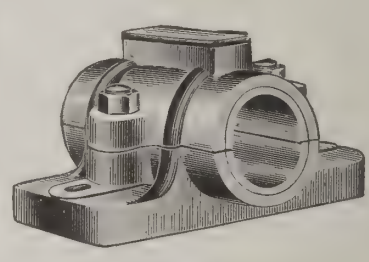


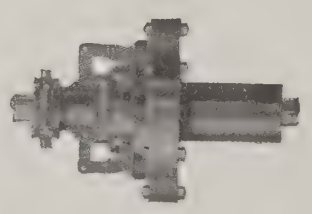
Distributing Spout

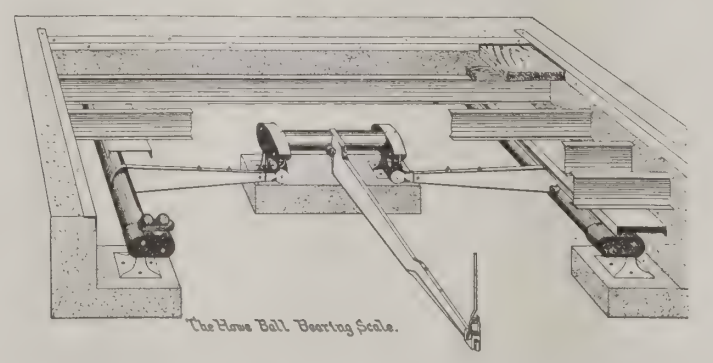




V Buckets—Salem and Empire







HOWE BALL-BEARING SCALES

Have met all the requirements and stood the test for 60 years. The only practical method in use today for absorbing the platform shocks and protecting the knife edges from wear.

WE OVERHAUL ALL MAKES OF SCALES

AMERICAN SUPPLY & MACHINERY CO.

1102-4 Farnam Street, Omaha, Nebraska

FROM WASHINGTON

ction Setting in Against Government ontrol of Business by License and Otherwise—More Protests vs. the K. K. K. Bills—A Farmers' Lobby

VASHINGTON, Sept. 27.—[Special Correspondence.]—The reaction from war-e regulation of business is apparent he attitude of members of Congress ard pending legislation. President son in his message to Congress on high cost of living nearly two ths ago made a number of recom-dations relative to permanent con- of business in one way and an-er. None of these has been enacted law and there is little likelihood measure will be passed which will e the President authority by license otherwise to exercise powers in the ner that became a common practice ing the war.

s an example of the tendency to e the burdens upon business as t as possible, the House committee agriculture completed its considera- during the past week of a cold-age bill. The President had recom-ded legislation along this line, in-ling a provision which would re-e the price at which goods left the ducer to be marked upon food in storage as well as other commodi-. The committee rejected this sug-ion with scant ceremony. An ef- was made to restrict the period of storage to ten months or even , but the committee increased the imum to twelve months, which was sfactory to the packers and others rested in the cold-storage business. nother example of the week of the rt to throw off war-time restrictions he earliest possible moment was the sage by the House of the Cummins restoring railroad rate control to Interstate Commerce Commission. effect of this is to prevent the Pres-it through the Railroad Administra- from fixing rates without being pelled to justify their reasonable-s before the Interstate Commerce mission if complaint is made.

he effect of the agitation against the ers was forcibly brought to the at-ion of the joint committees on agri-ure of the Senate and House by a gation of 42 Kansas live-stock pro-ers and bankers. Members of the gation, headed by former Governor obs, declared that an alarming sit-on existed in the great producing as and that as a result of the wide-ad agitation "scores of hundreds" breeders and feeders were selling r herds and going out of business. cribing a conference the delegation with representatives of the pack-interests in Chicago last Tuesday, ner Governor Stubbs said:

We had a perfectly free, frank and discussion with them. We asked n why they were not storing and ing. They made no attempt to con-their reasons. They said if they ed more than a week's supply they e accused of hoarding; if they ed heavily the stocks remained on r hands, for the shipping rates were igh they could not sell in Europe. y told us they were afraid to go d because of the uncertainty of litions. It was plain they were wor-g, too."

ne of the elements which has added he uncertainty of the packers, it stated, was the activities of offi- of the Department of Justice in li-ng food products.

he Kansas delegation held a confer-e with Attorney General Palmer, ng him to "clarify the situation so the packers can go ahead with r business." The Attorney Gener-views, Mr. Stubbs said, would be e known in a public statement tly.

aisin and peach growers of Califor- have joined with the National rd of Farm Organizations in per-ng plans for a campaign for the age of the Capper-Hersman bill permitting collective bargaining among the agriculturists of the nation. W. A. Sutherland of Fresno, Cal., attorney for the California Associated Raisin Co., comprising 90 per cent of the producers in that state, has been in Washington in the interest of this bill. Secretary Charles A. Lyman of the National Board of Farm Organizations is beginning to talk of a lobby which, he says, has been established in Washington to prevent the passage of the Capper-Hersman bill.

"The plan appears to be to try to convince the Judiciary Committee that the farmers are responsible for the high cost of living," said Mr. Lyman. "We have no specific information on this point, but from information reaching us some of the interests opposing the Capper-Hersman bill have been gathering data for some time which they will use when the real fight begins. The most effective way of increasing the present cost of living is to harass the farmer in his legitimate efforts. The persons who are preparing to oppose us in Washington do not appear to understand this."

In a revision of ocean rates from United States Pacific Coast ports to Hongkong, Shanghai, Kobé, Yokohoma and Manila the Shipping Board has made a 40 per cent reduction on wheat and a 33 per cent reduction on oats. The new rates are 60 cents per 100 pounds on wheat in sacks and $1 per 100 pounds on barley, oats, and rye in sacks. The rate on hay is 33 cents per cubic foot.

Some comments on the wheat scarity in Spain are made in a report received by the Bureau of Foreign and Domestic Commerce from Commercial Attaché Chester Lloyd Jones at Madrid. "The wheat scarcity in Spain continues," says Mr. Jones, "and there is a possibility of increasing the shipments of this cereal to the country in exchange for other foodstuffs which could be sent out of the country. The conservation policy of the kingdom has involved placing prohibitions and limitations on export of a great number of foodstuffs, including olive oil, lentils, garbanzos, and rice, and on fodder for domestic animals. A number of merchants have recently indicated that Spain would be glad to exchange goods of this sort for wheat, if the present regulations affecting export of that article from the United States to this country could be modified. It would, they say, be an easy matter to secure modification of the export prohibitions if something could be offered in return. It appears that it would be advantageous to the interests of the United States to allow wheat to come to Spain instead of sending it to northern Europe, on condition that an equivalent amount of Spanish foodstuffs were sent to northern Europe. The exchange herein proposed would not eliminate the necessity of shipments from the United Staes, but would probably exercise a valuable influence on American commerce with this country and at the same time assist in diversifying the character of the goods supplied to the peoples of northern Europe whom it is desired to relieve."

A cablegram from the American consul at Dairen, Manchuria, states that the crop prospects of Manchuria, exclusive of the Harbin district, are: Paddy rice, normal; wheat, millet, barley and kaoliang, 80 per cent of normal; beans, upland rice and maize, 70 per cent of normal.

The Sheep Situation.

From the Knollin Sheep Commission Co., Chicago, letter we sum up the situation as to sheep during the past week in a few words as follows: There has been a scarcity of fat lambs; feeders show even more advance than killers. especially light lambs; feeding sheep continue to be very scarce with good demand for them; the breeding ewe business picked up considerably; heavy sheep are almost unsalable and as low as they were when wool was bringing 9c a lb.

ENGLAND'S WHEAT SUPPLIES

Comparison of Wheat and Flour Stocks at Sept. 1 and a Year Ago—Seed Imports by Great Britain in August.

By JACK BROOKS.

LONDON, Sept. 11.—[From our own Correspondent.] — There are at the present time in Britain, according to official figures, 1,314,000 tons of wheat and flour. These supplies are distributed throughout port granaries and warehouses, mills, bakeries and shops. In 1914 in the same period of the year the amount was 2,684,000 tons.

There is a considerable difference in these figures, and there are some pessimists on this side who take a disconsolate view of winter prospects but there is no anticipation by those best informed of a serious shortage of grain during the next six months. The government department which is concerned with the purchase of wheat and its distribution for feeding the millions of this country takes the view that the world's grain supplies are sufficient for the world's needs but that the need of economy is as imperative as ever since there is no grain to waste.

So far as Britain is concerned the difficulty is chiefly one of shipping. An important factor in the grain supply before the war was Russia's contribution. Today these huge supplies are denied us. The carriage of the wheat supplies from the U. S. and Canada are practically assured and in the ships now northward-bound from Argentina nearly 50 per cent of the storage is devoted to wheat. From Britain's point of view it is such countries as Australia, with long sea voyages and consequently much higher freights, which provide food for speculation, if speculation be at all necessary. It is impossible to devote the entire storage of shipping voyaging from Australia to Europe with wheat supplies; there are other things almost as important. For instance, the Imperial government has bought the entire wool clip of Australia up to 1920, wool being a rather important item just now; and the wheat has to take its turn. Yet there are miles of it stacked up awaiting shipment.

When hostilities ceased in Europe this enormous supply of grain, concentrated in bags containing millions of bushels, was stacked up at points of embarkation in lines that extended miles in length. Much of it has been moved but much more still remains to be shifted, and it will take considerable shipping to do the trick. The Royal Commission on Wheat Supplies handles all this wheat as it arrives from North and South America and from the British possessions, and it is confident that the supplies will be sufficient to keep the 19-cent loaf going all winter. It anticipates increased available tonnage soon which will be used to relieve congestion in grain shipments, and with the settlement of the many strikes which have tended to increase congestion in shipping and congestion at docks, an improvement in grain shipments, it is believed, will soon be noted.

There is not much wheat on offer in the local markets, British farmers wanting more than the fixed government price and the millers being unwilling to give it. Barley at $25 per quarter was offered but little business was effected. American barley is selling at $18.50 per 400 pounds; maize meal at $110 to $125 per ton.

The clover and grass seeds imported into the United Kingdom during August amounted to 20,354 cwts. and were valued at $567,925. In August, 1918, these seed imports came to 14,294 cwts. with a value of $375,015. For the past eight months the import of seeds into this country totaled 153,325 cwts., representing a value of $4,717,530, and for the corresponding period of 1918, 140,508 cwts. valued at $3,661,545. These figures show a substantial increase in clover and grass seed imports over those of last year.

Apropos the above it is announced that the British Food Controller has raised the price of the quarter load effective Sept. 17, from 9d (18c) to 9½d (19c); 2 lb. loaf, 4¾d (9½c); 1 lb. loaf, 2½d (5c). This increase goes to the journeymen bakers as wages. The *London Times* states that the bread subsidy has already cost the taxpayers $500,000,000 and that the opinion is entertained in some quarters that with more efficient organization the subsidy could be reduced by a considerable amount. Rats, for instance, are said to consume home-grown wheat to the value of $75,000,000 in one year, and on this point Mr. Hyndman in *Justice* makes a severe characteristic attack on the government.—EDITOR.

FOREIGN TRADE IN AUGUST.

The official figures of the country's foreign trade in August are as follows:

	Aug., 1919.	July, 1919.	Aug., 1918.
Expts.	..$646,000,000	$570,083,475	$529,278,551
Impts.	.. 308,000,000	344,571,659	272,943,395
Exc. exp.	$338,000,000	$225,511,816	$256,335,156

The August foreign trade for the past six years and 1910 has compared as follows (000 omitted):

	Exports.	Imports.	Excess.
1919	.....$646,000	$308,000	Exp. $338,000
1918	 529,278	272,943	Exp. 256,335
1917	 488,655	267,854	Exp. 267,854
1916	 510,167	199,316	Exp. 310,850
1915	 261,975	141,729	Exp. 120,246
1914	 110,367	129,767	Imp. 19,400
1913	 187,909	137,651	Exp. 50,257
1910	 134,666	138,358	Imp. 3,691

For the different months of the past year the trade totals were as follows (last three figures omitted):

1919.	Exports.	Imports.	Excess.
Aug.	.....$646,000	$308,000	Exp. $338,000
July	 570,083	341,571	Exp. 225,511
June	 918,212	293,069	Exp. 625,112
May	 606,382	328,937	Exp. 277,445
April	 714,513	272,955	Exp. 441,558
March	... 604,912	267,588	Exp. 337,324
Feb.	 588,080	235,171	Exp. 352,909
Jan.	 622,674	212,992	Exp. 409,682
1918:			
Dec.	 565,886	210,886	Exp. 344,999
Nov.	 522,236	251,008	Exp. 271,228
Oct.	 501,860	246,764	Exp. 255,095

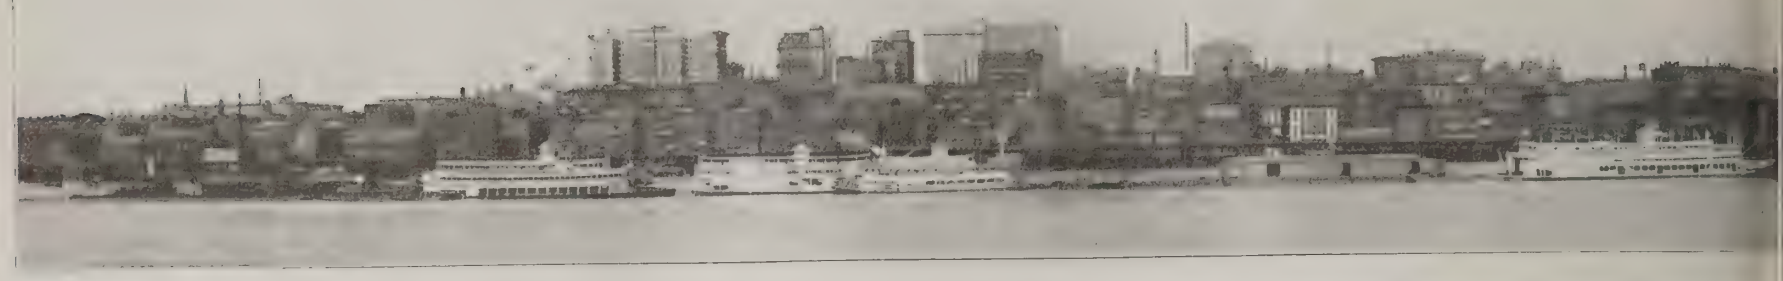
Pacific Northwest Wheat Grading.



Licensed inspectors report that of the first 1,000 cars of new wheat received at Seattle and Tacoma this year, 35.8 per cent graded No. 1 as compared to 19.9 per cent of last year's receipts (July 15, 1918, to February 1, 1919). Details:

	% No. 1	
	1919.	1918.
White club	..... 50.4	26.63
Hard red winter	..... 56.8	34.30
Common white	..... 11.6	8.50

An increase is also shown in the percentage of the new crop grading No. 2, 45.1 per cent falling into this grade as compared to 39.2 per cent for last year. A large increase is shown in common white wheats, while slight decreases are shown in wheats of the other classes. Combining the first two grades, the figures show 80.9 per cent graded No. 2 or better this year as compared with 59.2 per cent of last year's receipts.

A general increase is noted in the average test weight per bushel of the various classes, and a marked decrease in the percentage of the crop carrying dockage. Smut dockage increased in the common white and white club wheats, and decreased in the red wheats.

Welcome Awaits You in St.Louis

HISTORICALLY the beginning of Saint Louis as a grain market dates back almost three-quarters of a century, it being today amongst the oldest centers of its kind in the U. S. In reality the genesis of the organization, which is today the Merchants Exchange of Saint Louis, had its birth in the summer of 1836 when a number of prominent merchants of the city, believing that their mutual interests and the business conditions of the city could be benefited and improved, organized a society or debating club for the discussion of matters pertaining to their business and the dissemination of information relating to the trade of the city in general. About 25 of the leading business men of the city were members of the Association, which was designated as the Saint Louis Chamber of Commerce.

The parent organization steadily grew in popularity and numbers and from holding meetings once a month it was found necessary for more frequent gatherings and the meetings were changed to once a week. The Chamber of Commerce, as it was now known, continued to prosper for ten years or more. Business increased to such an extent that the members conceived the idea of holding meetings in the daytime instead of in the evening, that they might be made of a more practical character and the gathering utilized as a means of bringing buyers and sellers together and thereby facilitate trade.

In the early part of 1849 the milling interests of the city, one of the principal factors in the business of the community, got together and organized themselves into the Saint Louis Millers' Association; rooms were secured in which they placed tables—such as are now designated as sample tables on the Grain Exchanges throughout the country—pans were provided and persons having wheat, corn, flour, meal and the like for sale were invited to exhibit samples. The idea proved popular from the start and the "Millers' Exchange," as it was then called, was soon doing a good business. In the fall of 1849 the merchants of the city, finding that the Millers' Exchange was so successful, organized another exchange, rented quarters for meeting purposes, adopted rules and regulations for the government and conduct of business, and on January 2nd, 1850, held their first meeting. The daily hour of meeting was fixed at 11 to 12 o'clock, except on Sundays and holy days. This was the beginning of what is now known to the grain interests throughout the country as the Merchants' Exchange of Saint Louis.

The new organization prospered and grew in strength and it was not long until the necessity for more commodious quarters was quite apparent. A new building was erected for the Exchange on Main St., between Market and Walnut Sts., with a trading hall 80x101 ft. and a gallery for spectators. The new building was opened for business June 8, 1857. In its new quarters the Exchange prospered greatly until 1862 when the political strife, which rent the country, proved also the disruption of the Exchange. Arrangements were finally concluded whereby the organization was known as the Union Merchants' Exchange.

The building on Main Street was the home of the organization until December 21, 1875, when the Exchange moved to its present location and the modern history of the Merchants' Exchange began. The trading hall of the Exchange is one of the most commodious of its kind in the United States, having a floor area of 100x225 ft., unbroken by columns of any kind, the ceiling rising to 80 ft. from the floor, being supported entirely by steel trusses on the walls.

E. C. ANDREWS, PRESIDENT, ST. LOUIS MERCHANTS EXCHANGE.

In the early days of the Exchange everything came and went by river. For half a mile or so along the river front freight was piled high in rows as it was unloaded from the boats or delivered for shipment. Consignments of wheat, corn and the like for Saint Louis were stacked high and the commission merchants, on the arrival of the boats, would visit the levee in person or with an employe and secure their own samples.

GEOGRAPHICALLY.

Geographically the position of Saint Louis as a grain center is ideal, and, situated as it is, its place among the great grain markets of the world will ever be maintained, and as time goes on that position of prominence which it holds will be strengthened. Located in the heart of the great Mississippi Valley, at the delta of the Missouri Valley and in close proximity to the valley of the Ohio, each of which vast territory is fed by numerous streams tributary thereto, and in all of which the soil is rich in production of grain, with each decade bringing the center of production within a radius smaller and smaller in which Saint Louis is the hub, further augments the position of Saint Louis as a grain trade center.

Within the past four or five decades the center of production of grain has so moved to the West and Southwest that within less than a 400-mile radius, revolving on Saint Louis as its axis, is to be found the center of production in the United States of wheat, corn and oats. The former is but 250 miles away, the second about 25 miles and in the latter about 250 miles away.

Not alone is the center of the three great cereal crops almost at our door, but within 135 miles we have the center of farm area, while the center of the number of farms is located but 110 miles away, and the center of valuation of farms only about 100 miles distant.

More than a score of great trunk lines enter Saint Louis, practically all of which are grain carrying roads, either for the bringing of the millions upon millions of bushels of wheat, corn, oats, etc., to market from first hands, or for the transportation of the same to points of destination, after having been disposed of by commission and grain firms. Of these great railroad syste which are potent factors in the gr trade of our city, many penetrate dir to the great agricultural distric Saint Louis is the east and southw terminal for such great systems as Missouri Pacific; Chicago, Rock Isla & Pacific; Missouri, Kansas & Texa Chicago & Eastern Illinois, and Chicago, Burlington & Quincy. It an important terminal point for th portion of the Wabash and the Chica & Alton, whose rails lead to the no and west of Saint Louis in an ever creasing grain territory.

It is also an important termi point of the Illinois Central for bri ing in the grain from Illinois and Io and the distribution of grain from Sa Louis to the South and Southwest. is the Western terminal of the follo ing great railroad systems: The V dalia (Pennsylvania System); Cle land, Cincinnati, Chicago & Saint Lo (Vanderbilt System); Baltimore Ohio; Toledo, Saint Louis & Weste and the Chicago, Peoria & Saint Lou It is the North and Northwestern ter nal of the Southern; Louisville & Na ville; Mobile & Ohio; Saint Louis Ir Mountain & Southern (Missouri Paci System); Saint Louis & Southweste and the Saint Louis & San Francisco

From the foregoing it is readily d cerned the exceptional advantages joyed by Saint Louis as a grain cent its trunk lines reaching in every dir tion and making this the central poi which meets the lines from the Ea the West, the North and Northwest, t South and Southwest and Southea affording not only unexcelled adva tages for receiving grain from the p ducing sections, but likewise for t distribution of grain and its produc not only in that vast territory of t Southeast, South and Southwest, whe in many millions of people look to t Saint Louis market for supplies, b also for the handling of grain goi direct to the Gulf or Atlantic ports f export.

PRIMARY GRAIN MARKET.

Of the primary grain centers of t United States Saint Louis holds thi place, being surpassed only by Chica and Minneapolis in point of the qua tity of grain handled.

Each year the annual handling grain of all kinds through the Sai Louis gateway aggregates in round f ures upward of a hundred million bushels. Its receipts, under normal co ditions, come from Missouri, Illino Iowa, Kansas, Nebraska, Minnesota, t Dakotas and many other states, whi its shipments are destined for poin not alone throughout the South, Sout eastern and Southwestern states, but the Gulf and seaboard points for expo

In 1918 the total number of bushe of the five principal grains receiv amounted to 97,647,660 bus., of whi 37,731,818 bus. were wheat; 25,707,1 bus. corn; 32,884,465 bus. oats; 418,3 bus. rye, and 905,883 bus. barley. T aggregate shipments for the like perio was 65,693,600 bus., divided as follow wheat, 21,065,500 bus.; corn, 16,589,2 bus.; oats, 27,271,340 bus.; rye, 286,8 bus., and barley, 480,680 bus. Of t outgoing movement, 12,414,350 bus. wheat, 2,235,189 bus. of corn and

005,130 bus. of oats were exported to foreign countries.

A feature among the grain centers of the country, and to which Saint Louis, as a market, can lay claim, is that of a market for Soft Red Winter Wheat. For more than a half century it has held this distinction and controls the marketing of almost the entire production of this grade of wheat. Millers, and others, in all sections of the country, who want soft red winter wheat, look to Saint Louis for the major portion, if not all, of their supplies.

Allied with the grain trade of the city, and one which has long been a big factor, is that of the milling industry. Annually the production of flour by local mills, or by interests controlled by Saint Louis, aggregates up into the millions of barrels, thereby each year using for local consumption many millions of bushels of grain which come to this market. Saint Louis mills not only enjoy an excellent domestic business, but annually large quantities are exported to European and South American countries. The amount of flour manufactured by the local mills in 1918 amounted to 1,398,283 barrels, and by mills outside of Saint Louis, but owned by Saint Louisians, 1,954,930 bbls. There were received 2,965,320 bbls. of flour, with shipments aggregating 3,951,120 bbls. Of the flour shipments 508,485 bbls. were taken for export.

Another feature of the Saint Louis market that is worthy of attention is the production of mixed feeds for poultry and cattle. The industry the past decade or two has developed into wonderful proportions until there are now upward of a dozen plants, some of which are among the largest of their kind in the country.

Saint Louis ranks high among the great receiving and distributing centers of the country. Its position is ideal as a shipping point for not only the great South and Southwestern country, but likewise for the East. Its proximity to the great agricultural region, wherein are grown the great surplus crops of wheat, corn, oats and other cereals, makes it one of the foremost of the great grain receiving marts. As the great bulk of grain for shipping purposes is grown North, Northwest and West of Saint Louis and the greatest consumption is South, Southeast and East of Saint Louis, it can readily be seen that owing to the transportation facilities, both rail and water, the grain carrying lines from the West terminating at Saint Louis, the large systems to the South, Southeast and East starting at Saint Louis, this city is located in the line of least resistance for transportation purposes. Therefore, why should not Saint Louis be the growing grain market of the country?

PERSONNEL OF THE EXCHANGE.

The Merchants' Exchange of Saint Louis is governed by a Board of Directors consisting of thirteen members, a President, First and Second Vice-Presidents, and ten Directors. The officers and five directors are elected annually, the former for a one-year term and the latter for a term of two years, thereby five directors carrying over each year. It is one of the customs of the Exchange that the retiring President be elected to the Board of Directors. The officers and directors serving during 1919 are as follows: President, E. C. Andrews; 1st Vice-President, Chas. L. Niemeier; 2nd Vice-President, Frederick B. Chamberlain; Secretary, Eugene Smith. Directors—Roger P. Annann, Albert J. Rogers, Frederick Krey, Louis A. Valier, J. Frank Vincent, John O. Ballard, W. J. Edwards, A. C. Robinson, J. H. Watson and Mason H. Hawpe.

A number of standing committees, appointed by the President, co-operate with the officers and directors in the handling of the affairs of the Exchange. The Exchange maintains a Traffic and a Weighing Department, both of which are most essential and helpful to the members in the conduct of their business. The Traffic Department is under the direction of Charles Rippin, Commissioner, with Roger P. Annan, a member of the Board of Directors, as Chairman, while the Department of Supervision of Weights is under the management of John Dower, Supervisor, with J. Frank Vincent, also a member of the Board of Directors, as Chairman.

TRAFFIC DEPARTMENT.

The Merchants' Exchange of Saint Louis has maintained a Traffic Department for the use and benefit of its members during a period of about 20 years. This department is charged with the responsibility of watching the rate adjustments and transportation matters which might affect the interest of the Saint Louis grain market and milling center. It undertakes to keep that market in line with other markets in the matter of freight rates as well as other transportation practices. The department has about 3,000 tariffs on file which are kept up to date and all changes that are made in supplements or re-issues of tariffs are carefully examined, when received to determine how such changes may affect the market. These tariffs are used daily in quoting rates to members both for inbound and out-bound shipments. On in-bound shipments the rates charged on the freight bills are checked to see that no overcharge occurs in the transportation from the country to the market. The out-bound quotations are made to members to enable them to offer grain for sale at various points of consumption where they may be a demand. The department is frequently called upon for 100 quotations or more per day, in addition to which the members often file lists of points from and to which rates are wanted, involving several hundred rates at a time. If any rates appear to operate unj against the market, a thorough stu made of the situation involved an tion is inaugurated with the inter railroads or freight rate committe bring about correction. Somet there are differences of opinion bet the Exchange and the railroads the justice of its request in which the matter is handled with the l state Commerce Commission.

The Merchants' Exchange is a ber of the National Industrial T League, an organization which co of the principal shipping organiza and firms in the country, having a of about 700 members. This l handles all matters of general int to the shipping public for the bene its membership and undertakes to tect the shippers' interest in the m of legislation and other policies a ing transportation matters in a nat way.

The Merchants' Exchange was in mental in getting boat service lished on the Mississippi from Louis to New Orleans and interme points, having co-operated from th ginning with the New Orleans Boa Trade and other interested parti bring about restoration of river se The service when fully establishe it is expected to be in the near fu will create another outlet for from Saint Louis which will be ch than the rail outlets at present able and will stimulate the demand movement considerably through Saint Louis and New Orleans gate

In the days of the old barge li the Mississippi River there was as as 16,000,000 bus. of export grain to New Orleans via the Missi River in a year.

The fleet that is being built b Government will be ready for p operation this fall and will cons seven tow-boats and forty barges, barge of a carrying capacity of tons or about 66,000 bus. wheat. expected to carry about 18,000 b grain per annum from Saint Lo New Orleans by means of these b This does not include flour, fe other grain products nor general chandise, all of which will suppl the grain cargo. The method of lo grain is to put the barges alongs the river houses of the elevato Saint Louis and pour the grain into by means of spouts in the same m as is done at the seaports in lo bulk grain upon ocean steamer shipment abroad.

With the existing railroad fac plus this river facility the shippi pacity of the Saint Louis marke be considerably increased. An es advantage of the boat line in ad to lower rates than by rail, is th

time of car shortage, cars made empty at Saint Louis may be promptly returned to the country points for reloading with grain, whereas, heretofore, inbound cars were largely used to ship the grain out of Saint Louis, which resulted in the cars getting far away from their home lines and leaving the country bare of equipment when it was needed most.

AWAKENING OF MISSISSIPPI VALLEY.

Mississippi River Has an Outlet for Grain from Saint Louis.

BY CHAS. RIPPIN, TRAFFIC COMMISSIONER.

For thirty years, beginning in 1873 and ending in 1903, there was boat transportation on the Mississippi River for bulk grain from Saint Louis to New Orleans and the elevators located on the river did a thriving business, but gradually this business disappeared from the river and went to the railroads owing to the railroads making lower rates on the business that was water competitive in order to secure it instead of letting the boat have it, thus the boats died of inanition. Then there was a long period of sleep in the Mississippi Valley, so far as river transportation was concerned, but when the acute car shortage manifested itself after the opening of the European war, because of the great commerce that wanted to be moved between points in the United States and to points abroad, it dawned on the people of the Mississippi Valley that if they had their boat transportation restored on the Mississippi River they could help themselves without depending upon the railroad for cars or other facilities so far as the haul between points reached by the Mississippi River was concerned. Thereupon they had many conferences with their congressmen and senators and finally had a grand gathering of the Mississippi Valley Boosters in Washington du the summer of 1918 in which n senators and congressmen particip There were no dissenting views were quite clear as to what was wa and needed and that was restoratio the transportation facilities on great river. The people from the ley, realizing that they could not all of the facilities at one lick that

PIT SCENE, ST. LOUIS MERCHANTS EXCHANGE.

Several houses now located on the river are in position to make deliveries direct to the boats. This boat line, being furnished by the United States Government, will not be put out of business by the railroads as other boat lines have been in the past. It is a permanent additional asset for the whole Mississippi Valley.

result of this combined action and particularly the championship of their cause by their representatives and senators, led by Senator Reed of Missouri, who made a brilliant presentation of the whole situation before the two interstate commerce commissioners delegated by Director General of Railroads McAdoo to hear the testimony and make recommendations, was a recommendation from the two commissioners to Mr. McAdoo that there was a public necessity for such service being put upon the river; accordingly they recommended and he authorized the building of a boat line for transportation on the Mississippi River adequate to take care of the business that was in the Valley seeking that service.

A fleet to cost about $8,000,000.00 was thereupon put in course of construction. It will consist of seven towboats and 40 barges, the latter of two thousand tons carrying capacity each and be able to carry about 800,000 tons southbound and 400,000 tons northbound per annum at rates substantially lower than all rail rates between the same points. The first barge is now ready for service and others will follow at intervals of a few weeks. The entire fleet will be ready for operation in the spring of 1920 but a part will be operated this fall. Half of the southbound tonnage is expected to be grain and grain products, the other half will be merchandise and manufactured goods. As this line will carry at a cheaper rate than the railroads it will attract additional grain to Saint Louis for transportation from Saint Louis to Memphis, Vicksburg, Baton Rouge and New Orleans; particularly export grain to the latter point. There are elevator facilities now existing at Saint Louis and additional facilities to be constructed to take care of the grain tonnage that the boat line will handle.

The bulk grain is poured direct from the elevators through the river houses to the barges moored in the river at Saint Louis and upon arrival at New Orleans it is drawn out of the barges by means of spouts that lead from the barges to the elevators located on the water front at New Orleans. There it is held awaiting arrival of the ocean vessels going to foreign countries. This method of handling grain involves little manual labor and therefore the transportation charges are low compared with other class of freight that requires manual handling on which heavy terminal charges are necessarily incurred. While waiting for the permanent fleet to be constructed the Government has rigged up a temporary fleet consisting of old equipment that was available on the river and has carried grain, flour and general merchandise southbound to the full capacity of the temporary fleet, besides carrying northbound goods such as sugar, coffee and oil. The business developed so rapidly that the temporary fleet was unable to handle all that was offered. It is expected in a reasonable time after the permanent fleet has been in operation that the traffic will show a substantial profit, thus enabling the investment to be returned to the Government.

BURLINGTON TERMINAL ELEVATOR, OWNED AND OPERATED BY THE MARSHALL HALL GRAIN CO.

MARSHALL HALL, EXECUTIVE COMMITTEE CHAIRMAN FOR THE CONVENTION.

In the past it has been difficult, if not impossible, for the boat lines to compete with the railroads owing to the fact that the roads were allowed to reduce the rates in the water competitive business to a point where the boats could not profitably handle, while maintaining much higher rates to points on the roads not competitive with the river. This caused much dissatisfaction at the interior railroad points where much higher charges were made. The Government has announced that it will protect the boat line against that form of competition in the future and enable the river to take the traffic that can be handled most economically that way.

This opens a new era in transportation through the Mississippi Valley which is being watched with much interest by all the communities along and adjacent to the river. The river has been given a new chance to live and demonstrate its value as a transportation agency.

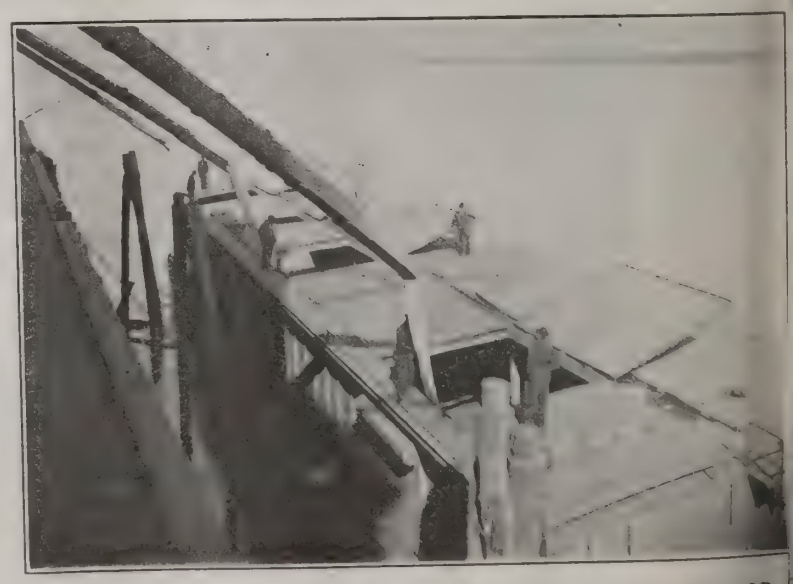
Finance Committee—Roger P. Ann Chairman; Fred W. Seele, J. H. W son, Julius J. Albrecht and Logan Baxter.

Subcommittees in addition to above will be arranged for the comf of all delegates and their ladies.



PREDICTS LARGEST MEETI

President Goodrich Outlines Importance St. Louis Convention—Many Problem Confront Trade—All Dealers Welcome

The St. Louis convention will be twenty-fourth annual meeting of Grain Dealers National Association. are looking forward to the largest tendance we have ever had and we lieve we will have as interesting m ing as we have ever had.

Events have moved rapidly since met in Milwaukee. Then we were war and now we are supposedly peace. But the problems of peace just as vexed as were the problems war. The settlements of these probl may be much more far reaching t the whipping of the Germans, wh richly deserved just what they got. have little patience with those, wh this time seem to believe, that we h enforced a peace treaty that is ou keeping with their just deserts. think they are wrong and radic wrong in taking this position. We American citizens, should stand for ideals of our fathers. And while welcome to our shores everyone, wh seeking a better country and better portunity than they had in their country, yet when they pass thr the gates of our ports, they sh cease to be foreigners but become A icans. Of course, not losing the lov their native land but their loy should be to America and Amer institutions. Any other kind of a eigner should not be admitted to shores.

Things of this character and m others will be discussed at the St. L meeting. We have men on progr national and international reput Men, who have made good in th spective callings and they will messages to deliver that we should We think the program as attract

any of our previous splendid conventions.

The problems that confront the grain trade will be discussed by people able to discuss them and ample time will be given to let our members take part in the discussions and express their views.

Let us get together and talk these things over and all go home with a better understanding of the problems and perplexities of our business and a broader view of national affairs and with a higher love for our country and a determination to see that its institutions are preserved and its laws upheld so that it will remain a nation of the people, for the people and by the people and not be administered for one class or one section.

P. E. GOODRICH, *President.*

ST. LOUIS THE MECCA

Secretary Quinn Predicts at Least 1,500 at Convention—Tells Reasons Why—To Be Greatest Gathering of Grain Men.

The twenty-third annual convention of the Grain Dealers National Association, to be held at St. Louis, Mo., on October 13, 14 and 15, will, without the slightest doubt, be the greatest gathering of grain men ever held in this country.

This may sound like the usual, stereotyped, platitudinous statement of a press agent whose business it is to try and convince the public that the event about which he is writing is sure to be the "greatest ever."

But when it is said that the coming meeting in the Mound City will be a great gathering only the plain fact is told. Indeed the truth of the statement seems obvious and requires no explanation or "bolstering up."

Ask any grain dealer why there should be a big convention and he will tell you, though he be one of the members of the Association who pays more attention to the routine of his business than to politics or to world movements.

We are living in a time such as the world has never before witnessed. One does not need to be a pessimist to understand that the industrial society of the nation is in a state of flux; that the much heralded "Reconstruction Period" is upon us in full force; that the destruction of old empires in Europe has changed the thoughts and minds of men; that the present commercial system is being attacked with great fierceness by powerful enemies.

We are living in a transition period, and transition is always uncertain. No one knows how far the movement will go or what it will destroy before it is checked. Labor is organized and so is capital, and it looks like a fight to

Following is a copy of the tentative program for the Twenty-third Annual Convention of the Grain Dealers' National Association, which is to be held at the Planters' Hotel, St. Louis, Missouri, on Monday, Tuesday and Wednesday, October 13, 14 and 15, 1919:

MONDAY, OCTOBER 13.

Morning Session, 9:30 O'Clock.

Call to order by the President.
Invocation—Rev. Dr. Wm. C. Bitting, St. Louis, Missouri.
Address of Welcome on Behalf of the City of St. Louis—Hon. Henry W. Kiel, Mayor of St. Louis.
Address of Welcome on Behalf of the Merchants' Exchange of St. Louis—E. C. Andrews, President.
Address of Welcome on Behalf of the State of Missouri—Hon. Frederick D. Gardner, Governor.
Response on Behalf of the Grain Trade—C. C. Isely, Dodge City, Kansas.
President's Annual Address—P. E. Goodrich, Winchester, Indiana.
Secretary's Annual Report—Charles Quinn, Toledo, Ohio.
Appointment of Committees.

MONDAY, OCTOBER 13.

Afternoon Session, 1:30 O'Clock.

Address—Hon. Max Thelen, Director of Public Service, United States Railroad Administration, Washington, District of Columbia.
NOTE.—This address will be followed by a general discussion of the various regulations and orders promulgated by the Railroad Administration. Mr. Thelen will endeavor to answer any questions asked by the delegates.
Transportation—Henry L. Goemann, Chairman, Mansfield, Ohio.
Report of Meetings of the Advisory Committee of the Grain Trade with Julius H. Barnes, United States Wheat Director—Geo. A. Wells, Des Moines, Iowa.
Telephone and Telegraph Service—M. L. Jenks, Chairman, Duluth, Minnesota.

TUESDAY, OCTOBER 14.

Morning Session, 9:30 O'Clock.

Address—"The High Cost of Living"—Thos. E. Wilson, of Wilson & Company, Packers, Chicago, Illinois.
Legislation—A. E. Reynolds, Chairman, Crawfordsville, Indiana.
Membership—Allen Early, Chairman, Amarillo, Texas.
(Following the reading of this report President Goodrich will present the prizes to the four Boosters who were at the head of the Roll of Honor list when the regular Booster Campaign closed on April 7.)
Advisory Committee of the Grain Dealers' National Association—Geo. A. Wells, Chairman, Des Moines, Iowa.
Uniform Grades—R. L. Callahan, Chairman, Louisville, Kentucky.

TUESDAY, OCTOBER 14.

Afternoon Session, 1:30 O'Clock.

Address—"The Government and the Grain Industry"—J. W. Shorthill, Secretary National Council of Farmers' Co-Operative Associations, Omaha, Nebraska.
Merchant Marine—Charles England, Chairman, Baltimore, Maryland.
Address—"Improved Methods in Grain Production"—Charles F. Curtiss, Dean of the Division of Agriculture of the Iowa State College, Director of the Iowa Agricultural Experiment Station, and President of the International Live Stock Exposition, Ames, Iowa.
Trade Rules—F. E. Watkins, Chairman, Cleveland, Ohio.

TUESDAY NIGHT, OCTOBER 14.

Banquet—Addresses to be delivered by Hon. David R. Francis, American Ambassador to Russia, and Hon. Jas. P. Goodrich, Governor of Indiana. Toastmaster, John L. Messmore, St. Louis.

WEDNESDAY, OCTOBER 15.

Morning Session, 9:30 O'Clock.

Address—"Handling of the 1919 Wheat Crop"—Hon. Julius H. Barnes, United States Wheat Director.
NOTE.—A general discussion will follow this address. Any questions relative to the wheat regulations will be answered by Mr. Barnes.
Arbitration Appeals Committee—Elmer Hutchinson, Chairman, Arlington, Indiana.
Arbitration Committee No. 1—C. D. Sturtevant, Chairman, Omaha, Nebraska.
Arbitration Committee No. 2—R. A. Schuster, Chairman, Chicago, Illinois.
Arbitration Committee No. 3—S. L. Rice, Chairman, Metamora, Ohio.
Address—"Relief or Prevention—Which?"—C. A. McCotter, Secretary Grain Dealers' National Mutual Fire Insurance Company, Indianapolis, Indiana.

WEDNESDAY, OCTOBER 15.

Afternoon Session, 1:30 O'Clock.

Natural Shrinkage—Henry L. Goemann, Chairman, Mansfield, Ohio.
Demurrage—Wm. D. Adie, Chairman, Portland, Maine.
Crop Reports—W. A. Cutler, Chairman, Adrian, Michigan.
Hay and Grain Joint Committee—Samuel Walton, Chairman, Pittsburgh, Pennsylvania.
Unfinished Business.
Election and Installation of Officers.
New Business.
Adjournment.

ENTERTAINMENT.

Monday, October 13—Orpheum Theater, at 8 P. M., for ladies and gentlemen.
Tuesday, October 14—At 11 A. M., automobile ride through the city for the visiting ladies, with luncheon at the Bellerive County Club at 1 P. M.
Tuesday Night, October 14.—Dinner at the Missouri Athletic Association at 7 P. M., for ladies and gentlemen.

CHARLES QUINN,
Secretary.

the finish. This can mean nothin industrial revolution which is more bloody and more destructive political revolution. Perhaps th mer may develop into the latter. knows?

Europe is seething and we a ceiving the back wash of the ment. The world grows smaller year.

member. Accompanying this communication was a return postal card. The member was asked to sign and return this card if he expected to attend the convention. The number of such postal cards is just twice that of last year. Remember, there were approximately one thousand registered at Milwaukee. Figure it out for yourself.

CHARLES QUINN,
Sec'y G. D. N. Ass'n.

FARMERS NOW PROPOSE TO JOIN THE ARMY OF STRIKERS ON ADVICE OF THEIR NEW LEADERS.

David O. Thompson, secretary of the Illinois Agricultural Ass'n, says the *Wall Street Journal*, explains the telegram his organization sent a few days ago to the Indiana Federation of Farmers' Associations in convention at Indianapolis, asking coöperation in holding back live stock and grain until "a sane market has established itself," as follows:

"It means that the farmer has about enough of being the goat for Board of Trade manipulators. It has always been the custom of the farmer to sell his products on a falling market, not on a rising market. The markets are manipulated on rumors. The public pays. The speculator, who has nothing to do with production of the stuff he is speculating in, profits at the expense of the farmer and consumer."

[All of which is the best of evidence that Mr. Thompson is densely ignorant of the nature of Board of Trade transactions; knows nothing of what the business of the Board means or of its effects on market prices and prices paid to the farmer. He is not a competent adviser, therefore, of the farmer because he cannot be informed of the conditions under which farmers' grain must be priced and sold. He is the same type of thinker as Senator Capper of Kansas, who, speaking of the charges against the packers, agreed there was no proof of those charges, but he was ready to believe they were true. Yet a Senator ought to be wise enough to know that nothing is more dangerous in a public man than to accept belief as a proof of reality. As an adviser of a large body of men who are ready to accept his direction to buy and sell, Mr. Thompson should be similarly warned that he is in the same position of responsibility.—ED.]

"If the farmer could sell on a steady market, be assured of a steady price and know when he plants a crop, or plans the breeding of a certain number of live stock, that he could go ahead with the certainty of at least breaking even on the game, he would increase production; there would be plenty of food for everybody, and the price of living to the consumer would go down instead of up."

[The Almighty might have indowed man with the quality of prescience, but He elected to reserve that power to Himself. What He did do as a compensation to mortal man was to give to some men wisdom and understanding and to others the art of playing the fiddle. But the fiddlers seldom are content with their art or their position and so come frequently into the place of other men who as Disraeli once said are "distracted by good intentions and difficult circumstances."]

"There is to be a meeting in Chicago Nov. 12 and 13 of delegates of all state agricultural associations in the country. A national organization is to be perfected. It will be an organization of business men—farmers or businesslike farmers—to bring about this reform. [What reform? The negligence of the Almighty just referred to?]

"If it does not succeed in getting legislation it wants it can succeed in its purpose with an alternative; that is, refusing to sell grains and live stock, holding it on the farm until the grower is assured of a steady price—a fair return. That will bring the speculators

CITY HALL, ST. LOUIS, FROM WHICH BUILDING THE MUNICIPAL AFFAIRS OF THE CITY ARE DIRECTED.

to terms, for they have to deliver every month on their speculations.

"'Is the Illinois association, or will the national association be allied with the Nonpartisan League of North Dakota?" he was asked.

"'Absolutely not,' replied Mr. Thompson. 'My office was open just two days when Nonpartisan League representatives were in to see me. They have been unsuccessful and they will continue to be so. We have no sympathy with them, for this is not a socialistic organization, but an association of business men.' [For which "let the people praise."]

"We have just as big a gun out for the packers as we have for radicals in any line. Here in the last month hogs dropped $5. There was a slight reflection in retail prices. The farmer found that he had lost money on his hog production because the market was forced down by manipulation. Spring pigs are now coming in, also there are a lot of brood sows coming to market. That means that every farmer selling brood sows is going out of the pig business.

"The average city man thinks the farmer is rolling in wealth. He is not. I helped about 100 of them make out their income tax returns this year and I find that the average return on investments running from $25,000 to $100,000 is around 4 per cent—one year's turnover—and if the farmer's and his family's labor be included his return is less than 3 per cent. Compare this with the carpenter, who is asking for $1 an hour in Chicago—a man with a $150 investment in tools, who works eight hours a day and has no responsibility. Where does the farmer get off?"

FOREIGN CROP REPORTS.

Special data compiled by the Bureau of Crop Estimates on the European crop situation may be briefly summarized as follows:

Ireland—Winter wheat promises a good crop in quantity and quality; spring wheat will be up to an average; oats are less promising although an average crop may be obtained; barley and rye promise an average; early potatoes small and light yield with quality good, late varieties promise fair to good.

Scotland. — General deficiency in wheat is about 7 per cent below average; deficiency in barley is about the same; deficiency in oats is fully 10 per cent, the acreage being 11 per cent short as compared with a year ago. Only a few districts promise an average production of potatoes with deficiency ranging from 5 to 20 per cent, the total area being 14,000 acres or 8.3 per cent compared with 1918.

Switzerland.—Grain crops generally are in good condition; condition of winter wheat being 96; spring wheat, 84; winter rye, 98; spring rye, 87; winter barley, 99; spring barley, 92; corn, 90; oats, 88; potatoes, 95. All pastures are above the average. The number of animals slaughtered for meat in 1918 was considerably higher than for 1916, the increased slaughterings being due to the high price of meat and the shortage of fodder.

Roumania.—In general the wheat harvest is good and the yield may be estimated at 18 bus. per acre giving a total of over 53,000,000 bus. from which about 18,000,000 bus. will be available for export not including an available surplus in Bessarabia where the harvest was very good. Broomhall, Sept. 29, cabled: "The general result of threshing this year is excellent. Exportable surplus of wheat 10,400,000 bu.; barley, 6,400,000; rye, 6,400,000. Rains have fallen recently and this moisture with warm weather has been most beneficial to the corn crop. The new incorporated districts of Transylvania Bukovina have excellent harvest results."

Japan.—The general government estimates on the basis of June 1 survey that the production of barley in 1919 will be 27,698,000 bus., an increase of 1,375,000 bus. over 1918.

Spain.—Most crops are below an average. The wheat yield is distinctly below normal. Corn, beans and potatoes will be an average, but garbanzos are far below. Commercial Attaché Jones, Madrid, Aug. 27, wrote that the wheat scarcity continues, and there is a possibility of increasing the shipments of this cereal to the country in exchange for other foodstuffs which could be sent out of the country. The conservation policy of the Kingdom has involved prohibitions and limitations on export of a great number of foodstuffs, including olive oil, lentils, garbanzos, and rice, and on fodder for domestic animals. A number of merchants have recently indicated that Spain would be glad to exchange goods of this sort for wheat, if the present regulations affecting export of that article from the United States to Spain could be modified.

OCTOBER CROP REPORTS.

A report showing the condition of the cotton crop on Sept. 25 was issued by the Bureau of Crop Estimates on Thursday, Oct. 2, at 11 a. m. (Eastern time), when the Census Bureau's report of cotton ginned will also appear. An act of Congress requires that the condition reports of the cotton crop shall be issued on the same day in October each year as the first ginners' report in October of actual cotton ginned. This will be the last regular cotton condition report of the season. The estimate of total production will be made in December.

On Wednesday, Oct. 8, at 2:15 p. m. (Eastern time), there will be issued a crop summary, as follows: Condition, either on October 1, or at time of harvest, and forecast of corn, buckwhea potatoes, sweet potatoes, flaxseed, ric etc.; yield per acre, total productio (preliminary estimate), and quality spring wheat, oats, and barley.

A supplemental report will be issue giving a general review of the crop s uation as of October 1, which will clude the following crops: Conditio either on October 1 or at time of ha vest, of clover seed, pasture, grain, s ghum, fruits, etc., sorghum, peanut production compared with a full cr (by percentages) of alfalfa seed, mill (hay and seed), vegetables, field bea field peas, broom corn, average yie per acre of alfalfa seed, broom corn, e

UNITED GRAIN GROWERS.

At a recent hearing at Ottawa, Ca ada, C. Rice Jones, general manager the United Grain Growers Co., of We ern Canada said the company ow grain elevators, timber limits, saw mil flour mills and coal mines, and distr utes flour and feed, coal, binder twin barbed wire, wire fencing, lumber, ced and willow posts, apples, salt, hay a building supplies, does a business hail insurance and appraising and se ing farms to settlers while the Unit Grain Growers' Export Company, a s sidiary with headquarters in New Yo does a large export trade. The co pany, in short, attends in a large w and on a cooperative basis to every ki of business which affects the farm. numbers 35,000 farmers as its me bers.

Mr. Jones said that for the y ending August 31, 1918, the total tu over in all this business was $6,087, and the total profits were $855,282 gross of 62.2 per cent, or 36.8 per c on the capital and reserve. The c handled in the terminal elevators the company was 49,000,000 bush The profits from 1912 to 1918 were follows: 1912, $121,614; 1913, $164,3 1914, $151,080; 915, $226,963; 1916, $5 804, and 1917, $607,899.

The United Grain Growers is amalgamation of the United Farmers Alberta and the Manitoba Grain Gr ers. It is the largest farmers coop tive organization in the world.

Delegates to Washington Conferen

The following have been delegate attend the industrial conference Washington, Oct. 6, to represent f organizations: P. S. Barrett, U City, Ga., president of the Farmers Operative Union; J. M. Tittem Omro, Wis., head of the American ciety of Equity, and T. C. Ake Washington, head of the Nati Grange.

The International Farm Congress requested representation by five m bers, and W. I. Drummond, a dire of the Congress states that "in event we will send our five men t with instructions to be seated and tain recognition, if possible."

Crop Conditions in Iowa.

The *Weather-Crop Bulletin* of I for the week ending Sept. 23 says "Copious rains on several days reli the long drouth in the central and s portions of the state. The average cipitation this week was the heavie the season. Over a belt extending f southwest to northeast across the s it amounted to from four to n than six inches. In the extreme n west the amounts were small. The came gently and steadily and so the soil to an unusual depth. little ran off into the streams.

Fall plowing and winter wheat s ing which have awaited the rains being rushed. Though late, cons able winter wheat and rye will ye seeded. The acreage will be much than last year.

The earlier planted corn, compri 75 per cent of the crop, is now from frost. Many fields had dried fore the rain came, till they had appearance of being killed by f Much seed corn of excellent quality saved this week.

DOLLAR STABILITY

$1.00 $1.25 $1.50 $1.75

CORN

The Wagner July 1, 1919, December Corn Review stated: "In the circular of January 26 we reviewed the chance of 1919 corn at 75c to $1.25, or at $1.50 to $1.75. We could not glimpse corn above $1.75 for the reason of its comparative price position, 1915-18 cash corn history, labor unrest and the impossibility of curing the necessity of 'dollar stability' by long, insolent price advances.

"Entering June and July, 1919—world labor and financial news seems far more definite as an indication that corn above $1.75 and hogs above 21c threaten dollar stability." Future Wagner circulars and letters will discuss the economic news that controls world food values. Leave your order for The Wagner Letter with our W. B. Christian, at St. Louis.

REPEAL THE ZONE LAW.

The grain trade has surely found out from experience the disadvantages of having those not familiar with the grain business and its workings demanding reports, information, etc., and the putting up with restrictions in the doing of legitimate business. However, the publishers of grain trade papers, as well as other magazines and periodicals, have been subjected to many vicious attacks and bad laws, tending to localize and limit the publication and curtail the dissemination of valuable business information to all the trade all over the country at equal rates. We refer to the vicious zone postal law and it gives us pleasure to know that there are some of our congressmen who recognize the drastic effects of this law and are willing to fight for it. We refer to Congressman Frank W. Mondell of Montana. The following is his view on the subject:

I am opposed to the zone system for the dissemination of news, ideas and information because I am of the opinion that the establishment and maintenance of such a policy would, in the long run, have a most unfortunate, harmful and regrettable effect upon the American people.

If we are to maintain peace, order and justice under the institutions of free Government, within our borders, we must have a homogeneous people guided by the same principles and inspired by the same ideals. This condition essential to the maintenance of free government can only be secured by the widest possible circulation of those instruments and instrumentalities which inform, mould and affect public opinion.

Any policy which tends to make us provincial or parochial as a people; which tends to build up zones of influence and information, is a policy not only harmful but one that long continued and widely extended would prove fatal to free institutions. On the other hand, a policy which makes equally available to the people in all parts of the country the journals and magazines which convey information, carry current argument, analysis and entertainment, tends to maintain those conditions essential to our institutions.

Those whose views or arguments for the zone system are based primarily or largely on its effect, or alleged effect, on postal revenues, or the profits of the publishing business, fail utterly to grasp or realize the larger and infinitely more important aspects of postal systems as they affect the national life. If it be a fact that the flat postal rate on newspapers and magazines has been unduly low, that is a matter for consideration by the Post Office Committee, having in view the traditional policy of the American people. The fact that some people have been able to make a considerable amount of money in the newspaper and magazine business is, of course, one of the matters that a committee would consider in this connection, but it is by no means conclusive that a policy is wrong because some people have been able to make money under it—many having the same opportunities and privileges failed utterly.

The demand for the establishment and maintenance of a zone system is particularly lame and illogical when it is made by those who are urging a flat rate of one cent on letters. Such people to be logical should insist upon a zone rate for letters as well as papers and periodicals. Neither is the argument for a zone system strengthened by exaggerated statements of losses to the postal revenues under a flat rate. Undoubtedly the former flat rate did not wholly reimburse the postal revenues but the most superficial examination of the matter renders ridiculous exaggerated statements of alleged losses. To the argument that publications enjoying the second-class rates are devoted more or less to advertisement, I offer the suggestion that a national dissemination of attractive advertisements is not without its educational benefits.

I have neither urged nor considered this as a party question. It involves a national principle affecting every man, woman and child in the Republic, and has never been considered in a partisan way by anyone so far as I know. I urged this repeal before the previous Democratic Congress, as I shall before the present Republican Congress—not on party or partisan grounds, but on the broad platform that such a policy tends to circumscribe and provincialize our national life to our great haven as a people.

Miss Clover Begins to Move.

Her fall moving season has about begun. October usually stages the chief clover "movie." This is especially true of years of large crops, like 1916, 1914 and 1913. This year's crop is small, especially in the Central States. The movement so far has been very light. As season progresses, reports of small yields in this section are confirmed. Wisconsin is a shining exception. New clover crop has its wo cut out. It will have to cover a lot territory; no old crop to help it o it's "on its own," as the English say. seems hard to believe that prices c show any permanently easier tende until some stocks are accumulated, a it's equally hard to see how they c accumulate fast in view of the sh crop. Reports from hulling operati feature small yields. Clover acrea on the other hand, has been stead decreasing, and unless farmers are give up this useful rotation crop th should be a very general demand seeding new fields even at high pri Clover is not a luxury, but a necess It is one of the most useful farm cr —*Southworth & Co., Toledo.*

A central Indiana seed dealer wri C. A. King & Co., Toledo, that the clo crop is very poor; a western Indi dealer says there is some surplus M moth but not enough medium to sup the demand while a dealer in the so western part of the state says that th is no surplus clover there this sea In Illinois a central dealer says t the clover crop is very light; timo very good, but acreage small, while other dealer in the same part of state says that the clover crop is ab the same as last year with quality f but farmers are holding or trad among themselves.

Herbert Hoover last week made statement that staple foods had fa in price and predicted there would steady decline for three months to co He urged the necessity of wearing clothes and shoes for that period time in order to effect a substantial cline in values.

The value of imports of grain other foods by Great Britain in Au were £16,953,000 for grain and f and £20,620,000 for meat including live animals for food. These totals well above those of August, 1918.

ne Hess Warming & Ventilating Co. hicago, is sending out, free, an ad- isement in the form of a maple ker, such as is used with the kettle r for bushelweight. On it will be d the requirements of all the dif- nt grades of wheat, corn and oats, making it a handy reference card the grain buyer. You are invited nd for one or more, and they will e to you free, postage paid.

ne Fourth National Bank of Macon, a bank with resources of $13,823,- and deposits of $11,115,400, began September the publication of a thly *Review* containing financial of the month, price changes, notes rops in Georgia, etc. The initial ber was very interesting and prom- to be very useful to patrons of the and others favored with copies. king of agriculture in general in state, the *Review* says: "The high s of all agricultural products hav- come coincidentally with the boll il, an enormous impetus was given iversification in Georgia. While arts of the state have been affected his movement, it has been most vorthy in South Georgia, to which n the weevil has up to this year ied his activities. Between 1914 1918, the production of corn in gia increased 23 per cent, tobacco r cent, wheat 114 per cent, hay 82 ent, Irish potatoes 106 per cent, potatoes 78 per cent, oats 33.3 ent, peanuts (since 1910) 290 per

A New Kansas Firm.

Trusler Grain Co. announces its ization and incorporation with a ul stock of $100,000. The new firm conduct a general grain business offices at Emporia, Kans., and also is other points in charge of the ing personnel: H. P. Trusler, ident, recently manager grain de- ent, Emporia Elevator and Feed- ing Company; V. B. Holt, vice-president, who, as office manager, will have charge of the traffic department; L. N. Miller, secretary, has been, for several years, in touch with the grain industry, and will give his personal attention to the needs of old friends and new. Jno. B. Woodward, treasurer, recently with the Emporia Elevator and Feeding Company, will have charge of the company's finances.

A Great Catalogue.

A most comprehensive book comprising 408 pages is Catalogue No. 27 which has just been compiled and published by the Union Iron Works of Decatur, Ill. This book will prove of special interest to operators of elevators, mills and power plants and will undoubtedly prove its worth to those who make room for it on their desks. Printed on heavy enameled paper and illustrated with fine half-tones and zinc etchings, the volume, which is cloth bound, will prove of great interest to the trade, for detailed descriptions and prices are listed therein.

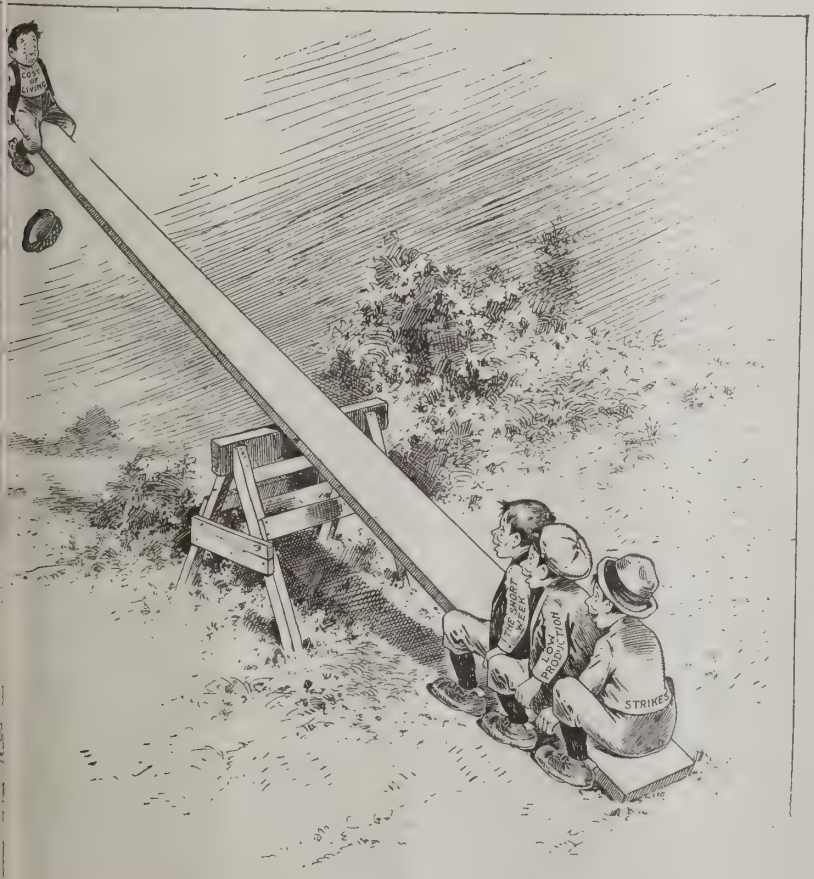
The Western Beet Country.

Consideration of the advancing cost of sugar, with reference to beet production of the West, is a discussion of exceptional interest to our trade in Nebraska, Colorado and other great beet-producing centers. A journey over the Union Pacific from Omaha to Denver, with the beautiful green alfalfa fields alternating with the fluffy green beet tops and the loading and unloading beet platforms, served to illustrate the magnitude of this sugar-beet industry. Grinding and refining plants dot the broad Western areas and this summer's drought has yellowed the leaves and somewhat reduced the tonnage that is now being offered at the mills.

Rosenbaum Brothers Increase.

The trend of grain trade affairs has been exceedingly interesting to watch and the perspective of THE PRICE CURRENT-GRAIN REPORTER, covering all markets and country points may be assumed to be fairly broad. We have noticed as prices have advanced what has seemed to be special care, justifiable of course among grain shippers to arrange dependable connections in terminal markets and with commission men. Frequent editorials bringing home the self evident advantages of such connections have appeared in our pages and we are now privileged to announce for the first time the purchase by Rosenbaum Brothers, Board of Trade, Chicago, of the fully equipped terminal elevator at Winona, Minn., formerly owned by the Gould Grain Co., of Minneapolis. The shipping situation this year should start new trades for the Rosenbaum house with a whir, particularly in connection with their facilities at Chicago, Sandusky, Port Huron and Toledo, and other distributing outlets in the East and South.

Barley will be the principal grain handled through the Winona plant, also coarse grain including wheat will be handled and the Minnesota state weights and inspection will prevail. Rosenbaum Brothers also handle field seeds which is becoming to be quite an important part of their business.



Flanley at Denver.

The several offices of the Flanley Grain Co. have been referred to in this paper in connection with the movement of milling wheat, operating elevators at Sioux City, Ia., and Omaha, Nebr. Their Denver office has been receiving liberal wheat shipments from country trade, as Colorado had its largest wheat crop in history this season. Ed. Past, who has been in the Denver office for some time, was appointed manager, effective Oct. 1; and in commenting on the situation referred to, the business of the Missouri Valley, he said, is looking toward the Denver market as a profitable outlet for corn and oats. He is of the opinion also that the Flanley Grain Co. will handle its share of this business and the movement of such grain to the drouth areas of Wyoming, Utah and Idaho.

Live Stock Prices at Chicago.

Weekly average prices at Chicago for good native beef cattle, hogs and sheep, per 100 pounds, and weekly average weight of hogs (†highest average on record):

KEEPING HIM UP.

—*Farm Implement News.*

From Canada comes word that a good flour may be obtained from the well known marsh plant, "cattails." Two tons of flour to the acre are said to be obtainable from the marshy lands of Ontario and the flour is rich in starch and has a high food value. The American Indian and the Maoris of New Zealand have made flour from the roots of cattails many years ago.

LATE POTATO CROP SHORT.

The late commercial potato crop is short, according to the report by the Bureau of Crop Estimates. The condition of this crop on Sept. 1 indicated a yield of 123,518 carloads of 700 bus. each compared with 146,048 carloads a year ago.

In nearly every state the production of the late commercial crop of potatoes falls below that of last year as shown by the report below, from the *Monthly Crop Reporter:*

BARLEY MARKETS.

MILWAUKEE.—The Milwaukee barley market ruled 2@3c higher for the week. The movement is light and the market is kept well cleared of choice grades which are in good demand from industries and shippers, while the low grades and thin stuff are slow and hard to place. Receipts for the week were 187 cars, against 182 cars a week ago and 111 cars in 1918. Current quotations are: Good to choice, 48 to 50-lb. test, is quotable at $1.32@1.38; bright, $1.39@1.40; fair to good, 45 to 47-lb. test, $1.27@1.36; low, 41 to 44-lb. test, $1.22@1.34; 36 to 40-lb., $1.10@1.20; feed, $1.10@1.22. Iowa quoted $1.10@1.36 for light to fancy; Wisconsin, $1.15@1.40; Minnesota, $1.10@1.36; Dakota, $1.10@1.36; feed and rejected, $1.10@1.22.

WINNIPEG.—Barley is decidedly firm and has only declined about 1 cent. It is noteworthy that every vessel clearing from Montreal is carrying barley, the quantity ranging from 25,000 to 100,000 bushels and the character of the buying denotes an almost unlimited demand for the cereal. It would be no surprise to see good malting barley go 20c per bushel higher than it is now, but feed barley will of course be dependent on the price of oats and corn.

BUFFALO.—Barley dealers did not have the kind maltsters were looking for, the offerings consisting mostly of black oat mixture and not very good weight at that. Keeping posted on the situation was mainly their object. Old malting was quoted at $1.40@1.46 and new $1.33@1.40. Feed, $1.28@1.35 on track.

DULUTH.—The barley market was absolutely dead during the last week. There was no demand from any quarter and operators found it a difficult task to work off the few cars that came in from day to day. Receipts were 28 cars, against 67 cars during the same period last year. Quotations were unchanged, with the range for spot barley standing at from 95c to $1.25.

SAN FRANCISCO.—There is very little business being done on exchange in barley with practically no change in prices. Sales are limited at $3.10@3.15 for the shipping grade and $2.95@3.05 per cental for feed.

Milling Wheat and Brewing Barley a Specialty
Shipment from Principal Grain Points in Washington, Oregon and Idaho

CHICAGO.—The barley market opened the past week with a strong undertone but without any particular advance in prices. Offerings were moderate, especially of the better grades which were in demand all week, but the poor lighter qualities and the black oats mixtures were rather heavy and slow sale. Maltsters were the chief buyers, although the feed men during the week took quite a lot of the better grain at malting prices when the barley was free from black oats. By the middle of the week a pretty keen competition came on for the scanty arrivals, and prices advanced from 2@3c, even the lower grades feeling the strength of the demand. The maltsters demands seemed to be more urgent and there was quite a call for pearling qualities. The week closed on Saturday with the market up a full cent. The present week opened with a rather easier tone to the market; offerings showing a slight increase, which with the weakness in corn rather depressed the market. Maltsters and the industries generally were the best buyers but there was some demand from the feed men. Sales of 24 cars were reported at a range of $1.22@1.36, with screenings at 72c. The September delivery was sharply higher, shorts desiring to cover, but the later deliveries were unchanged. September closed at $1.24 bid; Sept. new at $1.35 bid. December sold up as high as $1.23 and closed at $1.22½. May sold up to $1.24 and closed at $1.23½. Exports of barley from Atlantic ports last week were 845,000 bus. compared with 281,000 the same week last year.

PORTLAND.—The *Commercial Review* reports the movement of barley to Coast terminals as below normal, new grain moving very slowly and old grain being practically cleaned up. There is comparatively little of the malting grade in the new crop offerings, most of the grain being of the feed qualities. Prices continue strong. Values quoted: No. 3 blue, $63; feed, $62; No. 2 Eastern, bulk, $57 per ton.

MINNEAPOLIS.—Buyers are showing more interest in the clean heavy offerings and prices for that kind improved a little during the week, but on the average the market holds quiet and featureless.

Advices from Dublin, Ireland, state that many shiploads of barley are being received from the United States by brewers.

Barley condition at time of harvest in the state of Nebraska was 83 per cent, indicating a yield of 25.7 bus. per acre or a total production of 7,951,000 bus., as compared to 5,660,000 in 1918. The acreage has been increased considerably as barley as a grain crop has

The Letter Box

Location Changed.

Price Current-Grain Reporter: Please nd me the REPORTER hereafter to Anna, io instead of Sidney, Ohio, as I will located at that place shortly.—*Asa H. gt, Anna, Ohio.*

Will Enlarge Plant.

Price Current-Grain Reporter: I ink it of vital importance that the intry elevator should have some say to weights and grades at terminal arkets.

I expect to double the capacity of my nt next season, put in a cleaner, hop- r scale and drier about March 1.—*m McLendon, Goree Grain & Elev. ., Goree, Texas.*

Nebraska Conditions.

Price Current-Grain Reporter: We ve had a nice two and a half inch of n which put the ground in fine shape seeding fall wheat. I think the ual amount will be sown this season. rn is out of danger of frost and rip- nice. I think it will yield from 20 35 bushels per acre, average twenty. y is bringing fair prices from $20 $28 per ton.—*E. G. Raymers, Mar- ette, Nebr.*

One of the Best.

Price Current-Grain Reporter: Please d check for $3.00 to cover one year's scription. You have a good journal, e of the best. If you care for news— are experiencing some heavy rains r Texas since the Gulf storm. I am ilding a 60x92 foot concrete hollow e warehouse, making an addition to present elevator which gives me ,000 bushels capacity. The Sesko ain Co., of Sesko, Texas, also belongs me. We have a capacity there of 000 bushels storage.—*H. J. Bradfish, atherford, Texas.*

Texas Cane and Cotton Crops.

Price Current-Grain Reporter: The ie crop of Texas and the Southwest general is very large this year, per- os the largest we have ever had. wever, the seed crop is still an un- own quantity because of the heavy ns which continue to interfere with threshing of all kinds of grain. The cotton crop has been damaged by ent rains. This successive moisture s also encouraged the boll worms rough a wide section of the South- st, and these two factors, together h the severe storm throughout the er South, will affect cotton consid- bly.

The prices are already advancing and for good middlings is being paid in ne of the north Texas markets. Cot- seed is bringing from $60 to $67 most of the north and central Texas rkets.—*Pittman & Harrison Co., erman, Texas.*

Geo. Lopez to Take a Rest.

Price Current-Grain Reporter: Owing bad health, I recently resigned as president and active head of the at Western Alfalfa Milling Co., and e sold my interest to E. G. Middle- np of Pueblo, Colo., who has been ted president of this company in place, effective October 1. I will e a well needed rest. W. T. Holden, ociated with us since this company s organized, will remain with the pany as vice-president, and aided Mr. Middlekamp, who is a large, suc- sful, thoroughly experienced busi- s man, with alfalfa milling experi- e, I can predict nothing but a con- ued bright, successful future for the pany.

ly plans for the future are indefinite, smuch as it is my doctor's advice t I get out of the office and stay in the open for several months or il I have regained my health and ngth; but in any case, it is my hope to be able to reembark in this business at some future time, and being anxious to keep in touch with the grain and feed situation in the meantime, I will thank you to start sending me at once THE PRICE CURRENT-GRAIN REPORTER, together with your bill, for which I will remit you to cover.—*Geo. Lopez, Denver, Colo.*

Change in Ownership.

Price Current-Grain Reporter: The Osage City Elevator & Meal Mill and also the Asher Adams Feed Store, both located in Osage City have been sold to Austaett Bros. of Lyndon, Kans., who took immediate possession. They are also operating their elevator and feed business in Lyndon. Mr. Adams has been in the grain business in Osage City since 1876 and was active in his business until his death in March, 1919. We appreciated THE PRICE CURRENT-GRAIN REPORTER while in business.—*Mabel E. Adams, Osage City, Kans.*

For the Cob Burner.

Price Current-Grain Reporter: We are interested in installing something to take the place of a belt drag that conducts corn cobs from sheller to cob burner. This belt also carries some of the dust and silks. The burner is about 80 feet from the sheller. We are using a 10-inch belt, but it is not satisfactory. Could we secure something to blow these cobs and silks into the burner? The belt is as changeable as the weather and very unsatisfactory.—*Hannibal Milling & Elevator Co., Elsberry, Mo.*

[Note: If any readers of THE PRICE CURRENT-GRAIN REPORTER have installed conveyors to their cob burners, would greatly appreciate their sending us this information for the benefit of other brother grain men.]

Corn Coming Nicely.

Price Current-Grain Reporter: Weather continues exceptionally good for curing out the corn on the stalk. Farmers who thought some time ago that they would not commence shucking corn before Oct. 15th are now talking of starting on this work from Oct. 1 to 10. Only a moderate yield is expected in central Illinois.

Corn growers are holding back quite a little of the 1918 crop until along in October before selling under $1.50, but the hand-writing on the wall becomes more distinct daily, indicating no great scarcity of corn in any direction, except in sections of the belt where a crop failure occurred. Corn cutting is progressing rapidly, the high price of hay makes it desirable to feed more corn silage. Wagon roads are in good condition; box cars scarce on most roads. —*H. I. Baldwin & Co., Decatur, Ill.*

BREADSTUFFS EXPORTS.

The following statement of exports of domestic breadstuffs, cottonseed oil, meat and dairy products, cotton and mineral oils from the United States was completed by the Bureau of Foreign and Domestic Commerce, Department of Commerce, Sept. 27 (000 omitted):

Corn in Primary Markets.

Receipts of corn in eleven primary grain markets from Nov. 1, 1918, to Sept. 27, with comparisons with 1917:

	1918-19.	1917-18.
Chicago	61,366,000	88,317,000
Milwaukee	6,784,000	11,789,000
Minneapolis	6,621,000	15,643,000
Duluth	25,000	178,000
St. Louis	19,219,000	23,607,000
Toledo	1,127,000	2,457,000
Detroit	1,633,000	3,780,000
Kansas City	16,146,000	30,393,000
Peoria	18,511,000	33,694,000
Omaha	21,805,000	43,989,000
Indianapolis	15,905,000	18,791,000
Total	169,142,000	272,638,000

Receipts of corn the past week at primary markets, compared with the preceding week and corresponding week last year:

	Sept. 27, 1919.	Sept. 20, 1919.	Sept. 28, 1918.
Chicago	1,400,000	1,869,000	2,297,000
Milwaukee	219,000	315,000	174,000
Minneapolis	46,000	70,000	353,000
Duluth	.....	.....	.....
St. Louis	238,000	307,000	232,000
Toledo	8,000	18,000	59,000
Detroit	24,000	36,000	86,000
Kansas City	59,000	96,000	201,000
Peoria	241,000	351,000	855,000
Omaha	109,000	187,000	530,000
Indianapolis	175,000	288,000	541,000
Total	2,519,000	3,537,000	5,330,000
Shipments	1,407,000	1,948,000	2,741,000

Oats in Primary Markets.

Receipts of oats in eleven primary grain markets from Aug. 1, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	19,381,000	35,405,000
Milwaukee	6,593,000	9,162,000
Minneapolis	4,873,000	8,498,000
Duluth	313,000	580,000
St. Louis	4,697,000	5,884,000
Toledo	919,000	3,448,000
Detroit	433,000	1,095,000
Kansas City	1,639,000	6,011,000
Peoria	1,422,000	2,584,000
Omaha	1,958,000	5,326,000
Indianapolis	2,828,000	4,067,000
Total	45,056,000	82,060,000

Receipts of oats the past week at primary markets, compared with preceding week and corresponding week last year:

	Sept. 27, 1919.	Sept. 20, 1919.	Sept. 28, 1918.
Chicago	1,898,000	2,120,000	1,656,000
Milwaukee	578,000	617,000	820,000
Minneapolis	565,000	568,000	1,501,000
Duluth	15,000	13,000	260,000
St. Louis	604,000	628,000	274,000
Toledo	84,000	85,000	160,000
Detroit	86,000	74,000	74,000
Kansas City	69,000	147,000	296,000
Peoria	146,000	145,000	191,000
Omaha	276,000	178,000	380,000
Indianapolis	317,000	319,000	363,000
Total	4,638,000	4,894,000	5,975,000
Shipments	3,392,000	3,227,000	6,322,000

News of the Terminal Markets

DES MOINES, IA.

B. Randleman, Correspondent.

Receipts have been heavy for the week in all kinds of grain. Price on oats has ranged from 64c to 68c. Corn, $1.45 to $1.55. Wheat, 3c premium over government.

Farmers' Co-operative Elevator Co., recently organized at Dallas Center, has bought the elevator of Robert Whitaker. Possession October 1st. Magnus Neilson, manager.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Cattle market steady; best beef, $11 to $15.

Oats receipts were two cars, market unchanged, demand good. No. 3 white, 1 car, 67½c destination weights; one car at 68c.

Offerings of new corn to arrive are becoming more liberal the past few days. Several bookings of small amount were reported for Dec. 15 delivery.

Live stock market at Peoria steady with bulk of sales ranging from $17 to $17.50. Receipts, 500 light hogs, $17.10 to $17.50; mediums, $17 to $17.40; heavies, $16.75 to $17.25.

Saturday's receipts of corn at Peoria were 42 cars. Final sales showed market 3 to 3½c lower with good demand from local industries at the decline. Also several cars were bought to go out of city. No. 1 white, $1.44; No. 3 white, $1.43¾; No. 4 white, $1.43¼; No. 6 white, $1.42; No. 1 yellow, $1.44; No. 2 yellow, $1.44; No. 3 yellow, $1.44 to $1.44¾; No. 6 yellow, $1.42; No. 1 mixed, $1.44; No. 2 mixed, $1.44.

SIOUX CITY, IA.

Paul Larson, Correspondent.

J. L. McCaull, of the McCaull-Webster Elevator Co., and Mr. Earlie, secretary of the company, were visitors last week.

H. E. Scott, of the Scott-Wild Grain Co., of Omaha, was in the city last week looking after business, with a view of opening a branch office here.

Receipts of grain have been very light, due to the car shortage. Country elevators are reported full at some of the stations in this section of the country.

Mr. Morris, of Lincoln, Nebr., was a visitor last week. Mr. Morris contemplates opening offices here in the near future and will do a general cash grain business.

Falling sixty-four feet from a scaffolding of the superstructure of the Flanley Elevator under construction, S. Braat, a carpenter, and Daniel Jenkins, a negro laborer, were critically injured last week. Whether the men lost their balance while working, or whether a portion of the scaffolding gave away could not be learned as none of the other workmen witnessed the accident. Both men were dangerously injured, and are at a local hospital.

OMAHA.

Leigh Leslie, Correspondent.

The car situation in this territory continues extremely bad, with the result that the movement of grain to the Omaha market is light.

Reports received here from various parts of Nebraska indicate that the corn crop is in excellent condition and that the yield will be large and of good quality.

C. W. Adams, vice-president of the Flanley Grain Co. and manager of its Omaha office, returned home a short time ago from Estes Park, Coloraro, where he spent a month.

Robert H. Loomis is now connected with the commission department of the Maney Grain Co. For the last nine months Mr. Loomis has been with the inspection department of the Omaha Grain Exchange, where he specialized in the study of wheat grades.

Julius H. Barnes, United States Wheat Director and president of the United States Grain Corporation, delivered an address to wheat handlers and wheat producers at the Fontenelle Hotel at 2:30 o'clock Thursday afternoon, and in the evening he was the guest of honor at a banquet given by the Omaha Bankers' Club at the University Club. Many members of the Omaha Grain Exchange attended the meeting at the Fontenelle Hotel in the afternoon and were guests at the banquet in the evening. Mr. Barnes discussed thoroughly in the afternoon the wheat situation and answered many questions put to him by those interested in the raising and handling of wheat. In the evening he discussed various phases of the world's business outlook. He left Omaha with Mrs. Barnes for Kansas City Thursday evening.

NEW ORLEANS, LA.

CAIRO, ILL.

J. E. Clancy, Correspondent.

A. W. Lynch, of the Magee-Lynch Grain Co., is on a vacation trip to Wichita, Kas., and other western points.

Some new corn was offered this week for delivery October 1st. Farmers say that they will not sell for less than $1.50 and will feed the corn, seeing more money in $15 hogs than selling the corn at present prices.

The car shortage has become so serious at this market the past week that some of the elevators have had to shut down for lack of empties. Elevators having orders for 10 to 15 cars daily not receiving any. The 900 new cars received daily by the railroads do not begin to replace antiquated rolling stock that is being retired and it is hoped that the U. S. Railroad Administration will speed the building and delivery of new equipment.

NASHVILLE.

John Leiper, Correspondent.

Receipts of grain at Nashville last week amounted to 198 cars. Stocks at the end of the week were as follows: Flour, 46,100 bbls., increase of 5,000; wheat, 735,000 bus., increase of 59,000; oats, 461,000 bus., increase of 50,000; corn, 75,000 bus., decrease of 13,000.

Corn mills report demand very dull for meal. Southeastern corn mills, with capacity of 144,000 bus., reported output last week of 10,640 bus., or 7.39 per cent of capacity. Quotations: Bolted meal, sacked, per 100 lbs., f. o. b. Ohio River points, $3.60@3.70; plain meal, $2.50@3.60.

Grain trade was routine last week. Wheat continues to sell at a firm price, with mills well supplied and receipts moderate. Corn is quiet at recent declines, with little interest shown, and stocks light. Movement of oats has been moderate. Receipts are being curtailed from some sections by shortage of cars. Quotations: Wheat—No. 2 red, $2.25@2.29. Corn—No. 2 white, $1.65@1.70; No. 3 white, $1.60@1.65; No. 3 mixed, $1.58@1.62. Oats—No. 3 white, 74½@75½c; No. 3 mixed, 73½@74½c; No. 3 red, 72@73c.

RICHMOND, VA.

Aubrey Hawkins, Correspondent.

Grain business has been dull in this section during the entire month of September, there being no demand for corn and very little inquiry for oats. However, buyers have been fairly active in milling wheat, seed rye, mill feeds, cotton seed meal and poultry feeds.

In view of the fact, large fertilizer manufacturers do not expect to buy cotton seed meal for manufacturing purposes, this curtailing any demand from fertilizing sources, is expected to have considerable influence upon the price. The prices quoted here on today's market are about as follows: No. 2 white corn, $1.57; No. 2 rye, $1.50; No. 3 white oats, 75@76c; No. 1 timothy hay, $33@34; standard middlings, $54@55; reddog, $68@69; bran, $40@42; cotton seed meal, 38.62%, $68@69; 36% meal, $63@64.

From what we can gather, very few Richmond members will attend the Grain Dealers' National Association at St. Louis.

The weather has been very dry throughout Virginia for the past month and fall seeding considerably delayed.

FORT WORTH.

T. O. Walker, Correspondent.

Stocks of wheat have decreased for the week, the closing report showing wheat in store 942,400 bus., against 1,250,000 last week. Corn, 197,900 bus.—below the normal supply. Oats, 593,300 bus., about normal. Cars of grain on track, including kafir and milo in the head, 250.

The great congestion of rail traffic owing to the enormous demands of the new oil fields for material and to move the output of oil has resulted in an allotment of only 67 cars of grain per day to this market.

Inspection for the week has been 232 cars—wheat 95, oats 62, corn 26, maize 13, barley 4, hay 3.

Wheat—A large amount of the wheat now arriving is grading No. 4, owing to the long prevalence of wet weather in north and west Texas, and the rains have continued for the past week.

Oats—The same weather conditions that have lowered the grade of wheat are acting adversely upon oats, and No. 4 is plentiful in the market. The demand is fairly good, with No. 2 the best seller. Quotations: No. 4 red, 55c; No. 3 red, 60c.

Corn—Texas home grown is supplying the market except for the milling grades, and the demand is only fair at prevailing prices. Quotations: No. 2 white, $1.45; No. 2 mixed, $1.45; No. 3 white, $1.43; No. 3 mixed, $1.43.

Maize—Fort Worth grain dealers are doing a large business in maize, shipments being made on orders direct from points of origin to milling centers in the East, Southeast and North. Maize is quoted at $2; barley at $1.50.

WESTERN CANADA.

A. Caldwell, Correspondent.

Fall plowing is well advanced and with practically a month ahead of clear weather the advent of winter should see this important work practically cleared up.

Rye is marking time and accumulating. Traders are for the present bearish on this cereal but it will be in good demand when European countries have used up their 1919 production.

It is reported that a large oatmeal concern in the East has been out of the market for some time for Western Canadian oats and has been buying American oats to mill for export and is to be presumed that they could also be worked for eastern domestic demand.

The potato crop is now being lifted and is generally, in Manitoba at least, a good one, both as regards quality and quantity. Manitoba potatoes are in demand from East, West and South and prices are firm. There are rumors of an embargo on exports but this is probably mere talk.

Weather throughout Western Canada has been wet and muggy and has delayed the windup of threshing and some damage from sprouting is reported. The weather is still unsettled and country roads are in bad shape for long hauls. The futures markets have been fairly steady and somewhat draggy owing to the lack of any outside speculative support. Cash oats have declined about 4½c but there was a little stiffening of prices for both oats and barley at the week-end. The decline is due to the narrowing of the premiums, the effect of heavier receipts. Most of the coarse grain coming in is, however, going into storage, farmers are not anxious to sell at present prices. During the week 500 cars of oats have been inspected as against less than 100 during the corresponding period last year.

TAMPA, FLA.

Leonard Selz, Correspondent.

Florida corn (white) is being offered freely at $1.60 per bushel.

No. 3 white oats are quoted today at 85c. Receipts total about 18,000 bushels this week, with good demand from country buyers. Warehouse stocks are normal.

Lyman Mallard, for many years with Miller-Jackson Grain Co., has severed his connection with the grain trade entirely and is now with the Oscar Daniels Shipbuilding Corporation. Manuel Jones, one of Miller-Jackson Grain Company's crack salesmen, also left us for a few days in order to get married. Manuel will have to sell more of Edgar-Morgan's Old Beck than ever before.

F. D. Jackson, vice-president of Miller-Jackson Grain Co., accompanied by Mrs. Jackson, has returned from a seven weeks' vacation trip through the grain belt. Mr. Jackson has furnished a very interesting article in reference to conditions existing in the territory he covered, which the local papers are giving full publicity as an editorial. The local grain, feed and hay trade missed Mr. Jackson greatly.

CLEVELAND.

F. R. Sowers, Correspondent.

Mr. Teagle, of the Union Elevator Co., is spending his vacation at Weedsport, New York.

E. I. Bailey, of the E. I. Bailey Co., dealers in feed, has just returned to his office after an extensive business trip.

The country is a little dry and rain at this time would help the pastures. There is a splendid prospect of a good corn crop, but potatoes are short and the quality inferior.

The board of directors of the Grain and Hay Exchange on September 17th met for their regular monthly meeting at lunch at the Chamber of Commerce. Every member of the board was present and all the business of the exchange was attended to without delay.

The representatives of Shepard, Clark & Co., who has just returned from a trip covering western New York, Pennsylvania and eastern Ohio, says corn is ripening very fast and in most cases a frost could do no harm, but hasten the ripening. The farmers in many localities are busy cutting corn and filling silos.

The food demand is slow, as most dealers are well filled with high priced goods and claim while high cost of living is adjusted in the country, it would seem that every dealer in food products suffers from heavy decline, while the harness men, shoe dealers, clothing dealers and agricultural implement dealers seem to escape scot-free. A number of milk producers are still selling off their stock as a protest against decline in milk prices and the high cost of dairy feeds.

The following members of the Grain and Hay Exchange have been appointed delegates to the National Grain Dealers' Convention at St. Louis in October: S. F. Watkins, Cleveland Grain Co.; C. G. Clark, Shepard, Clark & Co.; A. A. Kemper, The Sheets Elevator Co. In addition to these delegates, the following of the exchange will be present at the convention as alte
nates: H. W. Robinson, Union Elevat
Co.; F. W. Blazy, Star Elevator Co
George Smith, The Nickel Plate Elevat
Co.; E. Fairchild, Cleveland Milling C
This assures a good representation at th
meeting of the Cleveland Grain and Ha
Exchange.

One of the most pleasant features of t
season was the clambake enjoyed by t
members of the Grain and Hay Exchan
and their guests, the Flour Club of Clev
land, the first part of the month. Eve
member of the Grain and Hay Exchan
was present on this occasion and to
as his personal guest his sales or offi
force, so that it was one grand party
grain and flour men assembled to spe
the afternoon and evening renewing o
acquaintances, establishing new ones a
stimulating an appetite, then satisfying
appetite with a wonderful New Engla
clambake long to be remembered. T
main feature of the afternoon sports w
a ball game between the jobbers and t
elevator men.

A matter of vital interest to the pr
ducers and handlers of dairy feeds to
place in this city last week when sev
dairy men of northern Ohio who had be
indicted by the grand jury for violation
the Valentine Trust Law for alleged co
bining through the northern Ohio Mi
Producers' Association to fix prices of mi
in Cleveland were freed. The case ca
up for final trial at the regular session
court opening the first of this month a
after a lengthy hearing the dairy m
were acquitted. This means that the dai
feed industry throughout Ohio will not
crippled by the court interfering with
operations. This case has been watch
by all dairy men and feed men througho
the country and the freeing of these ge
tlemen again places the dairy industry a
feed industry on a firm basis.

NEW ORLEANS.

Thos. C. Robinson, Correspondent.

Bulk No. 3 white oats have been offer
freely from 74c to 75c delivered. Sack
oats quoted at 80c for shipment. The d
mand for oats still continues slow and
ferings are as free as wanted.

Fred. Nuzum, representing the Armo
Grain Co., of Kansas City, Mo., was
visitor to our city during the Ad Me
Convention, incidentally, looking over t
facilities of the Port of New Orleans.
has returned to Kansas City.

Corn prices started to firm up consid
ably and the September option advanc
about three cents per bushel. This stim
lation created rather an active demand f
corn, but it was short lived, due to t
fact that the September option took
header and plunged downward, declini
almost as fast as it went up. At the clo
of the market this week No. 3 yellow co

Smith, a grain and hay dealer of Kas., has been restrained from ines for five days, ending Octo- alleged failure to apply for a icense. Other similar cases are the office of D. F. Piazzek, zone he United States Grain Corpora- nsas City.

. Barnes, president of the United ain Corporation, was the guest at a dinner given by the Kansas Club in the St. Francis room of Baltimore Friday night. Mr. as introduced by F. C. Hoose, of the club, and delivered an ad- which he went over the develop- the last two years in the grain ched on the question of living gave some advice as to the nduct of the grain business after tion of wheat control next June. of Mr. Barnes was along the same line as his speech before the International Farm Congress in the afternoon. He was applauded frequently during the course of his remarks and at the conclusion of his address.

Increasing difficulties of the grain shipping situation in Kansas City, due to shortage of motive power and cars, compelled the reinstatement of a limited embargo on wheat receipts Saturday for an indefinite period. A maximum of 135 cars of wheat daily will be allowed to come in and railroads will re-employ the blanket permit system in the country. A bulletin issued by the transportation committee of the Board of Trade prior to the ordering of the embargo said: "Elevators in Kansas City are full of grain and an embargo is imminent. The restrictions were removed a week ago because of the action of the board of directors in authorizing the running of wheat on destination official weight. The volume of the business has been very light, and we face another embargo of indefinite duration unless a much greater proportion of our daily receipts is reconsigned out of this market.

Application was made to the Circuit Court of Jackson county this week for the appointment of a receiver for the Missouri Farmers' Mutual Crop Insurance Co. The petition was filed by a committee representing 110 farmers of Montgomery county, who allege mismanagement of the company's finances and failure to pay losses aggregating about $1,000,000. A temporary injunction granted by Judge W. O. Thomas will prevent the company from disposing of any of its property. It is declared by the complainants that 11,000 policy holders paid in $217,000 in asesssments during the last year, and that $180,000 of this went to C. L. Sharpe, of Kansas City, for his services and expenses as general agent. The company has its headquarters in Kansas City. W. A. Blees is secretary and Leslie J. Lyons is attorney for the company. A defense is to be made by the company officials, who claim that contracts with the farmers specify December 1 as the date for payment on policies. The officials hold that an assessment recently made will, if paid, bring in sufficient funds to meet all damage claims. Policies to the amount of $19,000,000 were written on crops in Missouri during the last year, guaranteeing farmers against loss from hail and storm damage.

Farm Congress Ends.

The International Farm Congress, which was in session in Kansas City this week in conjunction with the International Soil Products Exposition, adjourned Saturday after electing Senator Arthur B. Capper, of Topeka, Kas., president. During the sessions, which covered three days, addresses by many noted agricultural authorities were delivered. Kansas City may be made the permanent home of the congress and the exposition.

Kansas won first place in the general classification of displays in the exposition, forging ahead of Manitoba, its nearest rival, and Oklahoma, which was adjudged third.

The winners by classes were:

Section 1. The best display by nation, province or state—Kansas, first; Manitoba, second; Oklahoma, third.

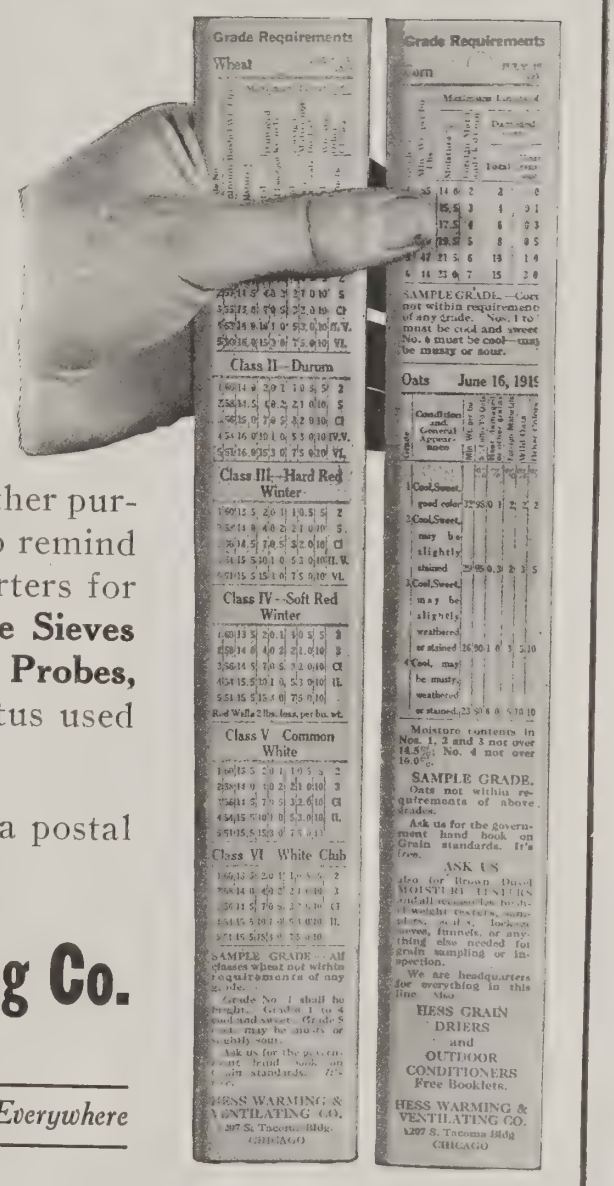
Most artistically arranged exhibit—Manitoba, first; Arizona, second; Kansas, third.

Section 2. Best display of small grains—Manitoba, first; Kansas, second; Oklahoma, third.

Section 3. Best display of corn—Kansas, first; Oklahoma, second; Colorado, third.

Best display of sorghum—Kansas, first; Oklahoma, second; Arizona, third.

Best display of vegetables—Manitoba, first; Oklahoma, second; Kansas, third.



The soil products show will run until October 1.

Cash Grain Markets.

Wheat—Receipts for the week, 1959 cars, against 1,200 a week ago and 191 a year ago. Despite an increase of 759 cars in the arrivals, the great demand for choice milling samples of hard wheat caused a further advance of 5c to 17c a bushel. Local millers made a record output of flour and there was a good shipping demand. Shipping, though permitted on destination weights, was curtailed by motive power and car shortage. It was hard to get cars transferred from one road to another. Congestion was so serious at the week's end that a new embargo had to be declared, the railroads being authorized to bring in 135 cars a day under the blanket permit system until further notice. Red wheat was in good request, with buyers turning to it because of its relative cheapness. Demand for red wheat flour was active. Prices of red wheat advanced 1@4c. The market for both hard and red wheat suffered a setback on Saturday, with milling and lower grades showing dullness. Purchases of car lots by the United States Grain Corporation during the week were possible only in the case of a few off grades. Purchases by elevator men for the manufacture of contract grades to turn over to the corporation on the minimum price level were retarded by the cash premiums prevailing. Stocks of wheat here increased 88,000 bus., to 15,378,000 bus. against 13,631,000 a year ago. Most elevator men said their storage space was about exhausted. Prices of car lots closed as follows: Hard Wheat—No. 1, $2.28@2.55; No. 2, $2.27@2.54; No. 3, $2.25@2.52. Red Wheat—No. 1, $2.21@2.23; No. 2, $2.18@2.20; No. 3, $2.15@2.18.

A STROKER for You

A **stroker** is a weapon specified by the Department of Agriculture to be used in striking off the grain from the top of the grain kettle used in determining the bushel-weight of grain. It must be of "hard wood, ⅜x1¾x12 inches, with the edges formed to a semicircle."

We have them for

Free Distribution

On one side are printed the grade requirements of wheat, and on the other those of corn and oats, so it is useful for other purposes than as a stroker. Its best use is to remind you that we are makers of and headquarters for **Brown Duvel Moisture Testers, Dockage Sieves and Scales,** Bushel-weight **Grain Testers, Probes, Sample Containers** and all other apparatus used in the testing and grading of grain.

Send for a Free Stroker—Your name on a postal card will do.

Hess Warming & Ventilating Co.

1258 Tacoma Bldg., Chicago

Makers also of HESS GRAIN DRIERS—Used Everywhere

Corn—Receipts, 36 cars, against 69 a week ago and 124 a year ago. Advances of 5@11c were recorded on a limited demand, mostly local. Elevator men took a part of the light offerings, evidently for delivery on September contracts. Sales to the South were out of the question in view of Texas and Oklahoma offerings of new corn as far north as Wichita, Kans. New corn from Iowa and states in Kansas City's territory was expected to begin moving the latter part of October. Cattle feeders bought stock freely in Kansas City, figuring on a farm price of $1 for corn when the new crop becomes available. Cash corn closed here as follows: No. 2 mixed, $1.56@1.57; No. 3, $1.55@1.56; No. 2 white, $1.58@1.59; No. 3, $1.55@1.57; No. 2 yellow, $1.58@1.60; No. 3, $1.56@1.57. Local stocks increased 23,000 bus., to 59,000 bus., against 615,000 a year ago.

Oats—Receipts, 50 cars, against 82 a week ago and 172 a year ago. Prices made a sharp recovery from the recent decline, owing to reduced offerings and sympathy with corn strength. White advanced ½c to 2c, closing at 72@72½c for No. 2 and 70@71c for No. 3. The final prices of mixed were 4c up, at 66@67c for No. 2 and 65@66c for No. 3. The close on red, at 69@70c for No. 2 and 69c for No. 3, was 5@6c higher. Demand was mostly local or from elevator men. Shipping business was restricted by car shortage. Stocks in the elevators increased 15,000 bus., to 1,221,000 bus., against 3,260,000 a year ago.

Kafir and Milo—Receipts, 25 cars, against 29 a week ago and 3 in 1918. Bearish comment on the new crop, including a prediction that prices would fall to $1.50 per cwt. later in Kansas City, had a depressing effect on the market. Prices dropped 20@25c, closing with No. 2 white kafir at $2.10@2.15; No. 3, $2.05@2.10; No. 2 milo, $2.10; No. 3, $2.05@2.10. Most of the offerings were new crop milo from Texas. There was fair buying of scattered character for poultry feed manufacturing account. Stocks increased 1,000 bus., to 9,000 bus., against 81,000 a year ago. Reports concerning the unmatured crop of Kansas were favorable. It is not believed that much remains subject to frost damage. The Southwest, as a whole, has a record crop. In Texas and Oklahoma new milo and kafir is selling in the head at $10 a ton.

MEMPHIS.

George Williamson, Correspondent.

Arthur S. Jackson, of Chicago, was here during the week and visited on 'change.

The site for the new plant of the Memphis Packing Corporation, which is composed of capital from this city and the nearby territory, has been chosen and work is to be started in a few weeks. Twenty-five acres have been bought in the southwestern part of the city, with excellent rail and river frontage. The buildings to be erected at once will cost about $375,000 and the killing capacity will be 100 animals daily. The concern is capitalized at $1,000,000.

Business continues at low ebb and will probably be that way for some time yet. The unsettled state of the cash markets has contributed, but a larger reason is that this is the time of the year when buying is limited and home supplies are largest. The shortage in the corn crop in most of this territory assures the trade good business later. There is a noticeable increase in demand for oats from people who for a while bought more freely of the mixed feeds, the grain now being regarded as cheapest weight for weight.

The grain and mixed feed business here has developed so rapidly during the past few years, especially the latter, that efforts are now being made to get rates which will enable dealers here to compete with Chicago, St. Louis and Peoria for business in the East. Application has been made for rates that will enable this market to compete and J. B. McGinnis, traffic commissioner of the Merchants' exchange, will go to Washington in a few days to be present at a hearing, one object of which is to grant the needed relief.

This has been Fair week and the live stock exhibits have attracted great crowds and more attention than any other features. A big part of the exhibits, especially of hogs and beef cattle, were from the nearby states, showing what wonderful progress has been made in this kind of farming. People from the older livestock sections say they never saw finer exhibits than those assembled here and the bulk of the prizes went to Southern stock. As a result of the wonderful record made by the get of one Duroc-Jersey board, nearly every prize going to them, an offer of $50,000 was made for the animal, but turned down.

Quotations for corn during the past few days have been difficult to make, for there has been very little business done. Receipts were small and practically all of this was on contract and not for sale. The mills have been buying very little and feed makers are practically out of the market for the time being. Oats have been in a little better demand for a day or so, but are still slow. Receipts have been moderate, but so has demand. Cash 2 and 3 white sold around 71 cents for several days, where there was any business, but on Saturday asking prices were around 72½. There continues to be very limited demand for red, and No. 3 red sacked sold Friday at 71c.

TOLEDO.

Carl Bryant, Correspondent.

"Michigan will have plenty of good corn this year," says Bill Cummings, of J. F. Zahm & Co. "Most of it has been cut. "Practically no oats in Michigan and very little wheat," he says.

Walter Haskell, sales manager of The Krause Milling Co., Milwaukee, Wis., was a visitor on 'Change Saturday. Mr. Haskell is well known hereabouts, having been connected with the Haskell Milling Co., Toledo.

E. H. Culver, chief grain inspector of Toledo Produce Exchange and president of the Chief Grain Inspectors' Association, will attend the annual meeting of the association, which will be held this year at St. Louis preceding the Grain Dealers' National Association convention.

Produce Exchange members who will attend the annual convention of the Grain Dealers National Association, at St. Louis, Oct. 13-14-15, are: President Fred. Mayer, W. W. Cummings and J. H. Streicher, of J. F. Zahm & Co.; E. L. (Colonel) Southworth; C. R. Keilholtz and Joe Doering, of Southworth & Co.; Chas. E. Patterson, of John Wickenhiser & Co.; Lester Howard, of H. D. Raddatz & Co.; Geo. R. Forrester, of E. B. Slawson Co.; S. L. Rice, of the Rice Grain Co.; J. W. Young, of the Young Grain Co., and O. W. Randolph, inventor of the Randolph Grain Drier.

John Wickenhiser, who owns a chain of elevators along the Nickel Plate railroad, says farmers are holding oats for higher prices. Many farmers, he says, have built storage tanks from their profits of the last few years and are able to hold their grain until the price is right. One big farmer in Wood county is still holding his last year's corn crop and will hold all his wheat and oats this year. This looks like "bull-headedness," says Mr. Wickenhiser, who believes high prices are a thing of the past. Elevators have stocked up on oats at 72c to 76c and are inclined to wait awhile before taking any losses.

Light movement of oats to market caused by inability to secure cars and refusal of elevators to sell at present levels resulted in especially good demand for the spot article here last week, and prices Saturday were highest of the week. No. 2 white oats sold at 70½c Saturday, while No. 4 white brought 69⅜c. Not a car of No. 3 white was offered on the sample tables last week, receipts being only 2 cars. Grading of oats has been good. Out of a total of 31 cars received, 24 graded No. 2 or better; 2, No. 3, and 5, No. 4. A car of No. 1 white sold Saturday at ⅝c premium over the No. 2. Despite the small corn receipts, prices declined here about 3½c for the week. No. 1 yellow corn ranged $1.46½ to $1.55 and No. 2 mixed, $1.43 to $1.53½ during the week. Receipts for the week were: Wheat, 109,000 bus. by lake and 150 cars; corn, 6; oats, 31; rye, 43; barley, 2.

DETROIT.

John Barr, Correspondent.

Shipping of rye was active all week, but the buying had been done earlier. The rye market was dull all week and prices worked lower. At the finish the market was easy at $1.41 for cash No. 2.

Demand for wheat is active. Millers are only moderate buyers, but exporters are in the market. Shipments show an important increase. Quote: Cash No. 1 red, $2.26; No. 1 white, $2.24; No. 1 mixed, $2.24.

Beans are easy and lower. They are offered freely and buyers at present are holding off. Farmers appear anxious to be rid of their surplus early. Beans for immediate and prompt shipment are quoted at $7.15 per cwt.

Local demand for oats was active most of the week, but there was not much doing in the shipping line. The market was firm early, declined ½c on Friday, but advanced and closed 3c higher for the week. No. 2 white oats were quoted at 74½c; No. 3 white at 73@73½c and No. 4 white at 72@72½c.

The Kimball-Martindale Co. is erecting a beam and feed elevator and warehouse on the Chicago belt line tracks at 66th street and Austin avenue, Chicago. This plant will be equipped with a grain and bean drier and washer and all modern machinery for handling beans, peas and other grains. The company has opened an office in the Hearst Building.

The corn market developed no new features for the week and ruled dull all the time. The bears were disappointed at the failure of the market to break at the start, but there was demand enough to put prices 8c higher in the first three days. Then came an easier market and part of the advance was lost. Receipts here continue too small and there is no possibility of activity as long as the supply is so light. Quote: Cash No. 3, $1.53; No. 2 and No. 3 yellow, $1.55; No. 4 yellow, $1.53; No. 5 yellow, $1.52; No. 6 yellow, $1.51.

Michigan bean jobbers held a well attended meeting in Detroit last week at which several questions of importance to the trade were discussed. A new selling contract came in for a share of attention, but the new form was finally rejected as being too complicated. Most of the dealers consider the old contract satisfactory. A plan for the extensive advertising of the Michigan bean was also considered. It was suggested to tax the grower 10c per bushel and the elevator men 5c, creating a large fund with which to carry on an ambitious advertising campaign, but the plan failed to go through and is abandoned for the present. The bean dealers figure the average crop this season at about 13 bushels to the acre and a total crop of about 3,500,000 bushels is expected. This is not far short of last year's production on double this year's acreage. Christian Breisch, of Lansing, was re-elected president and F. B. Drees, secretary.

NEW YORK.

J. M. Nugent, Correspondent.

The following gentlemen visited the floor of the New York Produce Exchange during the past week: Gordon P. White, of Baltimore; Frank Goedike, of Baltimore; Geo. A. Carruthers, of Montreal; Geo. Goldin, of Montreal; J. P. Spang, of Chicago, and Eaton G. Osman, editor of the Price Current-Grain Reporter, of Chicago.

Situation in cash corn in this market shows no noticeable change. Trade has been generally quiet, but the undertone remains comparatively firm, with New England buyers manifesting some interest. Prices follow: No. 2 yellow, $1.57; No. 3 yellow, $1.56½; No. 2 white, $1.57½; No. 3 white, $1.57; No. 2 mixed, $1.56½, and No. 3 mixed, $1.56.

The market for corn goods of all kinds remained very inactive and nominal last week. Prices follow the movement of cash corn more or less, but outside of a very moderate jobbing demand, and an occasional small export sale, business was at a standstill. So far no prices have been established on the new crop, although mills have been endeavoring to stir up a demand here for late fall and early winter shipment.

There was a moderate trade passing in spot oats during the week, and prices held firm. Domestic demand continues steady, and some export business was reported to Antwerp, about 50,000 bushels. A decline in freights to 90c per hundred pounds assisted this business, but the demand from the Continent is not expected to assume large proportions at the present time. No. 1 whites are quoted at 79c to 79½c; No. 2 white, 78½c to 79c; No. 3 whites, 77½c to 78c; No. 4 white, 77c to 77½c; ordinary white clipped, 77½c to 81c, and fancy white clipped, 81c to 84c per bushel.

BALTIMORE.

Robert C. Neu, Correspondent.

W. H. Killian has been named chairman of Baltimore's Federal Fair Price Committee.

Stocks of wheat in Baltimore elevators are now past the three and a half million bushel mark.

DULUTH.

S. J. Schulte, Correspondent.

ne Minnesota grain inspection depart- t has announced inspection fees effec- Oct. 1 on this market as follows: and corn, $1 per car, or 1,000 bus.; ections of all other grain, 75c, and hing of all grains, 75c per car, or 1,000 uels.

Cabe Bros. & Co. have been doing a business in handling Canadian wheat Manitoba territory through which the t Northern Railroad has connections. wheat is being brought in under per- from the grain corporation and is g handled mainly at the Great North- Elevators.

alers here were afforded opportuni- for business in an active market in during the last week. Spot No. 2 rye nd up ½c higher on Saturday at $1.41, ad in the interval sold up to $1.44, and o $1.40. Stocks of rye in the elevators egate 2,800,000 bus., an increase of 00 bus. in the week.

e oats market has been fairly strong of late and the net result at the end st week was an advance of 2⅜c in the ation in No. 3 white oats to 64⅞@ . Receipts were only of a straggling re, amounting to just one or two daily. Supplies of oats in the ele- rs at this point are light for the sea- at 375,000 bushels.

erators on the Duluth market were ested in a statement made recently by nan M. Patterson, president of the William Grain Board, to the effect Australian wheat will reach England bout the same price basis as that of da. He claims that the low exchange in this country will give Canadian t an advantage of around 25c a bushel mpetition for export to Great Britain. his study of the situation, after a to England, he found that flour trade xport is a poor business proposition at nt, as the European countries are us to keep their mills running and to n the offal in rolling wheat into flour.

e of the statisticians on the Duluth d of Trade has taken the trouble to e out that receipts of wheat on this et from July 1 up to September 23 were 6,011 cars, against 12,558 cars g the same period last year. During ame time Minneapolis received 35,274 of which 9,358 cars were winter t. Last year during the correspond- period 36,301 cars of wheat were re- d down there. The slump in wheat pts on this market so far this season ttributed to the falling off in the hwest yield and the active bidding for lies by Minneapolis millers. Operators are looking forward to receipts reach- a fair volume, however, between now the closing of the lake navigation on.

ST. LOUIS.

E. E. Reeves, Correspondent.

n Barrett, of E. Lowitz & Co., was a or on the floor of the Merchants' Ex- ge last week in conference with the representative of his house.

e regular meeting of the St. Louis Club was held at the Normandie Club last Tuesday. As usual, a golf ament was the feature of the after- entertainment.

of the living ex-presidents of the hants' Exchange were included in the f honorary pallbearers at the funeral rmer President Otto L. Teichmann, e funeral occurred a week ago last y.

H. Sullivan, manager of the Cash Department of the Hodgson-Davis Co. of Kansas City was in St. Louis tly, and came on the floor of the hants' Exchange to learn how we do ess in a real cash grain market.

S. Ambassador to Russia, Hon. David rancis, was given a rousing reception is return to St. Louis last week, and endered a reception and dinner at the uri Athletic Club last Friday eve- by the Merchants' Exchange, the administration and the St. Louis ber of Commerce.

e first barge of the new fleet of six oats and 40 barges of the Government Service departed last Thursday for Orleans, loaded with 45,000 bushels of t of the U. S. Grain Corporation. This is one of the two new ones so far ered. The wheat weighed approxi- ly 1,350 tons, the equivalent of 65 ads. The freight revenue derived the load is about $3,500.

e 92-foot scaffold which is being used e work of cleaning the ceiling of the nd Hall" of the Merchants' Exchange. reparation for the annual convention e Grain Dealers' National Association, distance of 68 feet on top of the le tables in the flour and seed cor- alf an hour before the opening of the ange a week ago last Tuesday morn- Four workmen were injured, two of seriously. Fortunately, none of the or seed men were in that part of the at the time. The death-dealing effect eavy scaffold would have had on any- one beneath it was shown by the way it smashed to splinters four heavy black walnut sample tables and two octagonal writing desks. The loss of the tables and desks is felt much more keenly by the exchange than their intrinsic value represents, because they are part of the black walnut furniture and woodwork with which the exchange was furnished when it was built, in 1875. The tables and desks were hand carved and put together without nails by artisans brought from New York.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

The elevator and grain business of Campbell & O'Brien at Dundas, Minn., has been purchased by Minneapolis interests.

C. E. Lewis, of C. E. Lewis & Co., is back in Minneapolis from several weeks of vacation spent at his country home, Lewis, Wis.

The resumption of trading in wheat futures in the Minneapolis markets is to be urged on the United States Grain Corporation through the local vice-president, Frank L. Carey. Resumption is to be asked for early in January for delivery in July.

The annual election of the Minneapolis Chamber of Commerce Association will be held Thursday, Oct. 2. William Dalrymple is candidate for president, John McLeod for vice-president, H. P. Gallaher, F. C. Van Dusen, W. T. Fraser, S. J. McCaull and A. L. Searle are candidates for the board of directors, H. D. Gee, F. J. Seidl and J. D. Lamb for the board of arbitration, H. G. Fertig, J. A. Mull and W. J. Russell for the board of appeals. The terms to be filled are, one year for the president, two years for the vice-president, directors and members of the board of arbitration and appeals.

John Washburn, president of the board of the Washburn-Crosby Co., died unexpectedly at his old home, Livermore, Me., where he had gone with his wife and daughter for a brief vacation. He was feeling well and died after spending the day in motoring. His death was a shock to his friends here and was entirely unexpected. He was a member of a family that was famous in the political life of the country. He is survived by his wife and three daughters. He was born in Hallowell, Me., Aug. 1, 1858, and obtained his education at Westbrook seminary, Hallowell Classical academy and Bowdoin college.

Cash Wheat.—The demand for dark northern wheat is strong and offerings well taken at advancing prices. Choice wheat is still very scarce and the millers here are fighting for it. Ordinary wheat is in fair to good demand, but velvet chaff offerings are slow. Durum and winter wheat are in good demand. No. 1 dark northern sells at $2.75@3. Winter wheat arrivals are quite liberal and account for 50 per cent of the in movement.

Corn.—The demand for corn is slow and featureless and prices are inclined to be weak, as the local market is above a shipping parity.

Oats.—The market is firm compared with the futures and there is a fair to good demand for the offerings, according to quality. Elevators are the chief buyers. There is a fair feeding demand locally, but very few cars are wanted for shipment.

Rye.—Elevators are the chief buyers of rye and offerings are light. Prices are firm compared with the futures. Mills pay a premium for the choice offerings. Country movement very moderate.

BUFFALO.

E. Bangasser, Correspondent.

Some inquiry for rye, but no offerings at the bids made. Holders seem to have more confidence in the market. There were offerings of No. 2 c. i. f. Buffalo at 3½c over Chicago October.

The corn crop in this state is in fine shape and the largest yield in many years is predicted. Pastures are also better than usual at this season and this has and will lessen the demand for feeds.

The heavy receipts of oats were absorbed, but several days it took a considerable shading to clean up the offerings at the close of the day. The market was fairly steady during the early part of the week, but closed at ¼c decline and offerings liberal. Closing: No. 1 white, 74¾c; No. 2 white, 74¼c; No. 3 white, 73¼c; No. 4 white, 72¼c on track, through billed.

While there were buyers of wheat at last week's prices they were few and practically out of the market at the close except possibly at lower figures and for the best grades of spring. No. 2 red quoted $2.28; No. 3 red, $2.24; No. 4 red, $2.20; No. 5 red, $2.17 on track, through billed. There was considerable smutty, musty and light weight wheat and this was discounted.

Buyers paid $1.64 for No. 1 or No. 2 yellow on Wednesday, which was 6c higher than the close last week, after which the decline started and there was a drop of 10c by the close of the week. There was a good demand at each decline and the market was well cleaned up daily. Millers were the best buyers. Quite a few cars were ordered in store as the prevailing prices did not suit shippers. The feeling here as a rule was bearish and the majority of traders could see no reason for the advance. The late purchases this week were on prospects of light receipts. No. 1 and No. 2 yellow sold today at $1.50, but at the close $1.54 was obtained for several cars from a miller in need of supplies.

Inspection track receipts for the week: Wheat—No. 2 red, 45 cars; No. 3 red, 58 cars; No. 4 red, 29 cars; No. 5 red, 14 cars; sample, 3 cars; No. 2 mixed, 8 cars; No. 3 mixed, 24 cars; No. 4 mixed, 5 cars; No. 2 soft white, 1 car; No. 2 soft white, 3 cars; No. 1 dark hard, 1 car; No. 2 dark hard, 1 car; No. 3 dark hard, 3 cars; No. 4 dark hard, 1 car; No. 1 hard winter, 1 car; No. 2 hard winter, 31 cars; No. 3 hard winter, 59 cars; No. 4 hard winter, 24 cars; No. 5 hard winter, 6 cars; sample, 1 car; No. 1 dark northern, 8 cars; No. 2 dark northern, 9 cars; No. 3 dark northern, 1 car; No. 4 dark northern, 1 car; No. 2 northern, 6 cars; No. 3 northern, 22 cars; No. 4 northern, 18 cars; No. 5 northern, 3 cars; sample, 4 cars. Corn—No. 1 yellow, 53 cars; No. 2 yellow, 19 cars; No. 3 yellow, 6 cars; No. 4 yellow, 1 car; No. 5 yellow, 1 car; sample, 2 cars; No. 1 white, 3 cars; No. 2 white, 3 cars; No. 1 mixed, 1 car; No. 2 mixed, 2 cars. Oats—No. 1 white, 41 cars; No. 2 white, 162 cars; No. 3 white, 162 cars; No. 4 white, 21 cars; sample, 4 cars.

CINCINNATI.

George Mosbacker, Correspondent.

Charles S. Maguire of Maguire & Co., will leave shortly for a sojourn in Michigan.

L. B. Moser, traffic manager of the A. C. Gale Grain Co., returned from a brief business trip to the South.

Frank F. Collins, who accompanied his daughter to an Eastern college, returned to his office late in the week.

Libby, McNeill & Libby of Chicago, dealers in food products, have arranged for warehouse facilities in Cincinnati.

John De Molet, of the De Molet Grain Co., is recovering from a severe attack of hemorrhoids and is expected on the Exchange early this week.

The U. S. Grain Corporation has notified all mills and elevators in this zone that extreme care should be exercised to prevent grain dust explosions.

F. E. Linder, manager of The Dorsel Grain Co., was confined to his home by illness, but was well enough Saturday to again attend to his trade duties.

President E. B. Terrill, of the Grain and Hay Exchange, will appoint a committee this week to attend the annual convention of the Grain Dealers' National Association to be held in St. Louis on October 13 to 15.

Further co-operation of shippers and receivers of freight in promoting freight car efficiency, owing to the continued shortage of box cars, has been asked by W. D. Hines, Director General of Railroads, of Cincinnati's merchants.

Clark R. Brown, who relinquished active participation in the local grain business as a successor of the late B. W. Wasson, but who maintains his membership in the Grain and Hay Exchange, is now engaged in the business of buying, selling and exchanging of farm properties.

W. L. Brown & Co. had the first car of new yellow ear corn of the season, which they disposed of at private terms. The corn was grown in the Miami Valley, of sound and excellent quality, and sufficiently dry for immediate shelling. Quotations for new ear corn ranged at $1.25 to $1.30 at the close of the week.

Cash Markets.

Wheat—There was a further decrease in receipts of the better grades of wheat the past week, only 16 cars of No. 2 red arriving, and as a result the premiums for the top grades showed a wider range from lower grades. The demand was active from all sources, and shippers were urged to increase the movement to meet the requirments of all interests. No. 1 red winter, track, $2.27½@2.28½; No. 2 red winter, track, $2.26½@2.27½; No. 3 red winter, track, $2.22@2.24; No. 4 red winter, track, $2.19@2.21; No. 5 red winter, track, $2.14@2.16; sample as to quality, $2.05@2.15. Smutty wheat discounted from 2 to 4c per bushel as to grade.

Corn—The spasmodic fluctuations in corn futures, especially the September option, brought a feeling of caution to local cash buyers, and as a consequence few sales for local account were recorded the past week. Offerings though were light, and held over from day to day until absorbed by elevators and a few shipping orders. Yellow grades held a premium over white and mixed, and quotations after wide variance during the week closed about the same as a week ago: No. 1 white, $1.52@1.53;No. 2 white, $1.51@1.52; No. 3 white, $1.50@1.51; No. 4 white, $1.46@1.48; No. 5 white, $1.44@1.46; No. 6 white, $1.42@1.44; No. 1 yellow, $1.54@1.55; No. 2 yellow, $1.53@1.54; No. 3 yellow, $1.52@1.53; No. 4 yellow, $1.48@1.50; No. 5 yellow, $1.46@1.48; No. 6 yellow, $1.44@1.46; No. 1 mixed, $1.52@1.53; No. 2 mixed, $1.51@1.522; No. 3 mixed, $1.50@1.51; No. 4 mixed, $1.46@1.48; No. 5 mixed, $1.44@1.46; No. 6 mixed, $1.42@1.44.

Oats—Not enough oats were available this week to supply the ordinary requirements of the trade, and prices held to a steady basis, with a slight premium for cars of heavy weight, either white or mixed: No. 2 white, 72@73c; No. 3 white, 71@72c; No. 4 white, 70@71c; No. 2 mixed, 70½@71½c; No. 3 mixed, 69½@70½c; No. 4 mixed, 68½@69½c.

ST. JOSEPH, MO.

W. H. Moore, Correspondent.

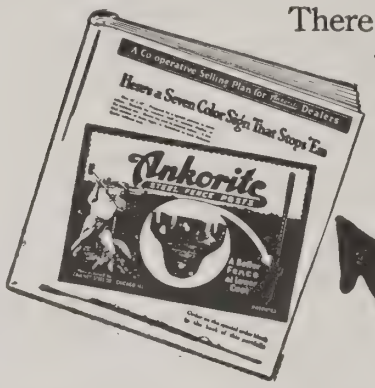
Clay, Robinson & Co., commission merchants at the St. Joseph Stock Yards, have moved into their new quarters, taking in the entire third floor of the exchange. T. F. McKee is manager of the company here and R. R. De Lap is office manager.

A new flour mill, to cost $350,000, will be erected at Atchison, Kansas. Application for state charter has been filed and contains the names of A. L. Jacobson, Henry Diegel, W. S. Washer, Ray T. Willette and W. S. Washer as incorporators. They are Atchison men. The new mill will have a capacity of 2,000 bbls. a day.

Rains fell on three or four days in Missouri during the past week, breaking the drought in all sections. These rains were too late for a great deal of corn, but some late planted bottom lands will be benefited. The ground is now in good condition for plowing, and wheat seeding will be rushed during the next ten days.

The Farmers' Elevator Co., of Forest City, Mo., has brought suit in the circuit court here against G. W. Carter and the G. W. Carter Grain Co., of St. Joseph, for $3,100. The plaintiffs consigned the defendants a carload of wheat and according to the petition were to have been paid cash at the market price, but payment was refused, it is alleged.

The following registered on the Grain Exchange floor during the week: Rufus J. Godfrey, Minneapolis; C. R. Story, Barnston, Neb.; V. H. Beryamir, Atchison; F. Larsan, Highland, Kas.; Jas. Gilmore, Falls City; Porter Buntin, Blythedale, Mo.; J. J. Comer, Wells, Kas.; Tom Howard, Shubert, Neb.; C. E. Kern, Omaha; B. W. Williams, and J. W. Young, Smithville, Mo.; J. W. Brewer, Bolckow, Mo.; Jno. Peterson, Hardy, Neb.; W. W. Young, Kansas City; D. P. Maxwell, Robinson, Kas.; L. L. Teare, Craig, Mo.



Here's a Steel Post With a REAL SALES PLAN Behind it

Ankorite STEEL FENCE POSTS

"A Smashing, Red-Blooded, Co-operative Selling Plan for Ankorite Dealers"

THAT'S the title of a 12 x 12-inch twenty-four-page three-color Prospectus just off the press—and you'll find that every page backs up the title.

If you'd like to receive the most practical, most convincing, most liberal co-operative sales plan that has ever come to your desk, get this book! It will show you how the Calumet Steel Company "goes the limit" with its dealers, and if you'll put the plan to work for you, it will enable you to sell posts as you never sold them before.

Your Prospectus is ready for you. Write for it.

There never has been a time when Ankorite sales came so easy—but you'll have to act quick to get your share of the fall business. Hundreds of farmers are writing to learn where they can buy Ankorite Steel Drive Posts, and we'll gladly refer to you all inquiries from your territory just the moment you're in position to take care of them.

Ankorite Steel Drive Posts are right, the time is right, and this big co-operative sales plan is a whirlwind. Write for it.

CALUMET STEEL CO.
208 So. La Salle St., Dept. 7
Chicago, Ill.

Cash Markets.

Wheat—The demand for good grades of wheat was brisk all throughout the week, good hard wheat being wanted by all buyers. Receipts for the week, 262 cars, against 562 cars a week ago and 276 cars a year ago. Cash wheat as follows: No. 1 dark hard, $2.36@2.53; No. 2 dark hard, $2.31@2.51; No. 3 dark hard, $2.28@2.46; No. 4 dark hard, $2.22@2.38; No. 5 dark hard, $2.18@2.33; No. 1 hard, $2.28@2.39; No. 2 hard, $2.23@2.36; No. 3 hard, $2.20@2.34; No. 4 hard, $2.14@2.30; No. 5 hard, $2.10@2.20; No. 1 yellow hard, $2.16@2.18; No. 2 yellow hard, $2.14@2.16; No. 3 yellow hard, $2.10@2.14; No. 4 yellow hard, $2.08@2.10; No. 5 yellow hard, $2.04@2.08; No. 1 red, $2.21@2.22; No. 2 red, $2.18@2.19; No. 3 red, $2.15@2.17; No. 4 red, $2.10@2.14; No. 5 red, $2.05@2.09.

Corn—Supplies all through the week were ample to take care of the limited demand. New corn was being offered freely from the Southwest, with very few buyers. A small demand picked up in the country, owing to the breaks in the cash markets. Receipts for the week, 26 cars, against 38 a week ago and 10 a year ago. Cash follows: No. 2 yellow, $1.52@1.53; No. 3 yellow, $1.50@1.51; No. 4 yellow, $1.47@1.49; No. 5 yellow, $1.44@1.47; No. 2 white, $1.50@1.52; No. 3 white, $1.48@1.49; No. 4 white, $1.45@1.47; No. 5 white, $1.42@1.45; No. 2 mixed, $1.50@1.52; No. 3 mixed, $1.47@1.50; No. 4 mixed, $1.44@1.47; No. 5 mixed, $1.42@1.44.

Oats—The demand continued extremely narrow for this commodity, with very few offerings to arrive and no demand to speak of from the interior. Cash oats: Receipts for the week, 11 cars, against 14 a week ago and 22 a year ago. Cash follows: No. 2 white, 70@71c; No. 3 white, 69½@70c; No. 2 mixed, 64@65c; No. 3 mixed, 63@64c; No. 2 red, 67@68c; No. 3 red, 66@67c.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

Very little ear corn is arriving here and demand is limited. Quotations are merely nominal around $1.75@1.76 a bushel.

Conditions in the straw market are unchanged with little demand for any grade and liberal receipts. No change is made in quotations this week.

The demand for shelled corn is a trifle better. The receipts are not large, a total of 29,900 bushels coming into market in the last period, but they are sufficient to meet all present needs. The market is so uncertain that shippers are advised of lower prices for shelled corn now on the way. Best grades are selling around $1.62@1.63 a bushel.

The grain market here is quieter than it has been for several weeks. Oats are in plentiful supply and the demand is light, so prices are barely firm. Considerable effort is required to move supplies at prevailing quotations and shippers are advised to hold off until demand shows some signs of improvement. Good oats are bringing around 75½@75¾ cents a bushel.

The Chicago Grain & Salvage Co. has the contract for clearing away the ruins, and this work probably will occupy the next two or three weeks. A force of more than 100 men is at work. Plans and specifications are expected to be complete within a short time and it is hoped to commence operations on the new building before the end of October. The contract calls for the completion of the elevator before the end of the present year.

R. A. Sheets, chairman of the R. S. McCague Co., Ltd., wholesale grain dealers, with offices in the Westinghouse building, is president of the Central Elevator Co., which is a stock concern. He stated that it is the intention of the company to build as complete a grain elevator, although not the largest, as there is in the country. About $20,000 worth of grain, largely oats and corn, was saved from the fire and it is being sold for hog and cattle feed.

It has been definitely decided that the grain elevator of the Central Elevator Co., which was destroyed by fire with a loss of about $500,000, is to be replaced with a modern concrete fireproof structure with a capacity of 400,000 bushels of grain. This is about twice the size of the former structure. The Burrell Engineering & Construction Co. of Chicago has the contract. C. F. O'Connor, representing the Chicago firm, was in Pittsburgh a few days ago securing data for the work. The new elevator, in which is to be installed all modern improvements in grain elevator machinery—dryers, cleaners and shellers—all operated by 200 horsepower electricity, will occupy the same ground space as the old building. It has a frontage of 126 feet on Eleventh street and 70 feet on Duquesne Way. It will be 125 feet high from the street level to the top of the cupola.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Charles Hay, a popular member of the Commercial Exchange, is still sojourning at Beach Haven, N. J.

Exports for the week ending Sept. 26 were 838,998 bus. wheat; 180,600 bus. oats and 17,967 bus. barley.

H. Price, flour jobber of Philadelphia, has started suit against J. Eddstein, also of this city, to recover $279.35 for flour sold.

Cake & Freedman, flour and feed brokers, 481 Bourse Building, have made application for membership in the Commercial Exchange.

The United States Grain Corporation this week purchased 578,728 barrels of wheat flour of all grades at prices ranging from $8.50 to $10.18 per barrel.

Charles H. Longcope, grain dealer, Philadelphia, has instituted proceedings against Frank C. Maguire, also of this city, to recover $537.92 alleged to be due for hay, etc.

Clarence S. Woolman, assistant to the president of the Hales & Edwards, Chicago, grain and feed dealers, and members of the grain firm of S. C. Woolman & Co., this city, is on a visit to his family here.

Receipts for the week ending Sept. 27 were 400 bbls. and 24,143,749 lbs. of flour in sacks; 943,719 bus. wheat; 10,117 bus. corn; 171,113 bus. oats; 54,233 bus. rye; 3,775 bus. barley; 25,000 bus. malt and 540 tons of feed.

Joseph E. Haasz, the popular and ever faithful gentleman on 'change, celebrated his 80th birthday on Saturday last, Sept. 27, and received many congratulations from his numerous friends at the exchange, with best wishes for many happy returns.

John McGuigan, Jr., formerly with L. F. Miller & Sons, grain merchants of this city, has been appointed general manager for the Philadelphia office of the Taylor & Bournique Company, Milwaukee. He succeeds Mr. F. M. Turnbull, who has been in charge of the local branch since its establishment two years ago.

William S. Hastings, of the firm of W. S. Hastings & Son, flour, hay and grain dealers at Atglen, Chester county, Pennsylvania, members of the Commercial Exchange, died on Sept. 21. Mr. Hastings was 78 years of age and was buried from his late residence, Atglen, on Wednesday last. A delegation from the exchange attended the funeral.

Mr. C. Herbert Bell, president of the Commercial Exchange, has appointed the following committee to attend the twenty-third annual convention of the Grain Dealers' National Association to be held at St. Louis, Oct. 13, 14 and 15. William Richardson, chairman; James L. King, Samuel L. McKnight, Frank M. Rosekrans and Frank M. Turnbull.

The following flour and grain men were registered on 'Change during the week: George H. Evans, of the Evans Milling Co., Indianapolis; R. Hasenwinkle, grain shipper, Bloomington, Ill.; Geo. D. Beatty, flour dealer, Sandusky, Ohio; C. S. Chase, sales manager of the H. D. Lee Milling Co., Salina, Kas.; Clarence Woolman, representing Hales & Edwar Chicago; H. D. Billings, Tunkahc nock, Pa.; Jas. F. Garnlaw, Brooklyn, Y.; S. A. Knight, New York City; L. Layton, Georgetown, Delaware; F. Lewis, Doylestown, Pa.; Charles Col Mt. Holly, N. J., and C. W. Rogers, Tan qua, Pa.

The retail grocers of Lancaster City a in the surrounding country have form an organization and purchased the fl mill of S. J. Pugh, located on Mill Cre near the city, for the purpose of produc their own flour. They will purchase wheat and manufacture the flour on co-operative basis. The mill, which is of the oldest in the county and one of few remaining that are operated by wa power, has a capacity of twenty-eight b rels a day.

Reports from Delaware and Maryla say that there is much wheat down those sections that has not been thresh out yet, the grain still standing in fields. The crop, owing to the excess rains and unfavorable weather conditi at harvest time, is a complete failure. a third of a crop having been garner In many instances the farmers h plowed their entire crop under for f tilizer, it having been ruined, and was inferior that it was not good enough chicken feed. It is said that fully fifty cent of that already threshed is good nothing. A prominent shipper of gr from that country said that the best wh he has received from there would grade above No. 3 garlicky and from down to Nos. 5 and 6 smutty, while great deal more is not fit to be graded.

CHICAGO.

The Grain Corporation is receiver fo large proportion of the wheat be shipped into this market. The wheat going into storage.

It has been announced by Arthur W liams, federal food Administrator, t prices of groceries have declined 15 cent in Chicago and meats 8 to 10 cent since January 1, 1919.

Newly elected members of the Board Trade are Michael F. Cudahy of Milw kee, Wallace Templeton of Chicago A. G. Sprague. The estate of Rol Pringle has been posted for transfer.

Craig B. Hazelwood, vice-president the Union Trust Co., Chicago, officiated the opening meeting of the Ameri

LIVESTOCK COMPARISONS.

The returns to the Bureau of Crop Estimates indicate that on July 1, 1919, the number of hogs in the United States was 5.3 per cent less than on July 1, 1919, while that of cattle is 1 per cent greater and of sheep 10 per cent greater. These percentages are based on reports of individual farms taken more or less at random throughout the United States and assumed to be representative of all farms. The actual totals of farms reporting and percentage changes of classes of livestock are as follows:

LIVESTOCK JULY 1, 1919, AND JULY 1, 1918, COMPARED.

	No. on farms reptg. 1919.	1918.	Change, %.
Hogs—			
Over 6 mos. old.	483,132	527,966	— 8.5
Under 6 mos. old	676,859	697,651	— 3.0
Total	1,159,991	1,225,617	— 5.3
Cows	568,045	572,388	— 0.8

American S. & W. Report.

The crop report of the American Steel & Wire Co. says that corn harvest is progressing rapidly; potatoes in the Eastern States are yielding better than was expected; recent rains have improved soil conditions for fall plowing and seeding; no damaging frost reported; the South will make a good crop of sweet potatoes.

As to corn the report says: Weather conditions have been exceedingly favorable during the past week to rapidly mature the balance of this crop. Such sections as were doubtful a week ago are now out of frost danger. Corn has matured this year in sections where usually nothing but silo corn is made. In some instances the quality of the crop has been somewhat damaged by too rapid ripening, but as a whole corn is in better shape than it has been for a number of years. In many cases husking from the field will commence Oct. 1.

The demand for new corn, says William G. Dilts, Jr., & Co., of St. Louis, will probably make the price when the corn is ready for the market and while much is said now about there being no demand for it, it is not often much demand appears for new corn in September at any time. The hog crop while not as big as last year is the second largest on record apparently and the carry-over of old corn is probably the smallest in years while the new crop is only an average although of excellent quality.

Vincent on Plumb Plan.

C. Vincent, a member of the Omaha Grain Exchange, who was active for many years in the development of the farmers' coöperative movement in the West, has addressed a letter to Senator Cummins of Iowa, chairman of the Senate Committee on Interstate Commerce, in which he opposes strongly the "Plumb plan" for operating the railroads of the United States. Mr. Vincent was connected successively with the Farmers' Alliance, the American Society of Equity, the Farmers' Society of Equity, the Farmers' Congress (in which he holds a life membership), and the Farmers' Educational and Cooperative Union. No man has been more closely identified with the cooperative movement than Mr. Vincent. He was at one time state organizer for the Nebraska Farmers' Coöperative Grain and Live Stock Association. In his letter to Senator Cummins, Mr. Vincent says: "The 'Plumb plan' for operating the railroads of the United States is unique in that it assumes that a vast property would be operated by persons who do not own it, so as to give satisfaction to all concerned. Is not this asking too much of human nature?"

COST OF CORN PRODUCTION.

The never ending discussion of the good things the farmer has compared with the city man's life of toil, or vice versa, whichever you please, is a quite natural subject of frequent discussion in this column. We now have a rather interesting and actual figure secured from one of the large farm operators in Illinois showing a cost of $23.10 per acre to produce corn. The minutiae of this, including labor, machine hours, horse feed, etc., are boresome but quite apparently correct. A farmer now figures corn at $1.00 per bu. and a 30 bu. acre extends $30, leaving $7 for Our readers will understand any remarks the varying for rental, from the two-fifths crop an actual price per acre. Is $7 for the rental of corn land?

The U. S. Grain Corporation es that flour consumption in the States has increased almost 15 p of 3,000,000 bbls. in the past 70

R. BARNES'S MOVEMENTS.

Sept. 24, Julius H. Barnes, Wheat ector, addressed the Bakers' Nation- Convention in Chicago recently, he urged greater consumption of t as a means to reduce the H. C. "The flour production this season," Wheat Director Barnes, "is 15 per greater than last while exports are t the same as last year. This in- es that the American people are asing their flour consumption, per- to the extent of almost 15 per cent." ter he went to Omaha where he essed the grain dealers, and then eded to Kansas City, where he dis- d problems connected with the ling of the present crop before the nal Farm Convention in Kansas

. Barnes will spend some days in Angeles, after which he will go to Francisco to speak to California men, and then to Portland, where ill talk to members of the grain at meetings arranged by M. H. er. On Oct. 15th Mr. Barnes will ss the Grain Dealers' National As- ion in St. Louis and he has been to speak to members of the Chi- Board of Trade the following day. ill return to New York about Oct.

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

FLOUR NOTES.

It is reported that under the proposed readjustment of freight rates, flour coming to Baltimore from the Northwest will pay equal to one cent per barrel more than wheat, as against 4 cents per barrel less now.

It is anticipated there will be a considerable demand for rye flour to supply the export demand as foreign countries, especially Germany, desire to purchase food of high nutrient content at the lowest level obtainable. Rye flour is relatively low in price and it is more than probable that the United States will be chief source of supply as the 1919 rye crop is over the pre-war average although not equal to the previous two crops when all energy was devoted to securing an enormous wheat crop.

FLOUR MARKETS.

CINCINNATI.

Cincinnati, Sept. 30.—The flour trade was more active and firmer the past week owing to the light wheat receipts and improved sales, and quotations for patents in wood advanced 50c per barrel. Winter patent was quoted at $11@11.40; hard patent, $12@12.30; Kansas bakers' patent, 140-lb. jute, $11, and corn flour, 100-lb. sacks, $3.75.

NEW YORK.

New York, Sept. 27.—Prices for all hard wheat flours experienced further advances during the past week and the market as a whole was very firm. The upward trend, however, served to very materially curtail business as buyers were not willing to pay the prices asked. The trade here has a large amount of flour bought for October and early November shipment from the mills and therefore feels in a comfortable position over the question of requirements in the immediate future. On the other hand, mills are said to have sold their prospective sixty days' output, and in view of the strength in cash wheat are not in a position to offer for later shipment at lower prices.

Sentiment, as a rule, seems to be in favor of higher markets, but owing to the disturbing economic conditions and the nervousness over the steel strike, it is thought that the situation is entirely too uncertain to encourage aggressive buying, especially as the campaign against high prices is still in progress. Purchases of flour of all grades by the Government on the past week's bids amounted to 578,728 barrels and the prices ranged from $8.50 to $10.18.

The following are quotations prevailing for flour in carloads to arrive in New York. The price is for 196 lbs. of flour bagged in 140-lb. jutes. Spring patents, $11.60@12.25; first spring clears, $9@10; soft winter straights, $10.15@10.40; Kansas straights, $11.25@11.75; Kansas patents, $11.50@12.25; and Kansas first clears, $9@10.25.

BALTIMORE.

Baltimore, Sept. 27.—The demand for flour from the domestic trade continues slow and lifeless, although most of the local and nearby mills are busy with Government orders, so that there is no weight of supplies on the market. The low point on rye flour seems to have been reached, in fact, there is a firmer undertone now to this flour. Quotations, per 98-lb. cotton or jute sacks, follow: Spring patent, $12@12.25; straight, $11.50@11.75; winter patent, $10.50@10.75; straight, $9.75@10.25; rye flour, pure to blended, $6.75@7.75.

MILWAUKEE.

Milwaukee, Sept. 27.—The flour market appeared better during the week than for some time. The demand from all sources is good. Prices generally advanced 30@40c per bbl. The rye flour market, which has been rather sluggish for some time, showed an improved condition. Flour production of the Milwaukee mills was the largest this year, the total for the week being 22,000 barrels. Of this, 16,000 barrels were wheat flour, or approximately 67 per cent of total wheat capacity, and 6,000 barrels of rye flour, as compared with 5,000 barrels of rye flour last week. Current quotations, carlots, per bbl., in cotton, are: Spring wheat patent, $12@12.25; straight, $11.10@11.55; first clear, $9.55@9.70; rye flour, pure, white, $7.60@7.80; rye flour, straight, $7.10@7.30; rye flour, dark, $5.75@6.25. Corn flour is nominally quoted at $3.80; corn meal, white, $3.75, and corn grits, $3.70, in 100-lb. sacks.

DULUTH.

Duluth, Sept. 27.—More activity was shown in the flour market here during the last week. Local millers, however, still found themselves handicapped in obtaining supplies of the best spring wheat, and it was necessary to pay high premiums even for light weight grain. On that account patents were advanced 10c a barrel.

The mills experienced a fair district demand and some further business was apportioned to them for export.

Quotations per barrel, in carlots at mills here follow: Family patents, jute, $11.85@12.10; bakers' patent, jute, $11.60@11.85; first clears, jute, $9.25@9.75; second clears, jute, $7.25@7.50.

DETROIT, MICH.

Detroit, Sept. 27.—Millers report only slight improvement in demand for flour. There is still a feeling among consumers that prices are to be lower, an idea that is not shared by the millers. The latter consider the market firm owing to light supplies in the hands of bakers and jobbers. Quote: Fancy spring patent, $13.25; fancy winter patent, $12.75; second patent, $12; straight winter, $11@11.25 per bbl.

NASHVILLE.

Nashville, Tenn., Sept. 29.—Flour was without new features last w Volume of business continued heavy cluding shipments on contracts. Bu is chiefly for current needs as the buyers anticipated their needs last m Prices have firm tone. Wheat cont

CHICAGO.

go, Sept. 27.—Demands for the grades of flour is strong and prices been higher. Premiums for good wheat quite general and $2.85 per reported last week as having been r No. 1 dark Northern. Carlots of d Minneapolis patents are quotable 90 with other spring wheat flours at $11.40@11.65 in carlots. First are quotable $8.30@9.50; 95% patent estern winters, $10.35@10.50; full $11@11.30; soft winter, $10.15@

PHILADELPHIA.

delphia, Sept. 27.—Flour receipts week ending Sept. 27 were 400 bbls. 143,749 pounds in sacks. The market is strong and Kansas straight, short patent, and spring clear are 25@50c per bbl. higher at the close of the week, reflecting the advance in the West. Buyers are pretty well stocked up, however, and demand for the moment is limited to urgent necessities.

We quote per 196 lbs. packed in 140-lb. jute sacks: Winter straight, Western, new, $10.10@10.40; do., near-by, new, $9.75@10; Kansas straight, new, $11.25@11.50; Kansas short patent, new, $11.50@12;

spring first, clear, new, $9.50@10; do., patent, new, $11.50@12; do., short patent, new, $12@12.25; fancy spring and city mills patent, family brands, $12.75@13; rye flour, $7.60@7.90 per bbl. in sacks, as to quality.

TAMPA, FLA.

Tampa, Fla., Sept. 26.—There has been a brisk demand for all grades of flours during the past week, and while flour stocks are not heavy, receipts and demand are keeping closely together. The local flour situation is a healthy one in every respect. The following quotations are in effect today: Gold Medal, for delivery from warehouse stocks, $12.75; Pillsbury's Best at $12.90 to 13; self-rising flours, good to soft wheat quality, $11 to $11.25 for mill shipment; high gluten content bakers' Oklahoma flour at $10.75 to $11.05.

WAGON SCALE HINTS.

The following is the first of a series of "Hints and Suggestions" pertaining to wagon scales to be given the readers of the Illinois G. D. Ass'n Bulletin by Jos. B. Sowa, scale inspector:

WAGON SCALES.

The first care to be exercised is in the purchase of the scale, which must be of standard make and have sufficient capacity to weigh the heaviest loads without taxing the strength of the levers or bearings.

The foundation or walls must be of sufficient strength and set deep enough in the ground to insure a perfect footing, and should be built of concrete, stone or hard brick. Soft brick should never be used, since they absorb and retain moisture. Have the pit of sufficient depth to permit ready access to all parts of scale, and keep all parts clear.

Install a drain in the pit and place a roof or shed over the scale; in fact, do all you can to insure a dry scale pit.

Rust is the most fatal of scale diseases and no respecter of quality. The bearings and pivots will rust and scale off, the result being that the knife edges become blunt, at the same time the relative position of these edges is shifted, thereby changing the multiplication of the lever.

If your scale is of the type that rests on piers in the pit, set the castings directly on the foundation. Do not use plank or timber between the foundation and the scale proper. Even though you renew such timber frequently, you cannot increase its compressive strength.

Where the team is not weighed with the load it is imperative that the approaches to the scale be level with the platform.

If possible, connect the main levers directly to the steelyard rod which comes through the floor to the weigh beam. Have this rod and all other connections plumb, and all levers level before placing the inside frame on the pivots.

If you must use an extension lever, give its support the same attention as the main foundation.

Have at least one-half inch clearance between the platform and outside frame, build the platform flush with the frame to prevent loads striking or dropping, and provide a manhole in or adjoining the platform to permit frequent cleaning and inspection of the pit and scales.

Have the inside frame sufficiently rigid to support any load without sagging. The bearing feet are attached to this frame and any deflection of the frame will throw the lever connections out of the plumb line.

It is advisable that at regular intervals, at least monthly, you jack up the scale platform, one end at a time, clean the bearings and loops and allow the levers to plumb themselves. Let the platform back carefully, being sure as you lower it that the check rods are free and that the connections do not crowd or pull.

Keep the notches in the weighing beam clean by the use of a stiff brush. A small amount of dirt in these notches may cause a variation of 10 or 20 pounds.

Don't be mislead in believing that as long as the beam is oscillating or breaking nicely, that your scale is correct.

Have your scales installed and then inspected regularly by a competent scale man, using at least 1,000 pounds of standard test weights, and keep in mind the fact that although it may not appear as such, nevertheless, hidden under the platform in the scale pit is possibly the most delicate and important machine of your entire equipment.

Influences in the Corn Market.

Rampantly bearish sentiment of the past week has been encouraged by agitation for a lowering of food prices. Instead of declining, however, commodity values (with the exception of grains and meats) are rising. This naturally is an important factor in determining whether corn values should depreciate further. Sentiment and theories exert a temporary influence, while legitimate trade conditions are the determining factors. Chief among these is the commercial value, which seems to have been given little consideration by the short seller, who can certainly find no encouragement in the present small stocks at primary markets. The cash demand has been restricted by the scarcity of good merchantable corn, which forced the "hand to mouth" policy on consumers. That this demand should increase with new crop supplies becoming available, seems logical and its importance as a market factor will have to be reckoned with from now on to a greater extent.—*Simons, Day & Co.*

New York Oats Market.

There was no material change in the general situation during last week. Export business was spasmodic and said to be mainly to fill old sales. However, the amount so disposed of has relieved pressure to some extent. The action ... corn still continues the dominating i... fluence, and the extreme weakness ... cash corn at Western markets has a... fected not only speculative but al... influenced cash sentiment, so that d... mestic dealers have become cautio... in purchasing supplies, believing that ... continuation of this weakness will fin... ly be reflected in a lower range of valu... for oats. There should be an improv... ment in the local demand during t... coming week. Holders are firm in th... views, and at the moment of writi... there is no apparent desire to acce... concessions from existing premiums. *L. W. Forbell & Co., New York City.*

tard, E. V. Croxton, Raymond Early, all of Medford.

Edmond, Okla.—The First Flour Mill in Oklahoma, which has long been idle, has opened again at Edmond. B. V. Stover is president and manager; A. B. Richert, vice-president; Herman Larson, secretary-treasurer; and F. H. Weir, local buyer. In selecting a location for their mill the managers bought the old Snyder mill and have remodeled it, adding an elevator with a storage capacity of 25,500 bushels and a warehouse 43x66 feet.

PENNSYLVANIA.

Allentown, Pa.—The Mauser Mill Co. has purchased the Frank J. Erdman flour and feed plant and will consolidate it with the East Penn branch. Mr. Erdman will be manager with headquarters at the East Penn branch.

Lancaster, Pa.—The prompt discovery of a slight blaze, caused by the friction of a loose bolt against the grinding bars of an attrition mill at the John W. Eshelman & Son grain elevator, prevented a serious conflagration. The loss will be less than $100.

Pittsburgh, Pa.—The Chicago Grain & Salvage Co. of Chicago will salvage the grain remaining in the Central Grain Elevator which was badly damaged by fire. The company will dispose of the grain, which is believed to be worth about $25,000.

SOUTH DAKOTA.

Roscoe, S. D.—The Farmers Elevator Co. will build a modern elevator at this station soon.

Volga, S. D.—J. O. Sundet has opened the elevator formerly owned by Dyball & Cotton.

Britton, S. D.—Ed Jorde has been appointed manager of the Farmers Elevator Co. here.

Dupree, S. D.—The new Bagley elevator is under way. House will have 25,000 bushels capacity.

Kimball, S. D.—The new Farmers Elevator has been completed. It has a capacity of 45,000 bushels and was erected at a cost of $15,000.

Summit, S. D.—Farmers have purchased a local elevator and will organize a farmers' company and conduct the elevator as a co-operative concern.

TENNESSEE.

Chattanooga, Tenn.—Chas. Hood of F. A. Hood Co., feed and grain dealers, will begin work shortly on a modern two-story warehouse. Plans call for a $50,000 building.

TEXAS.

Orange, Tex.—Arrangements have been perfected whereby the Waldmann-Rose Grain Co. of Houston will open a branch house in Orange. Monroe Colburn will be the manager.

Frisco, Tex.—R. C. Fisher's mill was totally destroyed by fire recently. Several thousand bushels of wheat were also burned. Fire originated in the engine room. Plant and wheat were insured.

UTAH.

Ogden, Utah.—Although plans have not yet been completed, it is expected that a large number of homes will be erected in this city for the permanent employes of the Globe Grain & Milling Co. It is the intention of the company to provide homes to prevent rent profiteering.

VIRGINIA.

Richmond, Va.—W. F. Richardson, Jr., Chamber of Commerce, is planning the erection of a $400,000 reinforced concrete grain elevator to have a capacity of 500,000 bushels.

WISCONSIN.

Oconto, Wis.—The Oconto Milling Co. has started operation in its wheat mill.

Spring Valley, Wis.—The Spring Valley Produce Co., has increased its capital from $10,000 to $20,000.

De Pere, Wis.—The A. G. Wells Co., dealers in grain, produce, etc., has increased its capital stock from $25,000 to $100,000.

Whitehall, Wis.—The mill of the Whitehall Mill & Power Co. has been extensively overhauled and considerable new machinery installed, including a new Allis-Reliance Sifter.

Kewaunee, Wis.—It is reported that the Kewaunee Equity Society has purchased a site along the railway right-of-way and will erect a modern warehouse and elevator.

Kewaskum, Wis.—It is reported that an addition will be built to the malt house owned by the L. Rosenheimer Malt & Grain Co., which will be used as a co-operative milling plant.

Manitowoc, Wis.—It is reported that the government will utilize the Manitowoc elevators of the Bartlett-Frazier Co., for storage of 2,000,000 bushels of what. Shipments are already being received.

Coloma, Wis.—The Follett Co. has been incorporated with capital stock of $50,000 to deal in farm products, flour, feed, etc. Incorporators are Vilas Follett, S. C. Runnel, Darwin Follett and W. F. Gray.

Ableman, Wis.—The Ableman Farmers Co., Sauk county, has recently been incorporated with capital at $18,000, to ship farm produce on commission basis. Incorporators are: Carl Bartenach, Fred Luckensmweiser and John Simon.

Grantsburg, Wis.—The Equity-Farmers Co-operative Association has been incorporated with capital stock of $5,000 to buy, sell, store and ship agricultural and dairy products. The incorporators are G. E. Larson, Paul C. Olsen, N. Erickson, Newton Branstad and P. C. Peterson.

De Pere, Wis.—The Wells-Osen Co., recently organized for the manufacture of dairy, stock and poultry feeds, is now operating in part of the plant of the A. G. Wells Co., pending completion of its mill. The officers of the company are Hugo S. Wells, president; C. A. Osen, vice president and general manager; R. H. Osen, secretary, and Leland A. Wells, secretary.

ANOTHER'S VIEWPOINT ON CROP REPORTS.

Crop reports are but guesses. Appearances, like pretty faces, are deceiving. Look at the present wheat crop. It promised early to feed the world. Now it has faded and is over 100 million bushels less than the record breaking crop of 1915 which was 1,025,000,000 bushels. There are public and private crop reports. Trained correspondents make the best guessers. The reports must be free from prejudice to be valuable. Occasionally some send false reports, hoping to affect market values. They seldom accomplish their wicked designs. Years ago there was a rumor that the Government added 10 per cent to the township returns because farmers were supposed to be economical in their crop returns. Some of the official state and national reports varied so greatly that we suggested they should make an effort to get together. They have in several important states like Missouri, Ohio, Oklahoma, Michigan and some others. Michigan is attempting to get thresher returns. This is slow and hardly satisfactory as yet. Kansas the greatest winter wheat state, still acts independently. It issues excellent reports generally during the latter part of the month. Some of the private reports are very good, but some are less desirable.

Government is inclined to duplicate its crop reports. Agricultural Department has crop bureau which is the leader and issues monthly reports. In its estimates an average change from seed time until harvest is allowed. It gets more crop replies than all the other departments together. Years ago it had some trouble. It had a naughty crop statistician. He tried to manipulate the cotton figures and favor some speculators. He frequently came to Toledo looked over our grain crop reports and acted like an innocent lemonade fiend. Government did not trifle with him long. Now the crop bureau is tied up by red tape and no plumber is needed to stop the leaks. Weather Bureau gets out a weekly report based on a limited number of observations. Food Administration gets its own reports and statistics. Bureau of Markets occasionally talks, but should be very careful. Let the Crop Bureau expand. Give it the funds. Too many cooks are undesirable.—*C. A. King & Co., Toledo.*

Fifty-seven Varieties.

There are about 57 different varieties of opinion on prices of hogs. It seems the whole situation in the hog market is demoralized. Sometime ago we were commenting on whether or not the big break in hogs would stampede the farmer into liquidating. It seems now as though that is the situation. Farmers tell us that it is impossible to get their stock to the shippers, for they are afraid to buy them with such an unsettled situation, therefore, live stock which came to the market this week is stock which was raised by the man who shipped them. There are many cases of mixed loads of cattle and hogs coming together. This indicates that even the farmer with less than a load of hogs is cleaning up. The receipts are liberal, which also indicates that the country is cleaning up on their marketable hogs. Therefore, under the circumstances, it is impossible to hold the market anywhere within reasonable bound. The Government seems to be riding two horses. On the one hand certain officials are demanding that the prices of live stock be kept up for the purpose of increasing production. On the other hand, a demand is made by the Government that the prices

eats be reduced for the purpose of wering the high cost of living. How is problem can be solved, we are unle to say. It is reported that the airman of the Federal Trade Commisn suggests that the export of meats l stopped to relieve the high cost of ing. This is another complication t we are unable to solve. We have en educated to the idea that we were t increase production for the purpose being able to increase exports. At y rate the situation is so full of comcations that any prediction for the mediate future is useless. One thing certain, there is not any immediate tering of hog prices in sight. Packe say they are unable to sell anything any price, except fresh pork. The ttle market is in bad shape, and they off at least half a dollar from last week.—*W. G. Press & Co., Chicago.*

Exports of Corn.

Canadian Northwest stocks not included.

Suggestions made by the Department of Agriculture for planting of winter and spring wheat if followed would probably aggregate a production in excess of 830,000,000 bus. from planting of 40,000,000 acres of winter wheat this fall and 20,000,000 acres of spring wheat in 1920. Of such a crop 200,000,000 bus. would be available for export.

Chicago Grain Stocks.

Wheat stocks in all positions in Chicago decreased 1,044,000 bus. last week and oats 102,000 bus. Corn increased 351,000 bus., rye 214,000 bus. and barley 9,000 bus. Details follow, the last three ciphers omitted, except in the totals:

	Public.	Private.	Total.	Last yr.
Wheat	...2,943	10,536	*13,632,000	17,867,000
Corn	 323	654	977,000	2,538,000
Oats	2,692	4,654	7,346,000	9,841,000
Rye	1,423	1,077	2,500,000	1,281,000
Barley	.. 95	156	251,000	767,000

*Includes 153,000 bu. afloat.

Exports of Oats.

The exports of oats from principal United States ports, as reported by the Chief of the Bureau of Statistics of the Department of Commerce for each month for four years were as follows:

Mos.	1919.	1918.	1917.	1916.
Jan.	10,144,545	8,278,653	7,792,632	5,921,805

British Feeds Under Licenses.

Effective Sept. 15 manufacturers, importers, wholesale dealers, brokers and distributors of feedingstuffs such as copra, cottonseed, groundnuts, linseed, palm kernels, rapeseed, rice, bran, ricemeal, sesame seed and soya beans in Great Britain must operate under license. This order came about as the result of excessive speculation in cake and meal but the Food Controller has made exception in respect of contracts entered into before the date of the order, purchases by or sales to any one person in any calendar month not exceeding in the aggregate four tons of all kinds of cakes and meals, or purchases by persons for consumption by their own cattle. The order also provides for manufacturers of such cakes or meal to be licensed unless their total manufacture is less than 25 tons per month.

Field Seeds

Colorado pinto bean acreage is estimated 10 per cent of last year but there are large quantities of the previous crop for seed purposes.

Although alfalfa seed was formerly raised in large quantities in the Rocky Ford, Colo., district, the seed acreage has been largely reduced influenced by the high price prevailing for the hay.

It has been announced that the first cargo of German goods entering New York since the beginning of the war arrived at that port Sept. 19 and a portion of the cargo consisted of beet sugar seed.

At the Manitoba Agricultural College of Canada some interesting facts have been ascertained regarding the seed crop of a pedigreed hybrid alfalfa plant which was raised in 1916. In 1917 this plant yielded six ounces of seed, or four times the average yield of a plant. The six ounces were thereupon sown and treated under ordinary field conditions with a resultant yield of seed said to be 40 lbs., which when cleaned should give 30 lbs. of good clean seed.

The E. G. Lewis Seed Co., of Monmouth, Ill., has purchased the business of the Patton Seed and Feed Store of that town, Mr. Patton retiring after 40 years' experience to conduct a general farming business.

Effective at once seed potatoes originating outside Oklahoma shipped into that state must be tagged showing that they are non-irrigated stock. Each container of potatoes, potato plants and sweet potato cuttings intended for seed purposes must be so tagged.

The time devoted to seed selection pays many times over. For instance, we have heard of a case where selction was made of sufficient kafir seed to plant 16 acres. This seed proved excellent when threshed and was used for the next crop but other seed obtained from the same field and used for additional acreage failed to produce a good stand. The common-run seed oftimes proves an expensive proposition.

Binghamton, N. Y., will no longer be recognized as the headquarters of the Stanford Seed Co., although the office at 18 Jarvis Street will still be maintained. For some years past the company has operated offices in Buffalo and in Albany in addition to the Binghamton office but now the geographical location of Buffalo makes a change in the location of the main office to that city advisable. Capital stock of the seed company has been increased from $50,000 to $100,000.

Sec'y Stuhr of the Nebraska Department of Agriculture is warning farmers of that state that much of the alfalfa seed being imported from Italy contains noxious week seeds which are particularly objectionable in new alfalfa fields. Specimens already submitted for examination reveal the presence of small flowered morning glory and dodder as well as ox tongue which thrives in such climate as Nebraska enjoys. Seeds are tested free by the state department and efforts to obtain pure seed should be made by all.

CHICAGO SEEDS MOVEMENT.

Following is a report of the receipts and shipments of grass seeds at Chicago for the months and weeks named in 1919 and 1918, in pounds (000 omitted):

Detroit Seed Prices.

e closing grass seed prices at Sept. 23 as follows: Clover ash, $29.50; October, $29.60; al- 5; timothy seed, $5.50.

Duluth Flaxseed Market.

TH, Sept. 27.—With declines ex- to 29 cents in spot, and to 42 n two of the futures, flaxseed were given some uncomfortable s during the last week. A pre- break of 19 cents came in the rket on Monday, and the futures 15@16 cents. After a brace-up sday, breaks of from 12 to 18 ame on Wednesday to be fol- y drops of around 5 cents on y. On Saturday the spot mar- e 7 cents, but the futures held ry.

weakening of the market was ed to the creation of bearish at through a slight improve- supply conditions and a slack- in the demand for linseed oil about to a great extent through uence of the nation-wide steel strike. Under these conditions s are disposed to go easy as increasing their commitments, desire to be placed in position advantage of such conditions as se later. Some interests in the ve in the meantime been predicting that flaxseed prices would recede to around the $4 mark.

Attention has been given to the weak exchange situation, and the consequent curtailing of export demand, taken in conjunction with the weakness shown in the Buenos Aires market for some time back.

Receipts of flaxseed on this market last week amounted to 52,371 bushels, and stocks in the elevators, as on Saturday, were reported at 48,000 bushels, an increase of 12,000 bushels from the figures of the preceding week.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track	$4.57-9	$4.93	$3.91-3
To arrive	4.30	4.73	3.91-2
September	4.55	4.90	3.91
October	4.28	4.70	3.98
November	4.17	4.55	3.88½
December	4.13	4.48	3.80¼
May	4.06	4.48	....

Linseed Situation.

NEW YORK, Sept. 27.—United Kingdom markets for linseed remain heavy and neglected, with buyers showing no anxiety to purchase. Argentine linseed on spot in the United Kingdom is six pounds per ton lower on the week. Linseed oil is also weak and practically buyerless. Strenuous efforts are being made to dispose of English crushed oil in America, owing to the very poor demand prevailing in the United Kingdom at the present time. Oil quotations as compared with a week ago are 9 shillings per cwt. lower, and the price is now 81 shillings per cwt. Arrivals of linseed into the United Kingdom during the week were heavy, and offerings are pressing on the market.

The seeding outlook in India remains favorable, and, provided favorable weather continues, a good acreage will no doubt be put to flaxseed. Shipments this week amount to 212,000 bushels, and will probably show a further falling-off during the next few weeks, as receipts at the ports continue to decrease.

Agricultural conditions in the Argentine for the new crop are generally favorable, but the recent heavy rains were not welcome to the new seedings.

Markets in the Argentine have been depressed, with prices declining owing to the absence of any good foreign buying. American interests have been absorbing sparingly, but Continental and United Kingdom exporters have temporarily withdrawn as a result of the weakness of their home markets. There is a goodly supply of tonnage available, but difficulty is being experienced in getting sufficient supplies to the ports owing to inadequate transport facilities.

FORT MORGAN, COLORADO

SEED SITUATION.

LIGHT SEEDS CROPS.

GALION, OHIO.—We have a very light crop of seed in this territory—timothy, clover and alsike. There is practically no seed moving. We think what little clover seed there is in the country will be mostly traded around among the farmers themselves. A little later, no doubt, there will be a little seed moving, but we do not look for a large movement.—*Switzer & White, Galion, Ohio.*

SEED SITUATION ACUTE.

LA CROSSE, WIS.—The clover, alsike and timothy situation in this state seems to be very acute. While there appears to be a good generous supply of medium and mammoth clover, there is no noticeable sluggishness in the market. Farmers are being offered top prices and find a ready market. If there is any attempt to bull the market on these commodities it is not as yet in evidence. The farmer is the individual who is receiving the benefit.

We think we speak the sentiments of plenty of seedsmen and handlers of field seeds when we state that we would much prefer to have lower prices on clover, alsike and timothy and other field seeds.

It looks to us now as though Wisconsin would not produce as much of a timothy crop as it has in other years. Alsike, while a generous crop, cannot be in any manner considered a large one in this state. On the other hand, however, medium and mammoth clover seems to be plentiful, and Wisconsin, compared with other years, is unquestionably delivering more clover than any other state. This fact, notwithstanding the scarcity of clover in so many districts in other states and the high price of imported clover, will find this country at seeding time with none too much clover on hand.—*John A. Salzer Seed Co., La Crosse, Wis.*

SEEDS IN SOUTHEASTERN IOWA.

KEOKUK, IA.—The timothy seed situation seems to be brightening up a little and we believe that the crop has been over-estimated. In the territory where most of the seed has usually been produced, in southern Iowa and northern Missouri, a large percentage of the meadows have been plowed up and the land used to raise corn and wheat, but in some localities where they had thin land, especially in the coal districts of Iowa and Missouri, where the land was so poor that they did not dare to plow it up and left their meadows stand, the high prices prevailing along about the 1st of July induced a great many farmers to harvest their timothy meadows for seed; consequently, there are some stations that will ship several times as much timothy seed as they usually have done. This we think largely accounts for the greatly increased production which has been reported through the seed journals.

Up to date there has been very little seed sold in Chicago by the commission men, and the same will hold good in Toledo; and if this crop was as large or larger than last year evidently some

SEED SITUATION ABROAD.

Peter Lawson & Son, Ltd., of Edinburgh, Scotland, make the following report on the seed situation:

In response to numerous inquiries we have the pleasure to address a few remarks to our customers and friends respecting the outlook and result of the crops of the leading agricultural seeds, as far as can be ascertained at present.

CLOVER SEEDS.

Red Clover.—A general shortage of this article is anticipated. Stocks of yearling seeds are very limited and held at extreme figures. The outturn of the new crop cannot be accurately estimated at present, as the weather conditions for the next few weeks may materially influence the result, especially in England.

White Clover.—Some parcels of good quality seed have been harvested in various districts, but it is difficult to estimate the quantities in the meantime owing to the difficulty of collecting information from some of the leading centers of production.

Alsike Clover.—A good average crop of fair quality has been harvested in Canada, but owing to the entire absence of yearling seed, prices have started rather high in the opinion of leading merchants. Some seed of good quality has also been secured in England.

Trefoil.—An average crop in England of pretty good quality. In various parts of the continent seed has also been harvested. Prices have opened rather high.

Timothy.—Only a small quantity of fine seed has been secured in Scotland, but a good crop is expected in America, where considerable stocks have also been carried over.

Tares.—Samples of the new crop English winters are now offering and show good quality, but prices are pretty high.

Rape, sowing winter.—A moderate crop in England and parcels of fine quality offering from abroad, but there may be difficulties about export licenses.

GRASS SEEDS.

Perennial Ryegrass.—A good average crop of fair quality has been secured in Ayrshire and Ireland; since the opening of the markets prices have been sagging up and down, as in the opinion of leading cleaners and merchants farmers are asking too much money; the situation will, no doubt, be steadied in a few weeks' time, when the extent of the demand from abroad has been ascertained.

Italian Ryegrass.—Is in a similar position to perennial, but as a good deal of seed has been harvested abroad the demand on the Irish crop will not be so great as in previous years.

Natural Grasses — Cocksfoot. — The Danish crop is reported shorter than last year; prices are moderate at present; it is not expected that any considerable quantities will be available for export from New Zealand and America. Meadow fescue is undoubtedly a very short crop in America. Some Danish seed is being offered, but prices, no doubt, will be ruling high. Crested Dogstail is a very short crop, and good seed will be scarce and dear. Some of the other continental grasses, such as hard fescue, etc., that we have been missing of late years, will be again available.

St. Louis Seed Market.

ST. LOUIS, Mo., Sept. 27.—Clover seed is the most active thing in the local seed market at present, and owing to the more liberal offerings, the market is easier. Timothy seed is firm, as offerings are light. Red top is firm, with offerings limited and demand active.

Quotations are as follows: Clover, high grade, $40 to $44 per 100 lbs., average run $32 to $39, down to as low as $5 per 100 lb. for very poor; alsike, high grade, $35 to $40, down to as low as $10 for poor; timothy, choice, $11 to $11.50, fair $10 to $10.75, low grade $8 to $10 per 100 lb.; red top, fancy solid seed, $16 per 100 lb., fair machine cleaned $12 to $15; chaffy, less; alfalfa, $15 to $25 per 100 lb.; sunflower seed, sound new seed, $8 per 100 lb.; millet, golden, $2.50 to $3 per 100 lb.

Toledo Timothy Market.

Timothy seed was a shade lower last week according to reports by J. F Zahm & Co., the main factor of the market being the switching of a lot of October to March narrowing the spread to 12½c. A few scattered trades and orders were filled during the week but prices ruled within a narrow range and no new features were developed. Zahm & Co. suggest that dealers do not overlook the domestic market. A lot of seed is used in this country; and if 75 per cent of the new crop has been marketed, as some contend, it shows that the Toledo market has absorbed a lot of stuff. The season's receipts at Toledo to September 27 are reported as 5,253 bags and shipments 7,272.

The five leading counties in th ed States in the production of in 1918 were: Bolivar, Miss. (bales), Orangeburg, S. C. (110,7 lis, Tex. (95,638), Sunflower, Mi 690), and Coahoma, Miss. (83,05 total crop of these five counti equivalent to 504,038 bales pounds, gross weight.—*Census.*

CLIMAX SUPERFINE BRAND.

Readers of our recent advertisement, a little one act play, laid under the open sky, will recall that it repeated a dialogue between a farmer and his son.

In continuing the story, we offer another drawing showing two farms, one very prosperous looking, the other run down, and the owner of the former is tactfully but nevertheless seriously asking the other, "Bill, did you ever buy seeds, put out in convenient size bags by W. H. Small & Co.?"

The owner of the poor farm says, "Yes, one time, 17 years ago, and I guess I shall go back to their seeds and make some money."

The successful farmer replied, "Yes, Bill, you will have to if you expect to run with me in producing bumper crops. I buy all my seeds from them, six different brands, and their bushel bags make a hit with me, as there is no loss of time or seed in buying from my dealer."

Potato Crop Notes.

The *National Weather & Crop Bulletin* says that potato digging is in full progress in northern Maine where the crop is turning out well although it is badly damaged in the central and southern portions of the state. In New York the yield is fair to good. In Maryland late potatoes are doing well. In Virginia all potatoes suffered further damage. In South Carolina the white potato crop is unsatisfactory. In Georgia sweets need rain. In Alabama the average condition of sweets is good. In Tennessee potatoes and all garden truck are suffering from drought. In Kentucky late white and sweet potatoes have been benefited by recent rains. In Indiana potatoes are fair to poor on account of previous dryness. In Illinois potatoes are being dug and yield is poor to fair. In Michigan late potatoes are dug but most of the crop is still green. In Wisconsin wet soil has started potato rot in the central portions of the state. In Minnesota the yield is poor. In South Dakota the yield is not good. In North Dakota the early crop is generally fair but the late crop is poor. In Arizona blight is doing considerable damage in Coconio County. In Utah the crop shows some improvement.

Potatoes in the northern counties of Iowa are being dug now but late varieties are still growing in some counties and the recent rains will undoubtedly prove beneficial to them. The crop as a whole, however, is considered a poor one. The Weekly *Weather-Crop Bulletin* of Iowa reports shipments from farmers at $2 per bushel and over.

Potatoes in the Red River Valley districts of Minnesota are said to be the best ever grown there, the tubers being large, bright and firm. Marketing is reported active as growers last year were not satisfied with prices obtainable after holding for a long period.

Potato flour made wonderful strides in the favor of the public during the period of the war and plants for its manufacture have been established in Wyoming, Colorado and Idaho. Potatoes that are sound but will not grade No. 1 or No. 2 find a good outlet for consumption as flour.

Harvesting of white potatoes was in progress during the week ending Sept. 23 although much of the Michigan crop is still green. There is considerable complaint of potato rot in some northeastern and north-central districts, says the National Weather & Crop Bulletin.

Don't let your subscription lapse; you may lose valuable numbers.

Feedstuffs

E. E. Eddington & Co., feed and grain dealers of Charleston, Tenn., expect to have their new building ready for occupancy Oct. 1.

The statement is made that the wheat acreage in western Australia for next season is 1,285,000 against 1,250,000 a year ago.

L. W. Dewey, president of the Ohio State Millers Ass'n, says that from reports received by him it appears Dewey Brothers at Blanchester are operating both their feed and flour mills to capacity except at such times as the mills are unable to secure empty cars for shipments.

Stockmen in the vicinity of Belle Fourche, S. Dak., are enthusiastic on the subject of alfalfa meal for hogs and sheep. One successful farmer has two mills on his farm for grinding alfalfa for his livestock, and he claims that grinding adds about 50 per cent to its feeding value.

A representative of the Bureau of Markets told at a meeting of feed officials in New York recently that European needs for dairy products may be largely supplied from pre-war sources within two years and that the American dairy industry might again feel competition in home markets.

Corn fodder should be stacked if the feeder wishes to save its feeding value for his livestock. Although they will sometimes eat it, animals do not relish fodder that has stood out exposed to the elements all winter and the mould that is sure to accumulate when so little care is taken to preserve its value is apt to prove deleterious to cattle. The fodder should be stacked as clover or alfalfa is stacked and should not be left in the shock, for if this course is followed it is only good as fertilizer.

Prof. H. L. Bolley, of the North Dakota Agricultural College, is authority for the statement that the feeding value of rusted or blighted wheat, oat or barley straw is much higher than that of straw which matured its grain normally. This is explained by the fact that when the wheat matures normally the full nutrient value in the straw finally accumulates in the seed, leaving but little in the straw. The direct opposite is true however if rust, scab or other blight stops maturity of the grain. The straw if properly cured will prove a most excellent feed for cattle and sheep.

Resume Trading Cottonseed Meal.

About Oct. 15 future trading in cottonseed meal will be resumed at the Memphis (Tenn.) Merchants' Exchange, it having been suspended when the government assumed control of the cottonseed products industry when war broke out. The trade here has perfected a clearing house association similar to those in use in other speculative markets, for the purpose of margin protection, and it is expected that business will be considerable from the start. This is perhaps the largest center for cottonseed meal and other products, and quotations made here from day to day will be accepted generally by the trade as reflecting conditions in the belt. Trading will be conducted under rules and regulations of the exchange, which is the body under which the products trade operates.

Cottonseed Products.

The cottonseed received at American mills during August amounted to 24,172 tons, compared with 144,981 tons during August, 1918, according to the Bureau of the Census. This does not include 24,599 tons and 40,438 tons on hand on Aug. 1 nor 1,483 tons and 1,526 tons reshipped or burned for 1919 and 1918 respectively. The amount of seed crushed during the month was 18,850 tons in 1919 and 47,424 tons in 1918. There were 29,921 tons on hand at the mills on August 31, 1919, compared with 137,995 tons on the corresponding date of the previous year.

Cottonseed products produced and on hand were as follows:

Item.	Year.	Produced Aug. 1 to Aug. 31.	On hand Aug. 31.
Crude oil, lbs.	1919	5,425,667	7,640,398
	1918	12,793,341	11,015,279
Refined oil, lbs.	1919	[1]20,248,961	106,850,762
	1918	13,737,782	194,540,068
Cake and meal, tons	1919	8,825	25,223
	1918	22,424	17,967
Hulls, tons	1919	5,328	79,285
	1918	11,597	45,161

[1]Produced from 25,254,987 lbs. of crude oil.

Imports of cottonseed products for August consisted of 1,743,173 lbs. of oil in 1919, compared with 399,120 lbs. in 1918. Exports were 9,220,628 lbs. of oil, against 3,500,256 lbs. and 26,123 tons of cake and meal, against 1 ton.

FEED STOCKS.

The Bureau of Markets reporting under date Sept. 27 has the following as regards ground feed stocks throughout the country:

EASTERN.—Scranton—Dmd. lgt., sup. norm.; c. s., gluten and other concentrates in gd. dmd. Lynchburg—Mills oversold for several weeks; reddog 15 days $71, flour middlings $62, std. bran $44. Washington, D. C.—Stks.-rcts. fr., dmd. lgt.

CENTRAL.—Hopkinsville, Ky. — Bran $57, middlings $60.

SOUTHERN.—Atlantic—C. S. meal offered lower prices, 36% c. s. meal offered $59@60, 36% cake $4 less, hulls steady at $7 ton loose, $10.50 skd. No velvet bean fd. to offer. Bran from Kans.-Okla. $43.50 immediate shpt., $42 for Oct., brown shorts $61, flour middlings $66. Savannah—Bran $44, middlings $60, 7% c. s. meal $62, 20% c. s. fd. $54. Columbus—Dmd. for middlings excellent but only fr. for c. s. meal and peanut meal. Bran $46.50, middlings $62, brown shorts $61, grey shorts $63, 7% c. s. meal $64, 20% c. s. fd. $50. Greensboro—Bran $47@50, middlings $64.50@67.50, brown shorts $62@64, red-dog $76. Wilmington—Dmd. middlings gd., bran $46@48.50, middlings $60@62. Pensacola—Bran $42, brown middlings $56. Miami, Fla.—Bran $52, shorts $70. Tampa—Bran $46, middlings $63.50, grey shorts $64.75, 7[illegible] s. meal $65.50, 20% c. s. fd. $[illegible] Jacksonville—Bran $44, brown s[illegible] $59, 30% peanut meal $65.50, 7% [illegible] meal $62.50, 20% c. s. fd. $53. M[illegible] —Bran $41, middlings $52, 36% p[illegible] meal $55, 7% c. s. meal $60, 20% [illegible] fd. $49. Montgomery—Bran $46, [illegible] dlings $62, 7% c. s. meal $62, 20% [illegible] fd. $50. SUCRENE FEEDS

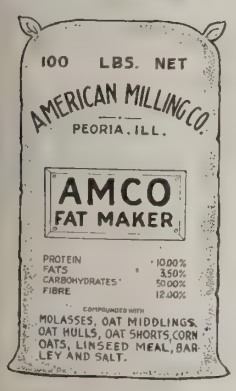
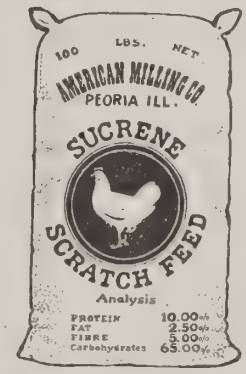
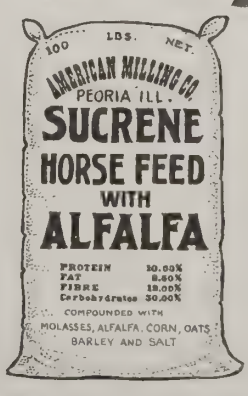
The Feeds That Nourish The Stock







Bring Repeat Orders

Almost any feed can be sold to some stock raisers **ONCE.**

Sucrene Feeds are the "Come-Back-For-More" Feeds, because the quality is always there.

You have Sucrene reputation pulling for you all the time—the reputation that's based on 19 years of recognized leadership—more firmly established in the good-will of the stock feeding world today than ever before.

The Till Tells the Tale

Keep your mind's eye on the Sucrene Line. In the near future our big new mill—larger, more modern, than the one destroyed by fire recently—will turn out Sucrene Feeds of standard quality, which will be offered to the trade at money-making prices. Due announcement will be made to the trade.

Send in your orders for Sucrene Poultry Scratch Feeds. We fill orders promptly on the full line.

GRAIN and FEED STUFFS

ern North Carolina are somewhat subnormal. The sentiments that always reflect into buying are having their effect with the local trade, in view of the recent declining market, and the trade is buying only from hand to mouth.

Stocks of everything that is needed in our line are received in sufficient volume to take care of the trade. Of course, for a while there was terrible difficulty in securing mill feed products, but these have resumed a comparative normal movement now and we think the jobbers, dealers and feeders have their immediate requirements taken care of.

Cottonseed meal and hulls, especially meal, have been scarce for sometime past, but with the oil mills resuming operations within the last ten days or two weeks these feeds will be plentiful.

We have had considerable dry weather for the last month, which will reflect into a reduced corn production and also have a tendency to curtail the forage crops generally, and we believe that as a whole, the requirements for feed in western North Carolina will be normal or above. We are also of the opinion that as soon as the markets have finished their settling processes, there will be a greater tendency to buying than exists at this particular time. —*J. D. Earle Feed Co., Asheville, N. C.*

FEED MARKETS.

PORTLAND, ORE.

Portland, Sept. 24.—The Commercial Review reports a bullish feeling in the feed market all over the Pacific Coast, becoming more pronounced from day to day. Local mills are firmer in their prices and the pressure for the spot offerings comes largely from interior mills. The call for bran is generally weak and easily taken care of. Offerings of the heavier grades are light and taken at comparatively good prices. Just at present the jobbing trade is handling feed as a commission proposition more than anything else and jobbers refuse to make contracts for future delivery. Mill run is quotable $37.50@38 per ton.

MONTREAL.

Montreal, Sept. 26.—The mills are having all they can do to fill their orders for mixed cars of bran and shorts. An occasional straight car of bran and shorts, however, is being shipped at $45 per ton for the former and $55 for the latter, laid down here. Corn feed is steady and sales are reported at $80@82 per ton, mouillie at $69@71, and pure barley meal at $69@70, and dairy feed, $48@50 per ton including bags, delivered.—Trade Bulletin.

CHICAGO.

Chicago, Sept. 27.—There was a liberal supply of mill feeds last week with good demand reported for bran and middlings which were quotable at $39 and $54 respectively. Cottonseed meal was quoted at $68.50 for spot 36%, with linseed quotable easier at $77.

PHILADELPHIA.

Philadelphia, Sept. 27.—Feedstuffs are dull and lower under a light demand and liberal offerings. Quotations are for carlots in 100-lb. sacks to arrive at cost per ton: Winter bran, $43@44; spring bran, $42.50@43.50; standard wheat middlings, $57@58; flour middlings, $61@62; red dog, $70@71; shorts, $57@58; low grade flour, $71@72; rye middlings, $55@56; reground oats feed, $29.50@30.50; cottonseed meal, 36% protein, $68.50@69.50; cottonseed meal, 11% protein, $75@76; cottonseed feed, 20% protein, $55@56.

PITTSBURGH.

Pittsburgh, Sept. 27.—Inquiry for feed has been fairly good during the last period and arrivals total 18 cars, most of which consisted of No. 1 and No. 2 white middlings. Supt. O. C. Alexander's weekly report shows that more than 500 tons more feed have been received in the last period than for the same period in 1918. The total for the week was 560 tons, as compared with 160 tons a year ago. Demand is for the higher priced feedstuffs and these grades are easily moved at the market quotations. Prices range from $40@60 a ton, according to conditions which affect the local market.

CINCINNATI.

Cincinnati, Sept. 30.—The demand for feeds showed a slight improvement the past week and prices were fairly maintained. Bran sold in the range of $40.50@42, mixed feed $49.50@50, brown shorts $54.50@55, gray middlings $60@61, standard fine middlings $57@57.50 per ton, and hominy feed, sks. 100 lbs., $58@59.

MEMPHIS.

Memphis, Sept. 27.—There is little activity in feed and the local plants are operating on the smallest output in many months. They are working on old business, which explains why prices are not much changed from what they were when grains and hay were higher. Cotton seed meal is offering more freely, but prices have recovered $1@2 a ton from where it was for several days. Car lots f. o. b. at the mill is offering at $61@62 for 7 per cent grade, with demand moderate. Mills are beginning to run and the present disposition is to market it freely.

There is still not much mill feed offering and stocks here are small. Cash wheat bran was offered on call today at $40, while prompt shipment was offered at $38 and in transit at $38.50. Gray shorts sold at $58.50 for cash.

NEW YORK.

New York, Sept. 27.—The feed market showed a slightly steadier tone early in the week with mills less disposed to press offers. The demand continued quiet, however, and later the market began to show signs of weakness, especially for bran, which was very difficult to sell. The reaction in coarse grains had a depressing influence on the market, and it was evident that feeders had little faith in sustained values. City feed bran was quoted at $44; middlings $58 and red dog $69 in 100 lb. sacks; while western spring bran was quoted at $41.50@42; standard middlings $57.50 to $58; flour middlings $62.50@63, and red dog $70@71 in 100 lb. sacks, thirty days' shipment.

BALTIMORE.

Baltimore, Sept. 27.—The tone of the general feed market is easier, with ample supplies of sacked bran and sacked middlings to satisfy the present limited demand heard, and Western advises easing on stock "to arrive." Quotations follow: Western spring bran, per ton, 100-lb. sacks, $44@45; Western middlings, per ton, 100-lb. sacks, $58@59; city mills' winter wheat bran, per ton, 100-lb. sacks, $58; brown middlings, per ton, 100-lb. sacks, $58@60; white middlings, per ton, 100-lb. sacks, $70.

MILWAUKEE.

Milwaukee, Wis., Sept. 27.—The local mill feed market shows a firmer tone after several weeks of moderate price lowerings. An improved demand exists, jobbers being quite in evidence, and buying mainly for October shipments. Business from consumers is still very slow and pasturage in all sections of the state is reported as being good. Bran is in exceptionally good demand, and prices generally have advanced 50c. Current quotations are: Bran, per ton, $38.50@39; standard middlings, $52.50@53.50; flour middlings, $59@59.50; red dog, $64.50@65.50; hominy feed, $59; rye feed, $50@51; old-process oilmeal, $72@73; cottonseed meal, $75@82; brewers' dried grains, $60; gluten feed, $65, all in 100-lb. sacks.

DULUTH.

Duluth, Sept. 27.—With the exception of a break in cracked corn and rye, prices in feed held steady during the last week. Trade was light, with dealers confining their buying to current needs as a result of the general unsettlement in the coarse grains market and fears of further downward readjustments. Prices per ton follow: Bran, $39.50; ground oats, $45; No. 1 ground feed, $52.75; No. 2 ground feed, $50.75; No. 3 ground feed, $49; shorts, $52.50; flour middlings, $60; red dog, $65; Boston mixed, $49,50; cracked corn, $56.75; rye feed, $40.

DETROIT.

Detroit, Mich., Sept. 27.—While the feed market is active it has lost some of the pep of a few weeks ago. The mills are able to sell all they can produce [illegible] and is less urgent. Wheat feeds are moving more freely than corn goods. Bran, $44; standard middlings, $[illegible] fine middlings, $65; cracked corn [illegible] coarse cornmeal, $64; chop, $55 per 100-lb. sacks.

NASHVILLE.

Nashville, Tenn., Sept. 29.—Declines of several dollars per ton on wheat featured the feed trade last week. The demand is less active and markets settled on account of break in grains, with stocks moderate. Quo[illegible] Wheat bran, 100-lb. bags, per ton [illegible] middlings, $61; horse and mule f[illegible]

COTTON SEED PRODUCTS

(MONDAY WEEKLY LETTER.)

MARKET: The crushing season will be open generally the coming ek. The crop is estimated at eleven and one-quarter million bales ainst twelve million last year. The cotton states have good grain l roughage crops. The southwest has one of the largest Milo, Kafir l Cane crops ever produced. Oklahoma and Texas will require for al use only a small percentage of amount of cake used last year. ying for export has been in very small volume so far. The specu- ive corn market shows December to be worth around $45 per ton o. b. central markets which makes present cake and meal prices far t of line with the range of price difference that has heretofore n usual between these two commodities.

This Weekly Letter or buyer's guide will be an added feature to excellent service this house has always maintained for its cus- ners and friends. We cannot foretell markets, but our letters will lect our views and impressions of the situation from week to week.

Our prices subject to confirmation **car lots only** 20 to 30 tons for mpt or October shipment closed Saturday as follows:

	43%	41%	38½%
Chicago	$72.75	$70.75	$68.50
Indianapolis	72.75	70.75	68.50
Des Moines	72.25	70.25	68.50
Milwaukee, Wis.	72.75	70.75	69.25
St. Louis	71.25	69.25	66.75
Kansas City	70.00	68.00	67.50

prices will follow market changes. **Let us bid on your wants.**

Actual Photograph of Standard Piler in Use by the Carlyle Paper Co., Carlyle, Ill. THEY SAY It Increased Efficiency in Their Warehouse 500 Per Cent.

500% More Warehouse Efficiency

THE Standard Piler illustrated is mounted on a steel wagon gear for outdoors, but also can be mounted on large ball-bearing castors for warehouse use. The elevator section mechanically raises or lowers to conform to height of pile. It piles any height to ceiling or elevates to floor above. Operated by gasoline engine or electric motor. Motion continuous, also reversible. Our low type conveyor conveys any distance on level or incline, and handles almost any kind of packed goods—bags, bales, boxes, barrels, bundles, etc. Our machines have several important improvements that add to their efficiency and durability.

McKINNEY-HARRINGTON CO.

Portable Conveyors, Pilers, Unloaders

NORTH CHICAGO, ILLINOIS

@57; dairy feed, $55@67; hog feed, $67; poultry feed, $68@72.

NEW ORLEANS, LA.

New Orleans, La., Sept. 27.—Mill feeds, while declining the past ten days, have firmed up recently and prices are somewhat improved. The low mark on tagged bran has been $1.95; some sales at $1.98; mills asking from $2.05 to $2.10 per hundred delivered. No business being reported at the last two prices. Brown shorts offered at $2.85 and grey from $2.95 to $3. The demand for bran has eased up considerably and while offerings are not free the situation is about a balance.

BOSTON.

Boston, Sept. 27.—The demand for feeds of all kinds was rather dull during the past week. Middlings, stock feed and cottonseed meal are lower than last week while mixed feed, red dog and second clears are quoted higher. Prices range as follows: Bran, spring, sacked, $43 per ton; bran, sacked, $43.50; middlings, sacked, $58@60; mixed feed, sacked, $55@60; gluten feed, sacked, $71.12; red dog, sacked, $71; second clear, sacked, $72; stock feed, sacked, $62.50; oat hulls, reground, sacked, $30; hominy feed, sacked, $62.40; cottonseed meal, sacked, $72. Receipts for the week ending Sept. 27 were none.

FT. WORTH, TEX.

Ft. Worth, Tex., Sept. 27.—The unsettled condition of the cottonseed meal trade turns upon the hesitation of cattle feeders to lay in supplies of young cattle for the feed lots. Until the cattle market settles, the situation in ground feeds will be unsettled also. But little cottonseed products are moving. Virtually, there is no spot market. Mill feeds are weaker and corn chops lower in sympathy with the recent decline in corn. Quotations: Cottonseed meal, 43%, $66@67 f. o. b. mills; chops, $2.70; bran, $2.10; shorts, $2.60@2.65. All grain and feed quotations are based on group 3, Texas points.

DES MOINES, IA.

Des Moines, Sept. 27.—Feeds have had a big slump in price during the last week. Oilmeal and cottonseed meal are now $15@20 per ton under prices asked a month ago. All wheat feeds have had some decline. The outlook is for lower levels on all classes of feed and with the big corn crop feeders are holding off buying their supplementary feeds.

ST. LOUIS.

St. Louis, Mo., Sept. 27.—Wheat feeds are steady, but quiet. Some alfalfa meal is offered, but other feeds are dull, and mostly nominal. Prices are as follows: bran, in 100 lbs. sacks, from $36 to $36.50 for hard, to $37.50 to $39 for soft; middlings, spot, $58 to $59, with deferred shipments as low as $53 to $54 per ton; mixed feed, from $49.50 for soft, to as low as $46.60 for hard; white hominy feed, $52 to $55; oat feed, nominally, $25 per ton; alfalfa meal, No. 1, offered at $37; No. 2, $33 per ton, in new sacks.

TAMPA, FLA.

Tampa, Fla., Sept. 26.—Middlings are being quoted at various prices, ranging from $61 for standard shorts to $64.50 for gray midds. There has not been much demand during the past week. Bran is meeting with some little demand at prevailing prices of $48. Hominy feed sold here yesterday at $63.50 for a small quantity. Five per cent ammonia cottonseed meal is offering at $56.80 for October-November shipment, but local dealers were interested for immediate shipment of all commodities only. Alfalfa meal is moving out fairly well, but stocks on hand here are ample for the next thirty days, and but little interest is being shown quotations from millers. The general quality of alfalfa meal received in this market this season has been very good, easily grading up to No. 1. The meal received from Colorado has been running very uniform and the product from that state is gaining in popularity. Alfalfa meal, No. 1 quality, is being quoted at $45. Receipts of alfalfa meal during the past week was practically nil.

J. R. Riggs of Sullivan, Ind., a farmer-politician, has been appointed Assistant Secretary of Agriculture. Indiana men generally speak very highly of Mr. Riggs.

Alfalfa Department

The third cutting of alfalfa in Colorado is reported good.

The last crop of alfalfa was being cut during the last week of September.

In Grant County, Wash., third cutting of alfalfa brought from $16@20 in the stack.

In Utah the alfalfa hay and also the alfalfa seed harvest was completed a week ago.

Miami, Okla., reports the last crop of alfalfa cut after the 18th of September this year.

Four cuttings of alfalfa each year are reported from the ranches in the vicinity of Newbern, Tenn.

It is reported that the alfalfa pastures in Nevada are short owing to lack of irrigation water and light rainfall.

Condition of the Kentucky alfalfa crop is placed at 74 per cent with third cutting yielding over a ton to the acre.

At the Rapid City, S. D., Alfalfa Palace this year a very considerable display of alfalfa was made for human food uses.

Toberman, Mackey & Co., St. Louis, report best grades of alfalfa in good demand in that market but medium grades are still slow.

Monroe County, Ind., farmers are reported to have sown a larger acreage of alfalfa this year than ever before with practically all of the land well limed.

Worms have destroyed the alfalfa fields in the vicinity of Constantine, Mich. They worked so quickly that in two or three days time the fields were entirely ruined.

A farmer at Schafer, N. D., is reported to have averaged $83 per acre for his alfalfa, the crop being grown without irrigation in the dryest year ever experienced in that part of the state.

The Clinton Alfalfa Mill at Clinton, Okla., was destroyed by fire recently and several tons of alfalfa hay were lost. Property damage is placed at $50,000. It is thought the fire was caused by internal combustion.

Alfalfa has supplanted the hop crop in many parts of the Yakima Valley for the crop was found to be a profitable one this year, bringing $25 a ton in that section. There were 23,560 acres in alfalfa in the Wapato project.

Average yield of first three cuttings of alfalfa in the state of Nebraska is said to be 2.9 tons per acre compared to 2.1 in 1918. The third cutting was light as compared to the first two. In some counties a fourth cutting will be made. Total production for the state is estimated at 3,480,000 tons compared to 2,527,000 in 1918.

A stock shipper at Emerson, Ia., says that cattle feeding in the corn belt while it develops a few new wrinkles each year does not change the fact that in nine-tenths of the feed lots a ration of corn and alfalfa is still recognized as the best beef making materials in a commercial way.

Plans are being made by O. E. Jackson and S. S. Lee for the construction of an alfalfa mill at Lindsay, Okla. It is estimated the mill will cost $25,000 and it is expected it will be completed in time to handle next season's crop. There is a large acreage of alfalfa in the Washita Valley and growers will find a profitable way of disposing of their crops when the mill is completed.

The necessity of increasing the acreage of forage crops in the prairie provinces of Canada is only now being fully realized. At the present time many farmers are without sufficient feed for their stock and unable to purchase. Of the many crops tested on the Scott Experimental Station alfalfa has been found to give fair returns in the dry seasons providing it is sown in rows at least twenty-four inches apart.

ALFALFA STOCKS.

The Bureau of Markets reporting under date Sept. 27 has the following in regard to alfalfa hay prices throughout the country:

SOUTHERN.—Atlanta—Rcts. fairly lge., 1 car inspected No. 1 alf., 14 No. 2 alf., 2 std. alf. Quotable No. 1 $37.50, No. 2 $32, alf.-John. gr. mxd. $30. Savannah—No rcts. alf. and no dmd., quote ch. $37, No. 1 $36. Greensboro—Ch. alf. $37, No. 1 $34, very little inquiry. Pensacola—Ch. alf. $36. Jacksonville—Ch. alf. $37, No. 1 alf. $36, no dmd. Mobile—Local alf. $32, ch. alf. $35, No. 1 alf. $33, dmd. increasing. Montgomery—Dmd. alf. fr., ch. alf. $37, No. 1 $36. Vicksburg—Ch. alf. $33, mostly from Kans. City.

SOUTHWESTERN.—Ft. Worth—Dmd. increasing considerably especially for best grades, prices stronger. Buying from N. Tex. and Ariz., No. 1 alf. $30, No. 2 $25@27. Oklahoma City—Alf. offered 25; bid $23. El Paso—Ch. alf. offered $27. Shreveport, La.—Alf. stks. fr. Houston—Rcts. practically nil, quoted $30@32 basis Houston for ch. grades.

ALFALFA SITUATION.

ALFALFA PRICES FIRM.

KANSAS CITY.—Alfalfa hay remains firm. Conditions are such at the present time for a good fourth cutting, but even with a large crop of this cutting we do not anticipate lower values. —*Nelson Grain Company, by E. L. Barr, Kansas City, Mo.*

Stock Hogs Estimates.

The total number of stock hogs in the United States on Sept. 1, 1919 and 1918, is estimated by the Bureau as follows (the numbers are given with final 000 omitted; percentage figures indicate the relative number Sept. 1, 1919, compared with Sept. 1, 1918):

State.	Sept. 1, 1919. Pct.	No.	No. Sept. 1, 1918.

Failure to obtain cars in Western Nebraska has caused thousands of bushels of wheat to be dumped on the ground. The elevators are full to overflowing and shortage of cars coupled with an embargo on wheat to Omaha and Kansas City has proved a serious menace to the crop which is now in danger of rotting.

Sweetened Feed for Energy

Molasses feed returns full value in increased energy and weight. Feeders are rapidly learning that it goes far toward replacing the more expensive grain feeds.

Cane Molasses

Domestic and Imported

mixed with the cheaper parts of the grain make an all-'round well balanced ration for maintenance, work or fattening.

We can supply molasses on short notice in any quantity.

American Sugar Refining Company

Molasses Department

New York Chicago New Orleans

Hay Department

Big Timber, Mont., reports a recent sale of 700 tons of hay at $25 per ton.

Feeders of Teton County, Mont., have been buying hay for stock unbaled in Minnesota which will cost about $23 per ton laid down in Montana.

"Pastures, all young and newly seeded grasses and alfalfa were benefited last week by the rains and warm weather," says the *Weekly Weather-Crop Bulletin* of Iowa.

The Oklahoma tame and prairie hay crop is said to be an especially good one this year. Condition throughout the season has averaged 96 per cent or above and indicates an average yield of two tons for the former and 1.10 tons per acre for the prairie crop.

A stock shipper from Graybull, Wyo., says that fully half the cattle in that section are still to come forward to market. Water however is very low in the streams and ranchers, even those with water rights, got only a part of a hay crop. Those with the very best irrigation obtained only one cutting of alfalfa.

No thrifty farmer nowadays lets straw go to waste, for it is much too valuable. Fresh oat and wheat straw constitutes a very fine roughage in the ration of stock during the winter and used as bedding for livestock it proves highly satisfactory as it readily absorbs the liquid part of the manure which is so valuable as a fertilizer.

The harvest of hay and general forage crops made good progress during the week ending Sept. 23. Pastures, ranges and meadows were benefited by rains of the present or previous week over the greater part of the country," says the *National Weather & Crop Bulletin*, "although drought conditions still continued in some Southeastern, Northwestern and extreme Western states."

The Forage Branch of the War Department has given notice that owing to excessive shipments of hay on contracts Government purchases hereafter will not be accepted at purchase order prices unless the matter of overshipment is taken up with the zone supply officer with a view to adjustment. Where overshipments have been made instructions will be issued to reject the excess or to unload at a discount to be fixed later.

Weevil has been discovered in the Idaho hay by the state agriculturist and according to Portland hay dealers an embargo has been placed against hay grown in certain sections of the state, particularly the southern part. Last year only the alfalfa hay grown near the Utah border was infected, but the weevil are said to have traveled north by the millions and to have reached the central part of the state. Some dealers believe timothy grown in the extreme northern part of the state should not be ruled against, but this is generally so high priced that local market does not care for it. If this situation in Idaho is as serious as first reports indicate, it means that hay will be high on the Coast during the coming winter. This situation will no doubt make it harder for the dairymen, who are already paying high prices for feed.

KANSAS CITY HAY NOTES.

SANDERS SOSLAND, CORRESPONDENT.

Indications are that Texas and New Mexico will be called upon to winter a larger number of cattle than expected, owing to heavy shipments from the Northwest and from Kansas. This interests the hay trade of Kansas City because of the influence of local consumption in Texas and New Mexico on the general trade of the South.

Labor unrest in industrial centers is not yet affecting the hay trade directly, but it is realized here that, in the case of alfalfa especially, the market is influenced by general business conditions. Improvement in labor conditions mean a better demand for the products of live stock, while lessened industrial production will wield a bearish influence. The lack of labor is felt in the market through interference with plans for harvesting and baling hay in the Southwest.

Owing to the spraining of an ankle, C. D. Carlisle of this market, who is vice-president of the National Hay Association, is using a crutch temporarily. Mr. Carlisle is recovering rapidly, however, and his many friends hope that he will soon be back to normal.

Drouth conditions in Missouri and Kansas were relieved the past week by liberal downpours, while Oklahoma continues to complain of a lack of moisture for growing crops. The weekly reports of the various weather and crop bureaus of Southwestern states follow: Kansas—"The drouth was thoroughly broken early in the week in Northern and Western Kansas by general and soaking rains, which totaled four to eight inches. The South-central and Eastern counties had less than an inch of rain, many less than a quarter of an inch. Temperatures were considerably above normal." Missouri — "The amount of moisture varied between two and three inches in the northern half, one and one-half to two inches in the southern half, and three to four inches in the eastern Ozarks and southern lowlands. Alfalfa, other late forage, and pastures were greatly benefited." Oklahoma—"Warm weather prevailed during most of the week with decidedly cool temperatures late. The sunshine was inadequate for growing and maturing crops. Rains were general in the northern half but were light. Pastures are dry in most of the northern portion but are in good condition in the southern counties."

"The Southeast is not buying hay on as liberal a scale as earlier in the season," declared L. C. Worth of the L. C. Worth Commission Company, large hay handlers and feed manufacturers in Kansas City. "The Southeast until a few weeks ago has been obtaining practically its entire requirements of hay from Oklahoma and New Mexico, but supplies were soon exhausted in these states. The result has been that buyers were forced to turn to Kansas, Colorado and other surrounding Kansas City territory for its alfalfa. There is a difference of about $3 a ton between the freight rates on hay from Kansas City territory and from Oklahoma and New Mexico, and naturally the South and Southeast are somewhat hesitant to continue purchases on the higher range. The hay is of practically the same quality. It is known that the Southeast is short of hay, this being indicated by the fact that buyers of that territory were making purchases in Kansas C immediately after the new crop m ment was inaugurated. So it must e the market at some time. The l of Southern demand is not so m felt at the moment, owing to the sc ity of good quality alfalfa availa the variety so much demanded."

Additional appeals for cars to rel the shortage of freight equipment w out of the Southwest the past w The situation is as serious as at other time this season, if not more stricting in its influence on the ma for hay and other commodities. movement of hay and all other c to Kansas City is affected. There many points in Kansas which are periencing virtually a scramble for In Western Kansas thousands of b els of wheat are reported piled on ground at shipping stations awai the arrival of equipment. It is obv that in a situation of this character, hay dealer is hapdicapped in obtai his allotment of cars. The Un States Grain Corporation is require pay interest and insurance charge wheat in country elevators every w when it is impossible to move ou per cent of the grain from any g elevator. Its influence is there probably in the direction of obtai more cars for wheat, but it is n ing with little or no success in imp ing the situation. Hay interests loading cars heavily to make the of the available supply of equipme

THE HAY SITUATION.

HAY ALL SHIPPED—FEED SCARCE.

ONNELLSON, ILL. (5).—The hay is al- all shipped out of this section. lows are damaged by dry weather. ie bulk of wheat also has been ped, corn is very, very poor, and e will be lots of feed bought through section this fall and next winter.— *Shult & Son, formerly Donnellson ator Co., Donnellson, Ill.*

NEW YORK STATE HAY.

BURN, N. Y.—We have a large crop ay throughout New York state and East. Much of it was harvested r favorable weather conditions. e of it was cut a little late. About usual proportions of the new crop already moved. Our farmers are selling freely now. The farmer is busy harvesting his fall crops, and ittle time to attend to the market- of his hay.

th the lessened demand in our ern cities for horse hay and the uncertainties in the trade, the et constantly has a weaker under- than is conducive to good busi- The fact that very little old hay carried over, with the farmers' un- agness to sell at the lower prices the cost of production, which was high this year, we do not believe hay prices in general can go much lower than they now are, and for reasons above mentioned we do not believe that they will go "awfully high." We believe that our best hay will be worth basis of our present market pretty generally through the season, although we realize that it is pretty early yet to predict what far future conditions may be.—*B. A. Dean & Son, Inc., by A. H. Dean, Auburn, N. Y.*

Baling is well along in the more southerly states, very little in Iowa and New York. Farmers in the Central States are holding hay and cars are reported short. Prices are generally reported "in line."

Corn cutters in one section of Ohio are demanding $9.00 a day with board.

Hay Markets

NEW YORK.

Sept. 26.—The New York Hay Exchange reports the New York hay market as follows:

	Hay, tons	Straw, tons
Receipts for week.....	4,465	260
Receipts last week.....	4,508	300
Receipts Sept. 1 to date....	15,634	950
Receipts same time last year	25,113	1,470

Offerings of hay have been ample at all harbor points and heavy at some points, and the situation is irregular and, as a whole, barely steady with values averaging a little lower than last week. New invoices are showing no increase despite the removal of the New York Central embargo last Friday, but trade has been disappointingly slow.

One or two cars of prime western hay were on the market the past week, one car working out a few days ago at $37. At the close $35 is generally regarded as top. In No. 2 timothy business above $32 is

No. 1 rye straw	16.00@17.00	.....
No. 1 oat straw	@14.00	.....

CINCINNATI.

Sept. 30.—The local hay situation showed no betterment over that of a week ago, in fact the dullness was more pronounced with prices for all descriptions from 50c to $1.50 lower. The South is not drawing very largely on supplies from this market, being reported as well filled up with cheaper hay from Western centers, and no promise of marked improvement is expected until these stocks, mostly of inferior hay, are materially reduced. The demand for choice timothy, No. 1 alfalfa, and an occasional car of good clover continues active, and offerings in most instances brought better than current values. The movement was light, and recent accumulations in terminals about cleared. Receipts for the week totaled 161 cars. Cars in the terminals Saturday, 21.

Timothy—No. 1, $28.50@29.50; standard, $28@28.50; No. 2, $26.50@27.50; No. 3, $23@25; threshed, $15@18. Light clover mixed, $26.50@27.50. Clover mixed—No. 1, $26@27.50; No. 2, $24@26. Clover—No. 1, $33@33.50; No. 2, $31@32. Sample, grassy, $23@24. Local alfalfa—No. 1, $34@36; standard, $33@34; No. 2, $31@33. Straw—Wheat, $8@9; rye, $11.50@12.50; oat, $8@9.

DES MOINES, IA.

Sept. 27.—Receipts of hay have been somewhat lighter during the past few days but the quality of Western hay has been very poor. Prices have been holding strong for all grades. There is a big demand for the better grades of hay now. There may be a temporary shortage of better grades of hay unless receipts are more liberal next week.

FORT WORTH.

Sept. 27.—The feature of the week's dealing in hay has been the number of cars of alfalfa cleared and now on track. With the figures not available, railway freight offices say that the amount of alfalfa now moving is abnormally large. Demand is chiefly for Arizona, although Texas is in good demand. Owing to the unusual rainfall in west Texas, the grading is below normal and below contract. Johnson grass is in poor demand, but the call has broadened for north Texas prairie, chiefly for the local market.

Quotations: Alfalfa—No. 1, $30; No. 2, $25@27. North Texas prairie—No. 1, $22. Oklahoma—No. 1, $25.

NEW ORLEANS.

Sept. 27.—Receipts of hay have been heavy the past week and prices range from $34@35 for No. 1, $32@33 for No. 2, and $30@31 for No. 3. These prices are for spot hay and hay officially graded and weighed.

MILWAUKEE.

Sept. 27.—The local hay market rules easy, the new crop, which has been slow in getting started, now being received in increased shipments. Choice timothy and light clover mixed are $1 lower. Current quotations are: Choice timothy, $28.50@29; No. 1, $27.50@28; No. 2, $26@26.50; No. 1 clover, $22@23; light clover mixed, $25@26; red top and timothy mixed, $25@26; marsh feeding, $14@15; packing, $10.50@11; rye straw, $10.50@11; oat straw, $8@9.

DULUTH.

Sept. 27.—It was a waiting game in the hay market. With the good pasturages available in this district and the continued marketing of loose hay from the surrounding country, demand was light. Dealers are still looking for some drops in quotations so that they are holding back in their buying. Quotations are unchanged as follows: Timothy—No. 1, $25@26; No. 2, $23@24. Mixed timothy—No. 1, $24@25; No. 2, $16@20. Prairie—No. 1, $23@24; No. 2, $21@22; No. 3, $16@18. Midland—No. 1, $18@20; No. 2, $14@16. Straw—Rye, $9@10; oat, $9@10.

DETROIT.

Sept. 26.—Scarcity of cars is holding back the hay movement and a firm market is quoted. A few cars come in from Canada, but demand could easily take more. Quote: No. 1 timothy, $29.50@30; standard and light mixed, $28.50@29; No. 2 timothy, $27.50@28; No. 3 timothy, $23@25; No. 1 mixed, $24@25; No. 1 clover, $24@25.

NASHVILLE.

Sept. 29.—Hay trade was of routine character last week. Quotations: No. 1 timothy, $35; No. 2 timothy, $33; No. 1 clover, $33; No. 2 clover, $31. Receipts of hay last week, 15 cars.

MEMPHIS.

Sept. 27.—Hay business continues to drag, but without any appreciable change in prices for the better grades. The lower ones are wanted less and are some cheaper. Demand is very slow, for the interior is feeding its own roughage and recent rains helped pastures materially. Cash No. 1 timothy was $30 bid and $32 asked today on call, while $31 was bid for No. 1 alfalfa. The same in transit was offered at $33, while No. 2 was offered at $27, with $25 the best bid. Receipts of hay are light.

BUFFALO.

Sept. 27.—Some demand has developed for No. 1 timothy, several cars having been sold at $27 track, Buffalo. This was Canadian hay. It is said farmers here are holding for higher prices but there will be little done along this line in the way of speculation as prices are considered too high.

PITTSBURGH, PA.

Sept. 27.—Receipts of hay show some increase over the same period last week and the same week a year ago, with a total of 1,512 tons bulletined at the grain exchange. A year ago the receipts were 950 tons and the week preceding, 1,200 tons. The demand is not pressing, although the best grades are being taken on arrival. The market is easier on No. 1 timothy, in sympathy with the other markets, No. 2 timothy is moving at prices quoted, while good clover and clover mixed are still in fair demand. Cars are scarce in a general way at shipping points and farmers are busy. They do not appear inclined to sell freely at present market prices. Quotations are unchanged.

ST. JOSEPH.

Sept. 27.—The hay market during the past week has been rather bearish, due to the heavy arrival on the various markets of low grade stuff, especially prairie. A further decline is not anticipated, and it is believed the present prevailing prices will hold for some time. The demand for top grades is still in excess of present supply and good hay should come to the market as fast as possible. Nominal quotations follow: Prairie—Choice, $20@21; No. 1, $18@19.50; No. 2, $16@17.50; No. 3, $12@15. Midland—No. 1, $14@15; No. 2, $10@13. Alfalfa—Choice, $30@31; No. 1, $28@29.50; standard, $25.50@27.50; No. 2, $22@25; No. 3, $18@20. Timothy—No. 1, $25.50@26; standard, $23@25; No. 2, $21@23. Clover light mixed—No. 1, $25@26; No. 2, $21@22.50. Clover—No. 1, $22@23; No. 2, $18@20. Straw, $8@8.50.

OMAHA.

Sept. 27.—Receipts of both prairie hay and alfalfa light, and the demand continues quiet. Market easy with no change in prices. Upland prairie—No. 1, $19@20; No. 2, $15@17; No. 3, $12@14. Midland prairie—No. 1, $18@19; No. 2, $14@16. Lowland prairie—No. 1, $13@14; No. 2, $11@12; No. 3, $8@9. Alfalfa—Choice, $30@31; No. 1, $27@29; standard, $25@27; No. 2, $22@24; No. 3, $17@19. Straw—Oat, $9@10; wheat, $8@9.

BALTIMORE.

Sept. 27.—The hay market is about steady at the late decline with a fair demand heard right along for desirable grades of timothy and light mixed hay and no oversupply of such stock offering. Ordinary, low grade, and bad order hay is in ample receipt and, when salable at all, such usually goes at low figures.

Straw of all descriptions is well sustained in price under light stocks and a fairly constant jobbing demand. Quotations follow: Timothy—No. 1, $31; standard, $30.50@31; No. 2, $30; No. 3, $25@28. Light clover mixed—No. 1, $30; No. 2, $27@28. Clover mixed—No. 1, $28@28.50; No. 2, $25.50@27.50. Clover, nominal—No. 1, $27; No. 2, $25. Sample hay, $20@22. Straw—No. 1 straight rye, $17@18; No. 1 tangled, $14@14.50; No. 1 wheat, $12@13; No. 1 oat, $14@15.

KANSAS CITY.

Sept. 27.—With the exception of an advance of 50c on fancy grades of prairie, no price changes were recorded in the hay market in Kansas City this week. Car shortage is a restricting factor in the movement, the receipts amounting to 790 cars, compared with 1,041 cars last week and 893 a year ago. Poor quality hay continues to comprise the bulk of the offerings, and it is probable that fancy grades will be scarce until relief is had from the present acute shortage of cars in the Southwest. Shipping demand for alfalfa is moderate, but Southeastern orders have recently dwindled. The East and North are taking liberal quantities of hay. Stock yards demand for prairie is of fair volume. Good quality timothy met with a strong demand, but more or less weakness prevailed on the cheaper grades. Straw was unchanged.

Prairie—Choice, $20@21; No. 1, $18@19.50; No. 2, $16@17.50; No. 3, $10@15.50; packing hay, $8.50@9.50.

Midland prairie—No. 1, $13.50@15; No. 2, $8.50@13.

Alfalfa—Choice, $30@31; No. 1, $28.50@29.50; standard, $25.50@27.50; No. 2, $22.50@25.50; No. 3, $18@20.

Timothy—No. 1, $25.50@26; standard, $23@25; No. 2, $21@23; No. 3, $16@20.50.

MONTREAL.

Sept. 26.—Canada has a good crop of which is none the worse for having a lare of clover and timothy for feeding rses at home, although for export it not be as much sought for. A few of good No. 2 hay have been shipped e American market from the south and judging from the fact that ate shipments have been made, one naturally conclude that the prices ed on the first cars were satisfactory. ding the crop in this province and n Canada, from all accounts it is and the quality a good average, alhere is a shortage of No. 1 timo-

receipts of hay during the last week ntreal were 4,246 bales, against 3,265 for the same week last year.
market is quiet but steady. Farmers olding for $20 f. o. b. at country n. Here No. 2 hay is quoted at $22 nd we hear of shipments being made country points on the south shore American market at $22 f. o. b.—Bulletin.

PHILADELPHIA.

Sept. 27.—Strictly choice No. 1 hay is and when offered sells readily at otations but there is a liberal supply lower grades and with only a moddemand prices are weak and unand quotations are about $1 lower week ago. Wheat and oat straw good request and firm under light s, but aside from No. 1 tangled rye, is wanted, the market is quiet and l.
thy hay—No. 1, $31@32; No. 2, $28 No. 3, $24@27. Clover mixed hay—mixed, $28@30; No. 1 mixed, $26@raw—No. 1 straight rye, $14; No. 2, 13; No. 1 tangled rye, $13; No. 2, .50; No. 1 wheat straw, $12.50@13; $11.50@12; No. 1 oat straw, $12.50@ 2, $11.50@12.

BOSTON.

Sept. 27.—The local hay market shows rable weakness and prices generallower. While receipts during the eek were not heavy, arrivals were han equal to the demand, with the that there is some excess of supfering at the various railroad terfor which there is little demand. eather during the past week has unfavorable for the movement of t only locally, but in all New Engnd receivers report little demand w sales. Buyers are only purchasmeet pressing needs in the expectaat they will be able to buy at lower by holding off. This they have been do, the market ruling lower each succeeding week. There is considerable pressure to sell on the part of receivers and even the prices quoted are being shaded in some instances. The bulk of the No. 1 timothy hay in large bales offering on the market is quoted at $33 per ton, although an exceptionally nice car, if wanted by the buyer, would possibly bring $1 per ton more. Small bales are quoted at $31@32, few sales being made at the extreme quotation. No. 2 timothy ranges at $30@31 for large bales and $28@29 for small bales. No. 1 Eastern is lowest at $28@30, with No. 2 Eastern at $24@27. No. 3 hay is unchanged at $23@24. Clover mixed, all grades, is offered at $25@28, and fine hay at $22@25, according to quality. Receipts for the week ending Sept. 27 were: Local, 98 cars.

The market on rye straw is quiet with prices unchanged at $17 per ton as an extreme quotation. Oat straw a shade firmer at $14@14.50 per ton. Receipts for the week ending Sept. 27 were: Local, 3 cars.

ST. LOUIS.

Sept. 27.—Receipts of hay during the past week have shown a heavy falling off. Receipts consisting principally of medium and common grade timothy and clover mixed.

Timothy hay market is ruling steady. There continues an excellent local demand for the better grades of timothy, also a fair shipping inquiry for standard and good No. 2 hay, but the lower grades are dull and slow, there being considerable poor hay on the market unsold.

Light clover mixed hay continues to rule firm, with a good demand for the better grades of light clover mixed. Off color and dark clover mixed is dull and slow.

Heavy clover mixed hay continues to rule firm on good bright heavy clover mixed hay containing at least ½ clover. Off grade and dark clover mixed is dull and slow.

Poor clover hay firm under very light offerings and excellent local demand for the better grades, low grades dull.

Alfalfa hay continues to rule firm on good bright leafy alfalfa suitable for dairy hay. Milling hay is rather quiet, the mills being well supplied and are holding off, anticipating lower values. The dullness in the milling trade is due to the heavy decline of over $18 a ton in corn prices.

Prairie hay market ruled steady, offerings moderate and demand good for selections, but the lower grades are quiet and difficult to place. Timothy—No. 1, $30@32; standard, $29@30; No. 2, $24@26; No. 3, $20@23; threshed timothy, $12@15. Light Clover Mixed—No. 1, $27@28; No. 2, $23@25. Heavy Clover Mixed—No. 1, $28@29; No. 2, $23@25. Clover Hay—No. 1, $31@32; No. 2, $27@29. Prairie Hay—Choice, $25@26; No. 1, $24@25; standard, $22@23; No. 2, $18@20. Alfalfa Hay—Choice, $35@36; No. 1, $33@35; standard, $31@32; No. 2, $26@28. Straw—$7.50.

CHICAGO.

Sept. 30.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Sept. 27, also the total receipts and shipments of hay from Jan. 1, 1919:

	Sept. 27, 1919.	Sept. 20, 1919.	Sept. 28, 1918.
Total receipts	5,436	4,166	6,899
Total shipments ...	314	393	655
Rcpts. since Jan. 1.	179,771	174,335	240,237
Shpts. since Jan. 1.	37,473	37,159	69,509

In the face of heavier receipts the hay market last week had a weak tone, and as the test below shows, prices are lower. The trade believes, however, that it is only a matter of time until prices go up again, inasmuch as receipts continue very light. It is a general remark that farmers will not bother with hay while putting up corn. For this reason if those who can move anything are likely to find results very pleasing.

Quote Monday as follows: Timothy—No. 1, $29@30; standard, $28@29; No. 2, $26@27; No 3, $22@24; sample, $18@20; threshed, $10@12.

Clover—No. 1 light, $26@29; No. 1 mixed, $25@26; clover, $23@26.

Prairie—Kansas and Okla., $20@24; Ia., Minn, Dak., $15@24.

Marsh Hay—Feeding, $13@15; packing, $10@12.

Straw—Rye and oat, $10@10.50; wheat, $7@8.

The *Michigan Weather & Crop Bulletin* says that warm, heavy rains have effectually broken drought in that state. Soil is now in excellent condition for winter rye and winter wheat seeding. Early seeding has germinated nicely and some is already above ground.

It is commonly known that the steel companies have taken extraordinary measures to improve working conditions, the comfort, health and welfare of their employes. The average citizen of this country, and business, large or small, interested only indirectly, but still vitally in the big issues affecting labor and always compelled to suffer serious loss and demoralization as a result of big strikes, are disgusted with these recurrent demands of labor leaders. Recent press reports say the daily earnings of the common labor averages $5.00 per day, and quote also rates of earnings for the skilled mechanics that are on a par with those high grade executive officers in important branches of trade and of most bank presidents.—*Pope & Eckhardt Co.*

Visible Supply of Corn.

Official statement of the visible supply of corn in the U. S. weekly, compared with same weekly dates of previous three years:

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Sept. 29.—Trading in provisions last week was of fair volume, with prices covering a liberal range. Closing trades were at well toward the highest of the week with gains of $2.30 on October pork and unchanged for September, the business being entirely in October. Lard is up $3.15 to $3.20 for the near futures and $2.10 for January, and short ribs 80 to 82½c on the near futures and $1.50 on January.

About 90 per cent of the trading was concentrated in lard. The big packers at times supported the market when needed and were also sellers on bulges to keep the market well in hand. Many of the smaller packers sold on the advances to hedge against the output of their packing houses. Values were strengthened at times by reports of eastern and export inquiries for lard and meats, especially for lard, and a little business was done, but although the domestic trade was slow and discouraging, taking many of the reports from the packers. Others, however, were a little more optimistic. Sentiment on the whole was bearish. The speculators are talking 10 to 12c for hogs by next February. Hog supplies were fair and prices moved irregularly with the trend downward.

Business in short ribs and meats generally was light. Considerable long stuff came out on the strong spots. Indications are that packers are making a few more short ribs than of late and there appears to be plenty of product for all demands at present. Advices from Europe continue discouraging, which is natural, as they are trying to buy as cheaply as possible. Foreign exchange rates were higher, but not enough to be a material factor in export buying. Of the 500,000,000 lbs. of hog products held abroad as reported by Mr. Hoover, Great Britain is said to have 300,000,000 lbs. It is said to be enough to supply the country until January. The statement was confirmed by a Liverpool provision operator who was here the past week. Shipments from Chicago for the week were of liberal volume and nearly equal to those of last year, there being an increase in lard.

A Chicago packer does not take the same gloomy view of the situation that some of the others do. He says that there will be a demand for all the meats the world has. The main thing is the lack of financing. Consumption of bacon in Great Britain is the largest known. No country, he says, can be prosperous without producing, and as we are producers and have a surplus, it is necessary for us to give credit, as it is the only way to do business. Credit has to be extended at all times and under present conditions it is more so than usual. We will get our money back in time. As to the future supplies of hogs, it is too early to make definite calculations, although a number of state reports indicate a shortage, but September returns are more or less deceptive.

Cleveland	9.00@15 00	4.50@ 8.50

The Department of Agriculture advocates the saving of all ashes from the wood that will be burned this winter. Scarcity of coal will undoubtedly increase wood as a fuel this year and all the resultant ash should be utilized as fertilizer for it is rich in potash.

Hog Slaughterings.

Special reports to THE PRICE CURRENT-GRAIN REPORTER show the number of hogs packed since March 1, 1919, at undermentioned places, compared with previous year:

	To Sept. 27, 1919.	To Sept. 29, 1918.
Chicago	3,741,600	3,774,100

Live Stock Markets

CHICAGO LIVE STOCK.

CHICAGO, Sept. 29.—Highest prices beef this month were paid the last week, several loads selling Friday at $17.90. They averaged 1,438 lbs. Choice yearlings sold early in the week at The top price on Friday was 70c higher than a week ago and $1.40 above a price a month ago, and $2.05 above a of a year ago. Average price of steers for the week was $15.60, compared with $15.25 the previous week and $15.40 last year.

A feature of the week was the active demand for feeders, buyers being from nearly all the leading eastern states as well as from the Central West. They took good western cattle with increased freedom, paying $11 to $13.25 for the best of them. As there has been a break of $2 in the price of stockers and feeders of late and prospects of low prices for corn, and the best quality of corn in recent years, feeders are being encouraged to operate. Prices on cattle have advanced $1 per 100 lbs. from the low point of the previous week and fair to medium stock is 50 to 75c higher. Common grassy steers sold around $7.50 to $8 and good Wisconsin lots at $12 to $13. Choice Montana grassers brought $14 to $15 and there were some Montana stocks that had been on the road over a week. Butchers' stock ranged at $10 to $14, cows heifers bringing the top, while canner grades were around $5.50 to $6.75.

Supplies of cattle at the leading markets were less than the previous week and materially under last year's, while the run of hogs and sheep exceeded the previous week at the leading markets and were under last year's.

Hog prics were irregular, with the top for the week $18.30, and at the close $17.90. Average for Saturday was $16.55, compared with $17.30 the previous Saturday and $19.30 last year. Average for the week was $17, against $16.90 the previous week, $19.20 a year and $18.90 two years ago.

Packers were fair buyers, taking 97,400 hogs, compared with 85,100 the previous week and 92,400 last year. Average weight for the week was 249 lbs., compared with 249 lbs. the previous week and 242 lbs. last year.

Feeders were good buyers of cattle and lambs during the week, taking about 50 per cent of the total arrivals here. Prices were especially attractive. Moderate advances were made, but cattle $4 lower than a year ago on thin steers. Average for the week on lambs was $14.50, against $14.75 the previous week and $17 last year, while sheep averaged $8.20, against $8.25 the previous week and $11.65 last year. Demand for aged sheep was slow.

Estimated receipts at Chicago last week are: Cattle, 67,000; hogs, 110,000; sheep, 170,000. Receipts last year were: Cattle, 78,000; hogs, 125,000; sheep, 184,000.

Kansas City Live Stock Mark.

Sanders Sosland, Correspondent

Kansas City, Sept. 27.—A rally in cattle market was the outstanding development in the trade in live stock in Kansas City this week. Prices of cattle 50 cents, to $1.50, with the sharpest on stockers and feeders. There was crease in receipts, the arrivals being 20 per cent lighter than a year ago run of hogs showed a slight increase prices were mostly a shade better. were irregular.

In the hog market the close was shade better than a week ago after advances the first half of the week. age cost of drove to packers was $17 the close, against $17.15 a week ago for the week was $17.75, compared $17.50 the preceding week and $2 year ago. Butcher and light weight in best demand, but the tone of the ket for heavy hogs improved. Pigs strong, and stock hogs were as much 50 cents higher, sales being made stances at $17.50, practically at the level as finished porkers. The trade not believe such a price advisable, fact that feeders are paying it ref

the wide range $5.50@8.50.
cline in the general beef trade has
he stocker trade, and but a small
of cattle has gone back to the

eceipts have been about cut in half, the week's total being 3,200 against 6,500 for the previous week. Values have remained about steady since the early advance of 15 to 25 cents, the top then standing at $17.55. The closing top was $17.30, but the hogs were far inferior to the good ones that made the high point of the week. The bulk of the week's selling has been done within the range of $16.50@17.25. Pigs are 50 cents higher for the week. These for stocker purposes. Packers are paying only steady prices.

Sheep are arriving slightly in excess of receipts for the preceding week, but this is accounted for by shipments direct to packers. The bulk of the sheep now arriving are in the stocker classes. The market shows some strength as the week closes, spring lambs making $15, yearlings $12@12.50, breeding ewes $10.50@13, stocker wethers at $10, killing goats $7@7.50, stocker goats around $5.

St. Louis Live Stock Market.

National Stock Yards, Ill., Sept. 27.—The receipts of cattle this week were the lightest of the season and a comparison with the corresponding week of last year shows a decrease of something like 17,000 head. Nothing choice or prime whatever was offered for sale during the period. The best heavy steers we had sold for $15.75, and the best yearlings for $16. The market, regardless of the shortage of good cattle, advanced rapidly all the week. At its close beef steers and yearlings are a full dollar higher than the low time of last week and on butcher stock and she stuff generally, including canners and cutters the advance is as much as $2 in spots. There was a moderately light call for stockers all the week and the market in this division ranged 50c@$1 higher than the previous week.

The hog market has been holding to a very steady basis for the past two weeks but in the last two days this condition has changed and a decline of 75c&90c is recorded. Our hog receipts are about normal and the quality of the offerings fair. Regardless of the ordinary volume and the decline in prices, clearances have been very good indeed. The week's closing quotations are: Mixed and butchers, $17@17.50; good heavies, $17@17.25; rough, $13.50@14.75; light, $17.20@17.50 pigs, $13.50&16.75, bulk $17@17.45.

The sheep and lamb market has been a rather slow and inactive affair all week. Prices have held to a fairly steady basis but common and cull classes have not found very ready sale. What few lower quotations are made are mostly in the poorer kinds.

Oklahoma Live Stock Market.

Thusnelda Haehnke, Correspondent.

Oklahoma City, Sept. 27.—The cattle market began with a rather uneven run which continued throughout the week. Packers cleaned up early and were paying stiff prices, some stuff going 15@25c higher and steers were called 24c higher for the week. Quality of steers has not been very good. Several loads selling up to $10.25, which is at least 25@50c higher than they would have brought last week. Steers selling from $9@9.50 are also showing an advance.

This market on she stuff continues to show an occasional dash of strength and packers today acted first rate on this class, while on steers their conduct deserved no special mention. However, compared with Northern markets these well-wintered grassers are doing pretty well, which is not saying a half mouthful. We have had a very active market on calves, all grades selling rapidly with values anywhere from strong to 50@75c higher. Quality of calves this week as a rule has not been very good. Several bunches of calves sold up to 14c, but the most advance has been on the heavier grades.

Packers are fighting the $18 basis at all markets, few holding to this figure through Friday's sales. Compared with a week ago hogs here are around 25c higher, though light mixed and others selling under $16.50 are not much better off. There was a bad break here a year ago, the top dropping to $19.55 on a 25@40c decline. The top was $17.25 on average finished butcher hogs this week. Quality was good the last of the week. Stockers are steady, some making around $15 towards the close of the week.

Denver Cattle Market.

Denver, Colo., Sept. 26.—Monday's run of cattle was heavy, around 7,000, but about normal for the season since. Generally prices are 25c lower than last week's close, and the break affects all closses. The heavy runs East, labor conditions and inability to furnish cars on the part of the railroads have all had a part in lowering prices. Typical prices about as follows: Horned beef, $9@12.25; killers, $7.10@9; feeders, $7.50@10.40; stockers, $7.50@8.40.

Canadian Livestock Market.

Winnipeg, Sept. 27.—The livestock market was dull and uninteresting throughout the week and there was a decided tendency towards weakness all along the line. Good butcher steers were quotable at $10, but the bulk of the offerings went at $8@9.50. Select hogs opened the week at $17, and although this figure held during the six trading days, nevertheless had receipts been heavier it was felt there would have been a still further reduction in values. As it is, the market closed with expectations of declines on Monday.

Movement of Hogs.

LORADO GRAIN INSPECTION.

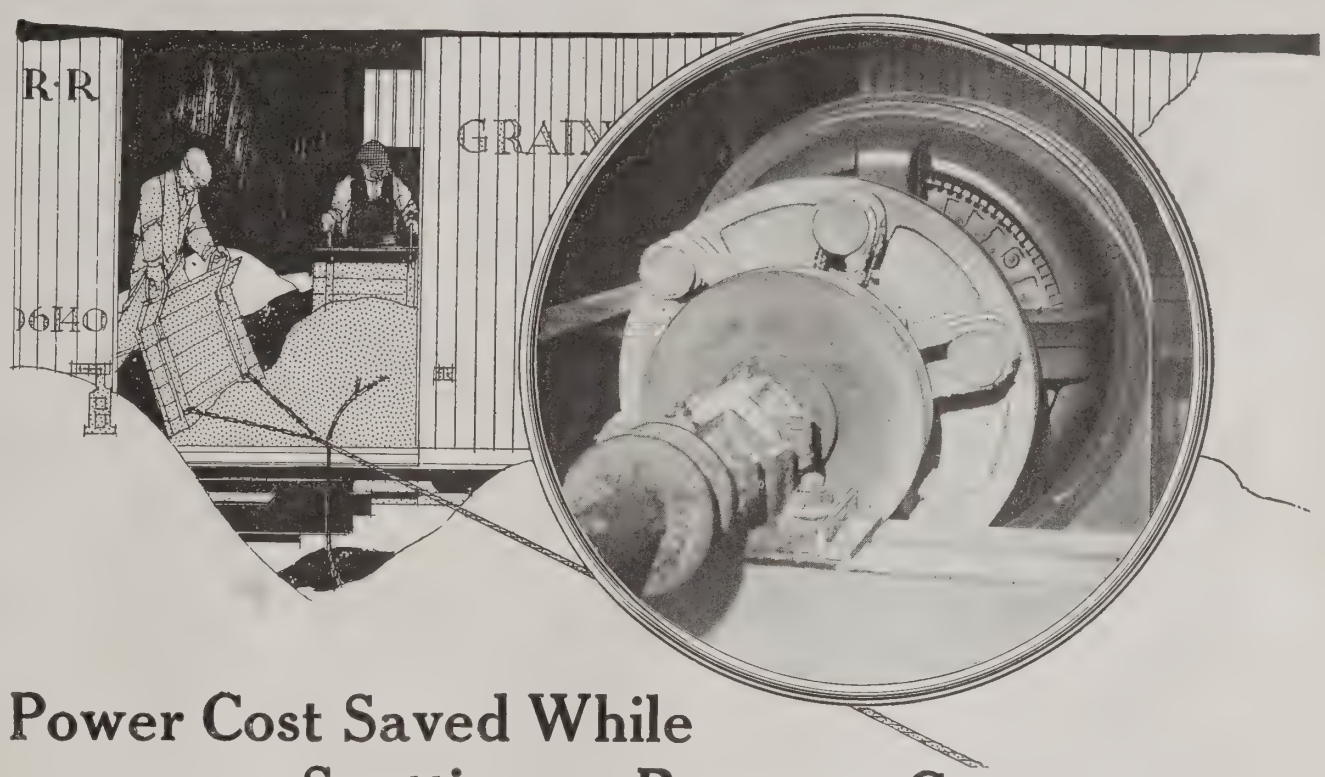
hen the Colorado legislature estab-d a grain inspection system they ly made a law which adapted to er trade practices what had long followed by the grain dealers, rs and feed manufacturers of this ern state in their transaction with lar merchants in Colorado and out- states. Colorado's grade stand- now conform to Federal standards inspectors are licensed. The rules ide for the farmer an appeal over ited grades. L. C. Hine, Federal n inspector for Colorado, with a equipped laboratory in the Cooper ., states that something over 500 n inspectors are to be licensed in state. They are mainly the buying ts for elevators and mills in the . The usual fee of $1.00 on appeal arged for referee inspection, to be by the appellant if the first in- ion is held to be correct by the sed inspector if the grade is ged.

. Hine and his department, with known mechanical device, is set- an excellent example for the trade ghout the state and invites in- es from those who may read this le as to the proper procedure with ng type samples, taking samples cars and other minutiæ and the cation of Federal grades to all actions, with penalties for viola- must be recognized. The "Down- law in Colorado further provides millers shall deliver to the seller creenings from his product unless wise agreed.

llowing is in substance an act led an act providing for a state inspector, local grain inspectors he inspection of grains in the state olorado, and to harmonize state and al grain inspection:

. 1. That any person, firm, com- association or corporation foreign omestic, who makes a business of ng grain, wheat, corn barley, oats or from the producer shall on and af- uly 1, 1919, be required to buy the on Federal grades, and the pur- ng agent of each and every person, company, association or corpora- dealing in grain shall secure a li- from the Chief State Grain In- or to inspect and shall inspect and all grain purchased in accord- with the Federal grades in effect e time of said inspection, except it shall not be necessary for licen- to make a moisture test.

. 2. Any person, etc., found guilty e wilful violation thereof, shall conviction be fined not less than 0, nor more than $500.00, or to have license revoked, or suffer both pen- at the discretion of the court.



. 3. The Federal grain inspector oyed at the Denver Grain Exchange ciation is hereby declared to be the state grain inspector for the state olorado and shall issue licenses to ct and grade grain to the grain rs or agent of any firm, company, iation or corporation, buying from producer. Said licenses shall pro- for the inspection and grading of t, etc., in accordance with the Fed- grades as in force at the time of inspection. The Denver Grain Ex- ge Association shall collect an an- fee of $5.00 from each person re- ng a license to inspect grain, and also receive a fee of $1.00 for in- ion or re-inspection of samples sent is office by any of the licensees. Chief State Grain Inspector shall direct supervision over all licen- and shall when requested re-inspect les of wheat, corn, barley, oats and or any other grains on which a Fed- grade may be established.

. 4. Licensees shall grade all to the best of their ability based ederal grades. If the seller of grain ts to the grade placed on safe by icensee, a sample for re-inspection e chief state grain inspector must aken at the time of delivery and e the load, lot, or parcel of grain uestion has lost its identity, and a sample of at least two quarts in quantity in an air tight container, which both parties to the transaction are agreed is representative of the lot, be forwarded to the office of the chief state grain inspector, together with a fee of $1.00. The findings of the chief state grain inspector shall be final and binding on both parties to the transaction. This fee to be paid by the appellant, when the grade of licensee is not raised by the chief state grain inspector, and by the licensee when the grade is raised by the chief state grain inspector. Provided, that whenever the parties to the transaction cannot agree as to what is a representative sample of the lot, they may select a disinterested party to obtain a sample of the grain in accordance with the instructions issued by the chief state grain inspector.

Sec. 5. It shall be the duty of the chief state grain inspector to mail to each and every licensee a pamphlet containing all Government rules as to Federal grades on all grains on which the grade has been standardized by the Federal Government. It shall be the duty of the licensee to familiarize himself with said rules. If repeated re-inspections by the chief state grain inspector develop the fact that any licensee is unfair or incompetent, it shall be the duty of the chief state grain inspector to make an investigation, and if said chief state grain inspector finds the licensee has been repeatedly unfair or is incompetent, it shall be his duty to revoke the license of said licensee. Party calling for re-inspection shall deposit with the licensee an amount necessary to cover all expenses when the sample is taken.

Sec. 6. Provided, that when grain is offered for sale by sample and when it can be agreed between the buyer and the seller as to value, it shall be lawful to purchase or sell grain by sample.

Most of the flour in this country comes from G-E Motor-driven Mills.

Power Cost Saved While Spotting or Between Cars

WITH direct-connected G-E Motors driving your car grain shovels, all power cost ceases except when shovels are actually in use.

While cars are being spotted and doors opened, while planking is being removed, and between cars, the motor can be shut down by a convenient push button.

The type of motor used has no electrical connections between its rotating and stationary parts and so cannot cause a spark, while an enclosing frame makes it rat-proof.

Leading elevators throughout this country are greatly reducing their costs per barrel by using G-E Motors which have operated for many years with practically no upkeep cost.

WEIGHMASTERS AT ST. LOUIS.

A conference of weighmasters and the grain committee of the National Scale Men's Association wil be held in St. Louis, on Sunday, Oct. 12. H. A. Foss, weighmaster of the Chicago Board of Trade, will preside at this meeting, which will precede the Grain Dealers' National Convention, taking place the following three days. It is the second conference of the weighmasters. The first was held during the Milwaukee convention of the Grain Dealers' National Association. The session of Oct. 12 will convene at the Planters' Hotel.

Walla Walla, Wash., reports Sept. 20 that 75 per cent of the wheat crop of that neighborhood had been sold. The harvest is practically completed, but the grain is moving slowly owing to the longshoremen's strike.

THE PRIVATE CROP REPORTS.

Goodman's (Clement, Curtis & Co.'s) crop report as of Oct. 1 says: "Reports of our correspondents make corn condition 79.6 vs. 77.6 last month. On revised October par value indication of crop of 2,828,000,000 bus. Improvement in north part of belt. Texas yield is heavier than indicated. Dry areas show no improvement. Oats yield 28.5 bus. per acre. Crop of 1,208,522,000, quality reduces value below 1,100,000,000. Spring wheat yield 8.8 per acre, or 200,000,000 bus., poor quality. Winter wheat acreage may be reduced 20 per cent. The decline in the average price of hogs followed the uncertainty of the foreign demand for meats, due to the necessity of Europe for long credits. The fall in foreign exchange has been a detriment to the grain trade, except wheat, as well as to the general export business. When credit arrangements are established some improvement in the outlook may be anticipated and a revival of meat exports, which would be reflected in the demand for coarse grains."

SNOW'S REPORT.

The Snow-Bartlett-Frazier report puts the condition of corn Oct. 1 at 81, against the Snow figure of 77.2 a month ago and the Government figure of 80. The crop is fully matured, of good quality and the indicated production is 2,856,000,000 bus., or about 2,914,000,000 on basis of the Government acreage. Oats threshing continues to reflect disappointing results, the final average yield being reported at 27.8, or a bushel lower than the preliminary showing last month. This makes a total drop of 1,184,000,000 bus. There is no improvement in the reports of quality, the average weight being much below normal. Final threshing returns make the yield of spring wheat 9.3 bus. and total crop 213,000,000. Final estimate of winter wheat, 713,000,000 bus., making the total wheat crop a trifle smaller than the Snow estimate for last year. Yield per acre of barley, 21.9, and total crop 195,000,000 bus., against a crop of 256,000,000 last year. Potatoes, the second in importance among good crops, are a failure in many districts and a full crop nowhere. The production is estimated at only 278,000,000 bus., against 400,000,000 last year by the official return. The crop this year is far below our ordinary domestic requirements.

MILL DUST EXPLOSIONS.

The Department of Agriculture and the Grain Corporation have issued a pamphlet entitled, "Just a Word About Grain Dust Explosions," in which elevator men are interested. The pamphlet closes with a dozen rules for safety with the suggestion that the reader check up the ones he follows, which may be quoted as follows:

1. Keep your plant clean. See that beams, spouting, machines, and floors are free from dust. A dust-free mill or elevator is explosion-proof.
2. Inspect the plant frequently for hot bearings.
3. Keep constantly on the watch for elevator choke-ups.
4. Report any slight rubbing, slipping, or other trouble with belts or machines.
5. Keep all foreign materials from entering the grinding machinery by installing a magnetic separator.
6. Do not smoke while in or near the mill or elevator.
7. Do not carry matches in or near the buildings.
8. Do not allow an open flame, lantern, or torch in the mill or elevator. Dust + open flame = explosion.
9. Do not lower artificial lights into bins to determine the amount of grain, flour or feed they contain. A weighted tape or measured rope will give better results and eliminate the fire hazard.
10. Prevent the accumulation of static electricity on machines and belts by proper grounding methods.
11. See that all electrical equipment is properly installed, light bulbs well protected, and switch and fuse boxes kept closed.
12. Sack the ground material immediately or convey it to bins of small capacity.

Every 2 minutes a National Cash Register leaves the factor

Consider for a moment just what this means

IT MEANS that every two minutes a wide-awake merchant somewhere in the world is installing a modern National Cash Register.

It means that during every ten-hour working day, more than three hundred merchants are convinced that they can conduct their business better with a National Cash Register.

It means that every month in t year more than seven thousa stores are adopting the safe, econon cal, efficient National Cash Regist System.

It means that wherever cash handled or merchandise sold, t National Cash Register System h come to be recognized as t quickest, most accurate, mo economical method of making a recording transactions.

There is a National Cash Register especially adapted for your busine Write today for full information.

INFLUENCES AFFECTING GRAIN PRICES.

Supply and demand are all powerful and ever to be reckoned with as the fundamental basis of prices. Temporary influences may overshadow legitimate conditions for a while, but sooner or later the law of supply and demand is bound to assert itself in a forceful manner. Developments of the recent past seem to warrant the belief that theories, as a market factor, have lost their dominating force and that legitimate factors will, henceforth, dictate the course of values. Among these, the attitude of the producer is attracting unusual attention. Agricultural interests are greatly disturbed over the drop in corn prices and they feel it more keenly, as the articles they are compelled to buy have not declined. The farmer believes that he can ill afford to sell his product at the current level, which, owing to the high cost of production, leaves him little or no profit; hence, the often referred to holding policy that farmers promise to resort to, seems logical enough. The result of such action is now being witnessed in and the movement of this cereal is tically one-half, so far this seaso what it was last year. Corn re are small, because old corn is scarc the new corn not yet available t appreciable extent. Whether the crop movement will equal that o vious years, or assume larger p tions, remains to be seen. Supp receipts are larger than expected, they prove to be burdensome in vi the big decline in prices?—*Simon & Co., Chicago.*

Approximately 5,000 cars, it is mated, are needed to relieve the age in Minnesota alone.

GRAIN WANTED.

GRAIN AND SCREENINGS WANTED—Off-grade wheat, barley, corn or oats, wheat screenings, corn screenings, corn bran, oat screenings, oat clippings, barley screenings, barley chaff or elevator screenings of any kind wanted. Please send samples. BEREND J. BURNS, 324 Chamber of Commerce, Buffalo, N. Y.

WHAT IS HOARDING?

Attorney General Palmer has defined what his Department understands to be hoarding under the Food Control Act. The law, he says, "prohibits accumulation by any firm or corporation in excess of seasonable requirements" and also "accumulation by the dealer in excess of the reasonable requirements of his business for a reasonable time."

As no man can possibly undertake to say what is "reasonable," the Department of Justice further said the Attorney General understands that the law authorizes as "reasonable" the accumulation of stock during a period of flush production in order to meet a reasonable period of scant or no production, which also means very little. Mr. Palmer said: "The Department of Justice has gone no farther than the law and it is not its purpose to treat as hoarding the normal storage of food products by legitimate dealers conducting business in the usual way and disposing of stocks in storage at the usual time upon reasonable margins of profits." The Department of Justice will not tolerate wanton accumulation of food for any purpose nor holding food and other necessities for higher prices, but the Department will use "great care in differentiating between stores held for this purpose and stores held against further need." A special emphasis was laid on this point by the Attorney General.

The attorneys general of various states were called to meet the Attorney General of the United States at Washington on Monday last, and it was expected that they would take up for immediate discussion uniform laws covering hoarding, profiteering and the cold storage of food and other necessities. The present laws, the Department thinks, are totally inadequate for satisfactory regulations of the necessities by the state governments, and thorough revision of state statutes along that line must be made if efforts by Federal and state governments against excessive high prices are successful. Some piffle!

GRAIN RECONSIGNMENT.

Grain interests have asked the Commerce Commission to issue an order directing the railroads to put into effect free reconsignment of grain, inspection of which is reported before 11 a. m. of the day of inspection. In accordance with the terms of the Commission's decision in I. & S. No. 1161, reconsignment case No. 3, this petition was filed because, as the *Traffic World* says grain handlers believe the railroads have had the proposed tariffis suspended by I. & S. No. 1161 and had played a sharp trick when they withdrew the tariff before the last day of suspension, to wit, Sept. 1. By withdrawing the tariffs the carriers left in effect the tariffs that were to have been superseded by the tariffs that were suspended by the Commission. Some of these tariffs give free reconsignment during the first 24 hours after the receipt of the grain held for inspection; some charge $2.00, and a few charge $5.00 for reconsignment; as a rule the charge is $5.00. The opinion of the Commission said that the carriers should rearrange the tariffs submitted by them so as to allow reconsignment if the orders therefor were given before the close of business of the day on which inspection was completed by 11 a. m. The loss, to obviate which the petition is filed, occurs to those who would have obtained free reconsignment on cars inspected before 11 a. m.

Fred Mayer a "Granddad."

Fred Mayer's friends, and they are legion, will be pleased to know that he is a granddad—Fred says, "To the prettiest, plumpest eight-pound girl you ever saw." This is surely a "red letter" day in the Mayer family.

An average yield of over 84 bus. per acre over a 70-acre tract is said to be the record established by a Kittitas Co., Wash., farmer near Ellensburg. The wheat is locally known as Big Club. Other yields of the same wheat in the same locality are reported at 61 bus. on 28-acre tract and another of 73 bus. on a 65-acre tract. Most of the fields are under irrigation. With dry farming conditions averages 35@40 bus. have been reported.

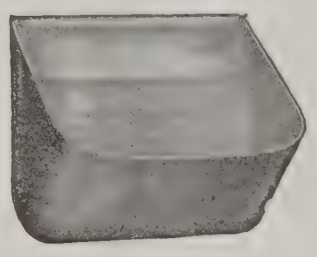
"See How Simply It's Built"

The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.



Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

BUSINESS AND TRADE CONDITIONS

THE great strike is of course still unsettled and continues to develop sporadic lawlessness and public disorder. That there has been comparatively little of this is somewhat remarkable, all things considered; but present immunity, attributable doubtless to the activities of the mayors of most of the cities where the mills are located, can not be expected to continue as the tension increases. This appears in the situation in Indiana, where Gov. Goodrich has found it necessary to use National troops to declare martial law. Judge Gary, in his testimony before the Senate committee of inquiry made it clear that there would be no arbitration of the issue. There is but one issue involved: the control of the industry by its owners for the benefit of the owners and the men who do not desire to belong to the unions and become subject to their jurisdiction and direction apart from that of those mill managers; or control by irresponsible shop soviets directed from above by still more irresponsible and uninterested union officials. Judge Gary made the point of the real issue—the duty of the Corporation to defend the rights of those individual employes who had not joined and did not wish to join the union. If recognition of the union were granted the industry would automatically pass to the status of the closed shop and the liberty of the individual worker as such would disappear. None can question the fact that unionism, as a condition of its assumed and some real benefits to some workers, means the surrender of the individual workman of his liberty and opportunity as a superior workman. He sacrifices himself in order that the whole body of his fellows, good, bad and indifferent, may be benefited by that very sacrifice, which is the *sine qua non* of "collective bargaining." The generosity of the sacrifice may be admired; its expediency or ultimate value to the class may well be questioned.

There was also the second fundamental objection raised by Judge Gary, that unionism means restriction of output. This, in the first place, is an injury to the workman himself, since it must be reflected in the amount of his real wages, and an injustice to the consumer of the products of the industry, since it is preventive of low prices for products, machinery and skill, which the engineering triumphs and managership developed by the industry and developing science in industry would make possible, without, on the contrary hand, necessarily reducing wages at all; rather the contrary. In these positions (which have here been stated rather more elaborately than Judge Gary himself made them) Judge Gary is morally and economically sound.

The universal industrial struggle of the times is conducted by employers against the workmen's policy *per se*, because the highest paid workman who earns his pay is the most profitable of employes, against the workmen-leaders' policy and determination,—the expression of their extreme ignorance of economic laws, and their unfortunate lack of any sense of common honesty—that union men should not earn the wages they are paid much less than they now demand. Lord Leverhulme, one of the wisest and most generous of English employers on a large scale, a man who advocates the six-hour day for at least certain classes of workmen, although himself manages to work sixteen hours, and who knows the present unreasonableness of workmen in general is doing what he can to better the condition of both the soul and body of all workingmen through short hours and better pay, has said:

> And with this widespread unrest there is the most profound ignorance of the very rudiments of the economics of production and of wages.
>
> We may search with painstaking care and attention through the present-day writings of those who attempt to deal with industrial conditions and wages and hours of work, whether the writers be socialists or trade unionists, but we shall search in vain for any recognition of the fact that the economical cost and the volume of the product are all-important factors, or for any reference to the fact that over 90 per cent, possibly over even 95 per cent, of the products of labor are consumed by the employe-workers themselves, and not by the employer-capitalists. So that restriction of output, or the ca'canny policy, can only, whatever might be the rate of wages, make wages nominal by reducing their exchange value when measured in terms of food, clothing and shelter.

It is only a few days ago that Arthur Henderson, the English labor leader, sneered at the calls for greater production as something urged wholly for the benefit of the employer-capitalist—"Why should men work for others?"—and no one was found or can be found in England or among American labor leaders to repudiate this fallacy. It is one of the very foundation ideas that support trade unionism which assumes that prices can be raised at will and *ad libitum* when wages are raised, or that wages can be raised by taking the advance out of the profits of the employers, neither of which view is true other than to an insignificant degree. Both theories are dishonest also because each predicates a taking of something from one class to give without recompense to another class. Moreover, all this is against the public interest which like the workman-consumer himself is vitally concerned in large production and low prices. It is because labor leaders have brought themselves into direct opposition to the public interest by and through the restriction policy of the closed shop that labor at this time has lost public sympathy and that Judge Gary is justified in his position that there can be no concessions by his Corporation which shall recognize a policy which means further reduction of output, such as has been going on in recent years in spite of the improvements in industrial methods, in organization, equipment and means of transportation, which up to 1914 had increased production of steel and made current high wages possible. The working man has been told ever since the war began that when peace comes there will be a new industrial world in which hours shall be short to nominal and wages so high that the standard of living shall be even higher than it ever had been. This can be made true if the product be increased so that the waste of the war as well as the greater consumption of the moment can be made good and provided for; because labor has always an increasing share in an increasing production. In his recent "Wealth and Income," Prof. W. I. King has shown that the "classical economists" were right in emphasizing the side of production, since, "The grim fact remains that the quantity of goods turned out absolutely limits the income of labor, and no reform will bring universal prosperity which is not based fundamentally on increasing the national income."

As the writer of the monthly review by the National City Bank has said, this problem of production is the very core of the universal industrial and social situation throughout the world. On it civilization rests. There can be no distribution or consumption of products until the products themselves exist, and they cannot exist without the labor of man. The Creator probably never intended that any human creature should starve. Nature holds what is essential to man but she offers nothing gratuitously—man may win what she holds, if he can. But demands for higher wages have never opened nature's gift boxes. For any real satisfaction, labor is necessary to fit the products of nature for human use. Therefore, as Lord Leverhulme has said, the problem of today in all the world "can only be solved by increasing wealth and increasing leisure. . . . We are forced therefore to direct our whole energies to the production of more wealth and in doing so we must concentrate on machine power and not on human energy." But the labor leader steps in here and says the world shall not enjoy the full measure of the benefits of this policy. And because this is the issue now Judge Gary is justified in refusing, as the head of the great Corporation, to take part in furthering any such policy or in giving countenance to this form of industrial nihilism.

There has been little or no change in general business which waits only on labor quietude to run into still greater volume. Production and distribution alike are retarded by the endless succession of strikes, which make it impossible to guarantee anything in either direction. The British strikes have stopped the export movement of all products, the shipping board having stopped loadings which might clog the docks abroad on their arrival. The Senate's dallying with the treaty which most of them understand they will "eventually (why not now?") ratify is doing its part also. Meantime winter approaches; the miners threaten stoppage to all industry dependent on coal as fuel, which will bring suffering to themselves and all others. Yet business goes on as it must so long as men are on the earth in considerable numbers; and moreover as the community has a right to exist and will not long sit idly by while less than 4 per cent of the population make the effort to throttle the other 96 per cent, public patience is working to the point of exhaustion.

FEED SITUATION

RECENT rains in the West and Southwest have revived the pastures and given renewed impetus to the cattle feeding game. Everywhere throughout the country, from the Rockies to the Atlantic Coast, the pastures are in excellent condition, green and lush, and the feeder-cattle and sheep trade is again brisk. In consequence of the state of pastures generally, the demand for feeds is not as seasonably brisk, generally speaking, as usual and prices are weak in consequence. Feeders and dairymen have not been as liberal with fall orders for concentrates as expected and the export trade has been rather disappointing because the usual English channels for distribution through northern Europe have been clogged by government control of shipping and of the feed trade itself. Exports of bran and middlings for the first seven months of this year were only 3,707 tons compared with 4,991 in 1918 and 4,853 in 1917; mill feeds, 5,576 tons vs. 7,508, and 17,140 in 1918 and 1917 respectively. There has been of course a large increase in the outgo of oil cakes and meals, as compared with last year, but the exports for Jan.-July, 1919, were not as large as for Jan.-July, 1917. Broomhall's *Corn Trade News*, Sept. 16, said:

> The great shortage of pigs and horned cattle in Continental countries is likely to exert a strong influence on the international grain market this season. It goes without saying that if the animal population is small, there will be little need to use home supplies of bread-

grain and potatoes for fodder, and naturally the demand for overseas feeding stuffs must be on a very small scale. Further, there is also a great shortage of cattle in both Russia and Roumania, therefore these countries do not want to retain the feeding grain they have grown. The smallness of Continental takings of American rye, barley and oats so far has been very noticeable, and in the last day or two we have heard of Belgium offering milling offals to this country. We know, too, that Belgium is not the only Continental importing country which is exporting cattle food to the United Kingdom.

With the exception of cakes and alfalfa meal, all feeds are comparatively cheap, and the buyer may well consider whether it be not the part of wisdom to begin to stock up now to the full extent permitted by the absurd legal ban on "hoarding"—looking out for the future, in other words.

HITTING THE NEGLIGENT

THE Grain Corporation complains that there is a decided tendency on the part of its licensees to neglect answering letters, telegrams and other communications sent out by them; and it is hinted that unless there is a marked improvement in this regard it will be necessary to revoke a few licenses in order to impress the trade with the circumstance that the rules and regulations of the Corporation must be strictly and promptly conformed to.

There have been some suspensions already of licenses for violations of the rules and refusals to license certain dealers who had handled wheat without first taking out licenses and for unfair dealings with the Corporation, as well as for dealing with concerns which had failed to take out necessary licenses. The Corporation does not seem to have been arbitrary. Recently two Wisconsin firms were given six days of grace to complete their records. Dealing with unlicensed handlers is prohibited, although several Chicago flour brokers are reported as persisting in doing so. Their names are withheld for the time being by the Corporation, waiting to see if they will mend their ways.

Now, of course, all realize that these reports are an annoyance, but the law and the rules of the Corporation require them. Why, then, be stubborn and "kick against the pricks"?

CAUSE OR EFFECT

THE mistaking of effect for cause is a common error, but it is the easiest way 'round. A Nebraska elevator man, for example, recently told his local paper that, "I can see no explanation for market conditions for farmers save that high speculative interests are depressing prices of their products by many millions in order to make unwarranted and unjust profits."

It is of course perplexing that, while the reports of the Government indicate only moderate supplies, grain and stock prices should decline to the degree recorded during the past 60 days. But the declines mean heavy losses to holders of grain and contracts as well as profits to "shorts." There must be a buyer as well as a seller when a quotation is recorded as "made." Sweeping price movements either way always have something more behind them than the purposes of a few "high speculative interests." When the markets are open and free from Government threatenings and orders and legal control, price ranges are moderate, except when a crop disaster portends or it is known that (as has been the case for four years) consumptive demand will outrun the known supply, because then the differences of men's opinions as to values can have full force and effect.

Just now the Government is prosecuting men who deal in foods. It is harassing the packers because some people of the Senator Capper type "believe" they are guilty of wrong doing. We would not be surprised to hear any day of grain buyers being indicted for "hoarding" grain they had lawfully purchased but had not sold within the time specified by rules made under the Food Control Act. The quite natural result is that speculators who desire a moderate carrying profit to assume the risks of ownership are reluctant to go into the market; and since the buyer is not permitted to hold his grain long enough to earn carrying charges (for that normally is about all the profit there is in "hoarding"), the market has become largely a cash market and prices are subject to the temporary influences which always affect the cash market and cannot be equalized by the present adjustment of the price to the world's view of what price the entire crop should bring on the basis of supply and demand running over an entire season. The present market is therefore in part controlled by the narrow policy of the Government as regards "hoarding" raw grains and meats and the uncertainty also as to European conditions due to lack of dependable information, which before the war was available for price making purposes. At present the disposition is to belittle the demand from abroad, both because industrial and fiscal conditions are greatly disturbed, because European crop reports look better than anticipated, and because the great European buyers are again able to get and are getting grain from the Southern hemisphere.

So that what our Nebraska friend can find no explanation for is an effect, the cause of which he seems not to have reasoned out.

THE BAG SITUATION

THE jute bag, ever since the war began, has been a serious additional cost to millers, feed manufacturers, seedsmen, Western grain shippers, alfalfa millers and their patrons and others of those interested in the columns of this paper. Prices have been steadily appreciating instead of declining, since the armistice, and there seems no immediate prospect of a change of this tendency. For our trades, the main dependence is on the jute of India, and crop conditions there, as well as shipping conditions from Calcutta and manufacturing conditions for various jute products at Dundee, Scotland, are paramount influences. During the war, the British government controlled absolutely Calcutta shipments of jute and bags as well as the Dundee output of cloth and various products; now the main factor is the crop of jute.

Under ordinary conditions, when the trade is free of control, prices are largely determined by what is termed "speculation" in the goods in this country; and strange as it may seem to those who eschew speculation and call it the prince of evil things in commerce and trade, it is only when the American importer does speculate, that is, buy goods for distant future shipment, that prices in this country are low. In other words, the more speculation there is the lower the prices have been and the less speculation the higher prices are. The reason is that it takes practically four months from the time a buyer places his order to the time he will get his goods from India, and if everybody holds off and is afraid to place orders for future shipment, there is a shortage and what few goods there are in the country bring high prices.

At present, as previously stated herein, the jute supply is subnormal and prices are high for jute products. The high price of cotton is also a factor which sustains the price of the jute bag. There is also another factor which buyers should bear in mind, one of the chief present causes of high bag prices, which is the multiplication of small concerns whose operations have the effect of multiplying profits to be paid by the consumer; and buyers of bags should consider whether the support of these small and more or less ephemeral traders does not do something to keep the prices of bags above what they should be, high as they must necessarily be compared with pre-war levels.

PERHAPS the interesting, or should we say anomalous, situation in rye flour, to which Blodgett-Holmes Co. elsewhere refer, is another evidence of the extravagance of the American common people. Americans have always had the English habit of eating bread with the eye; that is to say, the color of the bread is held to be a criterion of its dietetic quality. Those who may have eaten the "black bread" time during the war because it was cheap, abandoned it on account of its color and becau was cheaper than white wheaten bread and resumed the old habit of buying the more expe white bread or flour as an evidence of their h social position and responsibilities.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures various statistical exhibits appearing weekly in det "The Price Current-Grain Reporter," these figures r senting the past week, the preceding week and c sponding time last year, here assembled for ready r ence:

	Oct. 4.	Sept. 27.	Oct.

EDITORIALETTES

THE *Manufacturers' Record* demonstrates t own satisfaction that the high cost of livi due to the fact that the American farme not increased the production of foods as fast a American population has increased. Perhaps But as the *Record* can't point to a year in r times when the farmer has not been forced to e a part of the surplus of his foodstuffs in ord find a market and get it consumed, the argu that the farmer is not holding his end up do seem to get very far, except to fill columns by s writers.

WET WEATHER during the early part of last w making roads impassable over many Central Western states, afforded an opportunity for elev to clean up and make such shipments to term markets as cars available would permit. U tunately, however, in reducing country ele stocks, the grain dealer has been up against a se problem, many having bought coarse grain above present markets. Others are finding far universally stubborn in making sales at present ranges, as always is the case, as repeatedly call the reader's attention, because in a long stretc declining markets a country-wide belief, or we m say hope, that prices will return to previous levels creates a disposition to not sell at ma prices of the day. It has been estimated tha Northwestern Iowa, for instance, oats would ave about 65c at the elevator, very clearly indicati loss to the owner.

REE DOLLARS a year in the United s and Mexico; $4.00 a year for Canada, United Kingdom, the Continent of e, Australia, and other countries in the rsal Postal Union. Less than a year at ame rate. Single copy 10 cents.

ITERS on subjects of interest to those ed in the grain trade, news items, reports ops, grain movement, new grain firms, grain elevators, contemplated improve- and cars leaking grain in transit are ed.

ADVERTISING value of The Price t-Grain Reporter as a medium for ng the buying power of the grain eleva- en is unquestioned. The character and r of advertisements in its columns tell worth. If you would be classed with ading firms catering to the grain trade, your announcements in the trade's only , which is always first to get the live, date news to its readers.

ERTISEMENTS of meritorious grain r machinery and supply houses and of sible grain firms who seek to serve dealers are solicited.

CAGO, OCTOBER 8, 1919.

GRAIN TRADE REVIEW

s is heard of the high cost of living hat corn prices have dropped mate- from the recent high point. In December corn continues to hover d the sentimental figure of $1.25, ed by the grain trade many s ago to be the price at which the rop would sell. The Government to lower the cost of living by as cost the producer and country dealer much money, but so far nsumer has been unable to note eat difference in his bills. Corn ed and wheat a bread grain, but ter has advanced rather than de- owing to the guaranteed price, nce the only grain that would re- the consumer deriving a direct from its lowering in the price ore or less bearing on the value others. With wheat at $2 and nd corn at $1.25, it does not ap- gh to many, especially with labor nployed at high wages and efforts made to secure further advances. roducer is not interested as he be in political economy and the of organized labor to dictate t shall pay for its bread, and the decline in coarse grains is d as class discrimination. Ef- o talk the price down are made along, but corn is a domestic and demand proposition and ot reflect as rapidly as would any change of importance in for- change or the political situation Foreign exchange is only an t factor in the corn market. e are so many conflicting influ- t work in the corn market now arp fluctuations are expected to rule within comparatively nar- nge for futures, while the cash lvance or decline 5c or more a thout causing any unusual com- Those who should be in a posi- know say that the supply of old ack in the country is much than the trade believes and that all be wanted before the new is o market. The scarcity of cars storage room would seem to pre- big early movement unless the ted happens. Another factor is that the producer is not at all satisfied with the price, and having made considerable money in the past few years he is able to hold for a long time without any inconvenience. The fact that country banks can re-discount "paper" with the Federal Reserve bank is sufficient to show that money can be easily obtained if the producer is inclined to hold.

So far there has been no general increase in offerings of new corn to arrive, although the large crop and the smaller number of livestock on feed is expected to bring out considerable grain before long. Iowa has the best prospect of any state and the reports of offers so far have come mainly from there. The crop has been secured in excellent condition, and with dry and cold weather husking would be rather general within two weeks in some sections of the big producing states. The car that arrived at Chicago on September 29, testing around 26 per cent moisture, shows that the crop is very dry this season, as the average of the first cars in recent years has been much higher.

Whether the corn market can maintain the present level in the face of heavy hedging sales remains to be demonstrated. For one thing, the public are not in the market and only investment buying on a large scale can hold corn prices up with cash grain pressing for sale. The full effect of the Government propaganda will not be fully apparent until later. With the signing of the Peace Treaty, however, restrictions as to quantities are expected to be removed on corn, and the market's action will probably be more normal. Argentine grain has been offered at the Atlantic seaboard far below a domestic parity, and it is expected that the farmers' friends will now demand that action be taken on the bills introduced into Congress to reimpose an import duty on foreign grain useless except as a tax on Eastern American consumers.

After having been in a state of coma for many weeks the foreign demand for oats has revived materially. Taken as a whole oats has more friends than corn, and it is still more or less affected by foreign developments, having for the time being become somewhat of an international grain due to the shortage in Europe. France, Italy and Scandinavia are reported to have been the best buyers of late and free purchases made by seaboard exporters in the West have caused a lot of hedges to be removed. The producer is not selling his grain and a further decrease in the visible supply is looked for when the grain sold of late commences to clear for the East. The visible is by no means large and has decreased for three weeks. With cars short and new corn about ready to move it is expected that the latter will receive the preference as there is no question as to the keeping quality of the oats.

Good rains have fallen over the winter wheat belt and rapid progress has been made in plowing and seeding. The acreage is expected to be considerably cut down this season, probably 15 to 20 per cent. If, at the latter rate, it would take 10,000,000 acres off the total and still leave the aggregate around the average of recent years.

Grain Market Summary

Receipts of wheat, corn and oats at primary points the past week follow:

	Oct. 4, 1919.	Sept. 27, 1919.	Oct. 5. 1918.
Wheat	13,866,000	15,203,000	15,227,000
Corn	2,230,000	2,513,000	5,847,000
Oats	4,333,000	4,638,000	6,179,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	20,429,000	27,253,000
Preceding week	22,360,000	28,331,000
Since July 1	295,067,000	378,545,000

Corn prices held within a comparatively narrow range the past week. News was somewhat more two-sided, but the outside trade was light and the market was easily influenced. May gained slightly on the December, but the latter has more friends now than the May. Closing trades were at net losses of 1½@1¾, with the December about 4c under last year, showing that the market has been deflated to a great extent. The cash situation has become somewhat stronger than during the previous week, and the market failed to break with the passing of the September delivery which expired at $1.39.

Oats showed more strength than corn, and the December closed the same as the previous week, and likewise at the same figure as a year ago, despite the big reduction in the size of the crop as compared with 1918. Sales of cash grain to the seaboard were very heavy, and probably were the main influence in holding the December strong. May finished ½c lower for the week.

The cash wheat markets continue to show a firm undertone. The receipts in all sections have fallen off, mainly due to the fact that there is probably now less of a percentage of the crop back on farms than for many years. The shortage of cars is also a factor. Much wheat has been lost in some parts of Kansas and Nebraska as the result of recent rains, as the grain was piled on the ground for lack of proper storage room. Those in a position to know say that if winter wheat prices advance beyond all bounds of reason that the Grain Corporation will re-sell to mills from its accumulated stocks. Owing to the poor quality of the crop and heavier consumption of flour the carryover into the new crop promises to be relatively small despite the big yield. Clearances are as heavy as could be expected with shipments to the United Kingdom suspended, owing to the railroad strike there. Prices for the week follow:

	High.	Low.	Close Oct. 4, 1919.	Sept. 27, 1919.	Oct. 5, 1918.
Corn—					
Dec.	$1.27⅞	$1.22¼	$1.24¼	$1.26	$1.28⅜
May	1.25¼	1.20⅝	1.22⅛	1.23⅝	.....
Oats—					
Dec.	.71¾	.69⅜	.71	.71	.71
May	.74¼	.71⅞	.72⅞	.73⅜	.....

Wheat Stocks and Consumption.

Statement of the movement of wheat, and consumption in primary markets, compared for three years:

	1918-19.	1917-19.	1916-17.
P. stocks at July 1	2,942,000	226,000	4,289,000
P. receipts to Oct. 4	201,718,000	207,161,000	63,657,000
P. shipments to Oct. 4	84,325,000	80,529,000	30,273,000
P. stocks on Oct. 4	50,145,000	72,179,000	3,493,000
P. consumpt'n to Oct. 4	70,190,000	54,679,000	33,880,000

Corn Stocks and Consumption.

Statement of the movement of corn and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Nov. 1	4,117,000	174,000	849,000
P. receipts to Oct. 4	171,662,000	278,345,000	221,749,000
P. shipments to Oct. 4	102,703,000	142,168,000	122,485,000
P. stocks on Oct. 4	1,990,000	4,884,000	364,000
P. consumpt'n to Oct. 4	71,086,000	131,467,000	99,749,000

Where Cattle Are Grown.

Almost half of the cattle produced in this country are grown in ten states. The following table gives the number of cattle in these ten states, as reported by the live stock census on January 1, 1919:

State.	Head.
Texas	5,021,000
Iowa	4,492,000
Nebraska	3,602,000
Kansas	3,365,000
Wisconsin	3,329,000
Minnesota	3,000,000
Missouri	2,692,000
Illinois	2,427,000
New York	2,389,000
Ohio	2,132,000

The above estimates include all cattle of all ages, both beef and dairy breeds.

The Railroad & Warehouse Commission of Minnesota have been authorized by a law recently passed to spend $35,000 on an experimental flour mill. A very heavy waste of state money!

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to Oct. 4, 1919, with comparisons with 1918:

	1918-19.	1917-18.
Chicago	53,189,000	50,021,000
Milwaukee	3,153,000	6,453,000
Minneapolis	35,440,000	39,112,000
Duluth	3,481,000	22,525,000
St. Louis	26,036,000	28,287,000
Toledo	5,215,000	3,266,000
Detroit	864,000	620,000
Kansas City	43,522,000	37,732,000
Peoria	1,812,000	2,777,000
Omaha	13,371,000	10,900,000
Indianapolis	5,635,000	5,568,000
Total	191,718,000	207,261,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	Oct. 4, 1919.	Sept. 27, 1919.	Oct. 5. 1918.
St. Louis	1,344,000	1,649,000	203,000
Kansas City	2,902,000	2,361,000	234,000
Omaha	813,000	135,000	79,000
Toledo	354,000	349,000	71,000
Detroit	32,000	92,000	46,000
Indianapolis	60,000	135,000	64,000
Peoria	74,000	97,000	35,000
Chicago	3,342,000	4,961,000	1,595,000
Milwaukee	412,000	366,000	1,005,000
Minneapolis	3,630,000	3,634,000	5,364,000
Duluth	903,000	683,000	6,531,000
Total	13,866,000	15,203,000	15,227,000
Shipments	9,774,000	9,697,000	4,556,000

World's Wheat Exports.

Exports of wheat last week compared with previous week and year ago specially reported for this paper by George Broomhall's service:

	Oct. 4, 1919.	Sept. 27, 1919.	Oct. 5. 1918.
American	9,246,000	7,526,000	4,700,000
Indian	.....	.....	195,000
Argentine	3,433,000	2,504,000	1,378,000
Australian	4,392,000	736,000	580,000
Others	86,000	76,000	82,000
Total	17,157,000	10,842,000	6,935,000

Exports of wheat since Aug. 1, 1919, commencement of European crop year, compared for three seasons:

	1919-20.	1918-19.	1917-18.
American	86,207,000	39,204,000	54,967,000
Indian	.....	2,260,000	5,077,000
Argentine	34,504,000	27,023,000	2,262,000
Australian	21,929,000	7,180,000	13,358,000
Others	671,000	574,000	505,000
Total	143,311,000	76,241,000	76,169,000
Season	.....	529,032,000	376,524,000

World's Corn Exports.

Exports of corn last week, compared with previous week and a year ago:

	Oct. 4, 1919.	Sept. 27, 1919.	Oct. 5. 1918.
American	30,000	70,000	187,000
Argentine	2,390,000	1,376,000	201,000
African	112,000	82,000	68,000
Total	2,532,000	1,528,000	456,000

Exports of corn since Nov. 1, 1918, compared with last year and year before:

	1918-19.	1917-18.	1916-17.
American	3,964,000	27,771,000	44,251,000

P. consumpt'n to Oct. 4	17,409,000	18,511,000	18,899,000

TOWNLEYISM AT WORK

Failure of the Bank at Fargo Which Has Financed Townley and the Nonpartisan League—Heavy Liabilities —Queer Work.

The controlling spirits of such publications as the New York *Nation, The New Republic, Country Gentleman* and various others who have been shining the boots of Mr. Townley and the other white-winged spirits of the Nonpartisan League, may be interested in the gathering in of the first fruits of Townleyism, so much lauded by them in the state of North Dakota on Oct. 2 as recorded by the New York *Times*. The event was the declared insolvency of the Scandinavian-American Bank of Fargo, which was ordered by the state banking board, placed in the hands of a receiver, with liabilities of $1,606,847.43 and violations of the state banking law charged. The depositors of the bank are protected against loss by state guarantee of deposits act, one of those new-fangled social reform movements which wherever it has been tried has encouraged the bad management of banks generally.

The bank in question had acted for about two years as financial agent for the Nonpartisan League, and that fact is directly responsible for the insolvency of the bank and the action of the state board. A. E. Sheetz, in his report, characterizes the bank as "a vast, unwieldy, financial monstrosity unable to take care of its obligations."

It was found that among the loans of the bank were one of $170,000 to the Consumers' United Stores Co.; one of $143,824.26 to the National Nonpartisan League; $66,182.28 to the League Exchange, and $47,950.06 to the Publishers' National Service Bureau. All of these loans are grossly in excess of the lawful limits of any loan by the bank, the capital of which was $50,000 with $10,000 surplus.

The beneficiaries of these loans, it will be interesting to consider. The Consumers' United Stores Co. is a private mercantile establishment capitalized at $10,000, the capital being in shares of $100 paid by the farmers generally, not as purchasers of stock in the company, but as purchasers for the amount named for the privilege only of trading with the company. It was started and controlled by A. C. Townley, League boss of North Dakota and president of the Nonpartisan League, The League Exchange is a corporation also organized by Mr. Townley, controlled by him, which he some time ago testifying in the bankruptcy proceedings against him said was intended to finance the Nonpartisan League's political activities. The Publishers' National Service Bureau is another company organized by Mr. Townley, controlled by him, which owns and controls a string of country newspapers throughout North Dakota which were intended to educate the people of North Dakota to Nonpartisanism, which were intended to drive out of the state all independent newspapers through the operation of the law which practically cut independents out any sort of state, county or other legal advertising. They were also under certain other discouraging conditions made lawful by the Nonpartisan gang of the last legislature of the state. There was the National Nonpartisan League itself, a voluntary organization with no personal responsibility for its debts.

It appears that the examining board found that hundreds of thousands of a collateral representing the losses were post-dated checks, notes given to the Nonpartisan League and Consumers' Stores Co., and these, it is charged, were not even controlled by the bank but were held by a woman in the employ of the League and of the Stores Company; while of the collateral actually supposed to be in control of the bank, much had been taken out of it and is now in the hands of the Consumers' Stores Co., which Mr. Townley is personally promoting. The culpability of the bank may be understood when it is stated that the bank's loaning capacity under the state law is limited to 15 per cent of its capital stock and surplus $60,000, so that the most it could legally loan to any person or corporation was $9,000. The report of the examining board concludes as follows:

"The Consumers' United Stores Company has a line of credit extended through a system of individual loans to twenty-two individuals aggregating in all $170,000. The individual paper is given on accommodation purposes only and is secured by notes representing farmers' liabilities in the sum of $100 to $500, together with post-dated checks of $32 and less amounting in all to $554,364.38. It should here be noted that it was impossible to make an examination or even check this vast amount of collateral, and that the figures of the bank have been taken for the purposes of this report as correct. It should also be noted, however, that $201,435.55 of the above notes and post-dated checks are now not in the bank, but are in the hands of the Consumers' United Stores Company for the purpose of collection. All the bank has to show for this amount of collateral out for collection is receipts for the same signed by officers and employes of the Consumers' United Stores Company. It is estimated that the farmers' notes held as collateral are not worth in excess of 50 per cent of their par value. This is a liberal statement as to this class of collateral hypothecated for loans under discussion.

"The post-dated checks held as a portion of the collateral for this loan, and since they are held as collateral for the second largest loan made by the bank requires some explanation. The post-dated checks are in sums of $32 and under, payable at some future date. It is our opinion that these checks are not in law or in fact collateral at all. A current dated check in itself is not collateral, and a post-dated check would be for the same reason of a smaller value still for the same purpose. For the purpose of collateral and security for loans it is our opinion that post-dated checks are without any validity of substantial value.

"The National Nonpartisan League line of credit consists of twenty-two individual notes, ranging in denominations from $840 to $8,000, and aggregating in all $148,824.26. A consideration of the names of these accommodation notes will illustrate that the same condition attends to the extension of this line of credit as has been explained in the line of credit extended to the Consumers' United Stores Company. The individual notes represent only accommodation paper. The individual notes represent a single line and are so considered by the bank.

"The security held by the bank as collateral for its loan made to the National Nonpartisan League for $147,824.26 consists principally of post-dated checks in the sum of $274,864.01. In addition to this, Consumers' United Stores Company bonds in the sum of $20,000 is being held as collateral. It is our opinion from an examination of these bonds that they represent notes more than the individual liabilities of the Consumers' United Stores Company, a corporation. The bonds represent also the collateral already discussed in the form of farmers' notes and constitute a pyramiding of this collateral. In fact, they amount to nothing more than the signature of the Consumers' United Stores Company to the indebtedness which they secure."

The British government has engaged shipping space for new crop corn from Rhodesia and it is estimated that some 500,000 bags, equivalent to 1,785,714 bus. of Rhodesian corn, will be shipped within the next few months to Great Britain. In addition to this amount 200,000 bags, or 714,285 bus., will be shipped to England from Portuguese Africa.

If this paper pleases you, kindly recommend it to your neighbors in the trade.

WASHINGTON LETTER

Digest of a Review of the Export Movement in August—Volume of the Traffic and the Values Compared—Industrial Conference.

WASHINGTON, Oct. 4.—[Special Correspondence.]—Thirty-five per cent of the physical volume of exports during the past fiscal year consisted of foodstuffs. This is shown in a compilation made by the Federal Reserve Board in an effort to get a different view of the growth of export trade than is given by the statistics dealing with money value, which are issued by the Department of Commerce. The Board says: "It is noteworthy that an estimated 35 per cent of the physical volume of exports in the last fiscal year consisted of foodstuffs," in commenting on the increased cost of living. The tabulation and comments are given in advance sheets of the October Federal Reserve *Bulletin*, which will come from the printer in about a week.

The figures based on physical volume do not show such enormous increases as those based on money value, due to the higher prices in recent months. The increases are considerable, however. Taking the pre-war five-year period 1910-14 as a base for purposes of comparison and noting the increase for each of the succeeding five years as compared with the pre-war average, the following index numbers are reached by the Board: 1910-1914, 100; 1915, 125, 1916-17, 120; 1918, 109; 1919, 135. "It is noteworthy," says the Board, "that the fiscal year 1919 shows the greatest increase over the pre-war average—an increase of 35 per cent—a rate of increase more than fourfold that shown for the preceding fiscal year, 1918. Such a gain in the rate of increase suggests that heavy exports (effectuated for the most part by credit advances) to Europe have been a very considerable factor in our cost of living situation. "It should be noted that some improvement in our cost of living situation is likely to result from the diminished outflow of goods to countries not in a position to make payment by return shipments of goods."

Commenting on the export situation as shown by the figures of the Department of Commerce, the Board says:

"Little change is reflected in the recent volume of our foreign trade shown by the latest statement of the Department of Commerce, covering the month of August. Exports for August were $646,259,000, as compared with $670,083,000 for July. The first month in the fiscal year 1920, and $602,090,000, the average for the fiscal year 1919. Largely increased exports, as compared with July, are shown for unprepared foodstuffs, partial manufactures, and manufactures ready for consumption, while smaller exports for the month are shown for prepared foodstuffs, mainly meat and dairy products. Raw cotton exports show a further decline for the month, while exports of mineral oil, cotton goods and automobiles show considerable gains. August imports were $307,331,000, as compared with $344,000,000 for the month of July and $257,990,000, the average for the fiscal year 1919. Excess exports for August were $338,928,000, compared with $226,083,000 for July and $344,100,000, the average for the fiscal year 1919.

"The first two months of the current fiscal year are, therefore, characterized by a very marked diminution in the outward movement of goods."

In reviewing the agricultural situation for the past month the Board says:

"In agriculture, the relatively unsatisfactory situation prevailing with respect to wheat as compared with earlier prospects is compensated by the favorable situation with respect to corn, the bulk of which will soon be past danger of damage, and to hay, the yield of which is much above the average. Corn is of good quality, but in the case of spring wheat the grain is light. In consequence of deficiency of rainfall in district No. 9, all small grains are showing a poor return, with many sections of North Dakota, South Dakota, and Montana reporting 'a complete failure.' ... though good returns have been receiv... by farmers in district No. 10, it is stat... that indications point to a decrease ... the wheat acreage sown this fall, d... partly to unfavorable soil conditions ... fall plowing and seeding and partly ... 'a desire to return to the pre-war pl... of diversified farming.' District No. ... 'made the heaviest and best corn cr... ever raised,' and 'the grain crop w... also large beyond precedent.' The h... vesting of grain, except corn and ri... is now practically completed in distr... No. 12.

"Deficiency of rainfall has dama... tobacco in Kentucky and Ohio, and '... outlook is rather discouraging,' wh... in the Carolinas the crop ranges 'fr... extra good in the interior to very p... in extreme eastern counties.' ... condition of cotton showed a furt... decline and the lateness of the crop ... reflected in the small amount ginned ... date. AUSTRALIAN WHEAT SALES.

The Melbourne correspondent of the New York *Evening Post* said the Australian wheat pool in August sold 1,000,000 tons of wheat at 5s. 6d ($1.33½) f. o. b. and gave an option of 500,000 tons more for September shipment at the same price, but refused a similar option for December delivery. The assigned reason was the expectation that December prices would be higher, and also that it would be necessary to provide for local requirements and regular customers. These sales have probably disposed of Australia as a competitor for some time, although they have done something to fill up the empty bins in England, and may bring to the U. S. the demands from Greece, and the Near East of Europe which naturally would look to Australia for wheat. It is instead reported that Egypt has already sold 12s. 1d. ($2.93½) for small lots and began even more for Australian wheat. The correspondent quoted further as:

"Apart from these advantageous features, the Wheat Board had another reason for not wishing to dispose of the whole of its exportable surplus to Great Britain. It has built up a permanent and expanding trade with countries existing from Japan to the Mediterranean and South Africa, and it wants to keep the customers it has. It recognizes that in European markets it competes against Argentina, the United States and Canada under a heavy handicap because of the long freightage incurred in placing its wheat upon the market. But in the East and South Africa the freight factor operates in its favor and it has almost a monopoly in markets which are just being developed. Australia sees great possibilities in the trade with the East and South Africa and does not intend to lose it if it can be helped. That is why it is retaining about 2,000,000 tons on hand to meet possible demands from these quarters. It is also spending large sums in the erection of wheat storage houses. These may prove to be the first step towards bulk handling. At present that system is still 'under consideration' in the states, and its advantages and disadvantages are the constant subject of discussion between its advocates and opponents.

"Very conflicting reports, mostly by persons with a case to bolster up, are being circulated regarding the reduction in the area cultivated for wheat and the utilization of the land for other and more profitable purposes.

"An estimate by a generally reliable authority was published recently, showing that the area under wheat would show a slight increase next season—up to 5 per cent being prophesied. With the present price of wheat, a farmer who gets the best out of his land should find agriculture a profitable industry. Yet many farmers, however, get comparatively poor returns per acre, and wheat growing, even at present prices, is not a very attractive proposition for them. The truth is they do not take very kindly to scientific methods. America's expenditure on the teaching of scientific agriculture is a thing that Australia must emulate, and there is a healthy tendency in that direction at present.

"One of the most interesting signs is the development of the co-operative system among wheat growers. In western Australia practically all the farmers are members of a co-operative association which markets their wheat and purchases their manures and other supplies for them. In the other states co-operative associations, although of later growth, have already secured upwards of 50 per cent of the trade, and future prospects which are under way seem to indicate that practically the whole of the wheat industry will in future be controlled through co-operative organizations with the Government behind them and with their own representatives in London and elsewhere.

"The Federal Government has already guaranteed 4s. a bushel to the farmers for the 1919-20 crop, and farmers are seeking a guarantee of 5s. for the next five years. As the average f. o. b. price of the exportable surplus in pre-war years, however, was usually well under 4s., there seems little likelihood of the Government acceding to this request, although the future prospects are certainly promising."

FEDERAL CAR DISTRIBUTION RULES.

The Car Service Commission at Washington has prescribed the following rules governing distribution of all car equipment on all Government controlled railroads:

"1. Each shipper of grain will advise the carrier's agent each Saturday of the total quantity of grain on hand tendered for rail shipment. The ratio of the quantity so reported by each shipper to the total quantity so reported by all shippers shall be the percentage basis for the distribution of available cars at that station during the ensuing week for grain loading.

"2. Each shipper of grain shall make written order on the carrier's agent for cars wanted for grain loading, showing the following information: (A) Date of order; (B) number of cars wanted (in units of 40-ton cars) and whether for sacked or bulk grain; (C) destination; (D) date wanted to load; (E) quantity of each kind of grain on hand and conveniently located for prompt loading tendered for rail shipments; (F) name of shipper. Copies of orders by a shipper located on more than one carrier (steam, electric or water) shall be filed with the agent of each carrier. Such combined orders must not exceed the total grain conveniently located for prompt loading tendered for shipment.

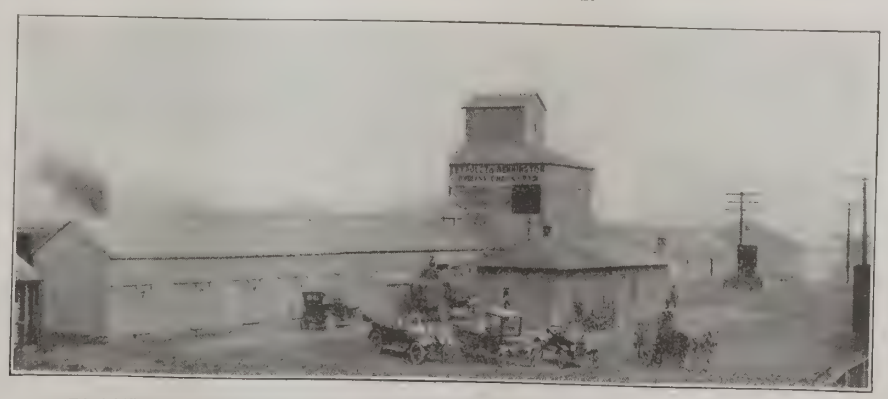
"3. Cars will not be furnished in excess of a shipper's ability to load and ship promptly.

"4. When a shipper's *pro rata* share of the available car supply is a fraction of a car, the fraction will be carried to his credit and he will be entitled to car supply on the basis of the aggregate of such fractional credits.

"5. The term 'prompt loading' as used in these rules is intended to mean that a car placed for loading not later than 10 a. m. must be loaded and billing instructions tendered before the close of the day on which it is placed, failing which, such car will be charged against the shipper's allotment, as an additional empty for each succeeding day held for loading, or for billing instructions."

Commenting on these rules, Sec'y Smiley says: "Sec. 2 of this order provides that each shipper *must* place his order for cars in writing. See that you do *this*. This Federal ruling deprives the Public Utilities Commission of Kansas [and other states] of the last vestige of authority over Government controlled roads. It is plain that this order favors the elevator operator having large capacity house. In fact, if the carriers follow out these instructions, the small elevator owner will be practically forced out of business."

Grain Rates in the Northwest.



At the request of Minnesota grain and flour interests the Commerce Commission has postponed until after Nov. 1 further hearings on Ex Parte No. 70, the proposal of the Railroad Administration to abolish transit at Minneapolis and to substitute proportional rates of 11c to Chicago, 5.5c to Duluth. The *Traffic World* says that the Railroad Administration would like to have the Commission's judgment on this subject before it goes into history, "but the chances are there will be no decision by the Commission before the end of the year. Minneapolis is better satisfied with the adjustment as it now is than it would be with the proposed proportionals." Minneapolis, therefore, will resist the petition.

A LARGE NEBRASKA BUSINESS.

The Leypold & Pennington Co., whose main office is at North Platte, Nebr., conducts a business, the magnitude of which may not be fully realized by Central and Eastern trade. Those in the latter class who have been fortunate enough to tour our great Western prairies know, of course, something of the business volume daily transacted by the trade there. The officials of The Leypold & Pennington Co. do not claim to have any unusual advantages, property rights or such special gratuities, about which much was heard in the early days of the Western plains. Their business has been built up little by little until today they have five plants located as follows: At Ogallala, with a 20,000-bu. grain elevator; Hershey, 9,000-bu. elevator and 1,000-ton hay warehouse; Maxwell, 12,000-bu. elevator and 500-ton warehouse; Atkinson, 500-ton warehouse. At the main office at North Platte, as illustrated herewith, are a 22,000-bu. elevator and 500-ton warehouse.

All of these plants have Richardson Automatic Scales and similar up-to-date machinery equipment, while the transportation of wholesale and retail business is accomplished with the kind assistance of Henry Ford who kindly supplied them with six flivvers and three trucks. In some way or other, possibly due to an exceptional salesman, the company strayed from the straight and narrow row on one occasion by buying a Republic Truck. At any event, they are well fixed to take care of any and all business from the smallest parcel to contracts for many cars.

They anticipate a big business this fall and winter, with the third cutting of alfalfa all up and a heavy fourth cutting maturing. In ordinary years non-irrigated lands of the Platte Valley, through which the Union Pacific wends its way westward, produce only three cuttings of alfalfa. This year but little irrigation has been required, giving the North and South Platte Rivers a chance to recuperate, possibly from the rains of former seasons and in anticipating those to come. These great rivers, joining their courses a little to the east are a wonderful "anchor to the windward" for the producers of grain, alfalfa, hay, sugar beets, etc., who always have on tap a practically unlimited supply of water when irrigation is necessary. To realize fully the position *aqua pura* occupies in these Western states, we quote a state politician of Colorado, who said that "murder and lesser crimes over water rights equal such transgressions from all other causes." It is in this atmosphere that the Leypold & Pennington Co. as typical of many other large operators transact their affairs.

PLANT OF LEYPOLD & PENNINGTON CO., NORTH PLATTE, NEB.

PROVISION STOCKS.

Following is the official report of stocks of provisions in store at Chicago on dates indicated, as collated by John Tredwell & Co.:

	Oct. 1, 1919.	Sept. 1, 1919.	Oct. 1, 1918.
M. pork, n.	1,680	3,139	9,130
Other pork.	37,512	34,509	47,117

Total cuts..	124,870,576	130,639,667	109,006,920

Summary of stocks on Oct. 1 of year named (000 omitted from last three columns):

	All pork, bbls.	All lard.	D. S. meats.	Total cuts.
1917.....	38,502	47,166	48,923	93,306
1916.....	40,043	46,211	46,723	91,927
1915.....	93,392	89,822	69,189	113,598
1914.....	63,259	45,144	39,248	77,484
1913.....	42,671	47,674	45,724	88,827
1912.....	62,471	37,199	43,282	80,631
1911.....	34,254	32,243	43,783	77,069

Decreases in September in years named follow:

	1919.	1918.	1917.
M. pork.....	1,459	1,255	1,912
P. S. lard.....	4,284,736	1,503,473	5,112,163
Ribs	1,727,052	3,391,422	7,398,852
D.S. meats (inc.)	890,895	13,402,987	15,507,281
Total cuts....	5,769,091	31,178,261	27,823,263

"We find no previous September where dry salted meat stocks have not shown a liberal decrease, nor an Oct. 1 where the dry salted meat supplies here were anywhere near as heavy as at present, excepting in 1918. This showing reflects the unsatisfactory consumptive demand. Lard supplies are light and liberal quantities sold for shipment are included in present stock figures."

COMBINED STOCKS.

Combined stocks of provisions at Chicago, Kansas City, Omaha, St. Joseph, Milwaukee, St. Louis and East St. Louis (figures previous to 1917 do not include St. Louis and East St. Louis):

	Oct. 1, 1919.	Sept. 1, 1919.	Oct. 1, 1918.

ROCKY MOUNTAIN BEAN JOBBERS.

The Rocky Mountain Bean Jobbers Ass'n held its fourth annual meeting at Denver during the last week of September and there was a goodly attendance of bean jobbers, elevator managers and dealers from both Colorado and New Mexico. In addition to the regular business of the meeting considerable discussion developed regarding the competition with which trade has been confronted from the Orient. As a result of the discussion a committee has been appointed to confer with delegates of the California Bean Jobbers' Association to see if legislation cannot be enacted so that a tariff may give growers and handlers the necessary protection against the influx of small Asiatic beans. The membership feel hopeful of favorable results, inasmuch as in the past the association has accomplished much that has proved of great benefit to the members individually.

L. M. HUNT, PRESIDENT.

Last year, although the original Government purchase of beans called for an allotment of only 100,000 bags to the Rocky Mountain States, nevertheless, the Association secured a final confirmation of 375,000 bags, or 528 cars, which order was shared by some 68 shippers. If it were not for this large sale the surplus in this territory would undoubtedly have proven very troublesome.

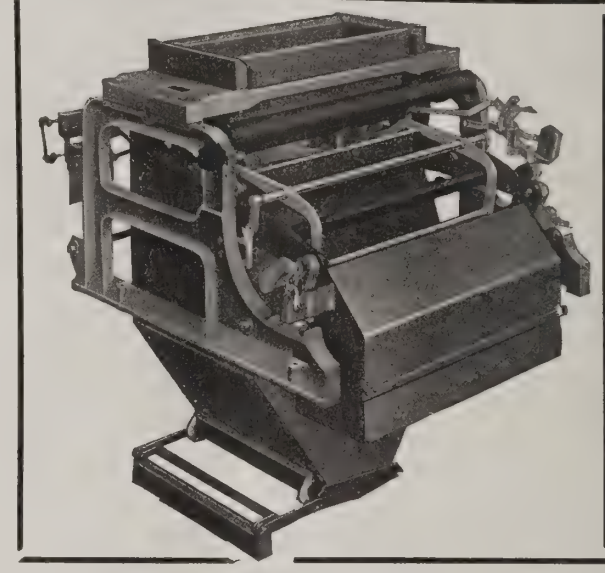
The Association has also been very successful in popularizing the pinto bean, a native of New Mexico, but now grown in great quantity in both Colorado and New Mexico. Formerly pinto beans were discounted $2@3 per cwt., as compared to the California beans, but now since a very strenuous publicity campaign conducted by the Association the demand compares very favorably with the latter.

Officers elected for the ensuing year are as follows:

L. M. Hunt of Colorado Springs, president; H. W. Young of Weldona, Colo., first vice-president; J. W. Heath of Fowler, Colo., second vice-president; A. Weist of Wagon Mound, N. M., third vice-president; M. Simons of Denver, treasurer, and C. F. Waugh of Denver, secretary. The following directors were elected for a term of two years: James A. McSwigan of Denver, Arthur Ilfeld of Las Vegas, N. M., and Robert Fletcher of Trinidad.

GOVERNMENT AND INTERSTATE WHEAT APPEALS.

Effective immediately, the Department of Agriculture will handle all wheat appeals from licensed inspectors' grades on intrastate as well as interstate transactions. Formerly, under the grain standards act, wheat was required to be shipped or delivered for shipment across state lines before an appeal could be taken to the Government.



The new arrangement has been made by the secretary at the urgent request of Julius H. Barnes, United States wheat director, and is effective under authority and during the continuation of the Food Control Act, the Wheat Guaranty Act, and the Executive order of May 14, 1919. Mr. Barnes stated that it was necessary to have the appeal privilege on all wheat whether interstate or intrastate in order to make the guarantee good to the producer of wheat everywhere in the United States.

Pursuant to this agreement Federal Grain Supervisors in all the large markets of the United States have been instructed to entertain all wheat appeals.

Don't let your subscription lapse; you may lose valuable numbers.

RAIN IN KANSAS.

Within the last ten days of Se ber every county in Kansas was s to the subsoil. The precipitation aged from 1½ to 9 inches. Rivers flowed much of the bottom lands every creek and pond was full t banks. It was the greatest dow at this season in the history of the and it insures a largely increased age sown to winter wheat, as the ers may now put in a crop with a ance of entering the winter wi soaked subsoil. The rains are a to the live stock industry of Kansa fine growth of grass in the pastur assured and cattle growers and fe are greatly encouraged. It is pred that many thousands of head of c will be brought to the western ha the state for fall grazing where, said, the grass will provide feed December.

Elevator Burned.

Price Current-Grain Reporter: Our evator burned on Sept. 2. We will build this fall and I think we will concrete construction. Capacity l be 60,000 bus.—*Cooksville Grain , B. E. Edel, mgr., Cooksville, Ill.*

Car Supply—New Elevator.

Price Current-Grain Reporter: We nk it of vital importance at the pres- time that there be sufficient car plies to relieve the blocked house ditions where they exist.

Ve expect to build a new elevator bably this year or early next spring. —*Im Krotter Co., Stuart, Nebr.*

New Roller Mill.

rice Current-Grain Reporter: We are ding a new mill and elevator here einforced concrete. The milling ca- ity will be 300 bbls. daily; elevator age, 38,000 bus. The plant will be ly for operation about the first of ruary. The building is in course of tion by Lahreck Contracting & En- ering Co., of Kansas City. The ma- ery will be furnished by Sprout, dron & Co., of Muncie, Pa.—*Gibbon er Mills, per J. N. Ashburn, mgr., ion, Nebr.*

Crops in Idaho.

ice Current-Grain Reporter: We a had considerable rain and there is t of third cutting of alfalfa. Red r and alfalfa seed were both caught he fall rains. Pasture conditions not any too good and the hay mar- is at a standstill.

heat yields are heavy, the best be- reported at 97 bus. per acre. The yield also will run high.

reshing of wheat is now pretty well ed. It is mostly soft wheat but Turkey Red was produced.—*W. B. s, Caldwell, Idaho.*

Farmers Are Close-Mouthed.

ice Current-Grain Reporter: Farm- owadays don't want the public to what they have on hand, and the tor man does not want you to know much grain he has in his house. w we have not much hay of any in this part of the country, but I ot able to tell you just what we do

There is no old corn to speak of o new corn. No one is shocking o we cannot tell what the yield e. Of oats, I don't know of any ll at present. The wheat is all so that it's a hard proposition to ate what is in the country unless n should just go around and take voice.—*J. E. Ewick, Henton, Ill.*

In Northwest Ohio.

e Current-Grain Reporter: For the ew years I have been a reader of PRICE CURRENT-GRAIN REPORTER, he exception of a short period, and iate very much the reading and ising matter contained therein.

essary and much needed rain fell during the past 10 days has wheat seeding possible and farm- e now busy sowing. Much fertil- being used, mostly high grade hosphate. The old crop of wheat stly marketed and all energy 's have now is being turned to the op.

tically all of the oats remain in nds of the farmers who say that ce is too low in proportion to the nd purchase of necessary com- es by them.

1 60 to 70 per cent of the corn is shock. It is of excellent quality. y weather is having wonderful n drawing out the excess mois- the grain. Some who have suffi- trying capacity have husked to xtent and report from 50 to 75 ld per acre.

Cruikshank & Graham Elevator at Mark Center, Ohio, is installing a Richardson Automatic Scale. Their large hopper scale fell from half way below the cupola below the basement.

Farmers in the neighborhood of North Baltimore, O., have organized a company and have purchased the large mill and elevator at that place.—*Hicksville Grain Co., per H. Grover, mgr., Hicksville, O.*

Crops in Northern Kentucky.

Price Current-Grain Reporter: Wheat is all threshed here, the yield being 13.5 bus. per acre but the quility is unsatisfactory, there being much smut. Rye is not yet sufficiently harvested for fall seeding. Oats are raised here only for domestic use, there being none for shipping. Corn is about 45 per cent of a crop and potatoes a failure.

We had a premature spring. Gardens were lost by frosts on the 18th and 20th of April. The weather was seasonable until the middle of June, when the drouth began to cause alarm and no rain fell until Sept. 21 that was sufficient to replenish stock water or revive the dried up pastures.

Hay is only 70 per cent cut, owing to scarcity of labor. Tobacco is 35 per cent merchantable, the total to be increased by belated growth, if frosts keep off. The quality is inferior.—*Reader, Mason County, Ky.*

Hot New Corn.

Price Current-Grain Reporter: The experience of one Illinois dealer, who has already had a car of new corn hot and sour in the Chicago market, will likely make others more cautious who are inclined to handle some of the new crop ahead of frost. Summer heat has prevailed during last week and though from all appearances corn has fully matured, it was much too warm to pile it up in a crib and expect to take out No. 2 grade next spring. We need a good hard frost to put the corn into condition for cribbing, and until this comes, caution should be used. Some farmers will begin shucking during the next few days, but we believe the majority will wait until near the 15th depending, of course, on the weather in the meantime.

Old corn is being moved out gradually, being offered on the declines, with very few buyers in the market, and held tight with a good demand on days when the market shows strength. There is very little inclination on the part of the farmer to contract new corn.—*H. I. Baldwin & Co., Decatur, Ill.*

Out of Grain and Into Tractors.

The Price Current-Grain Reporter: THE PRICE CURRENT-GRAIN REPORTER has never failed in any respect to live up to its reputation as the leading grain paper of the country.

The reason for informing your subscription department that I did not care for the paper any further is the fact that the tractor business has become the big business of our company to the entire exclusion of the grain. To keep abreast of the movements, I have to read several of our implement journals and do not find the time to look at the grain papers as much as I should like to. Such being the case, I feel that your paper is too good a magazine to come to anyone's desk without careful reading and would rather not see it at all rather than see it lying around unread.

I want to say that the minute I again become interested in the movement of grain or hay, if only a few carloads a year, THE PRICE CURRENT-GRAIN REPORTER will be a regular companion.—*Steel Mule Company of Minnesota, formerly Farmers' Grain & Tractor Co., O. A. Hohle, Minneapolis, Minn.*

Constructing Cob Conveyor to Burner.

Price Current-Grain Reporter: In your Oct. 1 issue, the Hannibal Milling and Elevator Co. inquires regarding a conveyor for corn cobs from sheller or cleaner.

The writer installed one while manager of the Sidell Farmers' Elevator Co. which worked satisfactorily and was practically fireproof as well.

We simply ordered a conveyor chain with lugs and conveyor lining and constructed a wooden trough which was built to empty into the top of the burner. The last ten feet of the conveyor was not made out of wood, but was a sheet steel box, the bottom tapered so as to form the right size of box for the chain to run in. To support this last ten feet, we used two old bridge angle irons which were fastened to one end of the wood conveyor and rested on the top of the burner at the other, and bolted the end boxing on these irons. The pillow blocks should be placed back a little from the wall of the burner so that the sprocket and chain will not be above the blaze, on account of the danger of the heat warping the same. The chain will throw the cobs a foot or more from end of the spout. We also put in a sheet-iron valve in the iron box, attached so that it would swing the same way the chain ran, so that no draft could possibly be formed to force the fire back through the spout to the elevator.

This style of conveyor is not very expensive and is durable, and it works regardless of weather conditions. It can be driven from the sheller end of the conveyor; and the only thing that one must be careful about is not to elevate the discharge head too high above the receiving end, though a chain conveyor will stand more than a belt in this regard.

The material we used was furnished by the Union Iron Works, Decatur, Ill. —*Gifford Elevator Co., per Otis J. Bear, Gifford, Ill.*

IMPORT AND EXPORT PRICES.

Following are the import and export prices of below mentioned commodities on dates named, as averaged by the Bureau of Foreign and Domestic Commerce, import prices being values in foreign markets and export prices those at the time of exportation:

WHEAT RECEIPTS—FLOUR PRODUCTION.

The United States Grain Corporation reports the wheat and wheat flour movement throughout the United States for the week ending September 19, 1919, in comparison with the figures for the same period a year ago, as follows:

	1919.	1918.
Wheat receipts—		
From farms, bu....	28,858,000	34,955,000
Previous week, bu..	30,847,000	35,890,000
From June 27 to Sept. 19.....	425,369,000	381,290,000
Flour produced—		
During week, bbl..	3,270,000	2,834,000
Previous week, bbl.	3,285,000	2,856,000
June 27 to Sept. 19.	28,809,000	24,931,000
Wheat stocks—		
In all elevators and mills, bu., Sept. 19.	264,779,000	220,560,000
Previous week, bu..	254,817,000	196,540,000
Change for wk., bu...	+9,962,000	+24,020,000

MAINTENANCE OF SIDINGS.

The Railroad Administration, in Supplement No. 2 to General Order No. 15, has abandoned the effort to compel industries, including mills and elevators, to maintain and pay for the operation of side tracks, as proposed by General Order 15, to which universal objection was made. The situation, therefore, is that existing side tracks not covered by contracts will have the status as prior to March 26, 1918, when General Order No. 15 was issued. As to new tracks, the order requires that the industry shall pay for the maintenance of the whole of the track from the clearance point outward while the railroad company shall own all track on its right of way, although the industry will be required to pay for the maintenance of the part of the track between the clearance point and the right of way. Modification of No. 2 of the original order as directed by Supplement No. 2 is as follows:

2. Where existing industry tracks are not covered by written contracts, they shall be maintained and operated in accordance with the provisions stated in paragraph (1) hereof. In the absence of a written contract as to the maintenance of an industry track constructed prior to March 26, 1918, the practice of the connecting carrier prior to Federal control, as applied to such track of any particular industry from the beginning by its use by such industry, shall be considered as equivalent to a written contract in accordance with such practice.

"DON'T ROCK THE BOAT"

"Inasmuch as we had not been advised of any attempt on the part of any of our members to exact an unreasonable profit in the purchase of wheat from the producer we assumed that everything is lovely," says Sec'y Smiley of the Kansas Association, "and that there was no cause for complaint on the part of the producer on the price received for the different grades of wheat." However, Mr. Smiley reports that he has received from Vice-president Piazzek of Kansas City a letter in which Mr. Smiley's assistance is entreated "in a matter that has given Mr. Barnes and the rest of us a great deal of unnecessary trouble."

Mr. Piazzek says that every mail brings in complaints of excessive profits taken from the producer; and at the same time it appears that licensees in Kansas are not all keeping full records of their transactions as provided for in clause 2 of the license agreement; and he calls attention to the second paragraph of the agreement 1582-B. Now, when complaints come in, Mr. Piazzek says, unless records of the transactions as required by the license are available and there is no evidence on the ticket to justify setting aside the complaint, "I simply have to proceed on the impression that the complaint is justified. I have," he says, "no other alternative than to be governed by the only information on the ticket." And he advises Mr. Smiley to take the matter up with the Kansas dealers. There is, of course, a very pointed hint thrown out here to dealers generally to keep their records up to the required mark as a matter of self-protection against men who make complaints and who perhaps may not be any too conscientious in doing so.

Crop Reports

Compiled by GEO. A. WELLS

According to the general reports published below, corn husking will begin as early as Nov. 1 throughout the entire surplus corn producing territory, and if weather conditions are favorable there may be considerable movement of new corn during the latter days of November, especially if the weather clears up and frosts occur to dry out the corn which is already well matured.

The general reports indicate also that there will not be much of a movement of oats from farmers' hands before corn husking begins.

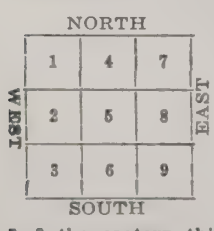
The reports and compilations given below are based on conditions existing Sept. 30 to Oct. 2 and any changes in climatic conditions since those dates should be taken into consideration. (Oklahoma reports are missing.)

SOIL CONDITIONS.—The soil condition is reported almost entirely "favorable," with the exception of a few localities which were reported "too dry" in the states of Ohio, Indiana, Illinois, Missouri and Minnesota. Iowa and Nebraska are largely "favorable," but a considerable number of localities are reported "too wet." North Dakota and South Dakota are mostly "too dry," a few localities reporting "favorable"; while the state of Kansas was reported in a small majority of cases "too dry" and the remainder of reports "favorable." The rains have been quite general and have materially improved the soil condition for plowing and will give an excellent growth of fall pastures.

TEMPERATURE.—The prevailing temperature during the past two weeks has been almost entirely "favorable." A few scattered localities in Kansas reporting "too hot" and in the northwest "too cold."

CORN.—Basing the Government term normal at 100, the average comparative reports of the growth condition by our correspondents in each of the states and the comparison with the Government report of Sept. 1 is as follows:

	Our report.	Government report Sept. 1.
Ohio	94	90
Indiana	84	77
Illinois	84	76
Missouri	68	70
Iowa	91	89
Nebraska	73	71
Kansas	49	47



The flat average of our reports just taken is 78 and of the Government report Sept. 1 74, thus indicating an improvement in condition that should show in the final estimates a total production of more than 2,857 million bushels; in fact, it would seem that the crop is good for at least 2,900 million bushels. The five-year average is 2,749 millions.

The percentage of the corn crop reported as matured in each of the states is as follows: Ohio, 92; Indiana, 90; Illinois, 91; Missouri, 84; Iowa, 92; Minnesota, 94; North Dakota, 82; South Dakota, 91; Nebraska, 88; Kansas, 81.

There is an unusually large acreage of corn in the states of Minnesota, North Dakota and South Dakota and it will be noted by the above reports is well matured, which is unusual.

LOCATION KEY.

Explanation.—In order to give the reader an intelligent an idea of the districts from which all crop and local trade condition reports are received, they are numbered to correspond with divisions shown in the accompanying diagram, the numbers 1, 2 and 3 representing the western one-third of the state from north to south; 4, 5 and 6 in central third, and 7, 8, 9 the eastern third. Figures indicating these locations will appear in all crop reports, in letters referring to trade situations in beans, feed, hay, etc. Each state will be treated as a square body.

FALL PLOWING.—The percentage of the fall plowing that has now been done in each of the states is as follows: Ohio, 68; Indiana, 74; Illinois, 61; Missouri, 63; Iowa, 53; Minnesota, 51; North Dakota, 44; South Dakota, 57; Nebraska, 63; Kansas, 56.

ACREAGE OF WINTER WHEAT SOWN.—Basing the acreage of winter wheat sown last fall at 100, the percentage comparison of the acreage sown as now reported and as compared with our report two weeks ago is as follows:

	Now.	Two weeks ago.
Ohio	86	70
Indiana	71	70
Illinois	66	62
Missouri	57	45
Iowa	67	53
Nebraska	75	63
Kansas	66	56

The flat acreage two weeks ago was 68 and now is 72, indicating that the recent general rains have resulted in increasing winter wheat acreage which has been restricted because of the soil being too dry for plowing and cultivation.

CLOVER AND TIMOTHY SEED.—Basing the crop production of clover and timothy seed last year at 100, the comparative percentage of production this year is as follows:

	Clover.	Timothy.
Ohio	61	57
Indiana	50	76
Illinois	109	106
Missouri	39	71
Iowa	119	87
Minnesota	92	100
North Dakota	90	85
South Dakota	66	67
Nebraska	103	103
Kansas	83	92

HOGS.—Basing the number of hogs being fattened for market this time last year, the percentage comparison now remaining on farms being fattened for market this fall is as follows: Ohio, 97; Indiana, 87; Illinois, 88; Missouri, 72; Iowa, 81; Minnesota, 97; North Dakota, 85; South Dakota, 85; Nebraska, 71; Kansas, 70.

The percentage comparison of brood sows being carried over this winter is as follows: Ohio, 95; Indiana, 88; Illinois, 91; Missouri, 78; Iowa, 85; Minnesota, 99; North Dakota, 76; South Dakota, 85; Nebraska, 87; Kansas, 77.

It would appear that there is not only a general reduction in the number of hogs being fattened for market this year, but also a reduction in the number of brood sows being carried over the winter for next year.

FARM SURPLUS.—The percentage of the marketable farm surplus of the new crop of wheat that has now been sold by the farmers is as follows: Ohio, 76; Indiana, 78; Illinois, 84; Missouri, 78; Iowa, 80; Minnesota, 36; North Dakota, 55; South Dakota, 56; Nebraska, 63; Kansas, 55.

Of oats: Ohio, 63; Indiana, 61; Illinois, 41; Missouri, 61; Iowa, 40; Minnesota, 29; South Dakota, 43; Nebraska, 61.

General Reports.

The general reports given below as to when farmers will begin marketing new corn and as to whether or not there will be a movement of oats from farms to any extent before corn husking begins are self-explanatory:

OHIO.

Xenia (3): New corn will not move before Nov. 15. There will be no oats movement before corn husking.

Sidney (2): New corn will begin to move about Nov. 1. Think farmers will not sell oats until after the corn is husked. Farmers will sell corn freely soon as dealers will buy.

Bucyrus (4): None of the corn in this locality is sold at all. The farmers are feeding all of it. They are not inclined to sell their oats before next spring.

Circleville (6): Will market new corn about the 20th of October.

Camden (2): There will be no corn to market as all will be fed on farms. The same applies to oats.

Agosta (5): Will market new corn about Nov. 1. Do not expect corn to move freely. No movement of oats to any extent before corn husking.

Greenville (2): Farmers will sell some new corn soon as they can find a buyer who will take it. No oats being marketed now and will not be until prices advance or until they are satisfied. No advance likely.

Ansonia (2): Will begin marketing new corn about Nov. 20. Think farmers will hold their oats until spring.

Leipsic (1): New corn will begin to move about Nov. 1. Will not move oats until after corn husking.

Lima (1): Farmers here may begin marketing new corn in about two weeks. Corn crop being very good much of new oats have been sold already.

Rockford (1): Hogs are being sold while very light as we are having cholera very badly.

Eaton (2): Corn will move slowly, not much will be sold for shipment. Not much oats to move in this locality.

INDIANA.

Angola (7): Very little corn or oats will be sold off the farms where grown.

Winchester (8): Farmers not selling corn except to neighbors. Forty to seventy-five dollars per acre being paid for corn in the field. Pastures very poor. Hog crop large. Farm labor scarce.

Lawrenceburg (9): Some new corn will be sold about Nov. 1, small per cent.

Rushville (8): There will be no oats marketed. Corn should begin moving from present prospects about Nov. 1 to 10.

Wabash (4): Some new corn will be marketed Dec. 1, however, very little marketed, most fed. Oats will not move at present price.

Markle (7): Will begin marketing new corn about Dec. 1. Oats will not move before corn husking begins.

Jasper (3): Will not look for much corn to be marketed before the first of the year. No oats to be had from the farmers, most of them will have to buy.

Princeton (3): New corn will be marketed in a small way about Oct. 15. No oats for sale on market. Late rains in latter part of August and first half of September have greatly improved the corn crop. Late corn is in excellent condition.

Kendallville (7): There will be no corn shipped from here, farmers feeding it all and most of their oats.

Tipton (5): No oats will be moved until winter. Corn shucking will start early. Corn all out of the way of frost.

Decatur (7): Will not buy corn until Nov. 15. Farmers feeding oats and holding for more money.

South Whitley (7): No corn will be marketed, about all will be fed. Not many oats left to sell, farmers will feed most of them.

Monticello (1): Weather has been very dry but now have had fine rains. Ground is in excellent condition. Need a frost to kill the corn stocks. If this comes soon, cribbing of corn will begin.

ILLINOIS.

Belleville (3): We have bought some new corn early sown at $1.30 a bushel. There will be a good deal moving about Oct. 15. Not many oats raised here.

Morris (7): Corn will not move before Jan. 1. Do not look for a movement of oats.

Highland (6): There will be no corn marketed here by farmers.

Pocahontas (3): No corn or oats to sell in the farming community.

Sparta (6): No corn to be marketed here.

Freeport (4): Think new corn will be marketed in December. Farmers are not selling oats at present prices.

Mt. Carroll (4): No surplus of corn, all will be fed. Look for no movement of oats until after corn husking is over.

Lostant (4): Movement of new corn will begin about Nov. 1. Oats will not move until in January.

Nashville (3): Corn is almost a failure with us. Oats barely enough for home trade; in fact, some are being shipped in. Sowing will begin this week.

Ashton (4): With good weather, corn should begin to move by the middle of November. Movement of oats will be light before corn husking.

Princeton (4): New corn will begin to be marketed about first of December. No movement of oats until after corn husking.

Eureka (1): New corn will begin to be marketed about Nov. 1. No movement of oats until after corn husking.

Earlville (4): No movement of oats until prices get up around 75c.

Rantoul (5): Sell corn in November if price O. K. Oats not selling.

Sidell (8): New corn will probably begin moving about Nov. 1 with favorable weather conditions. Movement of oats will be light.

Rockport (2): There are no oats in this locality. New corn will begin to be marketed about the 15th of November.

Vermont (2): New corn should begin moving about Nov. 1 if weather remains favorable. Farmers are beginning to move oats which the elevators could not take during harvest account of being full.

Mattoon (8): New corn will probably start to market last week in October. No oats will be marketed until next winter.

Ashland (5): New corn will not be marketed freely at prevailing price. Very few oats to move from farms.

Odell (7): No wheat sown this fall. Very little clover seed and no timothy seed raised for sale.

MISSOURI.

Harrisonville (1): New corn will be marketed in November.

Lamar (3): No corn in this locality for shipment. Crop here will not be to exceed one-third of a crop. There will not be many oats to move, being used for feed on account of short corn crop.

Columbia (5): Our corn is good.

Corning (1): There will not be any corn marketed here till Dec. 1. Oats acreage very small here and very crop. No oats will be sold here.

Carrollton (2): New corn will be keted Nov. 1. However, farmers wi sell for less than $1.25. No oats to s

Higginsville (2): No oats on far market. New corn will be market about 45 days.

Elsberry (8): On Sept. 28 we ha inches of rain, much needed for pl wheat lands.

Salisbury (4): New corn will move Nov. 1, but not much to move as a be used here.

Springfield (3): Have had rain late in insufficient quantity. Will be buy corn, not sellers. Very few oats w marketed early.

Mercer (1): Marketing of new cor begin about Nov. 1. There will movement of oats from this territo any time; no surplus to ship out.

IOWA.

Whitten (4): Farmers will begin ma ing new corn about Nov. 10. Will movement of oats until after corn hu

Clemons (5): There will be some marketed the last of November. Don for much of a movement of oats.

Gilbert (2): New corn would have marketed by the 20th of October, but to the excessive rains it is hard t now.

Onawa (2): Farmers will market early if price is satisfactory to otherwise think not. Do not anticipa run of oats before corn husking.

Tama (5): Movement of oats will be paratively light from now on a shortage of crop. With good weather ers will husk corn by Oct. 25 for cri

Keokuk (9): Farmers are going ba oats and corn, will not sow much w

Avoca (3): Good rains; everything

Belmond (3): Farmers will begin keting new corn in December. Do n pect much of a movement of oats corn husking.

Corydon (6): Farmers will begin ma ing new corn Nov. 1. Surplus of largely delivered.

Indianola (6): Wet weather se hindering sowing wheat and cutting

Spencer (1): Farmers will begin ma ing new corn about Dec. 1. Will movement of oats before corn huski gins.

Truesdale (1): Farmers will begin keting new corn by Nov. 15. Will movement of oats before corn ha begins.

Jefferson (5): There will be no mov of new corn here for at least thirty and not much then as the farmers like the price and have not yet star husk.

Lowden (8): Farmers will not offe before January. Don't expect oats to now.

Henderson (3): Do not think farme market corn at present price. Do n ticipate a movement of oats from fa before corn husking.

Randolph (3): We do not look movement of corn at present price oats to market.

Osceola (6): New corn will beg move about Nov. 1. Farmers will se little oats at present prices.

Oakville (9): New corn will start to ket about Nov. 1. Very few oats w sold this fall at present prices.

Allison (4): Corn will commence to about Nov. 15. Don't look for any ment of oats before corn picking.

Wright (5): Corn will be marketed Dec. 15. Do not think there will movement of oats before corn ha begins.

New Sharon (5): Corn will be ma about Nov. 15. No movement of oa fore corn husking begins.

Glidden (2): Farmers are selling a new corn. Do not think farmers w oats largely before corn husking.

Hamlin (2): It will take a long tim fore any corn will come to market. is very little corn marketed here, m it being fed to stock.

MINNESOTA.

Grand Meadow (9): No corn to be keted. Very few oats moving.

Minnesota (3): Corn movement w early, provided price is right. Oun is in the best shape that it has ever Oat movement will be light unless advances materially.

Henderson (6): Farmers will no corn for a month. We will get very oats until corn is husked.

Warren (1): No corn marketed he

Donnelly (2): Not much corn to m Farmers holding oats for a higher p

Albert Lea (6): Do not look for heavy receipts of oats at any time. oats crop is short 25 per cent unde year.

Hutchinson (6): Farmers will no corn at these prices and there will any oats sold here.

London (6): Corn will begin to be keted about the 15th of November. I think there will be many oats sold corn husking.

Farmington (9): New corn will Nov. 1. At the auction sales farme bidding more for corn and oats that are selling for at the terminal ma This would not indicate that there w any rush to put it on the market.

NORTH DAKOTA.

St. Thomas (7): Only small patch corn here, all matured this season frost yet. Oat crop poor. There w

little to ship out as barley was a fail-

akota (7): This is not supposed to be rn state but the corn is good.
arrington (5): No corn raised here for ket. Farmers are all short on oats and will have to ship in feed.
eat Bend (9): There is hardly any sold and oats are about all marketed

SOUTH DAKOTA.

andreau (8): New corn will not be eted before last of November.
irley (9): They will have to pick the before talking about sell—
tchell (8): No corn husked. Will sell last part of October if price is satisory. Will not move oats until corn is ed.
nton (9): New corn will be marketed ovember. Will not move oats until is husked.
dgewater (8): Will market corn about 15. No movement of oats before corn ing.
rrisburg (9): Farmers will possibly et some new corn by Nov. 15. Do expect much of a movement of oats e corn picking.
nour (9): Farmers will not market new corn on $1.00 basis; no oats to

NEBRASKA.

rvard (9): New corn will be marketed Nov. 15.
perior (9): No marketable surplus of here. Will all be needed here.
eland (9): We have had plenty of delaying seeding of wheat for five Dry fall matured the corn.
rmont (9): We will need all the oats orn for home feeding. Will also have in both.
raska City (9): We look for corn to to move at about normal time, latter of December.
nton (9): Corn will not move before 1. No surplus oats.
trice (9): No marketing of corn for months. Very few oats will be mar- soon.
gh (7): About Oct. 20 new corn will rketed. Farmers will hold oats.
uyler (7): Farmers do not seem very s about contracting or selling corn s yet but will likely have some for ast of October. Do not anticipate of a movement of oats for ninety

ice (7): Begin corn husking next marketing will begin in about sixty Oats movement will not be heavy.
perior (9): No surplus corn or oats for ere. We will likely ship in both for ise next spring. Farmers indifferent selling anything, not making any g plans.
ans (6): Will sell new corn in thirty No movement of oats and will not

KANSAS.

isburg (9): Too hot, corn not worth ing.
boro (5): Not much new corn raised locality on account of the drouth. rs are not selling oats freely, holding her prices.
ison (9): No new corn on market. No market. Farmers selling wheat moved to market.
Vista (8): Will have to ship in corn ts for feed.
on (4): The excessive rains recently amaged the unthreshed wheat about

eville (4): No corn or oats for marom the farmers here to speak of. little is for sale will move from one to another.
lo (5): No new corn will be marr oats either. Ground in prime con- Farmers will delay seeding on ac- of hoppers.
tion City (7): Practically no corn marketed here. Any surplus will tedly be absorbed by feeders. No ill be marketed in this locality.
nita (6): No corn to market here. s to move.
l (4): No corn or oats to ship here. ave to ship in to supply the demand.
eapolis (4): No corn will be offered ount of small acreage and short crop. ittle oats in country.
go (9): There are not any more re than will be used on the farms. will not be any corn here to ship. ve to ship in some later.
esha (9): Corn will be sold about ber 1st. Have had no frost yet. rn crop is a small one. Will need ts for feed.
ordia (4): Short crop of corn. Most ill be fed on farm. Same condition of oats.
ca (7): There will not be very much r shipment from this station and s.
ntown (9): We have no corn or oats out, will have to ship in.

BUCKWHEAT SITUATION.

new crop of buckwheat reached ity with less than the usual dam- it has yet to pass the most critical (from a milling standpoint) be- cutting and threshing. Since har- n many sections frequent, and in erritory almost continuous, rains already caused some injury and can be no free movement of the ntil a period of dry weather en- Prices promise to rule somewhat lower than the opening prices of last year.—*Blodgett-Holmes Co.*

The Pennsylvania State Report estimates the acreage sown to buckwheat this year as 317,000. Condition on Aug. 1 was 94.

In New York buckwheat was mostly harvested prior to the first of October, in Maryland the grain was ripening, in Michigan the harvest was completed.

RECEIPTS AND PRICES OF RYE.

Receipts of rye at the principal primary markets of the Central West for the week ended Oct. 3, and for the corresponding week last year, as compiled by the Minneapolis *Market Record*, were:

	1919, cars.	1918, cars.
Minneapolis	171	344
Duluth	326	470
Chicago	43	19
Omaha	23	4
Milwaukee	38	13
Total	601	250

Closing outside prices of rye of standard quality and spot cash for each day of the week beginning Sept. 26, were:

	Mpls.	Dul.	Chi.	Oma.	Mil.
Sept. 26..	$1.39⅜	$1.40¼	$1.42¼	$1.33	$1.42
Sept. 27..	1.39⅜	1.41	1.42½	....	1.42½
Sept. 29..	1.39⅞	1.40½	1.42¼	1.25	1.42½
Sept. 30..	1.39¼	1.40	1.42	1.30	1.42
Oct. 1....	1.40⅜	1.41¼	1.43	1.32	1.42
Oct. 2....	1.42	1.42⅞	1.43½	1.33	1.44½
Oct. 3....	1.39¾	1.40⅜	1.42¾	1.32	1.42½

Visible Supply of Corn.

Official statement of the visible supply of corn in the U. S. weekly, compared with same weekly dates of previous three years:

WESTERN GRAIN DEALERS MUTUAL FIRE INSURANCE COMPANY

HAZARDOUS CONDITIONS

This is the season of the year when country grain shippers usually make repairs on their elevators preparatory for the handling of the next crop, and we urgently suggest attention to the following hazardous conditions, namely:

Windows:—Broken or open. **Doors:**—Out of order; no fastenings; not locked at night. **Siding:**—Openings in, or warped away from wall. **Roof:**—In bad condition. **Foundation:**—Openings in. **Cob Room:**—Not closed, or husks and dirt allowed to accumulate. **Dust Room:**—Accumulation of dust and dirt. **Pulleys:**—Wooden. **Gasoline Engine:**—On wood floor; gasoline leaking; torch ignitor; gravity feed; improper method of starting engine; supply of gasoline too near engine or not properly protected; accumulation of oil and dirt about the engine. **Electric Power:**—Not properly installed or neglect in use of. **Dust and Dirt:**—Accumulation in elevator. **Weeds and Trash:**—Allowed to remain around elevator. **Chimney:**—Defective. **Stove:**—Floor, walls or ceiling not protected. **Oily Rags or Waste:**—Thrown about the premises. **Bearings:**—Not oiled, allowed to become dry and heat. **Wooden Spittoons:**—Cigar stubs thrown in. **Lights:**—If electric, not rightly installed or protected. If lanterns, carelessly used.

The correction or elimination of all such hazards will materially reduce the danger of fire, will reduce the cost of insurance, and avoid serious loss.

JAY A. KING, President **M. E. DEWOLF, Treasurer**
F. D. MILLIGAN, Chairman, Executive Committee
GEO. A. WELLS, Secretary
716-720 Hubbell Building, Des Moines, Iowa

Oats in Primary Markets.

Receipts of oats in eleven primary grain markets from Aug. 1, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	21,457,000	37,066,000
Milwaukee	6,929,000	9,794,000
Minneapolis	5,419,000	10,493,000
Duluth	318,000	849,000
St. Louis	5,124,000	6,262,000
Toledo	970,000	3,547,000
Detroit	480,000	1,170,000
Kansas City	1,839,000	6,120,000
Peoria	1,583,000	2,840,000
Omaha	2,228,000	5,600,000
Indianapolis	3,042,000	4,498,000
Total	49,389,000	88,239,000

Receipts of oats the past week at primary markets, compared with preceding week and corresponding week last year:

	Oct. 4, 1919.	Sept. 27, 1919.	Oct. 5, 1918.
Chicago	2,076,000	1,898,000	1,661,000
Milwaukee	336,000	578,000	632,000

News of the Terminal Markets

DES MOINES, IA.

B. Randleman, Correspondent.

Receipts have been rather heavy on both oats and wheat during the past week. Oats selling at 66c to 67½c. Wheat, 5 to 8 cents over Government price. Receipts of corn have been light. Prices have been ranging from $1.40 to $1.43.

OMAHA.

Leigh Leslie, Correspondent.

These officers of the Nye-Schneider-Fowler Grain Co. were elected this week: Frank Fowler, president; S. P. Mason, vice-president; R. J. Southard, secretary; Ray Nye, treasurer, and J. A. Cole, assistant treasurer.

The market in wheat has had only moderate breadth in the last week, while that in other grains has continued narrow. The car situation is still bad, shippers being unable to get enough cars for their requirements. Wheat suffered a very considerable decline Friday and Saturday. The demand for all grains has been sufficient to take care of the offerings.

MEMPHIS.

George Williamson, Correspondent.

Dealers in seed report demand improving some, but the volume of business done so far for fall sowing has been light. One reason has been the protracted dry spell.

Trading in cotton seed meal will be resumed at the Merchants Exchange on Oct. 15 and at the meeting of members of that trade on Monday rules regulating transactions were adopted, thus making them official. Indications are that considerable business will be done in meal through the future trading.

New members of the Merchants Exchange have been elected as follows: Ernest C. Merton, of John T. Leonard & Sons; J. W. Sykes, Jr., of the Mississippi Elevator Co.; Centennial Milling Co., H. B. Burtt, secretary; Delta Flour & Feed Co., M. G. Odeneal, president. They are all engaged in one way or another in the grain and flour business.

Business continues at a minimum and consequently prices have not changed much during the week. Receipts of corn, oats and hay have been light and there is not much demand for any of them. The mills are grinding but little meal and the feed manufacturers are having their dull season. Corn his stiffened up slightly, but buyers and sellers are far apart in their ideas of value. No. 2 on track Saturday was $1.50 bid and $1.60 asked, while $1.50 was bid for cash 2 yellow. The country is not offering anything in this section, but apparently has not anything to buy yet. Oats are firmer and cash 2 white from Illinois sold Saturday at 73, an advance of half a cent over the day before.

DULUTH.

S. J. Schulte, Correspondent.

Receipts of oats have been limited on this market so far this fall with offerings barely sufficient to take care of the district demand. Spot No. 3 white oats were quoted at 67@70c here, as against 64⅞@67⅞ last week.

Rye has been liberally traded in on this market during the last few days. As, after selling up to $1.52⅞c, No. 3 spot rye eased off on Saturday to $1.41. The present restriction on shipments to Buffalo is exerting a bearish influence on the trade.

Application has been posted for the admission of the R. B. McLean Co. of Winnipeg to corporate membership on the Duluth Board of Trade. That company has in the past done a good trade in flaxseeds on this market, in which W. H. Kiichli has largely acted for them.

Only 430,000 bus. of wheat were loaded out of the elevators here to go down the lakes during the last week. While shipments to Buffalo and other markets are being strictly held down on account of their storage capacities being taken up, less than 6,500,000 bushels of all grains is on store in the plants here out of a total capacity of around 35,000,000 bushels.

Hugo Eberle, a Swiss miller, was a visitor on the market here during the last week as the guest of B. Stockman, manager of the Duluth-Superior Milling Co. He asserts that he would be glad when the war restrictions are removed from the trade in cereals and that country would be able to get some good American wheat. The Swiss government is expected to relinquish its control of all grains in the near future, he asserted.

Grain Forwarding
NEW ORLEANS, LA.

Receipts of Nos. 1 and 2 dark and northern wheat are continuing to just straggle in. Some days no wheat of those grades is offered on the tables. No. 3 dark northern wheat sold up to $2.85 here during the week, with a car of No. 1 dark northern going at $2.95. Some of the lower grade wheat and durum has been left for the Grain Corporation to take care of during the last few days.

Grain handlers at Duluth have received advices to the effect that good progress is being made in plowing over western Minnesota and North Dakota, with the ground in good condition as the result of regular rainfalls during the last few weeks. It is believed that a normal acreage of land will be prepared for seeding to spring wheat. It is reported, however, that farmers are disposed to go in for dairying and mixed farming to a greater extent next season on account of the government guarantee coming oft wheat with the last crop.

NASHVILLE.

John Leiper, Correspondent.

Farmers in Tennessee are beginning to sow wheat. It is thought a good acreage will be seeded.

Receipts of grain at Nashville last week were 181 cars. stocks at the end of the week were: Flour, 42,400 barrels; wheat, 735,000 bushels; corn, 55,800 bushels; oats, 554,900 bushels.

Grain trade in the Nashville market last week was routine. Light demand continued for corn, and oats were fairly active. Quotations: Wheat—No. 2 red, $2.28@2.30. Corn—No. 2 white, $1.62@1.65; No. 3 white, $1.58@1.62. Oats—No. 3 white, 75@76c; No. 3 red, 73@74c.

An auction sale will be held Thursday, Sept. 16, in Nashville, when the plants of the Steel Elevator & Storage Co., 325-000 bushels capacity, and the Capitol Grain Co., including a small flour mill, will be offered to the highest bidders. Both plants have river and rail facilities.

Corn mills in the southwest report slight improvement in inquiries, and increased demand is expected for meal. Southwestern mills with capacity of 117,000 bushels, had output last week of 11,856 bushels, or 10.1 per cent of capacity of mills reporting, compared with 10,640 bus., and 7.3 per cent, the preceding week. Quotations: Bolted corn meal, per 100 lbs., sacked, $3.50@3.70; plain 5@10c less.

CAIRO, ILL.

J. E. Clancy, Correspondent.

H. E. Halliday and family have returned from a six weeks' trip through the east.

Ichtertz & Watson, grain commisson merchants at St. Louis, have discontinued their branch office at this place.

The first car of new corn was received here Oct. 4th from McClure, Ill., consigned to Samuel Hastings Co. The corn graded No. 4 white and contained 19.3% moisture.

W. L. Duncan of the Samuel Hastings Co. is back at his desk after a three weeks' honeymoon trip and is now receiving the congratulations of his Cairo friends.

Business here the past week has been unusually dull. Receipts of grain have been light, and the shipments are light, there being practically no Southern demand at present.

The Cairo delegation to the Grain Dealers National Convention at St. Louis will be: H. E. Halliday, A. W. Lynch, O. B. Hastings, H. S. Antrim, Ira Hastings, A. E. Rust, J. B. Gillispie, Jr., and W. S. Powell.

The J. T. Polk Preserving Co. have moved the main offices to Mound City and will make this their main canning plant. They have purchased large tracts of land and are having plans drawn for several new buildings. The Polk Company is one of the largest of its kind in the country.

DETROIT.

John Barr, Correspondent.

Trading in rye is lifeless and No. 3 is quoted nominal at $2.40@2.50 per cwt.

Beans are very active. Farmers have been liberal sellers and demand has been well sustained. The market advanced 30c and was firm at the close at $7.30 for immediate and prompt shipment per cwt.

Shippers did not do much in the rye deal. A little went out early in the week and later the market was sustained by some bidding on the part of local mills. The market is called firm at $1.42 for cash No. 2.

Buying for local consumption held the oats market firm nearly all week. Receipts are small. There was a little enquiry for oats for eastern shipment, but not much business. Quote: Cash No. 2 white, 74½c; No. 3 white, 72½@73c; No. 4 white, 71½@72c.

The local corn market is dull owing to small supplies. It held firm most of the week while other markets were quoting lower prices. Receipts are so small and the market has independent strength and pays little attention to bullish or bearish news that affects other markets.

The wheat market shows an increase in activity and the price is higher. The advance came from bidding by mills in competition with export demand. Shipping from here has been active all week. The market at the close was firm at $2.27 for cash No. 1 red, $2.25 for No. 1 mixed and $2.25 for No. 1 white.

Selling corn to Canada for feeding and distilling was formerly a large business with Detroit grain men, but it has gone to pieces recently and now amounts to nothing. The distilling went out with the war prohibition, but is trying to come back. Canadians will vote on this question October 20. As to feeding, there is an abundance of oats, barley and a low grade wheat and this is being used by the Canadians in place of high priced American corn. Then came the last straw. Canadian paper money went to a discount that amounts to a loss of $100@150 per car to the American shipper.

INDIANAPOLIS, IND.

Myron R. Green, Correspondent.

Thirty-five bushels of seed wheat were stolen from Zach Vachon, a farmer of Markle, Ind. The wheat was in sacks and marked "Z. Vachon."

Five million dollars is the approximate value of Allen county's corn crop according to the estimates of H. R. Smally, county agent, following a survey of 100 fields.

Difficulties in obtaining farm labor and lateness of the season in getting ground broken are contributing factors to a seriously threatened wheat acreage shortage for next season. Farmers insist that they have made no money from this year's wheat crop and the price of wheat is too low.

Improvements made in the seed wheat hot water testing machine by C. M. Job has been officially approved by the United States department of agriculture at Washington. W. H. Reed and V. F. Tapke of the department examined the model and ordered a similar machine of the same model, which will be used over the country in the department demonstrations.

When Michael Wolf opened his wheat granary in East Columbus a few days ago to get his seed wheat, he found a greatly diminished supply, with no indication of how the thief had gained entrance. Investigation showed that a hole had been bored through the floor of the granary and carefully plugged up. Tracks under the granary indicated that many trips had been made.

Grinding night and day without stopping, the Atlas Mills of Vincennes, Ind., are handling from 2,500 to 2,700 bushels of wheat every 24 hours. The mills are working double shift and will continue to do so until the first of the year. The flour milled from the red wheat, grown largely in Knox county, is dark in color, and in order to offset this feature, the wheat is mixed with smooth wheat shipped here from other points.

CLEVELAND, O.

F. R. Sowers, Correspondent.

Trade this week has been quiet in all lines and our investigation through the country develops that farmers are busy filling silos and completing their corn cutting, which accounts for possibly a slack movement from farm to elevator of grain at this particular time.

The corn crop in this locality is the finest this year experienced in a long while. Up to October 1st there had been no frosts in northern Ohio and this allowed the crop to mature properly.

Feed prices in some instances show a decline which is noticeable and to the advantage of the dairymen.

No. 1 timothy is quoted at $29 with a light demand, but No. 2 is quoted at $26.50 to $27 and very little moving at that price in this market. There always is a better demand for No. 1 timothy than for any other grade.

Oats, wheat and straw quoted at $10. Enough is arriving to satisfy local demand thus far.

Harry Prue, Federal Grain Supervisor for this district, returned last week.

John P. O'Donnell, formerly superintendent of the Lake Shore elevator, has left that position and we understand he will be the superintendent of the newly acquired elevator of the Cleveland Grains Drying Co.

On Friday of last week the Cleveland Grain Co. unloaded for storage another boat load of Government wheat. They are taking care of quite a bit of wheat for the Government again this year in their large elevator.

Announcement is made that the Cleveland Grains Drying Co. has purchased the Faber elevator and will do a general grain and hay business in connection with their grain drying business, with John P. O'Donnell as superintendent of the elevator. This assures the Cleveland Grains Drying Company an opportunity for increasing their business, which is an indication that they have enjoyed a prosperous year.

William Saunders has been appointed superintendent and weighmaster of the Lake Shore Elevator, taking the place of John P. O'Donnell.

A STROKER for You

A **stroker** is a weapon specified by the Department of Agriculture to be used in striking off the grain from the top of the grain kettle used in determining the bushel-weight of grain. It must be of "hard wood, ⅜x1¾x12 inches, with the edges formed to a semicircle."

We have them for

Free Distribution

On one side are printed the grade requirements of wheat, and on the other those of corn and oats, so it is useful for other purposes than as a stroker. Its best use is to remind you that we are makers of and headquarters for **Brown Duvel Moisture Testers, Dockage Sieves and Scales,** Bushel-weight **Grain Testers, Probes, Sample Containers** and all other apparatus used in the testing and grading of grain.

Send for a Free Stroker—Your name on a postal card will do.

The ups and downs of the Chicago corn et has not stimulated buying. Bulk yellow corn has been sold at $1.59 per el delivered New Orleans, New Orweights and grades to govern. Track rs claim they have been doing somebetter than this price, although, at offerings of corn from the country are limited. The demand, domestic and wise, is slow and there is not much to the situation.

NEW YORK.

J. M. Nugent, Correspondent.

Among the visitors upon the floor of the ice Exchange during the past week Frank Delaney of Chicago; Louis opp of Boston; W. Coats of Montreal, . E. Francis of Milwaukee.

Situation in cash corn remains dull with stic demand about steady. Offerings, wer, are not liberal. Argentine corn ing offered c.i.d. New York rather and at prices well under the Ameriariety. At the present rate of t between the Argentine and the d States, this corn can be laid down at a cost less than $1.30 per bus. yellow corn was quoted at $1.64¼ No. 2 white at $1.63¼ per bus.

he export business was reported in uring the week, and was said to be rance. Details, however, could not nfirmed, although it is claimed more ½ million bushels were worked. Dohe demand for oats continues on a cale and prices remain steady. No. te are quoted at 81½c; No. 2 white, o 81c; No. 3 white, 80 to 80½c; No. te, 79 to 79½c; fancy white clipped, nd ordinary white clipped, 80½c.

Saturday, Oct. 4th, an informal reon was held on the floor of the Pro Exchange to welcome H. R. M. Al King of Belgium, and his son, the Prince. There was a large attendof members and their friends to rethese distinguished personages. Durhe time of their visit on the floor ss was practically suspended while ne joined in giving this heroic King is son a hearty welcome, the ensm of which gave evidences of the steem in which they are held.

PITTSBURGH, PA.

I. B. Laufman, Correspondent.

The receipts of straw are better than rl, but demand is very light. Prices lding steady around $11.50@12.00 a .

There is no ear corn coming into the al market and no established quotaexist at this time. It is too soon w corn.

W. J. Parker and Albert Lauffer, both Pittsburgh, were visitors at the local nd grain exchange during the past as guests of J. E. Guyton.

Receipts of all kinds during the last show a material increase, except arrivals of corn. Corn indicates a se of about 2,000 bushels over the period in 1918. The largest peres of increase were recorded in affs and straw.

The oats market here is quiet but firm. show an advance of about 1 cent el over former quotations, although d is easy. Receipts were 92,000 s for the week as compared with 0 bushels in 1918. Best grades are around 76½@77 cents a bushel.

Receipts of shelled corn are light, but are sufficient for all demands at . The corn market is rather slugwing to disposition of buyers to developments. No. 1 yellow is g $1.58@1.59 a bushel with other a few cents under those prices.

The difficulty has been experienced by officials here in taking care of shipsince the disastrous fire occurred Central Elevator on Pike street. arrivals have been fair extra acdations have been found for cars oved immediately and there have w leftovers from day to day in the It will be some months before the elevator is rebuilt but no difficulty ipated here on that score.

WESTERN CANADA.

A. Caldwell, Correspondent.

Winnipeg flax market continues to extreme range of fluctuations but dily working downwards. Flax is high and the crop generally is a ne but of no great volume.

not yet possible to estimate the new oken this season. On the whole the was not favorable but there is no a large acreage was brought under ugh in the outlying districts.

gh the weather has been delaying shing it has been very favorable for ltivation of the land. The rains pt the ground in excellent tilth and l acreage already turned over is arge. The fact that there will be y a marked decrease in the acreage vinter wheat in the United States is d favorably for them by spring farmers. Conditions certainly point ger acreage in spring wheat in the n west than ever before.

weather during the past week has ery unsettled and caused considerlay to threshing where not com- It has also hampered deliveries by country roads in bad shape. These ave caused some alarm over the deliveries of oats and barley and caused the Winnipeg market to exhibit a certain independent strength in these lines. Wheat receipts continue in fair average volume but are not as heavy at this time as might be expected from the remarkably early harvest. Probably with a fixed price farmers see no necessity for rushing their grain to market. Oats and barley they are inclined to hold, not being satisfied with existing prices for these grains. The export barley market is undoubtedly firm, and if shipping were available prices would be higher. There does not seem to be any export enquiry for oats.

CINCINNATI.

George Mosbacker, Correspondent.

Further steps were taken here by U. S. Terminal Manager John A. Morris to alleviate the distressing shortage of box cars in the Cincinnati district.

A. C. Gale, president of the A. C. Gale Grain Co., has returned from a brief but enjoyable fishing trip to Lake Wawasee, Ind., the guest of Frank Wright of Brookville, Ind.

George Metzger, who gained a wide acquaintance among members of the local grain trade through his many years' connection with the Big Four Railroad, died suddenly at his home, Hartwell, Ohio, last week.

President E. B. Terrill, of the Grain and Hay Exchange, will appoint a committee this week to represent the local Exchange at the annual convention of the Grain Dealers' National Association to be held in St. Louis, October 13, 14 and 15.

D. J. Schuh, secretary of the Grain and Hay Exchange, who is also a leading spirit in the newly organized American Legion, and vice commander of the Robert E. Bentley Post, a local branch, has been appointed a delegate to the state convention to be held at Columbus, October 9 and 10.

The grain elevator of The Early & Daniel Co., located at 6th and Carr Sts., was damaged by fire to the extent of several hundred dollars the past week, caused by dust in a grain chute. About an hour after being apparently extinguished the fire broke out again, the fire department in responding striking a wagon driven by an old negro, who was seriously injured.

The holiday spirit was much in evidence at the Grain and Hay Exchange on Wednesday and Thursday, incident to the World's series ball game, and the trading session was adjourned early to permit members and guests to attend. Many shippers of grain and hay to this market attended the games as guests of the Cincinnati trade, who provided tickets and hotel reservations.

The Ruehlmann Flour Co., local millers, located on Harrison Ave., have outgrown their present quarters and will erect a new building on Sixth St., opposite the Big Four Station, to cost about $100,000. The structure will be built of brick, two stories, with a frontage of 84 feet and 135 feet long. Flour storage will have a capacity of nine carloads per day, and the milling department is to be perfect in every detail, and thoroughly equipped with the most modern appliances and milling machinery.

Among rate cases of interest to the trade to be considered by the Louisville District Freight Traffic Committee on October 8 are: Request of the Louisville & Nashville railroad for authority to amend its tariff covering milling in transit of grain at Clarksville, Tenn., drawn from or through Evansville, Ind., and the product shipped by the L. & N. to gulf ports for export to foreign countries, except Europe, Asia and Africa, to provide for grain drawn through Evansville and to add definition of the term "grain and grain products."

During the month of September the members of the Cincinnati Grain & Hay Exchange received 1,078 cars of hay, 248 cars more than during the same month last year, and 529 cars more than during the previous month this year. This is the second time since 1895 that more than 1,000 cars of hay were received in Cincinnati during the month of September. The previous high record for September having been established in 1917, when a large volume of this commodity passed through Cincinnati for shipment overseas. At the close of business Sept. 30, 1919, the total receipts of hay so far this year were within 281 cars of the total for the year of 1918.

Certified checks for $6,000 were turned over to the Clerk of the United States Court in satisfaction of the fines assessed against August Ferger, former president of the Ferger Grain Co., of this city, and his employes and associates, Robert H. Rasch and Thomas M. Dugan. The fines were those imposed ten days ago by the late Judge Hollister, after pleas of guilty had been entered by them, confessing the making and use of fictitious bills of lading by which the Ferger Company succeeded in obtaining a loan of $22,000 from the Second National Bank of this city. The fine against Mr. Ferger was $5,000 and against the others $500 each. Mr. Ferger assumed the entire responsibility, financial and otherwise, and the case is closed. The loan of the bank was repaid in full before prosecuting proceedings were commenced.

Cash Markets.

Wheat. A keen demand prevailed for good milling wheat, and though no advances were recorded for No. 1 or 2, a fractional gain was made for No. 3 with low grades quoted a shade lower. Few of the arrivals of good quality were offered, and

reported sales during the week showed only 6 cars of No. 2 red and all of 58 lbs. at $2.26½. Most sales were of damp and smutty grain, with several cars full of live weevil, which were sold only after a price adjustment with shipper. No. 1 red winter, track, $2.27½@2.28½; No. 2 red winter, track, $2.26½@2.27½; No. 3 red winter, track, $2.23@2.25½; No. 4 red winter, track, $2.17@2.19; No. 5 red winter, track, $2.13@2.15; sample as to quality, $2.10@2.20. Smutty wheat discounted from 2 to 4c per bushel as to grade.

Corn. The demand for shelled corn remained inactive, and was confined entirely to immediate needs of a few buyers for mill supplies of top grade white and yellow. Prices for these ruled fairly steady to a slight decline from last week, but mixed was extremely dull and suffered losses of 5c per bushel. Small receipts alone prevented greater declines. Ear corn was in good demand with few offerings. No. 1 white, $1.48@1.49; No. 2 white, $1.47@1.48; No. 3 white, $1.46@1.47; No. 4 white, $1.45@1.46; No. 5 white, $1.42@1.44; No. 6 white, $1.40@1.42; No. 1 yellow, $1.48@1.49; No. 2 yellow, $1.47@1.48; No. 3 yellow, $1.46@1.47; No. 4 yellow, $1.44@1.46; No. 5 yellow, $1.42@1.44; No. 6 yellow, $1.40@1.42; No. 1 mixed, $1.47@1.48; No. 2 mixed, $1.46@1.47; No. 3 mixed, $1.45@1.46; No. 4 mixed, $1.43@1.45; No. 5 mixed, $1.41@1.43; No. 6 mixed, $1.39@1.41.

Oats. The oats market ruled steady until near the close of the week when higher options influenced the market 1½ to 2c above last week's prices. The demand was only fairly active, with elevator and local retail feed interest absorbing the moderate receipts. Good whites of heavy weight continued to command a premium. No. 1 white, 74½c; No. 2 white, 74c; No. 3 white, 72½@73c; No. 4 white, 71½@72c; No. 1 mixed, —; No. 2 mixed, 71½@72½c; No. 3 mixed, 70@71c; No. 4 mixed, 69@70c.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

During the week four steamers took out 703,981 bushels of wheat and 86,189 sacks of flour for Europe.

Exports for the week ending Oct. 3 were, 1,577,908 bus. wheat; 70,000 bus. oats; 30,000 bus. rye, and 6,836 bus. barley.

Receipts of flour and grain for the week ending Oct. 4 were 800 bbls. and 18,908,879 pounds of flour in sacks; 870,669 bus. wheat; 7,086 bus. corn; 118,640 bus. oats; 5,108 bus. rye; 1,500 bus. malt, and 720 tons of feed.

The Cream of Corn Company with a capital of $500,000 having for its object the manufacture of cereal products of all kinds, has been chartered under the laws of Delaware. M. M. Lucey, B. M. Barrett and M. Butler, all of Wilmington, are the incorporators.

W. S. Woodward & Co., corn millers and grain dealers, 23d and Cherry streets, Philadelphia, have sold out their business to W. G. Morse and Richard Haughton, who will conduct the business at 23d street and also five other branches in various parts of the city under the firm name of Woodward & Co.

The following out of town flour and grain men were registered at the Commercial Exchange during the week: H. W. Hilyard, grain shipper, Kenton, Del.; J. W. McCulloh, member Board of Trade, Chicago; J. Lee Murphy, grain dealer, Baltimore; W. C. Cullen, grain shipper, Pocomoke, Md., and J. K. Ressler, Lancaster, Pa.

LOUISVILLE, KY.

A. W. Williams, Correspondent.

Repairs costing $3,000 will be started at once on the plant of the Fleischmann Malting Co., Louisville.

Corn harvesting is well along and a very fair crop is in prospect. Rains came too late to help corn, but aided potatoes materially.

Reports from various sections of the state are to the effect that a small wheat crop is being planted as compared with the last two crops.

The Ferncliffe Feed & Grain Co., recently incorporated in Louisville, is remodeling the Ferncliffe Distillery to manufacture molasses and other feeds.

The Thompson Milling Co., operated by the Thompson elevator organization, has been issued a permit for repairs costing about $5,000, including a new warehouse.

The Ballard & Ballard Co., of Louisville, in addition to having become corn buyers since installing its corn mill, is now buying oats, which are used in manufacturing crush oat feeds, chop feeds.

Clover hay this year is equal in price to timothy due to the high cost of seed, small crop, and coming heavy fall demand. No. 1 timothy and No. 1 clover are on a par valuation today, which is very unusual, and mixed hay is close in line.

Corn mills are busier than they have been, with orders on hand to run two shifts for the next ten days. Meal is in fair demand at the lower prices. Cornmeal is quoted at $3.40 a hundred in cotton; pearl and cream meal and hominy grits, $3.65, and corn flour, $3.75.

Elevators are not at all rushed, but are somewhat busier than they have been. There is a good export demand reported on oats, which is resulting in movement of oats through primary markets being somewhat lighter as offerings have slumped. Corn is not moving at all freely, as farmers are holding for higher prices.

BOSTON.

R. S. Wallace, Correspondent.

Export of grain for the week ending October 4th were: Wheat 232,000 bushels; oats 114,092 bushels; barley 13,288 bushels.

Stocks of grain in regular elevators September 27th were: Wheat 614,133 bushels; oats 89,372 bushels; rye 72,616 bushels; barley 52,089 bushels.

Exports of grain and flour for the month of September, 1919, were: 1,118,000 bushels; oats 670,433 bushels; rye 188,919 bushels: oats 33,185 bushels; flour 5,375 sacks.

The following were visitors on 'Change during the past week: R. J. Kennelly, New York City; Howard J. Smith, Buffalo, N. Y.; J. E. McCartney, Canton, N. Y.; E. J. Housen, Battle Creek, Mich.; J. D. Hurlburt, Toledo, Ohio; F. W. Rowe, Grand Rapids, Mich.

Receipts of grain and flour for the month of September, 1919, were: Flour, 175,517 barrels; wheat 1,801,470 bushels; corn 3,525 bushels; oats 538,760 bushels; rye 223,325 bushels; barley 1,250 bushels; malt 12,700 bushels; millfeed 320 tons; cornmeal 1,545 sacks; oatmeal 4,075 cases.

The demand continues rather light for nearby corn, although prices are quite some higher than a week ago. The following prices were quoted at the close: For shipment, No. 2 yellow corn, $1.66 to $1.68 per bushel; No. 3 yellow corn, $1.65 to $1.67 per bushel. Receipts for the week ending October 4th were none.

Oats continue in rather light demand with the market a trifle higher than a week ago. The prices quoted at the close: New 38/40 lbs., fancy, clipped white oats, 84 to 84½c per bushel; New 38/40 lbs., regular, clipped white oats, 83 to 83½c per bushel; New 36/38 lbs., regular, clipped white oats, 82 to 82½c per bushel. Receipts for the week ending October 4th were 10,600 bushels.

BUFFALO.

E. Bangasser, Correspondent.

Leroy Urmston, president of the Urmston Grain Co., was in Buffalo this week.

A few cars of No. 2 rye sold at $1.48 on track, through billed, but the market has eased off since.

The Buffalo elevators are plugged with grain and there are no prospects of relief until cars are more plentiful.

All records for growth of hay have beeen shattered on many farms in this state. Still there is no disposition shown to sell at what dealers consider a fair price.

The Nowak Milling Corporation, with the main office over the Broadway National Bank on Broadway, has opened a branch office at 716 Chamber of Commerce. Chas. J. Reitz is in charge of this office. Mr. Reitz is well and favorably known all over the country, having been in the feed and grain business for 43 years, and is no doubt the oldest in years in that line in Buffalo. He is still young and active. He is a member of the Corn Exchange of Buffalo.

Buyers wanted corn but kept their eyes on the other markets, remaining out on any sharp advances and taking only sufficient to supply their wants when prices eased off. Not a sale was made yesterday owing to the weak feeling in the West and today only a few cars were sold at about 1c over last week. No. 1 yellow and No. 2 yellow, $1.55 on track, through billed. Light mixed corn was hard to dispose of at any reasonable difference in price.

While oats sold up about 2½c during the week the demand the past few days was extremely light and prices began to settle back. Receivers were inclined to clean up at the close of the day and buyers took advantage of this. Some heavy weight oats brought a premium of ¼c to ½c, but as a rule they all went together to move any quantity. It looks like lighter receipts as this market has been a little low. Closing: No. 1 white, 76¼c; No. 2 white, 75¾c; No. 3 white, 74¾c; No. 4 white, 73¾c on track, through billed.

Quite a fair amount of wheat has been coming to this market but the past two days it looks as if the movement has been shot to pieces as the receipts have dropped off almost entirely. The mills were in the market for all kinds and kept the tables cleaned daily. They were also willing to pay a little better prices. Sales were at $2.31 for No. 1 red; No. 2 red, $2.28; No. 3 red, $2.24; No. 4 red, $2.20; No. 5 red, $2.17; No. 2 mixed, $2.26; No. 3 mixed, $2.23 on track, through billed. Smutty wheat sold at the usual discount.

Inspection track receipts for the week: Wheat—No. 2 soft white, 4 cars; No. 3 soft white, 1 car; No. 4 soft white, 2 cars; No. 1 red, 2 cars; No. 2 red, 12 cars; No. 3 red, 19 cars; No. 4 red, 11 cars; sample red, 10 cars; No. 1 mixed, 4 cars; No. 2 mixed, 10 cars; No. 3 mixed, 5 cars; No. 4 mixed, 1 car; No. 5 mixed, 1 car; No. 1 hard winter, 1 car; No. 2 hard winter, 12 cars; No. 3 hard winter, 31 cars; No. 4 hard winter, 8 cars; No. 5 hard winter, 4 cars; No. 2 dark hard, 1 car; No. 1 northern, 9 cars; No. 2 northern, 7 cars; No. 3 northern, 13 cars; No. 4 northern, 2 cars; No. 1 dark northern, 5 cars; No. 2 northern, 3 cars; sample spring, 2 cars. Corn—No. 1 yellow, 43 cars; No. 2 yellow, 59 cars; No. 3 yellow, 2 cars; No. 4 yellow, 2 cars; sample, 2 cars; No. 1 mixed, 2 cars; No. 2 mixed, 5 cars; No. 3 mixed, 2 cars; No. 4 mixed, 3 cars; No. 1 white, 1 car. Oats—No. 1 white, 40 cars; No. 2 white, 97 cars; No. 3 white, 92 cars; No. 4 white, 3 cars; sample, 6 cars. Rye—No. 2, 2 cars.

RICHMOND, VA.

Aubrey Hawkins, Correspondent.

Little improvement in business this week, with good demand for feeds, and demand for grain slow.

The hay situation here for the present is very discouraging, there being lots of consigned hay on track, also quite a lot of off grade hay shipped on orders for No. 1 timothy, light mixed and No. 2 timothy, which will grade all the way from sample hay, No. 3 timothy, mixed hay, with more or less stained hay and lots of grassy hay.

The spot hay market is demoralized and owners selling for anything they can get.

Quotations on No. 1 timothy to arrive from responsible shippers, range from $31.00 to $32.00.

Millfeeds are quoted for shipment today about as follows: Bran, $40@42; std. middlings, $52@52.50; red dog, $68@69.

Cotton seed meal took a little advance early in the week to drop off a little during last of the week.

Oats are quoted: No. 2 mixed, 75@76c; No. 3 white oats, 76@77c.

No. 2 red wheat is offered around $2.35, Richmond rate, bulk.

Corn selling at $1.55@1.57, No. 2 white and yellow.

Weather very dry; no rain for six or eight weeks. No serious labor troubles to report.

The Richmond branch, American Locomotive Works, has closed down entirely. However, it is expected to want men in a month or so, provided they can be obtained on a new wage scale, somewhat lower than previously.

The union carpenters and tinners are out on strikes, and those contractors who have non-union shops are getting more work than they can do, also are adding to their forces every day.

ST. JOSEPH, MO.

W. H. Moore, Correspondent.

The Carter Grain & Hay Co. has been incorporated with a capital of $5,000, and will do a general hay and grain business in St. Joseph.

Edward Corrigan, sales manager of the Grain Belt Mills Company, left Saturday night for an extensive tour of the East. Among places he will visit are Pittsburgh, Washington, Philadelphia and New York.

Elevators are experiencing considerable trouble in getting cars set to elevators. There does not seem to be any excuse for it taking the railroad 14 days to set a car from the inspection track to the terminal elevator, but this is the kind of service that is being given.

The St. Joseph Hay & Grain Co. purchased a car of wheat from a shipper in Missouri, and in shipping the wheat the shipper lost an expensive gold watch. When the car was unloaded in St. Louis, the watch was caught and returned to the St. Joseph office. The wheat, it is understood, was also transferred in transit.

The following were registered on the Grain Exchange during the week: W. D. Purdy, Amity, Mo.; J. H. Lynds, Kansas City; F. O. Cummins, Doc Snyder, Jos. Mead, Salem, Nebr.; Frank Dorsey, Kansas City; O. L. Peters and J. W. Sullinger, King City, Mo.; Fred. Savage, Virginia, Ill.; H. B. Hall, Hoag, Neb.; H. G. Thomas, Beatrice, Neb.; C. H. Merrick, Rosendale, Mo.; D. C. Hartley, Bolckow, Mo.; G. L. Ebeling, Leona, Kas.

A fight that has been waged for two years between St. Joseph and Kansas City live stock exchanges on the one hand and live stock interests of Omaha on the other, took a new turn when Hugh Lamaster, assistant attorney general of Nebraska, brought suit in the United States District Court here to enjoin the Burlington railroad from putting into effect amended regulations which were ordered by the Interstate Commerce Commission April 29th last. The regulations which the attorney general of Nebraska asks to have suspended provide that in one-car shipments of live stock between points in Nebraska free caretakers' transportation shall be issued for one way only. Formerly two-way transportation was given to shipments to Omaha, whereas St. Joseph and Kansas City were allowed but one way, and this discrimination was ruled out by the decision of the Interstate Commerce Commission.

Cash Markets.

Wheat—Receipts for the week, 230 cars against 283 cars a week ago and 1 year ago. The present week opened with a pronounced change from the period of inactivity which prevailed during the latter part of the week before. All buyers were in the market and the demand was fairly good for all classes of offerings. Toward the end of the week wheat was somewhat draggy, but a fairly complete distribution of ordinary and better quality of samples occurred. The cash wheat on Saturday broke from 5c on the good grades to 2c on lower grades. Cash wheat follows: No. 1 dark hard, $2.31@2.49; No. 2 dark hard, $2.28@2.45; No. 3 dark hard, $2.24@2.40; No. 4 dark hard, $2.19@2.38; No. 5 dark hard, $2.14@2.30; No. 1 hard, $2.29@2.34; No. 2 hard, $2.20@2.30; No. 3 hard, $2.16@2.25; No. 4 hard, $2.07@2.20; No. 5 hard, $2.05@2.15; No. 1 yellow hard, $2.18@2.19; No. 2 yellow hard, $2.15@2.16; No. 3 yellow hard, $2.12@2.14; No. 4 yellow hard, $2.09@2.10; No. 5 yellow hard, $2.04@2.08; No. 1 red, $2.19@2.20; No. 2 red, $2.16@2.18; No. 3 red, $2.13@2.15; No. 4 red, $2.10@2.12; No. 5 red, $2.05@2.08.

Corn—Receipts for the week, 36 cars against 33 a week ago and 92 a year ago. At the close of the September option the attitude of the buyers underwent considerable change and there seemed to be a demand for all the corn that was offered. New corn is being offered freely, with few buyers. Country demand is quite brisk, but the demand from the Northwest is picking up, now that it is getting nearer cold weather. Cash corn follows: No. 2 yellow, $1.47@1.49; No. 3 yellow, $1.46@1.46; No. 4 yellow, $1.42@1.44; No. 5 yellow, $1.40@1.42; No. 2 white, $1.45@1.46; No. 3 white, $1.44@1.45; No. 4 white, $1.43@1.43; No. 5 white, $1.40@1.42; No. 3 mixed, $1.45@1.46; No. 3 mixed, $1.43@1.44; No. 4 mixed, $1.42@1.43; No. 5 mixed, $1.40@1.42.

Oats—Receipts for the week, 19 cars against 15 a week ago and 17 a year ago. The demand for oats was very slow and practically every car on the floor during the week was carried over. The demand from the interior was nothing. Cash oats follow: No. 2 white, 69@70c; No. 3 white, 68@69c; No. 2 mixed, 65@66c; No. 3 mixed, 64@65c; No. 2 red, 66@67c; No. 3 red, @66c.

BALTIMORE.

Robert C. Neu, Correspondent.

H. J. Guernsey, representing the Anson Milling Co., of Minneapolis, Minn., was a caller upon the local trade this week.

Jules Picard, a grain importer of Zurich, Switzerland, was a visitor on the floor of the Baltimore Chamber of Commerce last week.

Egil Steen, head of the grain and commission firm of E. Steen & Bro. of this market, is spending some time at Atlantic City, N. J.

Lester Howard, representing H. D. Goldatz & Co., grain merchants of Toledo, was a visitor on the floor of the Baltimore Chamber of Commerce last week.

Exports of rye from the port of Baltimore for the first nine months of the present year amount to 8,076,043 bus., as against 1,759,653 bus. shipped in the same period in 1918.

Receipts of baled hay in the Baltimore market for the month of September amounted to 3,331 tons, compared with 111 tons arrived in the same month a year.

The receipts of new water-borne wheat in the Baltimore market so far this season amount to 1,190,000 bus., compared with 698,000 bus. arrived up to the corresponding time last year.

Exports of wheat from the port of Baltimore for the nine months of the calendar year total 19,119,841 bus., compared with 7,271,356 bus. shipped in the first nine months of 1918.

The committee on hay and straw quotations of the Baltimore Chamber of Commerce for the month of October will consist of Colonel H. C. Jones, George H. Watson and W. B. Watkins.

Loans totaling $10,000,000 have been made to 5,200 individual farmers by the Federal Land Bank for the purchase and development of their farms. This district embraces the district which includes Maryland, Virginia, Delaware, West Virginia and Pennsylvania.

William M. Brittain, general manager of the Export and Import Board of Trade of Baltimore, will deliver a course of lectures here under the auspices of The Johns Hopkins University on the "Principles of Merchant Marine Administration and Operation." The course will be open to men and women.

Milton Thelan, director of public service, Railroad Administration, has announced the appointment of G. Stewart Henderson, traffic manager of the Baltimore Chamber of Commerce, as a member of the Trunk line territory freight traffic committee of the Railroad Administration. The committee to which Mr. Henderson has been appointed is one of the most important committees appointed by the government to assist in the management of the railroads.

The following Baltimore grain men have signified their intention of attending the meeting annual convention of the Grain Dealers' National Association at St. Louis Oct. 13 to 15, viz.: Messrs. Charles Rand, George A. Hax, Colonel H. C. Snyder, E. F. Richards, J. A. Manger, John Snyder, D. Yulee Huyett, Henry A. Rost, Wm. E. Harris, Oscar M. Gibson, who is Chief Inspector David H. Larkin, Weigher A. E. Kahler and Traffic Manager G Stewart Henderson.

The trade organizations of Baltimore are preparing to wage an aggressive fight for the maintenance of the freight differentials in favor of Atlantic ports which have been threatened with interference by the recent revision downward of export rates in favor of South Atlantic and Gulf ports. A hearing before the Railroad Administration will be held on Oct. 8 for arguments for a further readjustment to protect the interests of such ports as Baltimore, Philadelphia, Boston and New York. The Baltimore Chamber of Commerce, the Export and Import Board of Trade and the Merchants' and Manufacturers' Association of this city are prepared to guard Baltimore's interests.

FORT WORTH, TEX.

J. E. Blewett, Correspondent.

Inspectors for the week at the Grain Exchange: J. G. Feather, Richmond, Va.; Dyer, Kansas; Clark C. Dalrymple, North Dakota; C. B. Cozart, Oklahoma City.

Shipments to gulf ports and Ft. Worth have been by permits only and the movement has been very light on this account. However, the situation shows some improvement and the authorities are issuing permits to cover grain in distress which is affording some relief in a small way.

The wheat has been greatly damaged during last thirty days by heavy rains in October and by the lack of cars to move of the crop being moved freely. Many ports have been embargoed for the last 45 days and all country and local elevators have their capacity of wheat and in some instances wheat has been threshed and piled on the ground and has especially was badly damaged by heavy rains which fell generally over the state amounting in precipitation of from 6 to 12 inches.

Flour mills are very anxious to increase their holdings of hard winter wheat and are bidding as much as 5c over government price for choice milling wheat. Some of them they will be compelled to look to other sources for their supply of this grain and in fact reports are made of purchasing made out of Kansas City for shipment of 25,000 bus. on a basis of 4c over Kansas City basic price. The demand isn't so strong for red winter wheat but mills seem to have sufficient wheat of this on hand to meet requirements for the present. However, good demand for red winter wheat commands a premium of 2c to 3c over government price.

There is uneasiness is being felt over the crop for next year's crop as the most pessimistic prophets can't see any chance for more than 50% of last year's acreage. In the form the red wheat belt such as Wise and Cooke counties report not over 50% of a normal amount of land sown and in other parts there isn't sufficient roadway made to afford any tangible basis as to acreage. This is caused by the lack of labor and from dissatisfaction over the out-turns of the past year's crop which in some cases resulted in a total loss. The entire crop on account of lack of threshers and labor, resulting in thousands of acres not threshed and very little hope of ever being threshed now as the heavy rains have ruined that wheat still in the shocks. This with the greatest difficulty of securing labor the country has shown would indicate there will be a decrease in the acreage generally over this state.

The Texas Corn Crop continues to move in increasing volume; however, the quality was badly handicapped by heavy rains during September and those who sold this grain for that shipment had some difficulty in covering their contracts. The outturn this year shows a good sample of corn with low moisture which generally runs about 12%. Farmers are not so free to sell as the past month, which is due in a great measure to the directing of all available labor to saving the cotton crop which is now being picked generally over the entire belt. Prices show some advancement over those of September and sales were made in Texas to Texas mills on a basis of $1.53 Kansas City for No. 3 mixed with No. 2 white selling about 5c higher. Early expectations are being realized as to the yield and the crop would be in full movement were conditions normal and sufficient labor and equipment to be secured. Dealers are anxious for bids for October and November shipment and sales are being made for these periods. If the opportunity for exporting this corn would appear likely the price would doubtless stay much higher and offerings for future shipment would slacken. But with all ports embargoed and shipment being made only under permits the chances for exporting any of this crop are very remote.

Oats were still further damaged by the heavy rains in September and buyers are finding it very difficult to obtain stocks that will grade No. 3 and are offering a good premium for contracts that stipulate strictly No. 3 red oats. No. 4 red oats are selling more freely and the southwest is taking these now in place of No. 3. These are being worked about 70c Memphis for bulk and 74c new even weight bags. The Panhandle, which had a good stock of No. 2 red oats, now offer only stained No. 3 and those who have choice heavy bright oats are storing for higher prices for seeding demand which should come later.

Maize scored a heavy advance during the last week in September which was caused by short sellers trying to cover their contracts in which they had very heavy profits. Prices were bid up 30c cwt. in one week and heavy demand for short sales was stopped by good weather the last three days in the month which permitted threshing to resume. The grain shows good quality and reports from northern terminals show some grading No. 2 and very little grading under contract. Movement will doubtless lighten up somewhat as cotton picking becomes more general over the Western part of the state. Bids are being made for October shipment on a basis of $2.00 cwt. Kansas City rate points with some sales made at 5c over this.

SIOUX CITY, IA.

Paul Larson, Correspondent.

M. E. Authier of Elk Point, S. D., has made application for membership in the Board of Trade.

C. C. Flanley of the Flanley Grain Co. has been out of the city for three or four days looking after business.

George Strom, manager of the Taylor & Bournique Co., has been out of the city for ten days, going over the territory and visiting the trade.

The Martens & Ketels Milling Co. elevator finished pouring concrete last Wednesday. It will take about two weeks to finish installing the machinery.

Mr. Conkey of the U. S. Grain Corporation of Minneapolis was a visitor a couple of days last week. While here he made arrangements for storing a million bushels of wheat here.

The Sioux City Stock Yards Co. has just completed installing one of the largest track scales in the Northwest. It is a 150-ton Fairbanks type registering beam. This scale was installed for weighing grain, hay and coal.

DENVER, COLO.

H. M. Hayter, Correspondent.

J. A. Dailey, of The Updike Grain Co., of Milwaukee, Wis., spent the latter part of last week in this city.

H. C. Shaw, of the Mid-West Grain Co., of St. Joseph, Mo., called on several grain offices the first of the week.

John Endelman, manager of the Potato Growers Assn. at Eaton, Colo., spent the first part of the week in this city.

L. Marshall, of The Barrett Grain Co., of Kansas City, was in the city last week visiting several of his grain friends.

N. C. Warren, of the Moody-Warren Commercial Co., at Fort Collins, Colo., was a visitor on the exchange this week.

The Warwick Grain Co., of Wichita, Kans., has opened a branch office in this city, with W. L. Brown as manager.

The Fred. M. Elder Grain Co., of Hastings, Neb., has opened a branch office in this city with J. P. McLain as manager, with offices in the Cooper Building.

The new crop of beans has just commenced to move. The Denver Grain Exchange has inspected one car of the new crop which is equal in quality to the last year's crop.

Up to the present time, grain inspected by the Denver Grain Exchange has been better in quality than any years since the history of the exchange, grading one and two with few exceptions. The new crop of oats, which has been moving quite freely for the past month, has been grading mostly No. 3 on account of the test weight.

J. W. Conley, who has been in charge of the Denver office of the Flanley Grain Co. for the past two and a half years, has resigned and has associated himself with J. P. Ross and Paul Holmquist, formerly with the Western Grain Co., and will operate under the firm name of the Conley-Ross Grain Co. The new company will do a general wholesale business in grain and beans and will occupy the offices formerly occupied by the Western Grain Co. at 732-735 Cooper Building.

KANSAS CITY.

T. J. Tanner, Correspondent.

Total deliveries of corn on Kansas City's September contracts were 50,000 bus.; oats, 225,000 bus.

The Middle Western Broom Manufacturers' Association held an all day meeting at the Hotel Savoy October 1 to discuss technical matters pertaining to the trade.

Secretary E. D. Bigelow is the accredited delegate of the Kansas City Board of Trade to the convention of the Grain Dealers' National Association, in St. Louis, October 13, 14 and 15. Several other members of the exchange may attend.

The Begley Rice Farms, near Poplar Bluff, Mo., produced 30,000 bus. of rice this year, according to a report by George Begley, Jr., proprietor. Mr. Begley says the yield averaged 60 bus. an acre and that the crop was sold for $3.03 a bushel, or a total exceeding $90,000.

C. W. Lonsdale of the Simonds-Shields-Lonsdale Grain Co. attended the funeral of John Washburn, member of the Washburn-Crosby Milling Co., in Minneapolis, Wednesday. Mr. Washburn, who died at Livermore Falls, Maine, was a member of the Kansas City Board of Trade.

G. B. R. Smith, a miller of Sherman, Tex., who bought red wheat in Kansas City this week, said the heavy rains of September had greatly damaged the unthreshed portion of the Texas wheat crop. He was inclined to belittle the recent estimates on the Texas corn crop and said he doubted an excess of 100,000,000 bus. in the production.

J. C. Mohler, secretary of the Kansas State Board of Agriculture, is making a thorough investigation of the cost of producing wheat in Kansas. He hopes to come closer to the facts than any other authority has ever done. Among other features of the inquiry will be a consideration of waste land on farms. The time element of farmers engaged in wheat growing also will be recognized.

S. D. Flora, federal meteorologist for Kansas, says many reports indicate a decrease of 50 per cent in the wheat acreage being sown in eastern Kansas. Sowing in a few western counties has been delayed by grasshoppers. Soil in the three northern tiers of counties and also the western third of the state is in fine condition for plowing and seeding, and from 10 to 25 per cent of the wheat in those parts is already sown and is beginning to come up nicely.

About 80,000 bus. of wheat and other grains have been removed from the Murray elevator since the explosion and fire on September 13. Temporary legs have been constructed on two sides of the wrecked house. Withdrawal of the grain, originally about 1,000,000 bus., will go faster from now on. It is believed that all of the worst damaged contents is out. The actual condition of the tanks can not be ascertained until they are emptied. At that time rebuilding plans may be announced.

September receipts of wheat in Kansas City were 10,180,000 bus., showing a reduction of 8,736,000 bus. from the August high record. Corn arrivals were 357,500 bus.; oats, 622,200 bus.; kafirs, 79 cars; rye, 45 cars; barley, 103 cars; millfeeds, 422 cars; flour, 328 cars. The shipments were: Wheat, 4,956 cars; corn, 133 cars; oats, 287 cars; kafirs, 31 cars; rye, 14 cars; barley, 64 cars; millfeeds, 714 cars; flour, 1,200 cars. Total receipts, 9,170 cars, against 8,500 a year ago; shipments, 7,399 cars, against 4,033.

With the hope of forcing certain country grain dealers to take out federal licenses and thus come under control of the United States Grain Corporation, D. F. Piazzek, zone agent, gave notice to Kansas City Board of Trade members Monday that their licenses would be suspended if local firms were found guilty of further trading with persons resisting the law. Huffine & Co., a Kansas City grain and hay firm, later faced charges of trading with a non-licensed concern and received a sentence of one day's abstinence from business in Kansas City and at the company's stations in Missouri, Kansas and Oklahoma.

Cash Grain Markets.

Wheat—Receipts for the week, 2,143 cars, against 1,959 a week ago and 200 a year ago. Although the railroads were ordered by the grain control committee to limit deliveries to 135 cars a day, the embargo was not strictly observed, as shown by the increased arrivals. However, much of the grain brought in was en route or being loaded when the curtailment order became effective. As cars for shipments out of Kansas City continued scarce, hampering both private shippers and the United States Grain Corporation, there was increased pressure against local storage facilities, which would have exhausted except for the heavy grinding by Kansas City mills. Some elevators reached their limit and had to stop buying, which rendered the market very weak for the lower grades of wheat. The milling grades also broke severely, hard being quoted 4c to 17c down and red 1c to 4c off. At the end of the week even the Grain Corporation had to refuse offers of durum and other inferior kinds of grain at the guarantee level, which caused dissatisfaction among receivers, who were thus subjected to demurrage charges. Shippers said they had wheat sold from New York to the Pacific coast, but were unable to move it except in a haphazard way. Agitation for a larger supply of cars and motive power continued here and in Kansas. At the end of the week Governor Allen of Kansas received some very encouraging advice in this regard from the Grain Corporation headquarters in New York, though the railroad administration made no definite promise. The stocks of wheat in Kansas increased 140,000 bus. for the week, to 15,518,000 bus., against 13,619,000 last year. Closing prices of the leading grades of wheat were: No. 1 hard, ordinary to dark, $2.24@2.40; No. 2, $2.20@2.37; No. 3, $2.15@2.35; No. 1 red, $2.20; No. 2, $2.17@2.19; No. 3, $2.12@2.14.

Corn—Receipts, 85 cars, against 36 a week ago and 210 a year ago. Though the increased offerings were disposed of, as reflected by the fact that local stocks decreased 2,000 bus. to 57,000 bus., trade was possible only on declines from day to day. The market showed a weekly recession of 11@14c, closing with No. 2 mixed at $1.45, No. 3 mixed at $1.42@1.44, No. 2 white at $1.45, No. 3 white at $1.44, No. 2 yellow at $1.48@1.49 and No. 3 yellow at $1.43@1.46. Weakness in corn was attributed to the increasing use of the new crop in the country, the offering of new grain from Oklahoma and Texas, in southern Kansas and the feeding of low-grade wheat in sections where cars for shipment are lacking. The arrival of new corn here is expected to begin by the end of October or early in November.

Oats—Receipts, 128 cars, against 50 a week ago and 62 a year ago. Trade was fairly active, with good shipping orders, but prices were depressed by increased offerings and sympathy with corn weakness. Prices lost 2@5c, with light weights of red off most. Final prices were: No. 2 white, 69@70c; No. 3, 68@69c; No. 2 mixed, 63@65c; No. 3, 62@64c; No. 2 red, 65@67c; No. 3, 64@65c. Stocks decreased 76,000 bus. to 1,145,000 bus., against 3,299,000 a year ago.

Kafir and Milo—Receipts, 24 cars, against 25 a week previous and 2 last year. Demand for small lots for immediate use was good, and prices advanced 10@15c per cwt. Both No. 2 white kafir and No. 2 milo were quoted at $2.20@2.25 and the sales of No. 3 of each grain were at $2.15@2.20. There were many inquiries from Texas and Oklahoma for bids, but the holders were not disposed to name selling prices. As the weather southward was better, it is expected that a larger movement will be seen soon. The Kansas crop is maturing rapidly and practically all out

of frost danger, but wet weather would delay the handling, and no big movement is expected before November or December. Eastern buyers are withholding their stocking-up orders in the hope of a decline to $1.50. It is said their future bids are on that basis. Stocks here decreased 1,000 bus. to 8,000 bus., against 72,000 a year ago.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Saturday's hog market, 10c higher than the late close, with the bulk of the sales on 500 head ranging from $15.90 to $16.10. A load of choice light butcher hogs brought $16.35 top. Cattle market steady at the recent advance. Receipts were 150 head. Calves were steady at the late close. Representative sales of cattle were made along the following lines: Cows—No. 1, average, 1,070, at $9; No. 1, average 1,240, at $7.25. Heifers, No. 1, average, $8@10; choice to fancy butchers, $9.50@12.

Saturday's receipts of corn were 33 cars. Local demand good but not so urgent as usual. Prices were 2c lower all around, but comparing with other markets are still high. No. 2 white, $1.48; No. 1 yellow, $1.49; No. 2 yellow, $1.49; No. 3 yellow, $1.48½; No. 1 mixed, $1.48; No. 2 mixed, $1.48; No. 6 mixed, $1.46; sample grade, $1.43, showing 21 per cent damage. Oats strong with good local demand for all offerings and market ½ to 1c higher. No. 2 white, 70@70½c; No. 3 white, 69½c.

A change in grain business here has recently taken place. E. V. Maltby, James A. Waring, Samuel Thomas and C. S. Cochran have disposed of their interests in T. A. Grier & Co., of this city, and have bought the S. C. Bartlett Company, Inc., with offices at 16-29 Board of Trade building. The S. C. Bartlett Company has elevator holdings at Akron, Radnor, Buda, Langley, Hahnaman, Nelson, Fairbury and Lodemia, Ill., and will continue the general grain commission business of the company. The new officers of the S. C. Bartlett Company are: E. V. Maltby, president; J. A. Waring, vice-president and general manager; C. S. Cochran, secretary; Samuel Thomas, treasurer. T. A. Grier will continue the business of T. A. Grier & Co.

ST. LOUIS.

E. E. Reeves, Correspondent.

The number of visitors on the floor of the Merchants' Exchange was smaller the past week than for many months, as, according to Eddie Loesch, outside merchants are awaiting for the Grain Dealers' Convention to visit St. Louis.

Consular invoices will now be issued in St. Louis to exporters permitting them to give through bills of lading on shipments from the city to Mexican points, following an effort made by Cosme I. Luque, commercial agent for the Department of Commerce and Industry of Mexico, to obtain this privilege from his government. Heretofore this has been done through brokers at New Orleans, necessitating some delay and needless expense to shippers.

There is considerable speculation among grain men in regard to the probable course of action of the Government on the policy of insurance of wheat, as there is a tendency on the part of the Government to withdraw from the field of commercial activity as soon as possible. This insurance of wheat has been a boon to farmers as well as to grain dealers. A large amount of short-term grain insurance is being written to protect grain on the farms. It is moving slowly because of the shortage in cars. The short term grain certificates cover the grain cut or uncut, and many farmers have been protecting their crops against fire as soon as they ripen.

The Merchants' Exchange Traffic Bureau announces that the United States Railroad Administration and the Interstate Commerce Commission have approved the proposed advance in rates, St. Louis to Southeastern territory generally, ½ cent over the present figures on grain and grain products. They have also approved an advance in rates, making rate on all grain and grain products, St. Louis to Memphis, 7½ cents to New Orleans, and competing points, 17½ cents. This latter rate applies to both domestic and export to New Orleans and Mobile. Rate to Little Rock also advanced 1 cent, namely, 18½ cents on all grain products. This will affect all of Arkansas. The effective date will be announced later.

The will of the late Stephen A. Bemis, founder of the Bemis Bag Co., who died in California recently, was filed for probate in the St. Louis Probate Court Wednesday. Mr. Bemis was 91 years old and was one of the best known and most beloved men in St. Louis. He was the father of Judson A. Bemis, vice-president of the Bemis Bag Co. The estate goes equally to his six children, excepting $2,000 to his sister, Mrs. Mary H. Lattin, of Sycamore, Ill., and $1,000 to the Berry School, of Rome, Ga. The children, beside his son Judson, are Mrs. Alonzo Hull of Seattle, Wash.; Mrs. T. J. McLemore of Escondido, Cal.; Mrs. Chester Simmons of Minneapolis.

TOLEDO.

Carl Bryant, Correspondent.

s A. Streicher of J. F. Zahm & Co. nday on a western business trip.

nty-one members of the Flea Club e over to Rockwell Springs, near Cas- ., Saturday afternoon, as guests of r. Burge of the S. W. Flower Co.

e y Raddatz, of H. D. Raddatz Co.; h Sheldon, of S. W. Flower Co., and n uscombe, of Southworth & Co., were l ago last week attending the world s ames.

g s were on Fred Mayer, president of t Exchange, Tuesday. On that day e me the proud granddaddy of a fine l ound girl born to his daughter, Mrs. g Close of Toledo.

. Randolph, inventor of the Ran- n rain Drier, returned Saturday from h gh and Indianapolis, where, at the r lace, he inspected Springer & Mc- b new terminal elevator. This firm is installing two Randolph driers of the direct heat system.

'Change members enjoyed the world series games in real style last week. Through the courtesy of E. W. Wagner & Co., their private wire was hooked up to the blackboard and genial "Tim" Burke, floor manager of the firm, chalked up the plays. The floor was crowded daily.

"Never saw so much corn in Michigan this year, and the quality is good," declared Harry DeVore of H. W. DeVore & Co., returning from a few days' visit in Lansing, Mich. Mr. DeVore was surprised at the number of cattle he saw along the way, stating farmers everywhere are putting great effort to cattle raising this year.

The regular monthly meeting of Northwestern Ohio Co-operative Elevator Association was held at Holgate, O., Monday evening. 'Change members who attended were: Paul Barnes of the Young Grain Co.; Bill Cummings of J. F. Zahm & Co.; Lester Howard of H. D. Raddatz Co.; George Woodman of Rice Grain Co.; Harry DeVore of H. W. DeVore & Co.; Fred Wickenhiser of John Wickenhiser & Co.; and Charles Keilholtz of Southworth & Co.

Receipts of grain here show a falling off from a week ago. Corn was weak early but firmed up Saturday, closing at prices equal to the previous week. No. 1 yellow ranged $1.44½@1.48. Oats is in good demand, the spot article bringing good premiums. Prices Saturday were highest of the following range: No. 2 white, 70¼@72c; No. 3 white, 70⅛@71c. Receipts for the week were: Wheat, 219,000 bus. by lake and 101 cars; corn, 11; oats, 26; rye, 52; barley, 1.

John Luscombe, of Southworth & Co., should take his place alongside of Hugh Fullerton, Grantland Rice and other experts on athletic affairs, for, should the "Reds" be the victors in the present world's series it will mark the tenth time out of eleven "tries" that "our John" has called the champions in the world's series contests. Not only in baseball has he proved himself a "dopester" but also in most of the athletic events in which the general public interests itself. He was "right" on the Dempsey-Willard affair as well as many of the big football games.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

Corporate privileges have been granted to the McLaughlin Grain Co.

M. J. Vehon, of M. J. Vehon & Co., Chicago, was in Minneapolis last week.

A traveling representative's license has been issued to Frank Bergevin to represent Johnson-Olson Grain Co.

Dan McKinnon, Minneapolis manager for Thomson & McKinnon, left Friday for the East. He will visit in Chicago and New York. He was accompanied by his wife.

Hugo Eberle, a Swiss miller, member of a commission visiting in this country to obtain information on milling and grain handling, was a visitor in Minneapolis last week.

Isaac Moss, of M. Blum & Co., San Francisco; Kurtis Froetert, of the Froetert Malting Co., Milwaukee, and William Hunter, of Hales-Edwards Co., Chicago, were visiting in Minneapolis last week.

The following elevators have been declared "regular" as public warehouses under license by the Minnesota Railroad and Warehouse Commission: Pillsbury Elevator, operated by Andrews Grain Co.; Interior Elevator, operated by International Grain Co.; Great Northern Elevator, operated by International Grain Co.; Soo Terminal Elevator, operated by Bartlett-Frazier Co., Minneapolis.

The following list of six officers was elected at the annual election of the Minneapolis Chamber of Commerce held last Thursday: William Dalrymple, president; John McLeod, vice-president; H. P. Gallaher; F. C. Van Dusen, W. T. Fraser, S. J. McCaull and A. L. Searler, directors; H. D. Gee, F. J. Seidl and J. D. Lamb, members of the Board of Arbitration; H. G. Fertig, J. A. Mull and W. J. Russell, members of the board of appeals.

Cash Wheat.—The demand for cash wheat is not as keen as it was the beginning of last week and prices are beginning to ease off again, chiefly because of the draggy flour demand and the weakness in Kansas City. Offerings of spring wheat are light. Local millers are still competing strongly for the top grades of dark northern, but the medium class wheat is slower in tone and the weakest. Farmers are delivering small amounts and the car shortage is holding back a lot of wheat in country elevators. Durum wheat is in slower demand and weaker. Winter wheat of the dark variety was in good demand most of the week, but the demand began to slow down on reports from Kansas City that prices had dropped to the government minimum. Interior mills bought considerable wheat to arrive and there was some trade with local mills. Some very fine Western wheat of spring growth was purchased to arrive by local mills. This wheat graded No. 1 Dark Northern and tested 60 to 61 lbs. to the bushel. It is the finest wheat received in the local market so far and most of it is of the Marquis variety.

Corn.—The demand for corn was sluggish for a time and prices declined in sympathy with the weakness in other markets. Shippers would not buy here because of the comparative high prices prevailing. Receipts have been very light recently. Some new corn has been bought to arrive from Minnesota shippers and some sales of this new corn have been made for Western shipment.

Oats.—Receipts are light and the heavy oats hold in good demand, but the interest in thin oats is draggy. Receipts have been very light and there is only a light supply moving in the country. Export bids were close to local quotations during the week past, but no sales were reported by the holders.

Rye.—Millers received considerable rye on October contracts and virtually withdrew from the spot market during the past week, but today they were again picking out choice offerings. Elevator companies were steady buyers all through the week. Mills are paying December price and elevator companies ½c under for No. 2. No. 3 sells at 1@1½c less. Receipts very light.

CHICAGO.

The price of bread in this city has been advanced 1c a loaf.

Attendance from many markets and country points at the World Series ball games found no stronger rooters than the Toledo trio, Sheldon, Raddatz and Luscombe.

Another membership sale was effected last week at a purchase price of $10,350, or $10,000 net to the seller. This shows no change over the last reported Chicago Board of Trade membership sale.

Announcement has been made of the death of Thomas Duncan, well known to the members on 'Change as the commercial editor of the Chicago Post. Mr. Duncan was in his eighty-fifth year, having been born Sept. 4, 1834.

Hans Siemon, of J. S. Bache & Co., having returned from a two months' European trip, has many interesting tales to tell. Scarcity of sugar is keenly felt abroad, for Mr. Siemon says that in Paris four drops of saccharine for his coffee was all he was able to obtain and that in London a small pat of butter once a day is the rule. He believes that Germany will prove a good buyer of grains and provisions if extended credit.

Among prominent out-of-town visitors on the Chicago floor in the past week were Fred. Sawyer, of the Midland Packing Co., Sioux City, Ia.; Burt Dow, Davenport Elevator Co., Davenport, Ia.; Messrs. Lincoln, of Armour at Kansas City; Grimes, of Cargill at Minneapolis, and Elec Harsh, of Elmore-Schultz, St. Louis. Those who commented on country business in the grain belt believed that farmers were marketing the new crop.

BARLEY MARKETS.

MILWAUKEE.—The Milwaukee barley market showed slight improvement in the cash values which range 2@3c higher for the week. The market general can be considered steady, with choice grains being in good demand, while lightweight stuff remains comparatively quiet. Receipts for the week were light, totaling only 144 cars, as compared with 187 cars a week ago and 68 cars in 1918. Current quotations are:

Good to choice, 48 to 50 lb. test is quotable at $1.38@1.41; bright, $1.42@1.43; fair to good, 45 to 47 lb. test, $1.35@1.40; low 41 to 44 lb. test, $1.26@1.37; 36@40 lbs., $1.18@1.25; feed, $1.18@1.28. Iowa quoted $1.20@1.39; for light to fancy; Wisconsin, $1.28@1.43; Minnesota, $1.20@1.39; Dakota, $1.20@1.39; feed and rejected, $1.18@1.28.

DULUTH, Oct. 4.—Specialists in the barley market met with a good Eastern inquiry during the last week. Receipts were light amounting to 68 cars against 59 last year. Quotations in spot barley were advanced to a range of from $1.06 to 1.38, as compared with 95c@$1.25 at the end of the previous week. No lake shipments of barley were made from here during the week, but a good tonnage is marked to go down within the next few days.

BUFFALO.—Maltsters came into the market and took all the new barley offered and nearly all the old except some fancy which was held above their ideas. More ordinary malting grades were wanted but dealers were unable to secure anything approaching the prices bid. The market was strong today at $1.48@1.52 for old malting and $1.34@1.43 for new. Feed was quoted at $1.30@1.40 on track or in store, Buffalo.

FORT WORTH.—Movements of barley and rye have been small. Barley is quoted at $1.15.

ST. JOSEPH.—Cash barley: There were no receipts of barley the entire week, and there was a good demand for this class of grain from the country. Northern shippers are not shipping barley south, in view of the high prices on northern markets. The barley that is coming into this market is low grade, bright in color, but testing from 32 lbs. to 35 lbs., whereas the northern barley goes up to 45 lbs. Present outlook is that there will be considerable barley used for feed this year, and more than previous years. No. 3 barley is quoted $1.20@1.22, and No. 4 grade from $1.17@1.19.

PORTLAND.—The barley trade at Portland, according to the report by the *Commercial Review* was last week very narrow. Buyers and sellers were wide apart as to values and even the light country offerings failed to sustain the market. The demand for California barley is slow as the Eastern barley is freely offered at lower prices. Apparently, the dealers have filled up the wants of the trade and nothing is to be done except to wait for a new demand to come on. No. 3 blue barley is quoted at $63 with the feed at $62 per ton. No. 2 Eastern $58 per ton.

SAN FRANCISCO.—The barley trade has been very limited, prices in the interior being more or less uncertain in the absence of any shipping demand. There are several vessels reported in port chartered to load barley, but the *Commercial Review* say shippers have the stock on hand and are not required to go out and make any purchases for these vessels. Shipping grades are worth from $3.05@3.10 per cental common point, f. o. b., while the feed is quoted at $2.90@2.97½, or for choice varieties $3 per cental.

CHICAGO.—The barley market last week was under the influence of light offerings of the better qualities, but during the greater part of the week prices moved within a very narrow range and without any particular advance although the general tone of the market was good. For the most part the maltsters were the only buyers of consequence although later in the w some of the industries appeared took the better qualities. On Thur there was a general advance equiva to 2c. The week however closed f 1@2c lower with the general disposi of the trade to wait until this wee take on their requirements. Per the statement of the Attorney Ge that the Peace Treaty not having signed no let up would take plac the prohibition policy of the Governm may have had some effect, but th so old a story that probably its i ence was nil. The market on Mo last had a heavy undertone and p lopped off from 3@4c. Most of heavier buyers of last week were of the market and maltsters were ing only the very best qualities. C ings were fairly liberal but there no export demand in evidence and domestic call was slow. There we cars reported sold at a range of $1. 1.32. Futures closed irregularly. cember which opened at $1.31½ cl at $1.30¼. May, which opened $1.30¼, sold down to $1.29 and cl only ¼c higher. Exports from Atl seaboard were 820,000 bus. comp with 11,000 bus. the corresponding last year.

KANSAS CITY.—Barley receipts creased 50 per cent this week, am ing to only 9 cars. The reduction attributed to the car situation r than to a lack of supplies. There a good demand, especially for the l ier samples. Shippers with Milwa orders were in the market. T were scattered feeding orders and feed manufacturers and elevator were buyers. Prices advanced a bushel. The closing quotations w No. 3, $1.18@1.20; No. 4, $1.15 Stocks increased 3,000 bus. to 14 bus., against 69,000 a year ago.

MINNEAPOLIS.—Maltsters were ers of good barley at intervals there was a fair demand for th lected offerings. Thin barley was lected most of the week. Receipts very light and there is not much moving in the country. Most of barley arriving is of fairly good but very thin.

BROOM CORN.

Weather conditions through the Southwest have been favorable as a rule for harvesting and most of the crop is now out. Marketing, however, as the *Broom Corn Review* says, has been rather backward and the outlook is not immediately promising. The movement in the dwarf areas has been later than usual, owing to the lateness of the crop and the difficulty of getting labor. In the primary markets business is fairly active, the Lindsay section showing the best activity. Receipts show a decline but already about 1,200 cars are said to have been shipped from that district. Buyers now are taking all corn on the street markets at prices ruling from $125@275 per ton for the bulk with $312.50 paid for one choice small crop. Elk City reports corn bringing from $140@200. Northwestern Oklahoma buyers are reported offering $140@175 or even $200 for good contract.

The Wichita market continued firm with general increase of movement from the warehouses. Bulk of trading is confined to common to medium grades or $125@200, but the warehouses are holding corn pretty firmly. Some corn has been sold as high as $300 at Wichita.

In central Illinois practically all of the crop has been harvested but not yet all baled. It is estimated that about 60 per cent of the Illinois crop has already been sold but the corn that is left appears to be about as good quality as that which has been sold. Growers have been asking from $300@350 but the demand at present is only fair with the smaller buyers rather reluctant to pay even as high as $300. Lindsay corn is selling at this market from $200@300 and the dealers are sellers whenever they have an opportunity.

DROUTH IN NEBRASKA.

T. B. Hord Grain Co., of Central Nebr., is typical of several large ors of long strings of elevators Western country. The concern es 40 stations with sacking facili- all country points. Referring to crop reports they say that dry r up to Sept. 17 resulted in spot- n conditions in central and east- ebraska. The yield ranges from 40 bushels, probably averaging hels. This same dry weather un- bly affected wheat, so that the wheat planting will approximate cent of last year's. There is ally no spring wheat planted in rt of Nebraska and fall plowing en seriously delayed by the dry r.

Bedell, of the Department of Ag- re, says Iowa is becoming one of st important feeding states in the the state having taken a very art of the feeder lambs and sheep t from the markets during Au-

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

Work has begun on a $650,000 mill and elevator with a daily capacity of 2,000 bbls. at Russell, Kans.

Southern Illinois dealers report a firm tone to flour prices with good demand, and better shipping directions from Southern buyers.

James C. Legg, of John C. Legg & Co., flour and grain commission merchants of this market, celebrated the 21st anniversary of his marriage on October 3.

The Farmers Co-operative Union is planning an up-to-date flour mill to be built in Girard, Kans. It will have a capacity of 200 bbls. per day and will cost $100,000.

President Charles C. Macgill, of the C. A. Gambrill Manufacturing Company, millers and exporters of Baltimore, returned last week from a hunting trip in Canada.

After being closed seven weeks for repairs the C. S. Christensen Co.'s flour mill at Madelia, Minn., has been reopened for business. The daily capacity is now 1,000 bbls.

The flour trade in the South and Southeast is improving in tone, in spite of low cotton indication and a good trade is expected when the crop is in full movement.

The stoppage of buying by the Grain Corporation has hit the Minneapolis mills harder than other sections, perhaps, and a somewhat lighter production is reported temporarily.

The new England flour market is strong in tone with some advances in prices reported at Boston, springs being especially firm. The general feeling of the trade is excellent.

The Atchison Flour Mills Co. of Atchison, Kans., has filed articles of incorporation with a capital of $350,000. Incorporators: A. L. Jacobson, Henry Diegel, W. S. Washer, Ray T. Willette and A. I. Moxcey.

The Western Milling Co., recently incorporated, will erect a 1,000 bbl. per day flour mill and an elevator with a capacity of 500,000 bushels, at Oakland, Cal. H. E. Woolnor of San Francisco and Los Angeles is the man behind this deal.

The Grain Corporation bought no flour the last week of September due to the congestion of wheat flour stocks at all Atlantic seaboard points. This congestion was partly due to the reduced supply of ocean tonnage resulting from unsettled ocean transportation conditions on account of the British railway strike. The withdrawal from the market of the Corporation will continue so long as present unsettled conditions are maintained. Announcement will be sent to all interested when the Corporation is again prepared to receive offers of straight wheat flour.

The Portland *Commercial Review* reports some improvement in the flour situation locally, but with the demand only fair. Business is rather disappointing, the amount of trade not being up to the seasonal standpoint. Coast sales, however, have been a little better than for some weeks past and for the most part the mills have orders enough to keep running at full time. The demand for mill run feed is brisk and offerings are light with a tendency to a strong market in that respect and owing to the strike having depleted stocks somewhat all Portland mills are running at full time after a week of small operations.

Flour Trade Fairly Good.

The Grain Corporation is endeavoring to stimulate the domestic consumption of bread (or flour) the export movement being impeded somewhat by foreign exchange and labor conditions, both of which are against free purchases by peoples who really need more flour. On the whole, the success of this campaign has been fair, a 15 per cent increase of consumption over war rates being estimated. At this time, however, jobbers report rather low stocks, while the mills are well satisfied with their business. In the East buyers and others are dickering, neither side being anxious to commit themselves on prices or quantities or to close contracts. Consumers seem to be pretty well stocked up, and go so far as to predict some shading of prices later on. Resellers were also in the market toward the close of the week with some though not large offers of springs.

Rye Flour Situation Extraordinary.

In view of the fact that the consumption of rye bread in this country at the present time does not exceed half that of the pre-war period, it would appear that the ignorance of the consumer as to relative values—in his not taking advantage of real bargains when they exist—is no small factor in the much discussed "H. C. L."

For instance, does he know that a bushel of the best rye grain in the Minneapolis market is selling for less than one-half the price of the best wheat? That east of the Mississippi rye flour can be bought for from fo to five dollars per barrel under t price of patent wheat flour? That t darkest grades of rye flour are co manding for feeding purposes pri equal to those at which they are bei sold as breadstuffs? That the grade wheat flour necessary to be used making rye bread can be bought fi dollars per barrel under the price patent? In short, that while a loaf rye bread equals in nutritive value loaf of white bread (to say the leas the flour necessary to make the r loaf costs only a little over half much as the flour necessary to ma the wheat loaf? That while domes consumers are neglecting the oppor nity of reducing their breadstuff co foreign buyers are taking our rye a rye flour to an extent never bef known?—*Blodgett-Holmes Co., Jan ville, Wis.*

TAKES OPTIONS ON MILLS.

Announcement was made Wednesd that the Nebraska Consolidated Mi Company, which was recently organiz in Omaha, has obtained options on fi flour mills in Nebraska with a view taking them over and operating them.

The plants upon which options ha been obtained are the old plant of t Omaha Flour Mills Co., the Hastin Mills, the Henry Glade mills at Gra

nd, and the Blackburn & Furry mills t St. Edwards.

he Omaha Flour Mills Company is d to let a contract for the building of lern flour mills in Omaha with a y capacity of 4,000 barrels, and the tion of a modern grain elevator with apacity of 400,000 bushels. William oad, president of the Omaha Flour s Company, says that the Nebraska solidated Mills Company has taken ption on his company's present plant the distinct understanding that the ha Flour Mills Company is to con- e to operate this plant until its new s are completed and in operation. Omaha Flour Mills Company will t one of the biggest and best pped mills in this section of the try.

R. Kinney of Ravenna, for twenty- years a Nebraska miller, is to be ident and general manager of the olidated mills, with offices in Omaha. r officers are F. A. Glade of Grand nd, secretary and treasurer; Robert ickinson of Ravenna, vice-president resident manager of Ravenna; E. H. kburn of St. Edwards, vice-presi- and resident manager of St. Ed- ls.

W. Glade of Grand Island, who re- y directed the remodeling of the ke mills in Omaha, will direct the ations of all the consolidated mills. e new company has a capital stock ,500,000, of which $2,000,000 will be d.

FLOUR MARKETS.

MILWAUKEE.

Milwaukee, Oct. 4.—The price of flour at Milwaukee market took another sub- ial leap forward during the past week, the top price of spring wheat patent d as 85c higher than that of a week A much improved demand exists, a noticeable increase of new business, is quickened by the steadily increas- prices. Shipping directions are free. ye flour market rules steady and un- ged, and generally assumes an im- d appearance over several weeks past. domestic demand for rye flours has an appreciable increase, while one eports bookings for export shipments. r production at the Milwaukee mills een the biggest in years, reaching a of 25,000 barrels for the week. Of otal, 19,000 barrels were wheat flour, per cent of the total mill capacity, enting an increase in volume of 33⅓ ent over a week ago. The rye pro- n for the week was 6,000 barrels. rent quotations, in car lots, per bbl., ton, are: Spring wheat patent, $12.20 ; straight, $11.60@12.10; first clear, 9.80; rye flour, pure white, $7.60@ rye flour, straight, $7.10@7.30; rye dark, $5.75@6.25. Corn flour is nom- quoted at $3.85; corn meal, white, and corn grits $3.70, all in 100-lb. cot- ucks.

Milwaukee flour stocks Oct. 1 were 60,480 as compared with 28,362 bbls. Sept. 1, ,500 on Oct. 1, 1918.

BOSTON.

Boston, Oct. 4.—The position of the flour t is decidedly stronger, each passing bringing advances in prices, even if buyers have not yet fully responded upward turn of the market. Per- he most serious feature of the situ- is the enhanced premiums that mill- ve recently been obliged to pay for milling wheat. Beginning in the west, the movement has now ex- to the Southwest. Millers who have n the Boston market lately are tak- is phase of the situation very seri- as it prevents them from taking ad- e of the big crop of new winter in making prices reasonable for their customers. While they are constantly hoping for something to happen to bring wheat prices within bounds again, it is not clear that anything will be done in this direction. Prices were quoted as follows: Spring patent, special, $13 to $13.50; spring patent, standard, $12.25 to $13; hard winter, patent, $11.40 to $12.80; soft winter, straight, $10.50 to $11; soft winter, patent, $11 to $11.50; soft winter, clear, $10.25 to $10.50. Receipts for the week ending October 4th were 8,270 barrels.

FT. WORTH, TEX.

Ft. Worth, Oct. 4.—Texas mills report good business, with most of them running full time with orders booked ahead for capacity runs. High patent flour selling at $11 to $11.25; extra high patent at $11.50 to $11.75. Considerable difficulty is being experienced in getting sufficient stocks of good milling wheat and heavy premiums are being paid over government guaranteed price for milling wheat of good quality. Scarcity of cars is also causing some delaying in making shipments and mills are using any kind of equipment they can secure for loading out their bookings. Demand shows great improvement over the past thirty days, which is caused to some extent by work in cotton fields and a general feeling in the trade that prices are low enough on this crop.

The demand for corn meal shows a vast improvement in the past month and most mills who were worrying over the lack of demand at that time now find they can sell all they can make. Sales are being made on basis of $1 for 25-lb. bags, $1.90 for 50-lb. bags pearl.

NEW YORK.

New York, Oct. 4.—The Grain Corporation withdrew from the market as a buyer of flour last week owing to fears of congestion at the eastern ports, where shipments have been suspended by the U. S. Shipping Board to the United Kingdom on account of the railroad strike in that country. It was not said definitely when the Government will come back into the market as a buyer, as it will depend on future developments.

The flour market, in general, was very inactive and buyers and sellers were still apart. Some further advances were made in the price of hard wheat flours, especially springs, owing to the strength in cash premiums. These advances were not followed by buyers here, and it

is quite evident that the trade is very well supplied with flour, and will not pay these high prices under present conditions. Moreover, flour was offered here on resale at much below mill prices, but even these concessions failed to bring out any substantial buying.

Quotations follow: Prices as quoted are for carlots to arrive in New York at the rate of 196 lbs. in 140-lb. jute bags. Spring patents, $11.85 to $12.50; spring clears, $9 to $10; Kansas straights, $11.25 to $11.75; Kansas patents, $11.50 to $12.25; soft winter straights, $10.15 to $10.40, and Kansas first clears, $9 to $10.25.

DES MOINES, IA.

Des Moines, Oct. 4.—Prices have been advanced the past week owing to the increased premiums on wheat. Fancy Northern high patent flour quoted at $12.25@12.60 per bbl.; 99% flour quoted at $10.90@11.50 per bbl.

NASHVILLE.

Nashville, Tenn., Oct. 6.—Stronger tone to prices featured trade at soft winter wheat flour mills in the Southeast last week, due to the continued firmness of wheat. Current sales were smaller, but shipping instructions continued and aggregate business was above normal.

Nashville and Southeastern mills, with capacity of 221,430 bbls., showed output for the week of 189,077 bbls., or 85.3 per cent of capacity of mills reporting, compared with 179,262 bbls. and 80.3 per cent the preceding week, and 66.1 per cent the same week last year. Quotations: High grade patents, 98 lbs., cotton, f. o. b. Ohio river points, $10.90@11.25; standard patents, $10.40@10.60; 100 per cent flour, $10.25.

BALTIMORE.

Baltimore, Oct. 4.—On spring wheat brands of flour the local market is firmer with a fair inquiry for known brands. Soft winters show a wide range in quality and price. Sales to the Grain Corporation constitute the bulk of the business passing, the local demand being very moderate. Quotations follow: Spring patent, $12@12.25; straight, $11.50@11.75; winter patent, $10.50@10.75; straight, $9.75@10.25; rye flour, pure to blended, $7@8.

DULUTH.

Duluth, Oct. 4.—Quotations in hard spring patent flour were marked up from 25c to 40c on this market during the last week. Millers were again in receipt of a good Eastern demand and a fair trade was put through in macaroni flour by a local mill. The trade was compelled to pay high premiums for good milling dark Northern and Northern wheat.

Quotations per barrel, in carlots at mills here follow: Family patents, jute, $12.10@12.50; bakers' patent, jute, $11.85@12.25; first clears, jute, $9.25@9.75; second clears, jute, $7.25@7.50.

DETROIT.

Detroit, Oct. 4.—Agents for Northwestern spring wheat mills say their customers are pretty well loaded up with flour, in fact, a few of the larger bakers think they have bought a little too freely. There was a good deal of a scare about the shortness of the spring wheat crop that resulted in a lot of loading up. Winter wheat millers say demand for flour is not increasing and the market is slow. Mill feeds are easy and in some cases a little lower. Quote: Fancy spring patent, $13.25; best winter patent, $12.75; second winter patent, $12; straight, $11@11.25 per bbl.

Bran, $43; standard middlings, $56@57; fine middlings, $63@65; coarse cornmeal, $64; cracked corn, $65; corn and oat chop, $55 per ton, in 100-lb. sacks.

PHILADELPHIA.

Philadelphia, Oct. 3.—Flour receipts for the week, 800 bbls. and 18,908,879 lbs. in sacks. The market during the week has ruled strong with mill prices held higher, but most of the trade is well supplied for near wants and they are not disposed to operate at any cost while resellers are discounting mills' quotations. Some few of the mills reduced their figures yesterday from 25c to 50c per bbl., but buyers will not purchase even at the reduction made. It looks now as if there would be very little doing for the next three weeks.

Winter straight, Western, new, $10.10@10.40; do., nearby, new, $9.75@10; Kansas straight, new, $11.25@11.50; Kansas short patent, new, $11.75@12.25; spring, first clear, new, $9.25@9.75; do., patent, new, $12@12.25; do., short patent, new, $12.50@13; fancy spring and city mills patent, family brands, $13@13.75; rye flour, $7.85@8.05 bbl., in sacks, as to quality.

A controlling interest in the 1,700-bbl. flour mill of the Midland Milling Co. Kansas City, has been sold by Shane Bros. & Wilson of Philadelphia to C. B. Warkentine of Newton, Kan., J. H. McNair of Halstead, Kan., and associates. The company will hereafter be known as the Midland Flour Milling Co.

Movement of Wheat.

Following is a statement of the receipts and shipments of wheat at the primary markets of the West for the weeks named:

	Receipts. (Final 00 omitted)		Shipments. (Final 00 omitted)

Dundee Jute Market.

Consul Johnson, Dundee, Scotla under date Aug. 22, reports that ernment control of the jute trade ceased, to the intense satisfaction of concerned. Prices after the release control had been vouchsafed showed tendency to rush to extremes. Quations did move upward but in modtion. The market however was then in any way fully tested, but cations given in each department lowed the buyer a glimpse of what had to be prepared for, seeing that at that date was up to £28, or $12 at normal exchange, per ton above price on which the control was foun Dundee had information that the qity of jute appearing at Calcutta excellent and that the acreage s while small had given a high yield. price of old crop first marks offered on the Calcutta market at or $340, per ton and sales were repo at that figure. New crop jute for S Oct. shipment was to be had at equivalent to $350, with no buyers, ever, at that figure. The jute yarn tion showed decided strength, especi in the Hessian yarn branch.

The Institute of Agriculture at R reports the six leading producers of as showing a decrease in yield for current year as compared with 1918.

The Schmitz Mfg. Co., Board of Trade, Chicago, is marketing ever increasing supplies of calking paper and has the following railroads on their list: B. & O.; Gulf Coast and Colorado; Santa Fe; Monon; Pennsylvania and Nickel plate.

A cordial welcome to St. Louis is being sent out to the trade by the Turner Grain Co. It is a little three-page folder clipped together by a printed key which represents the key to the city that will be given to callers at the office of this company during the St. Louis convention next week.

O. W. Randolph Co., manufacturers of Randolph Grain Driers, has moved its office from the Second National Bank Bldg. to 1015 Summit St., Toledo, Ohio. This move was found necessary due to increased business which the firm has enoyed during the past two years. The Randolph Co. now has its own manufacturing plant, which is equipped with all the latest type machinery, where they will manufacture the Randolph Grain Drier exclusively. This drier has been standardized so that it can be put up in units with a capacity from 80 to 1,000 bushels of grain per hour.

Mr. Charrlin with Thayer & Co.

There is an old adage, "The way to get business is to go after it." This applies to the grain business as well as other lines of business and is evidenced

ALBERT CHARRLIN.

by the fine bunch of fellows traveling the grain surplus states in the interests of the respective firms which they represent. One of the latest traveling representatives to be added to those from Chicago is Albert Charrlin of Sioux Falls, S. D., who has been added to the working force of C. H. Thayer & Co. Mr. Charrlin will have charge of South Dakota, northwestern Iowa and southwestern Minnesota, with headquarters at Sioux Falls. He has been in the grain business for a number of years and thoroughly understands every detail and is very well known by the country trade in territory he travels. We take pleasure in presenting photograph of Mr. Charrlin herewith.

Changes in Grain Business at Peoria.

E. V. Maltby, Jas. A. Waring, Samuel Thomas, and C. S. Cochran have disposed of their interests in T. A. Grier & Co., of Peoria, and have bought the S. C. Bartlett Company, Inc., with offices at 16-29 Board of Trade Building. The S. C. Bartlett Company has elevator holdings at Akron, Radnor, Buda, Langley, Hahnaman, Nelson, Fairbury and Lodemia, Illinois, and will continue the general grain commission business of the company. The new officers of the S. C. Bartlett Company are: E. V. Maltby, pres.; J. A. Waring, vice pres. and general manager; C. S. Cochran, secretary; Samuel Thomas, treasurer. T. A. Grier will continue the business of T. A. Grier & Co.

Argentine Corn.

A break in Argentine corn in Argentine, with reports that 160,000 bu. had been bought to come to this country at prices ranging from $1.51 to $1.30, or far below what old or new grain could be offered from the West, was a factor of Saturday's corn market. A semi-panicky condition was reported as prevailing in Argentina, say Logan & Bryan, owing to the immense surplus, and farmers there sold cash grain freely on Thursday.

Field Seeds

Indiana clover seed is generally short but of good quality.

Southern Ohio seed dealers report clover scarce, acreage small.

Prof. Bolley of North Dakota thinks he has evolved a wheat that will successfully resist black stem rust.

A Missouri seed dealer reports a better demand for timothy with advancing prices. Clover seed is very scarce.

Rapid City, S. D., reports that alfalfa seed buyers are "now touring the hills." They represent big seed houses and are making contracts for the future delivery of alfalfa seed not yet threshed.

A Swedish firm writes from Stockholm to C. A. King & Co. that Sweden is a seller of white clover, trefoil and other seeds, but a buyer of timothy, alsike and red clover.

An Ontario dealer reports to C. A. King & Co. that four different farmers in succession unloaded 19 bags of alsike each check reaching over $1,000. One farmer sold his sweet clover, the product of 33 acres, for over $5,000.

A single grower of Grimm alfalfa seed in South Dakota, W. H. K. Williams of Cottonwood, recently sold one load weighing 5,300 lbs. which he sold at $2,300. Mr. Williams and his father raised this year about 400 acres of alfalfa, the seed yield of which was unusually good.

The State Department of Agriculture of Nebraska complains that seed wheat imported to that state from the East and North contains darnell, a noxious weed, and issues the warning that darnell is practically impossible to separate from wheat. It is a gray berry of shape and size of a very diminutive oat.

A farmers' co-operative exchange has been organized at Great Falls, Mont., for Cascade County, with Clark Bumgarner as president, and C. M. Storm as secretary. At the organization meeting it was decided to purchase 60,000 bus. of seed wheat for farmers of Cascade County for next spring's seedings.

Trade Commissioner Geringer of Prague under date of Aug. 12 reported that should weather from that date on be at all favorable it was estimated that there would be from 100 to 800 cars of 220,446 lbs. each of red clover seed for export from Czechoslovakia. The time of delivery of this year's crop will depend upon the amount of other work the farmer has to do. The shipments, if exported, will be to Hamburg and American money will be very acceptable.

Toledo Timothy Seed.

Liberal receipts of timothy last week at Toledo, the parge part grading prime, for applying on September and October contracts. September lost its entire premium. Considerable timothy has been moved from West to Seaboard awaiting export demand, which trade thinks will be large on the signing of peace.—*Southworth & Co.*

Detroit Seed Prices.

Quote grass seed prices Oct. 4 as follows: Clover seed—October $30, December $29.55; alsike, $26.25; timothy seed, $5.50.

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during week ending Oct. 4, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce:

Chicago Seed Market.

Slight offerings of timothy seed contributed to a fine market all last week in both cash and futures. At the close Saturday cash sales ranged from $8@10.80, with country lots quotable $8.50@11.25 for seed grading poor to fancy. The clover market recorded gains during the week and the tone at the close was very strong. Country lots of clover quotable $30@45, according to quality. Quotations for futures follow:

	Timothy— September. B.	A.	October. B.	A.	March. B.	A.
Sept. 29..	$.....	$12.75	$12.00	$12.50	$12.60	$12.80

Oct. 1..... 49.90 Oct. 4..... 50.80

Duluth Flaxseed Market.

DULUTH, Oct. 4.—New low price records on this crop and in more than a year were set in seed prices during the last week. Recessions extending to 67 cents in spot and 40 cents in the futures were set during the six days' operations. Longs made comeback on Saturday, when bulges up to 21 cents were scored on short covering largely.

The initial upset came in the flattening out in the September future. It went out at $4.03, as compared with $4.55 two days previously. It unexpectedly came about that operators on the short end were unexpectedly placed in position to make deliveries. Nearly 67,000 bushels of seed were taken in at the elevators on the last day of the month, whereas the average daily run for some time previously had not been more than 8,000 bushels. Winnipeg October flax, in which there was also supposed to be an extended short interest, slumped heavily as well.

Operators reported persistent selling from the country in flaxseed and crushers sat back to await developments. It was noted, however, that they came into the market during its weakest spells. A reported material slackening off in the demand for linseed oil as a result of a slowing down in building operations, and fewer new commitments in that line owing to the uncertainty created through the steel workers' strike was a factor too. Other operators again were disposed to take a more optimistic view of the situation. They drew attention to the dropping off in receipts from the country since the break in the market began to assume momentum as evidence that growers may take a hand in bringing about a solution of the problem in refusing to sell at around the present price levels. It was also claimed in some quarters that German inquiry for seed is likely to become a material market factor as soon as financial arrangements have been completed with that country. The development of German buying on any scale in this country would, it was claimed, speedily result in cleaning up stocks in the regular trade channels, with inevitable bulges in quotations.

Receipts of seed at the elevators here during the week were 130,001 bushels and supplies in store were brought u 176,000 bushels.

Closing prices of flaxseed on the luth market on Saturday as compa with the previous Saturday and year were:

	Saturday.	Wk. ago.	Yr.
On track.....	$3.90-3	$4.57-9	$3.
To arrive.....	3.90	4.30	3.
October	3.88	4.28	3.
November	3.86	4.17	3.
December	*3.86	4.13	3.
May	3.85	4.06	3.

Weekly Linseed Review.

NEW YORK, Oct. 6.—*United Kingd* Trade in linseed in the United King continues light, and the railway st tends to restrict business. The dem for linseed oil has been slightly bet and prices have firmed a trifle. rivals of seed into the United King were liberal, but the demand from C tinental sources is still disappoint In Antwerp Argentine seed is b offered rather freely at lower pri Linseed oil also rules heavy in the s market.

India: Seeding conditions in country are described as favora Movement of seed to the imports been limited, and loadings show a

g f. Shipments this week amount to 6)0 bushels.

Ajentina: Markets in this grower nd, after the early sharp break in i(s. American buying checked the c)e and caused some profit-taking .ortsellers. Loadings of seed have e on a smaller scale, as the railway f ilties and the bad traffic situation v been retarding the movement of c from the interior. Port receipts r rather light.

SEED SITUATION.

:)NG DEMAND FOR TIMOTHY SEED.

S NEY, OHIO—There is a strong de- r for timothy seed from the farm. *.J. Wells Co., Sidney, Ohio.*

MISSOURI SEED CORN.

%THAGE, Mo. (1).—There is very l of interest along the seed line to d from this section. Continuous /eather has demoralized the de- n covering the entire line of fall s s and clovers.

l crops with the exception of corn r)een very good, but corn has been l hurt by continuous dry weather. :verage yield will probably be 8 to o hel per acre; quality will be very d *-Tuckers' Seed House, per E. J. lr, Carthage, Mo.*

NEW JERSEY SEED CORN.

MELFORD, N. J.—The only seed rown in this country is corn, that remely good, having had a good g season, it ripened early and has arvested in fine shape. Our gol- ange Flint did 85 days this year. have opened our stock at $3.25 per f. o. b. here, and $3.50 for less ar lots.

sweet did not ripen as early as on account of the wet weather; frost has not yet arrived, we will cured yet. A strange feature of eet was that which was topped mature as quickly as the whole *-Harvey Vail, New Melford, Co., N. J.*

REDTOP SEED IN ILLINOIS.

Y, ILL. (6).—Redtop this season fully 40 per cent short of last crop, which was estimated at 65 t of a normal crop. The turnout verage year is from 8 to 10 bus. acre, while this year it will aver-)m 3½ to 4 bus. to the acre. ng usually runs up into Decem- hile this year the seed is all d in this vicinity now and the es have pulled in. We believe per cent of the redtop hay was his year without threshing, ow- the poor turnouts and the high threshing, as the threshers want- per day to thresh. We believe cent of the crop has been mar- nd the price paid to the farmers n 15c basis for clean seed and we cases where the price has gone ic.

e County, which is one of the red top counties in the district, turn out over 40 lbs. of fancy to the acre. They report that 75 per cent of the threshing is done there. The seed turns out nearly as many bags but is much lighter and will not test nearly as much as last year.

It is hard to make the city dealers see that the crop is short, as most of them were over the district early, before threshing started, and are banking their judgment on the hay. The hay was much better than last year, but owing to the wet weather and then the extreme hot weather the seed was blighted. We know of several farmers who threshed all day and would only get from three to five bags.

We have been over most of the red top district and find the crop is reported short in every locality. We figure we will get only half the amount of seed we had last year, while we have been buying over a larger territory than we did last year owing to several dealers staying out of the market because of the unsettled conditions.

We believe the trade will realize within the next few weeks that the crop is short and the market will advanc owing to the extreme short crop. We do not think there will be over 100 cars of fancy red top this year.

This county raises practically no timothy, and the counties north of us who are large producers of timothy report a very short crop. Very little clover hulled in this county and what is hulled is very poor turnout and quality.—*Frank H. Vice & Co., Olney, Ills.*

Toledo Clover Seed.

Clover seed was sharply higher last week after staying in a rut nearly all week, prices suddenly advanced and October sold well over the $30 mark. October shorts got a little restless probably; the slowness of the movement of seed of consequence to Toledo, causing the uneasiness. Other months followed but did not keep pace with October, say J. F. Zahm & Co. Also made a new high on Saturday at $27 for a few bags. There was a heavy undertone all week.

Kansas City Seed Market.

KANSAS CITY, Oct. 6.—Fall-maturing seeds are monopolizing attention of dealers, though practically nothing has moved thus far. Receipts of millet are imminent, as threshing has been in progress for some time. A tentative price range of $2.30@3 per cwt. is given. Doubtless, some seed has been contracted, as local houses have their agents in Kansas and Colorado. The Texas crop was damaged and held back by heavy rains in September. Hog millet, the coarser variety, is wanted by the poultry feed trade. The finer varieties, golden and Siberian, are expected to command top prices, as they are not likely to be plentiful.

The cane seed crop is thought to be liberal. It is in practically the same position as the sorghum grains, with maturity practically accomplished. While some has been cut for fodder and silage, most of the seed corn is still in the fields and subject to bad weather. No prices have been established.

Advices indicate a fair crop of Sudan grass in Kansas and Oklahoma and a good yield in Texas. Rains delayed threshing in Texas and caused some damage. Kansas City houses have bought some Kansas seed, but the market is not yet settled. Prices quoted range from $6 to $11 per cwt.

Alfalfa reports still indicate a small and late crop of seed, owing to the fact that all cuttings up to the third went for hay. Large areas in the western half of Kansas suffered from grasshoppers. Cutting of the seed crop is about ready to begin, and dry weather will be desirable for best reults. Dealers in Kansas City say there were importations from Europe for fall sowing. Prices of seed are quoted nominally at $17 to $23 per cwt., as from first hands.

Scattered lots of clover seed are being offered, mainly from Missouri, but the crop is small and no big movement is expected. There is a good demand, as many farmers who raised wheat heavily in the last few years are desirous of restoring meadows. Seed is quoted at $35 to $42 per cwt. for country run.

There has been a fair run of timothy seed, though the crop is not a large one, owing to reduced acreage and high prices for hay. Offerings are well taken, though dealers say there will be no shortage because old stocks are of fair size. Seed in the country run basis is quoted at $9.50@10.50 per cwt.

Trade in blue grass seed is mostly of a distributing character, as the Missouri surplus has passed largely into dealers' hands. Prices have not changed recently. Rough seed is quoted at $10@12.75 per cwt.; cleaned, $17@26, of timothy are mostly of ordinary or poor quality. Quotations are as follows: Clover, high grade, $44@48 per 100 lbs.; average country lots, $35@42; heavily buckhorn mixed, $18@30; poor, $5@15; alsike, high grade, $35@40; poor as low as $10; timothy, choice, $11 @12; fair, $10@10.75; low grade, $8@ 9; redtop, fancy, $16; average country lots, machine cleaned, $12@15; poor and chaffy, less; millet, golden, $2.50@ 3 per 100 lbs.; sunflower seed, new crop, spot, $10.50 per 100 lbs.; to arrive, $9@9.50; popcorn, shelled, white rice, $8 per 100 lbs.

St. Louis Seed Market.

ST. LOUIS, Mo., Oct. 4.—Offerings of spot seeds are light, and consist mainly of clover. The quality is fairly good, and the demand is active. Redtop is scarce and in good demand. Offerings

Minneapolis Flaxseed Market.

MINNEAPOLIS, Oct. 6.—The demand for flaxseed was slow all through the week and prices lost ground compared with the futures. Crushers would not pay up on account of the cheap Argentine offerings. A local crusher is bringing in Argentine seed by way of New York and has about a dozen cars in transit. Local offerings extremely light and there is nothing much for sale on the arrive basis. Elevator companies say that farmers are delivering practically nothing at present. Many fields will not be threshed on account of the light yields and the lower prices.

The Government has placed a contract for 4,500,000 lbs. of oats with the Albers Brothers Milling Co. at Seattle. These oats will be taken from Minneapolis, sacked at Seattle and forwarded to the Government in the Philippines. Price to the Government reported $54.40 a ton double sacked.

COTTON REPORT.

The Bureau of Crop Estimates put the condition of the cotton crop on Sept. 25 at 54.4 per cent of a normal, as compared with 61.4 on August 25, 1919, 54.4 on September 25, 1918, 60.4 on September 25, 1917, and 63.5, the average on September 25 of the past ten years.

A condition of 54.4 per cent on September 25 forecasts a yield per acre of about 158.0 pounds and a total production of about 10,696,000 bales. That is, the final outturn will probably be larger or smaller than this amount according as conditions hereafter are better or worse than average conditions. Last year the production was 12,040,532 bales, two years ago 11,302,375 bales, three years ago 11,449,930, four years ago 11,191,820, and five years ago 16,134,930 bales. Comparison of conditions, by States, follows:

	September 25.		Change during September.	
State.	1919.	10-yr. avg.	1919.	10-yr. avg.

*Nine-year average. †Lower California (about 85,000 acres and 59,000 bales) included in California figures but excluded from United States total.

The estimated picked acreage is 4.6 per cent (1,570,000 acres) less than the area estimated in cultivation on June 25, 1919. The picked acreage is 10 per cent less than the picked acreage of 1918; the planted acreage (i. e., in cultivation on June 25) was 8.7 per cent less than the planted acreage in 1918.

WINTER WHEAT OUTLOOK.

The Price Current-Grain Reporter and others of the business press have referred to the quite prevalent idea among farmers that heavy fall wheat seeding is unwise, in which conclusions they are doubtless correct. This judgment has been supported by force of circumstances in much of the winter wheat area, where exceedingly dry weather has prevented normal fall plowing. Rather startling reports on the winter wheat production have, however, been received from western Missouri and parts of Kansas; and specifically referring to the former territory, we have advices from Chariton County, only a short distance east of Kansas City, that a reduction from 50 to 70 per cent of last year's crop is quite certain. The adjoining counties, Carroll and Wray, with a large wheat acreage along the Missouri River, reported 50 per cent of a normal crop, meaning the growth before the high fixed guarantee obtained. We are rather inclined to commend this situation, believing, as so frequently stated in this paper, that without fixed prices the relativity of values influences seeding of hay and corn on land preferable for such feedstuffs and seeding of wheat only where wheat seems to be the best crop. So many apparent proofs of this conclusion have reached our ears this year that we should like to again refer to the above Missouri situation, where they are harvesting a remarkably fine crop of corn. It equals in quality the big Missouri crop of 1901 and 1902, when they had their largest known surplus, and the above estimated loss of wheat acreage for the 1920 crop may find a corresponding increase in corn, returning to Missouri a larger financial yield than if the land were sown to wheat for normal prices.

CLIMAX SUPERFINE BRAND.

Readers of our recent advertisement, a little one act play, laid under the open sky, will recall that it repeated a dialogue between a farmer and his son.

In continuing the story, we offer another drawing showing two farms, one very prosperous looking, the other run down, and the owner of the former is tactfully but nevertheless seriously asking the other, "Bill, did you ever buy seeds, put out in convenient size bags by W. H. Small & Co.?"

The owner of the poor farm says, "Yes, one time, 17 years ago, and I guess I shall go back to their seeds and make some money."

The successful farmer replied, "Yes, Bill, you will have to if you expect to run with me in producing bumper crops. I buy all my seeds from them, six different brands, and their bushel bags make a hit with me, as there is no loss of time or seed in buying from my dealer."

Lard	635,169	
Meats	12,263,460	16,1
Seeds	2,077,089	1,9

Beans and Potatoes

he *National Weather and Crop Bul-*
n for the week ending Sept. 30 says
h potato digging continued in north-
n Maine with quality good. In the
o hern part of that state, however,
h e was much complaint of the stock
r oing. In Pennsylvania the yield was
g erally normal. In Tennessee both
v e and sweet potatoes generally did
v except in the dry areas. In West
V inia the yields are unsatisfactory.
n hio the crop was generally poor, but
n oved by late rains. In Wisconsin
h yields were mostly light. In Iowa
n y farmers did not produce enough
p home use. In South Dakota the
i l was diminished. In Montana the
r was caught by a frost. In Nevada
n ields were fair.

te reports by the Weather Depart-
n as to beans say that in Michigan
n ng was completed before the first
' ctober. In Arizona there was an
n ased acreage and the yield large.
n regon the crop was fair to good. In
a ornia the crop of beans was light.

e American Steel & Wire Co.'s re-
p on the bean crop indicates that on
e whole it will be good to very good,
n beans in the West will be only an
r age.

Bean Market in General.

CHICAGO.—The market for beans and
a is extremely difficult to interpret.
e have a short crop in Michigan, a
a rain damage during the past
e in California, and not over 50 per
n of white pea beans (Kotenashi) in
n huria, Korea and Japan. On the
n hand, we are getting very little
n nd from consumers, and the sit-
t n in New York is worse on account
t temporary lack of export demand.
I consequence of all this prices have
e declining steadily for the past two
e until strictly handpicked small
i pea beans (Kotenashi) are avail-
l e today (Oct. 2) at $5.25 per 100
n bond, Pacific Coast, equivalent to
7 freight and duty paid to prac-
a all points in the United States.
c gan is quoting at about $7. Very
c the same condition of affairs ap-
e to other varieties of beans, with
c ception of limas, which are strong,
d ed kidney, which are scarce, but
n imported colored beans continue
g ted and offered at very low prices.
O ur opinion we are very likely to ex-
i ce the usual consumptive demand
i October and November, with a
s quent reaction toward materially
l prices.—*Herbert W. Smith Bkge.*
, hicago.

BEAN SITUATION.

O DO ONLY HALF A CROP OF BEANS.

ORADO SPRINGS, COLO.—We do not
e to exceed 50 per cent of last
r out-turn on beans from the pres-
op, principally on account of the
smaller acreage planted. The sur-
s rom last year's crop is not very
g and the demand at present not
e. Growers are not disposed to
. the basis of the present market.
l Seldomridge Grain Co., Colorado
i s, Colo.

MANY BEANS AS LAST YEAR.

AE ODESSA, MICH.—The bean acre-
our vicinity is hardly 50 per
f normal but indications are that
ield per acre will be much better
has been for the past few years
good quality. This being the
ve will have practically as many
s of beans in our vicinity as we
st year. Supplies of old beans
ll cleaned up and new crop has
s rted to move. The market at the
t time is very quiet.—*Smith*

BEAN AND POTATO PRICES.

Quotations follow for lots of good quality and condition beans and potatoes, sacked, per cwt., unless otherwise specified as of Oct. 4:

Beans—

Boston—Limas, $12@12.50.

Buffalo—Marrows, $11@12; mediums, $8@9; pea beans, $8@9; wh. kidney, $11@12; red kidney, $9@12.

Chicago—Pea beans, hand picked, ch. to fancy, $8.50@8.75; brown Swedish, $5.50@7.50; red kidney, $11.50@12.

Cincinnati—Navies, $8@8.50; marrowfats, $12.50@12.75; red kidneys, $13@14; limas, $13@13.50.

Detroit—H.-p. pea beans, $7.30.

Denver—Pintos, $6@7; navy, $8.50@9.00; limas, $10@10.50, wholesale.

Montreal—A good consumptive demand continues for Ontario hand-picked, which are quoted at $5.50 per bus., strictly ch. hand-picked, $5.75; two to three-pound pickers, $5; common five to six-pound pickers, $4.50 to $4.85 per bu.—Trade Bulletin.

Minneapolis—Navies, h.-p. fancy., $9; soy, $5; Cal. limas, $11.

New York—Calif. limas, $12.75@13; pinks, $7; ch. marrows, $11.75; fair, $10.50@11.50; ch. pea beans, $8.25@8.50; sma. wh. Calif., $7.75@8; red kidney, $13.50@14; wh. kidney, ch., $12.25@12.50.

Pittsburgh—Limas, $13@13.50; Calif. navies, $8; Mich. navies, $8.75.

St. Louis—Quote c. lts.—Ch. h.-p. Mich., $7.75; prime ma.-p., $7.50; orders and small lots higher; pinto beans, $7 per cwt. From store—Scotch peas, 7½c per lb.; split peas, green, at 15c. Per cwt.: Calif. black eyes, $7; ch. limas, $13; Calif. pinks, $8; white, $8.50—Market Reporter.

Potatoes—

Buffalo—Weak market, rnd. per bu., $1.50@1.60; long, $1.25@1.30.

Chicago—Minn., Ohio, $2.60@2.65, bulk; Wis.-Minn., blk., rnd., wh., $2.20@2.35.

Cincinnati—Minn. early Ohio, h.-g., bbl., $6.50@6.75; Wis. round wh., $2.65@2.75; early Ohio, h.-g., bbl., $6.50@6.75.

Denver—Wholesale del., Colo., $2.05@2.10; Idaho, $2.15@2.45.

Kansas City—Minn. Red River, $2.85@3; h.-g., bu., $1.50@1.70; Tri., $2.70@2.75; North'n wh., $2.50@2.60; West'n wh., $2.50@2.60.

New York—Jer. rnd., 150-lb., $3@4; L. I., 150-lb., $5@5.75; Me., 165-lb. bg., $3.50@4.25.

Los Angeles—Stockton Burbank, new, $2.60@3.

Minneapolis—$2.35@2.45.

Montreal—Receipts last week were 9,512 bags, against 5,718 bags the week previous, and 15,553 bags last year. Sales of car lots on track reported of Quebec whites at $1.40 to $1.50 per bag of 90 lbs. New Brunswick potatoes have sold at $1.75 per 90 lbs. in car lots on track. The market is said to be flooded with Quebec potatoes. Ontario is short, owing to the drought, and quite a few cars of Quebecs are being shipped there. Enquiries are at hand from Cornwall to Windsor.—Trade Bulletin.

Pittsburgh—N. J. Cobb., blk., $2.85; Pa., rnd., wh., blk., $3.15@3.25; Wis., sk., c. lts., $4.40; N. J. Giants, 150-lb. sk., $3.75@4.

St. Louis—Idaho Rural, $2.50 trk.; Minn. Rural, $2.55, trk.; Wis. Rural, $2.25; Red River early Ohio, $2.80, trk.

THE APPLE CROP.

The commercial apple crop, as indicated by Sept. 1 condition, is 23,072,000 bbls. out of a total yield of 153,242,000 bbls., being a decrease of 28,000 and 1,762,000 bbls. respectively compared with a year ago. The barrel crop is the lowest in recent years; the box apples crop on the other hand, is the largest, due to the increase of box shipments from the Pacific Northwest. The total number of cars shipped last year of barrelled apples was 29,476, the four largest shippers being New York (10,954), Washington (5.052), Virginia (2,523), and Michigan (1,540). Prices for the season are not yet established, but contracts made for future deliveries are slightly higher than a year ago at this time.

Eastern Oats Market.

There was a liberal trade in oats for export during the current week, which included sales of a large amount for shipment and a quantity from the spot sufficient to absorb most of the offerings. Prices have held firm and the attitude of receivers is to exact full premiums on all occasions. The situation is such that it is more a question of premiums than of prices in the near future, the latter fluctuating more or less in sympathy with the action of the Chicago futures, while holders are inclined to advance their premiums on more than fractional declines. Exporter's orders are invariably for heavy oats, and their recent large purchases have helped to advance their premiums.—*L. W. Forbell & Co., New York.*

Feedstuffs

The Valdosta Mill & Elevator Co., Valdosta, Ga., is erecting a new building which will house its feed mill plant.

The Ferncliff Feed & Grain Co. of Louisville, Ky., will remodel the old Ferncliff distillery and make molasses stock feed.

The *National Weather and Crop Bulletin* for the last week of September says that pastures and meadows in New Jersey are fine; in Texas ranges and live stock are in good condition; in Oklahoma pastures needed rain. In Kentucky pastures and the sorghum grains were much improved by late rains; in Indiana pastures and meadows were much improved, but only fair to poor. In South Dakota pastures good in the east, but poor in the northwest, and late rains were beneficial, but North Dakota pastures and ranges were poor in most sections. In Wyoming the ranges are scanty. In Nevada the late rains generally benefited ranges and pastures, while in Oregon pastures were revived.

Stock Growers Protest.

The Kansas Livestock Association, at a meeting held recently at Emporia, Kans., adopted resolutions protesting against the so-called corner of cottonseed meal and cottonseed cake. The resolution says among other things that present prices of native seed meal and cake make it a feed that is out of reach of cattlemen, and the resolution recommends "immediate Congressional investigation of the cottonseed situation." The meeting went on record as saying that in its opinion the price of meal quoted is at least $25 per ton too high.

Feeding Corn Alone.

"Many farmers are feeding corn alone. This is an unprofitable practice. Demonstrations at Purdue have shown that about 550 pounds of corn are required to produce 100 pounds of pork. When protein feed, such as tankage or linseed meal is added to the corn, about 350 pounds of grain are required for 150 pounds of pork. At this time, when the country is calling for food no hog feeder can justify the use of his extra 200 pounds of grain. To secure greater production it will be necessary to improve practices and use more efficient methods."

About Cottonseed Meal and Cake.

A. J. (Jake) Maurer, general manager of the Choctaw Sales Co., Kansas City, Mo., dealers in cottonseed meal and cake, writes Clay, Robinson & Co. as follows:

"The season in meal and cake opened up this year at the highest prices ever known for this commodity. This was due to the scarcity of summer stocks following the war time demands of two or three seasons past. August shipments for 43 per cent cake brought around $90 per ton delivered Chicago territory. The decline since that time has reduced delivered prices on that grade to around $78 per ton for prompt shipment, and the mills are asking around $72 for October and November delivery. However, the range of cake prices during the next three months is as yet problematical and will decline only when sufficient goods have been produced to supply emergency demands now prevailing in the drought territory.

"The South and Southwestern portions of the country have produced an immense tonnage of grains and roughness and these sections will buy only a small per cent of the cake, compared with the amount used the last two years when drought and high cattle prices prevailed.

"There is some distress among big cattle pasture districts of Kansas where grass made excellent growth early, but was later dried up by excessive temperature and lack of rain, but this section will likely right itself. Many of these good feeder cattle will come to market and furnish a good opportunity for feeder buyers from the corn belt, while others will likely be held and fed cake, although the demand for cake from that section at the present time has been very light.

"The export outlook for cake has been practically nil and will likely continue so while exchange rates remain prohibitive. The cake market during the next few weeks should find prices level at which free trading will be possible."

FEED SITUATION.

FEED DEMAND SLACKENING.

JACKSON, MICH.—There is very little to say with reference to feedstuffs except that we find the demand for feeds in the East has slackened materially, however, we look for a better demand after a few killing frosts.—*Heywood Milling Co., S. H. Heywood, pres., Jackson, Mich.*

Meal for Yearlings.

An Iowa feeder who favors use of cottonseed meal with young cattle is B. F. Myers of Dallas county, that state. On a bunch of yearlings he sold recently at a fine figure feed was a mixture of silage and shelled corn twice a day. This method of feeding until about May 15, at which time they were turned out on pasture and fed a liberal quantity of ground corn and from a pound and a half to three pounds cottonseed meal, increasing the meal as the season advanced. After sixty days of such feeding he gave them all they wanted of ground corn cob meal, ground oats, a fair ration of barley and four pounds of cottonseed meal. This latter method was employed until the end of the feeding period. They were fed only once a day on the latter ration. Mr. Myers said that during the period extending from the middle of July the stock did not show a gain of as much as one pound of flesh, due to the fly nuisance. This, however, was no fault of the feed.—*National Live Stock Reporter.*

A Protein Problem.

Providing protein for next winter's feeding is a problem which faces dairymen these days, also many beef producers who have come to depend on buying cottonseed meal or something else to balance their silage. Those who have alfalfa, clover or soy-bean hay are in best shape to balance their feed, the others face a high hay market and the same kind of a feed market. In large milk producing territory there will be plenty of silage but lack of protein, and the cost of the latter is likely to have its effect on production. We know of no better policy than to buy whatever protein can be had in the cheapest form obtainable. Alfalfa hay or meal may prove to be a commercial substitute for some of the by-product protein feeds. It is now selling at Kansas City, the greatest alfalfa market in the country, at $22@27 per ton.—*National Stockman and Farmer.*

HAYES GRAIN & COM. CO. of Ill.
COTTONSEED and LINSEED MEAL
Feeds of All Kinds
327 S. La Salle St., Chicago, Ill.

FEED MARKETS.

KANSAS CITY.

Kansas City, Oct. 4.—An advance of as much as $3.50 a ton occurred in prices of cottonseed cake and meal in Kansas City this week. The 43 per cent protein grade was offered here at the close of the week around $72.50@73 a ton, compared with $70 a ton last week. For 41 per cent grade, the price was around $70.75, and $70.50 for 38.5 per cent. The October Government report, showing a reduced cotton crop, and buying of cake for export account, were bullish influences. Domestic demand was fair.

MONTREAL.

Montreal, Oct. 3.—The mills are still busy filling delayed orders. Straight cars of bran are quoted at $45 per ton, and s at $55. Corn feed is steady and sale reported at $80@82 per ton, mouill $69@71, and pure barley meal at $6 and dairy feed, $48@50 per ton, incl bags, delivered.—Trade Bulletin.

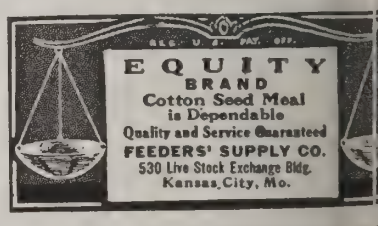
NEW ORLEANS.

New Orleans, La., Oct. 4.—Pric tagged bran ranges from $2 to $2.0 hundred delivered New Orleans. The have about filled their wants on bra are indifferent to present quota Shorts are worth about 80c per hu more than the price of bran. Very sales of shorts and the recent deman been filled.

FT. WORTH.

Ft. Worth, Oct. 4.—Demand for feeds continues to drag and most report surplus on hand which the unable to move. Millrun bran is quoted in 10 lbs. at $2.10 delivered common points but prices are acc much lower.

LOUISVILLE, KY.



Louisville, Ky., Oct. 4.—Demand fo is not strong and mills are now ca fairly good stocks and able to supp demand. Flour prices are slightly str than they were in mid September, d lower feed.

Principal quotations, carlots, c Bran, $45 a ton; mixed feed, $58;

DES MOINES, IA.

s Moines, Ia., Oct. 4.—Mill feed prices a fallen off the past week due to in- se in arrivals. Bran quoted at $37, ght middlings at $50, flour middlings t $56. Cottonseed and oilmeal have ed a basis where feeder trade is ning to buy in small quantities. Trade s to look for further decline before a trading basis is reached.

MEMPHIS.

mphis, Oct. 4.—About the only fea- in the feed market here are slight es in bran and shorts and some ad- in cottonseed meal. Demand for feeds has not improved but offerings larger, which brought a decline of $1 a ton. Offerings of cottonseed are not being pressed, although the are running and turning out the ct freely. Holders are apparently ient of better prices later and are encouraged by strength shown in the al feed situation. Prices asked for cent meal at the mill are $64@64.50 Manufacturers of mixed and sweet are still doing but little and report holding fairly well although slight es have been made in a few of the l brands in which shorts and con- ted feeds have a part.

NEW YORK.

York, Oct. 4.—The feed market was weak and the volume of business small. Consumers were disposed to their purchases as they felt that feed- of all kinds will work to a lower

offers were quite liberal and while was the weakest early in the week, quently middlings were also reduced. tations as follows: City feed bran, iddlings, $58; red dog, $69; Western bran was quoted at $42; standard ngs, $54@55; flour middlings, $62.50 nd red dog, $70@71, in 100-lb. sacks, rs' shipment.

NASHVILLE.

ville, Tenn., Oct. 6.—The situation ues less active with easier prices on nd moderate supplies. Quotations: bran, 100-lb. bags, per ton, $41.70; gs, $61; horse and mule feed, $45@ iry feed, $66@67; poultry feed, $67@ ; feed, $68.

DULUTH.

uth, Oct. 4.—Quotations in ground ere advanced $3.25 and in ground $1@2 in this week's market. Other are unchanged. Trade continued ith supplies in fair volume as East- pments were slow. Dealers in this y bought to cover their current only. Prices per ton follow: Bran, ground oats, $48.25; No. 1 ground 3.75; No. 2 ground feed, $52.50; No. nd feed, $51; shorts, $52.50; flour gs, $60; red dog, $65; Boston mixed, cracked corn, $56.75; rye feed, $40.

BALTIMORE.

nore, Oct. 4.—The demand is fair obbing way for sacked bran and middlings, and the general feed is steady and unchanged. Quota- ollow: Western spring bran, per)-lb. sacks, $43@44; Western mid- per ton, 100-lb. sacks, $57@58; city inter wheat bran, per ton, 100-lb. $58@60; brown middlings, per ton, acks, $60; white middlings, per ton, sacks, $70.

MILWAUKEE.

ukee, Wis., Oct. 4.—The local mill rket is steady to lower, showing rice concessions in several in- The consumer demand has been y low mark for this time of the e to most ideal weather conditions out Wisconsin, keeping pasturage did shape for out-of-door feeding. stomary demand from Eastern sually commencing the first days er is also lacking. grains, $60@61; gluten feed, $63, all in 100-lb. sacks.

PITTSBURGH.

Pittsburgh, Oct. 4.—The feed market shows a large increase in receipts over the same period last year, a total of 560 tons being bulletined here as against 140 tons last year. Included in last week's receipts were 2 cars of bran, 9 cars of feed, 3 cars of middlings. Demand is good and prices are holding up well, with some classes of feeds bringing as high as $65 and $70 a ton.

BOSTON.

Boston, Oct 4.—Demand for feeds of all kinds continues extremely dull with prices a little easier. Middlings, gluten feed, red dog, and second clear are all quoted lower than last week while other feeds are practically unchanged with the exception of oat hulls which is quoted higher. Prices being quoted as follows at the close: Bran, spring, sacked, $44 per ton; bran, winter, sacked, $44; middlings, sacked, $55@59; mixed feed, sacked, $53@60; gluten feed, sacked, $68.12; red dog, sacked, $70; second clear, sacked, $71; oat hulls, reground, sacked, $31; stock feeds, sacked, $62.50; hominy feed, sacked, $62.40; cottonseed meal, $72. Receipts for the week ending October 4th were 42 tons.

PHILADELPHIA.

Philadelphia, Oct. 4.—The market for feedstuffs is dull and demoralized under a very light demand and liberal offerings which cause increased pressure to sell. The quotations given below are for carlots in 100-lb. sacks to arrive at cost per ton: Winter bran, $42.50@43.50; spring bran, $42.50@43.50; standard wheat middlings, $53@54; flour middlings, $61@62; red dog, $70@71; shorts, $53@54; low grade flour, $71@72; rye middlings, $52@53; fine yellow hominy, $57.50@58.50; fine white hominy, $58.50@59.50; reground oats feed, $29@30; cottonseed meal, 36% protein, $72@73; cottonseed meal, 41% protein, $74@75; cottonseed meal, 20% protein, $59@60.

ST. LOUIS.

St. Louis, Mo., Oct. 4.—The feed market is dull and slow, with a better inquiry for wheat feeds than any other kind, but business light. Some of the offerings are being carried over, and the feeling is weak. Quotations are as follows: Bran, hard $36 @37, soft $37.50@38, brown shorts $50@53, gray shorts $56@59; white hominy feed, $53@55.50; oat feed, $25; alfalfa meal, No. 1 $37@38.50, No. 2 $32.50@33; milo maize, No. 3 $2.40, No. 4 $2.25.

MINNEAPOLIS.

Minneapolis, Oct. 6.—The demand for millfeed is narrow and offerings are increasing. Mills cleaned up most of their contracts for September shipment and not much offal has been sold for October shipment. Bran is in fair demand. Interior mills are shipping more of it lately. Heavier grades of feed are in the slowest demand and the weakest in tone. There is very little demand for feed to be shipped later in the season, as the buyers are looking for lower prices.

Quotations in car lots f. o. b., sacked in 100-pound sacks: bran, $35@37; standard middlings, $48@49; flour middlings, $53@56; red dog, $64.50@65.50; rye middlings, $49@51; ground barley, $59.

Burlaps were without activity last week. There was little change in the general position, and importers and traders believe that a little time must be granted for the absorption of the large arrivals which have lately come to this coast. After the goods now entering have begun to be cut up, importers expect a strong revival of demand, says the *Journal of Commerce*. Prices Oct. 4 were nominally unchanged, with spot, 8-ounce, at 13.85c and spot, 10½-ounce, at 17.75c.

The Railroad Administration with the approval of the Commerce Commission will advance rates from St. Louis to Southeastern territory generally ½c over present figures on grain and grain products. It has also appoved advances in rates on grain and products of St. Louis to Memphis of 7½c; New Orleans and common points, 17½c; Little Rock, 1c@18½c, date effective not yet announced.

107 DAYS WITHOUT A DRINK.

It is probably entirely safe to start this article with the above caption because there is surely no one, following the eventful First of July, who in any way hankers for a drink. Neither do we make argument with the camel as to his ability to pass up the usual liquid refreshment.

We have used actual figures however which cover the extended drouth in Wyoming, Montana and parts of other Northwestern states prior to August 2, when they secured their first rain of the summer. Uncertainty has prevailed among the hay and feed men and to a less degree among the grain trade as to the exact condition of feedstuffs in this great cattle producing country many miles west of our Western terminal markets. There have been well posted large operators in hay and feed quoted as saying that this Northwestern demand would not amount to much, but our advices hardly agree with such conclusions, and the personal search for the truth has yielded interesting and in many ways astonishing data. For instance, late consignments of beef cattle, skinny, almost valueless, stock, reached the slaughter houses in deplorable condition. Many droves in territory where even the little creeks reduced from rushing rivers had dried up, revealed in the slaughtering process lumps of alkali and minerals in the stomachs of the animals, a condition surely not con-

NORTH PLATTE, NEB.

ducive to beef production. The severity of this early summer drouth hastened the shipping of livestock of all kinds, stockmen being assisted by the railroads and the Government to the pasturage accommodations east of Chadron, Nebr. This exodus of stock included even horses, thousands being sold, thus considerably reducing the working facilities of Northwestern farmers, with a bullish effect on everything. Hay in the Northwest is now selling for $35.00 in the stack.

But the usual abundant enterprise and recuperative qualities of the American farmer, rancher and feeder will "save the bacon" of the Northwest as on previous occasions when similar drouth conditions prevailed. Their banks, knowing the dependability of their people, are financing buyers who for the past several weeks have brought in stock for winter feeding. These feeders feel justified in buying young stock, reasoning that present hay and feed prices will show a profit in winter feeding. Correspondence to THE PRICE CURRENT-GRAIN REPORTER from Duluth, Sioux City, Omaha and Denver, in addition to our personal investigations at intermediate points, quite clearly support our belief of a demand from Northwestern territory for outside feed and hay supplies of considerable volume during the coming feeding season.

A Trade Service.

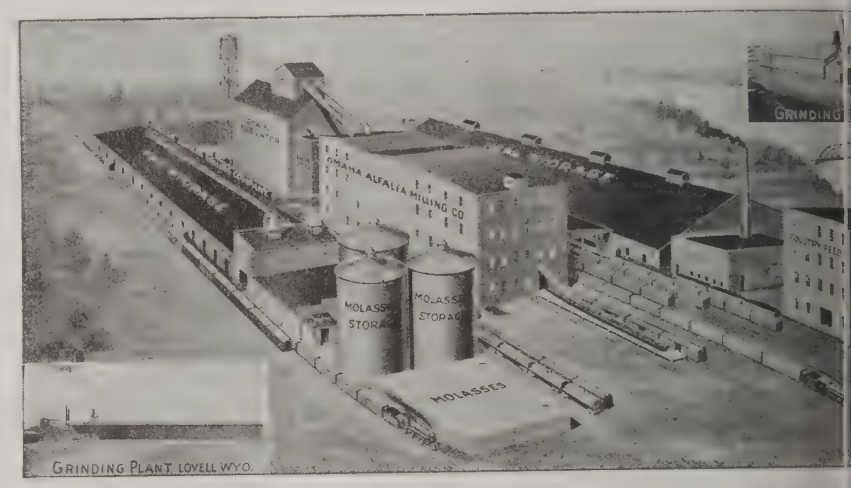
In the publication of its weekly market letter, the Choctaw Sales Company of Kansas City is rendering a unique service to dealers, to feeders and breeders of live stock and to others interested in cottonseed cake and meal. The weekly reports on trade conditions, as analyzed by A. J. Maurer, better known in market circles as "Jake" Maurer, general manager of the organization, will not be influenced by any enthusiasm to make sales. Instead, Mr. Maurer and his associates in the Choctaw Sales Company, are giving to the trade, through the medium of THE PRICE CURRENT-GRAIN REPORTER and other market publications, an entirely unbiased review of the cottonseed cake and meal outlook.

Were one to remain in close touch with the affairs of the Choctaw Company, the conclusion might be reached that the handling of cottonseed cake and meal is but a minor and unimportant activity, that rendering "service" is its business. Mr. Maurer is a shrewd student of feed and live stock markets, having devoted the major part of his life in these industries. For more than a score of years, he was the head cattle buyer for one of the leading packing plants on the Kansas City market, and even at the present time is in constant touch with the live stock trade. Several hours during the day, it is not uncommon to find Mr. Maurer in consultation with breeders and feeders of cattle—not consulting on buying cottonseed feed—but in giving information and analysis on the future of the beef animal market. Mr. Maurer's views demand the attention of producers, and while he cannot foretell trade developments, for this is the work of prophets, his views have been borne out on markets.

In addition to cottonseed feed, the Choctaw Sales Company handles bran and shorts, alfalfa molasses feeds, and is the agent for Kansas City territory in the sale of the "checkerboard" line of feeds for the Ralston-Purina company of St. Louis.

OMAHA ALFALFA MILLING CO.

The Omaha Alfalfa Milling Co., main offices in the Grain Exchange Bldg., Omaha, Nebr., have merchandised their "Quality" brands of feed for so many years that our trade surely needs no special comment on their uniformity, value and all around advantages from a dealer and consumer standpoint.



However, Sales Manager Dolman, and everybody knows him through his years of service with Wash-Co, Golden Grain, Peters Mill and others, is developing larger sales than ever for the company. He is justifiably proud of the fact that the Omaha Alfalfa Milling Co., during the present declining markets, is strictly upholding the quality of their feeds which do not include in their materials any by-products. The business of the company is mainly with Eastern and Southern markets and consuming territories; and Mr. Dolman says the only limit to its volume of output is the car shortage situation.

The capacity of their plant, illustrated here, is 600 tons each 24 hours and with ample producing, storing and shipping facilities, including private switching on the I. C. railroad, there seems to be every reason to believe Mr. Dolman's estimate of business to come during this winter will be realized. The company has grinding plants at Cozad, Nebr., and Lowell, Wyo., and is equipped with the latest grinding, mixing, sacking and shipping equipment. There are three tanks of steel construction and one underground concrete storage tank for a total of 3,500 tons of molass the Omaha plant. The grain st accommodates 35,000 bushels; an location in Omaha, with easy acce country supplies as well as purch in the city, makes the rapid turn of material stocks and the conve into the various lines of feeds easy

Food Administrator Resigns.

B. W. Reynolds, who was C Food Administrator during the w Fremont, Neb., and who lately res the practice of issuing flour price on foodstuffs, has quit the job. He it is a worthless one and the offic acting has no authority. He "What is the use of going to a chant's business and demanding t his invoice for certain goods and h tell you to go to hell if he wants? look mighty silly and take his a and get out." Therefore Mr. Rey resigned.

Send us the news from your borhood—changes, crops, local tions, etc.

COTTON SEED PRODUCT

(Monday Weekly Letter and Buyers' Guide)

MARKET: The Government estimate of the Cotton cr this season, issued October 2nd, is 10,696,000 bales. The we closing October 4th has been most favorable to growth, maturit and picking. By the end of the coming week most of t mills will be in operation throughout the belt. The featu of this week's market was buying in rather large quantiti of Loose Slab Cake by exporters. Also some buying by mil and dealers to fill early sales delayed by backward season. T market advanced $2.50 to $3.50 per ton depending on gra location and time of shipment. The trade expected lower pric and was consequently disappointed. On Saturday the advan seems to have halted.

Our prices subject to confirmation, car lots only 20 to tons for immediate, prompt and October shipment clos Saturday as follows:

	43%	41%	38½%
Chicago	$75.00	$73.00	$71.00
Indianapolis	75.50	73.50	71.50
Des Moines	75.00	73.00	71.50
Milwaukee, Wis.	75.50	73.50	71.50
St. Louis	73.50	71.50	69.50
Kansas City	72.75	70.75	70.50

THE BAG SITUATION.

In further considering the bag situation, and in line with our bag market reviews, we are glad to quote *Mealology*, the live, peppy house organ of the Denver Alfalfa Milling & Products Co., Lamar, Colo., which says. "Alfalfa millers have an investment of $1,500,000 in sacks used in alfalfa meal transportation. The sacks average two round trips a year from mill to mixer. The average life of a bag is only four years, thus making an annual wastage of $400,000, representing an expense wholly chargeable to convenience in carrying meal from millers to mixers. For six months of the year they are empty and represent idle capital. The handling of meal by air in loading and unloading would eliminate this investment of $1,500,000 in burlaps for carriers. We have tried to solve this burlap problem, but this far have failed."

FOREIGN CROP REPORTS.

Special reports compiled by the Bureau of Crop Estimates of foreign crop conditions include among other things the following:

ALSACE LORRAINE.—The Bureau of Statistics shows that winter wheat is about the same average yield this year as last; spring wheat the same; spelt is a little larger; rye, both winter and spring, somewhat less, about one point. Barley, both winter and spring, 2 to 3 points better than last year; oats, one point higher.

NORWAY.—The best estimates now possible for the crop of 1919, based on early August conditions, show that wheat is about 2,000 bus. larger; rye, 50,000 bus.; barley, 100,000 bus.; oats about 250,000 bus. larger than last year; potatoes very much larger, the total being 34,722,000 bus. this year compared with 28,954,000 a year ago. Beets, turnips and hay all larger yields than last year.

FINLAND.—The Finnish Department of Agriculture on the basis of June shows satisfactory crops expected of the fall and spring grains, potatoes and other tuberous plants as well as hay.

POLAND.—Consul McBride of Warsaw reports that in the main middle Poland has good crops this year. Heavy rains seem to have had no bad effect except on the hay crop, many fields of which were completely washed away. The hay supply therefore will be small.

LIVESTOCK.

BRAZIL.—Statistics published in the *Jornal do Brazil* show a total of 37,500,000 head of cattle of all kinds in the Republic. Of these 16,100,000 are milch cows; 9,100,000 calves. Varieties are known as native, Indian and European stock.

FINLAND.—The Finnish Agricultural Department has no definite information in regard to the number of livestock at the present time but on May 20, 1918, there were 1,400,000 cows; 1,125,000 sheep and 227,000 hogs in that country. These estimates are considered however as low.

NEW ZEALAND.—The official estimates of the number of sheep in New Zealand on April 30, 1919, is 25,511,000 against 26,538,000 in 1918; a decrease for the 12 months of 1,027,000 head. These figures show that nearly all the increase gained the previous year has been lost and the country is only 241,000 head better off than in 1917.

SWITZERLAND.—The Census of April 24, 1919, shows that the Canton of Zurich had 111,000 head of cattle against 116,000 in 1918; 27,200 hogs against 20,081 in 1918. The number of milch cows decreased by 5.75 per cent, the number of sheep increased greatly.

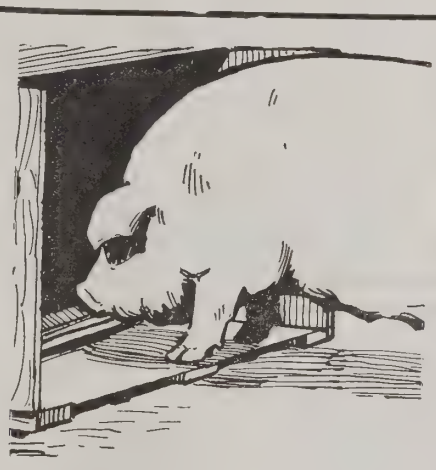
RICE BRAN Indispensable for successful HOG FEEDING

K. & E. NEUMOND, Inc.

Manufacturers, Dealers & Exporters of Feed.

New Orleans St. Louis



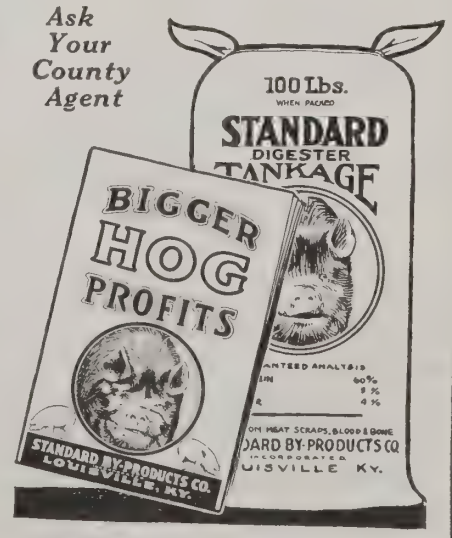
E. H. Young & Co., Dallas.

E. H. Young, formerly prominently identified with the Texas Cake & Linter Co. of Dallas, Texas, has started a business of his own, incorporated as E. H. Young Co., Fort Worth, Texas. The firm is a member of the Interstate Cottonseed Crushers' Association, the Texas Cottonseed Crushers' Association and Southwestern Peanut Shellers' Association. The capital stock of $25,000 is ample finance to support Mr. Young's abilities which have been proven through many seasons of good and bad business in manufacturing and selling cake and meal for Texas mills. In contemplating the activities of the new company, Mr. Young is writing his trade that "This company will ship cracked cottonseed cake and meal, nut and pea size, also cake and meal made from peanuts. We are in a position to ship promptly and quote you the very lowest prices from the mills, taking most advantageous freight rates to any point to which you may wish shipment made.

"If you are needing any cake or meal, please telegraph us on receipt of this letter. In any event keep this letter before you and ask us for prices delivered at any station to which you may wish shipment made, being careful always to state the quality and quantity, as we ship in carload lots only and furnish grades containing 45 per cent protein, 43 per cent protein, 41 per cent protein, and sometimes 36 per cent protein."

Corn growers of central California included in the Farm Owners' and Operators' Ass'n at Stockton have installed a complete moisture tester for use of members.

Broom corn pulling is practically all finished in the Southwest.



Hog Sense Makes Dollars For Dealers

No feed dealer can afford to be without a protein feed. Hog instinct demands it as part of the ration. Experienced breeders always feed it. It is in demand in every experimental station. Any hog knows that

Standard Digester Tankage

Ask Your County Agent

is the most perfect balance for his corn. Guaranteed sixty per cent protein, combined with phosphate, lime, ash and fibre. Put it in a trough and he feeds himself just the right amount.

Hay Department

Baker, Ore., reports a good demand for local timothy.

The hay market at Spokane is still weak with no improvement in the demand.

The hay market at Seattle is reported holding steady with no material change in the disposition of buyers. Sellers are also firm in their holdings.

Portland, Ore., reports no arrivals of eastern Oregon timothy. Clover is quoted $24.50, oat hay $24, cheat $18, valley timothy $28.50@30.25.

The Hypo Hay Co. of Memphis has been incorporated with a capital stock of $25,000 by P. McIntyre, J. E. Roberts, E. G. Hedges, F. M. Bailey and J. W. Farley.

J. H. Moorehead of the Farmers' Exchange, Great Falls, Mont., closed a contract with Minnesota hay growers for 2,000 tons of upland hay at a price of $23 f. o. b. Great Falls.

Lyon County, Kans., reports a heavy crop of prairie hay, the amount harvested being much larger than last year. The country is expected to have an ample supply of forage feeds this year.

A rancher from northwestern Nebraska says that in some sections hay has declined over a dollar a ton in the last few weeks and believes that winter feeding of cattle will be larger on that account.

John H. Upschulte, a federal grain inspector, has been selected as hay inspector for the Houston Grain & Hay Exchange, Houston, Texas. His appointment will be approved by the National Hay Ass'n.

The hay situation at Great Falls, Mont., is more or less uncertain. The demand and movement at present is very light. Nebraska upland hay is offered at $25; Minnesota $27; Nebraska timothy $32.

The business of the Southern Hay Co. at Ft. Smith, Ark., has obtained larger quarters and are now located in the old Cottonpress Bldg., near the Poteau River bridge, a structure giving them 640x150-ft. of space.

Hay making was still in progress during the last week of September in Georgia and Alabama, in both of which states considerable hay was gathered in good condition. In Louisiana some hay was still being cut.

Hay listed in Minnesota for sale to drought areas of Montana are said to have reached 30,000 tons. This report is made by H. J. Hughes of the Director of Markets, the State Department of Agriculture. He adds that a million acres of Minnesota land has been offered to the department for grazing purposes.

The Pennsylvania crop report says the average production of hay in that state is about 1.4 tons per acre. The 13 counties reported produce in excess of 100,000 tons each. The largest producer is Bradford County, 172,000 tons, followed by Tioga, 170,000, and Lawrence, 159,000 tons. The total for the state is estimated at 4,430,000 tons.

New Traffic Manager.

The new traffic manager of Dyer & Co., hay merchants of Omaha, Nebr., P. P. Murray, is finding his former experience of real benefit in correctly and quickly routing cars from country points on hay shipments to dairymen and other consuming trade. Mr. Murray was assistant manager of the Ohio Traffic Bureau for some time before his present connection with the operating end of business was made. and it is hardly necessary to suggest the first importance of traffic information to hay dealers. Ed. P. Palmer, manager of Dyer & Co.'s Omaha office knew this full well in securing Mr. Murray, thus nicely rounding out his Omaha organization.

Federal Inspection of Hay.

One of the largest shippers of alfalfa hay and seed in New Mexico who are buying brokers and shippers only, or acting agents for distant receivers, and one of the most dependable firms in that country, Lange Brothers, Carlsbad, in a recent communication to this office said:

"We are not at all in harmony with Federal inspection ideas of hay because the inspections are not uniform as a rule and therefore are detrimental to the shippers of hay, causing them great losses. Some farmers have loaded several cars of choice alfalfa for us, all of one quality, yet when these cars were inspected by the Federal Inspector he graded almost every car differently. Hence you can see how the losses are made and why the buyer of hay uses state inspections to shelter himself as to payments. It makes no difference if the inspector has made erroneous and faulty inspection or not, we simply have to take the buyer's claim (based on the certificate) from the price at which we sold the dealer the hay, and which we paid to the farmers. The latter sells for cash when the cars are loaded for destination points. Our own inspections are ignored by the Federal inspectors, who are supposed to be infallible."

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

S. B. Fitzgerald, formerly manager of the hay consignment department of Hogan Bros., Kansas City, is applicant for membership in the Kansas City Hay Dealers' Association. The Hogan Bros.' organization will continue actively engaged in the receiving and shipping of hay.

Only small supplies of alfalfa and other varieties of hay have been marketed from northwestern Missouri. W. L. Anderson, an extensive producer of hay of Gentry County, reported on a visit among the forage trade of Kansas City. Good quality prairie and tame hay are scarce in that territory, but a large amount of excellent alfalfa has been produced and now available for markets. Farmers there are more or less indifferent to disposing of their hay, being inclined to await the late fall and winter period before shipping to market.

Favorable growth of late forage crops and pastures was reported in the weekly weather and crop bulletins issued by states in the territory surrounding Kansas City. Need of rain in some sections was again emphasized. Excerpts from the reports follow: Kansas—"Fine early fall weather prevailed over Kansas until the closing days of the week, with general showers in the northeastern quarter, and some heavy rains in the north-central counties, where they were needed. The southeastern and central counties still are in great of moisture. Cutting of the last cr alfalfa for the season is in progr many places. In the western thir ting forage crops is just getting way." Oklahoma—"Temperatures seasonable and there was no pre tion of any consequence in the no portion, with frequent light m rains in the southern half. Pa are fair to very good in the so portion, but are short and dry an rain badly in most of the northern ties." Missouri—"Pastures and la age crops have improved. The was warm with about the n amount of sunshine and no rain consequence." Nebraska—"Thr and haying still are in progress northern counties with fav weather conditions. The week clear and pleasant."

Economic conditions in the Sou being watched by dealers in hay, to the importance of the Cotton as buyers. In the past week ther a sharp slump in the price of c which is disconcerting to the Sou official report on the production ton in the South also indicated duced production of the staple, the being estimated at 10,696,000 bales ever, improved weather for cot reported, and it is believed tha next figures may be more fav The depressed foreign exchange tion is affecting cotton. Howeve world needs the staple badly, and is a feeling in the hay trade th South will continue a good buy hay. In the horse and mule mar is reported an active buyer of stock, which is significant to th trade. The South, however, will d to maintain its present economic tion in the coming year.

Hay Markets

KANSAS CITY.

Oct. 4.—A strong tone was displa the market for hay in Kansas Cit week. The better quality offerin prairie rose 50c to $1 a ton, and alfal unchanged to $1 a ton higher. T clover mixed and clover were unch with a firm tone in the market. Al

MONTREAL.

3.—The hay crop in this province tern Ontario is a good average in t and fair in quality. The only e is the crop will bulk largely on ay with a small proportion of No. g to timothy being mixed with but for feeding purposes it is con- as good as straight timothy, in ne prefer the mixture of clover and for cattle feed. Some feeders he straight timothy from custom, y for horses.
ting the shipment of hay to the n Northwest, it is believed that will need more. The largest order received was 100 cars. Should pplies be required in that direction. vince, it is said, will be able to hem. Most of the hay in Quebec ed in good condition, and it can ely be baled and shipped. A considerable quantity of loose hay is being carted into the city by nearby farmers, or baled hay would be higher than it is.

The receipts of hay during the last week at Montreal were 6,420 bales, against 15,461 bales for the same week last year.

The market is steady. Farmers are still holding for $20 f. o. b. at country points. Here, No. 2 hay is quoted at $22@23, and shipments are being made from country points on the south shore across the border at $21@22 f. o. b.

The Government's estimate of Canada's hay crop, including alfalfa, for 1919 is 17,699.145 tons, against 15,218,000 tons for 1918. showing an increase of 2,480,445 tons.

This province shows the heaviest production of hay and clover, being 8,091,800 tons against 6,799,900 tons last year, an increase of 1,291,900 tons.

As mentioned previously, England has a short hay crop, but it is feared that the shortage of freight room will prevent Canada filling the deficiency.—Trade Bulletin.

SEATTLE.

Sept. 29.—Eastern Washington timothy, mixed, $36@37; double compressed, $40; alfalfa, $31@32; straw, $15@16; Puget Sound, $31.

SPOKANE.

Sept. 29.—Alfalfa, $34 ton, $32 carload; timothy, $40 ton, $38 carload.

NASHVILLE.

Oct. 6.—Business continues quiet in hay trade. Quotations: No. 1 timothy, in carlots, $35; No. 2 timothy, $34; No. 1 clover, $33; No. 2 clover, $30; alfalfa, $36. Receipts of hay last week were 20 cars.

DES MOINES, IA.

Oct. 4.—Hay markets have been steady and receipts ample to take care of the demand. Upland hay is quoted at $22. Alfalfa quoted at $27. Oat straw, $8 per ton. Wheat straw, $7 per ton.

NEW ORLEANS, LA.

Oct. 4.—The West has consigned considerable hay to our market, more than it could readily absorb, due to limited space and the hardship of handling from team track delivery. No. 1 hay offered at $34, No. 2 at $32, and No. 3 at $30.

OMAHA.

Oct. 3.—On account of light receipts of prairie hay and the demand somewhat improved, the market is some higher on the better grades. Alfalfa remains firm and steady. Oat and wheat straw steady.

Upland prairie—No. 1, $19@21; No. 2, $15@18; No. 3, $12@14. Midland prairie—No. 1, $18@20; No. 2, $15@17. Lowland prairie—No. 1, $14@15; No. 2, $11@12; No. 3, $8@9. Alfalfa—Choice, $30@31; No. 1, $27@29; standard, $25@27; No. 2, $22@24; No. 3, $17@19. Straw—Oat, $9@10; wheat, $8@9.

DETROIT.

Oct. 4.—Buyers are taking hay liberally and keep the supply pretty well cleaned up. Receipts are only fair. There is still trouble in securing cars, but farmers are said to be a little more bullish on hay and not especially anxious to sell at present prices. Receipts from Canada are not large. Quote: No. 1 timothy, $29.50@30; standard and light mixed, $28.50@29; No. 2 timothy, $27.50@28; No. 3 timothy, $23@25; No. 1 mixed, $24@25; No. 1 clover, $24@25 per ton.

DULUTH.

Oct. 4.—Business in hay was about as slow as it was possible to be on this market during the last week. Receipts were just of a straggling nature and demand was lacking from any quarter. Quotations are unchanged as follows. Timothy—No. 1, $25@26; No. 2, $23@24. Mixed timothy—No. 1, $24@25; No. 2, $16@20. Prairie—No. 1, $23@24; No. 2, $21@22; No. 3, $16@18. Midland—No. 1, $18@20; No. 2, $14@16. Straw—Rye, $9@10; oat, $9@10.

MEMPHIS.

Oct. 4.—Dullness continues in hay and prospect is for such to continue for some time yet. The country is buying as little as it can get by with, but for the better grades of timothy and alfalfa, which have been rather scarce, a slight advance has been obtainable where business was done. On call today some No. 2 alfalfa sold at $28, while sample and No. 2 sold at $26.50. For standard $31 was bid and $32 asked, and for No. 1 and No. 2 in mixed cars $31.50 was bid and $32.50 asked. On yesterday standard sold at $31, while No. 1 and standard sold at $32.50. No. 2 clover mixed sold at $27 and No. 1 timothy at $31.50.

BOSTON.

Oct. 4.—The local hay market is slightly firmer on medium and the lower grades, which are cleaning up a little better than last week. There is now less of an oversupply at the various railroad terminals and this helps to strengthen the general situation. The demand for top grades, while in a measure reflecting the better demand for poorer grades, shows but little improvement over last week, but receivers are holding firm in the belief that the bottom of the market has been reached, and show no inclination to make concessions from asking prices. In fact, sales of the best grades have been made above quotation, when the hay was extra nice and wanted by the buyer. No. 1 timothy is held unchanged at $33 per ton for large bales and $31@32 for small bales. No. 2 timothy ranges at $30@31 for large bales and $28@29 for small bales. Extra nice cars might bring possibly 50c to $1 per ton more if wanted by the buyer. No. 1 Eastern is quoted at $28@30, with No. 2 Eastern a shade firmer at $25@27. No. 3 hay is also firmer at $24@26. Clover mixed hay is held $26@28 for all grades with fine hay unchanged at $22@25. Swale hay is held higher at $18@20 per ton. Receipts for the week ending Oct. 4 were: Local, 92 cars.

Rye straw is in moderate demand with the market a shade firmer at $17 per ton as an inside quotation, fancy cars bringing a little more. Oat straw quiet and unchanged. Receipts for the week ending Oct. 4 were: Local, 2 cars.

LOUISVILLE, KY.

Oct. 4.—The hay crop in Kentucky as a whole has been good, and the stocks are good. The South is well stocked and demand just now is a little dull. Offerings are good but buying is light and receipts are only four or five cars daily.

Quotations are: Baled, carlots, timothy, No. 1, $30; No. 2, $28; No. 1 mixed, $28; No. 2, $27; clover, No. 1, $30; No. 2, $27; alfalfa, No. 1, $32; No. 2, $30; wheat and oat straw, $10; rye straw, $12.50.

MILWAUKEE.

Oct. 4.—The Milwaukee hay market is steady and showed no special price changes. The demand from consumers is lacking as pasturage throughout the state is best in years for this period. Receipts have been light but sufficient to supply the current needs. current quotations are: Choice timothy, $28.50@29; No. 1, $27.50@28; No. 2, $26@26.50; No. 1 clover, $22@23; light clover mixed, $25@26; red top and timothy mixed, $25@26; marsh feeding, $14@15; packing, $10.50@11; rye straw, $10@10.50; oat straw, $8@8.50.

PITTSBURGH, PA.

Oct. 4.—The receipts of hay are not excessive at this time and the demand for good timothy hay is fair at firm quotations. Cars are said to be very scarce in some quarters and this is contributing to strength in the local market. Owing to a busy season with the farmers and general lack of interest in the hay market receipts are not expected to show much increase in the immediate future. Prices have not changed since the last issue. Total receipts for the period amounted to 1,332 tons, as compared with 1,063 tons for the same period last year.

CINCINNATI.

Oct. 6.—The past week has exhibited little difference from a week ago in volume of hay business or in the promise of increase. Excepting choice timothy, there was practically no buying of any kind, and liberal concessions in prices for light and heavy mixed clover and local alfalfa were necessary to create a demand. Shipping inquiries were almost entirely absent, and the moderate receipts far exceeded the local consumptive requirements, leaving numerous cars on tracks unsold from day to day, and to some extent increasing the supply in terminals. Country loadings, however, are decreasing, and on present basis of values shipping orders are expected to show some improvement. Holiday conditions, incident to the world's championship baseball games here also caused some interference with trading and an indifference among usual buyers.

During the month of September the members of the Cincinnati Grain and Hay Exchange received 1,078 cars of hay, 248 cars more than during the same month last year, and 529 cars more than during the previous month this year. This is the second time since 1895 that more than 1,000 cars of hay were received in Cincinnati during the month of September. The previous high record for September having been established in 1917, when a large volume of this commodity passed through Cincinnati for shipment overseas. At the close of business Sept. 30, 1919, the total receipts of hay so far this year was within 281 cars of the total for the year of 1918.

Timothy—No. 1, $28@29; standard, $27@28; No. 2, $26@27; No. 3, $22@24; threshed, $12@14. Light clover mixed, $26.50@27.50. Clover mixed—No. 1, $26@26.50; No. 2, $23@25. Clover—No. 1, $28@29; No. 2, $24@27. Sample, grassy, $20@23. No. 1, Western alfalfa, $36@37; No. 1 local alfalfa, $30@32.

BUFFALO.

Oct. 4.—Little business is being done here, dealers holding off at present prices asked in this state and buying in Canada when any is needed as the market there is easy. Quoted: No. 1 timothy, $26@27; No. 2, $24@25; No. 3, $20@21, on track.

BALTIMORE.

Oct. 4.—There is a fair demand for the better grades of timothy and light mixed hay, with no surplus of the better qualities on hand but an ample supply of common, nondescript stuff, on which values are rather irregular.

Straw is selling in a jobbing way only and under these conditions it does not take a great deal of stock to go 'round. We quote: Timothy—No. 1, $31; standard, $30.50@31; No. 2, $30; No. 3, $25@28. Light clover mixed—No. 1, $30; No. 2, $27@28. Clover mixed—No. 1, $28@28.50; No. 2, $25.50@27.50. Clover, nominal — No. 1, $27; No. 2, $25. Straw—No. 1 straight rye, $17@18; No. 1 tangled rye, $14@14.50; No. 1 wheat, $12@13; No. 1 oat, $14@15.

PHILADELPHIA.

Oct. 4.—There is a fair demand for choice hay of which there is very little here and prices for this description rule firm but the bulk of the supply consists of medium and low grades which are dull and weak to sell. Straw is quiet but steadily held.

Timothy hay—No. 1, $32; No. 2, $28@30; No. 3, $24@27. Clover mixed hay—Light mixed, $28@30; No. 1 mixed, $26@27. Straw—No. 1 straight rye, $14.50; No. 2, $12.50@13; No. 1 tangled rye, $13; No. 2, $12@12.50; No. 1 wheat straw, $12.50@13; No. 2, $11.50@12; No. 1 oat straw, $12.50@13; No. 2, $11.50@12.

ST. JOSEPH.

Oct. 4.—The hay market is practically unchanged with a slight advance on choice grades from 50c to $1. Movement on lower grades has been rather slow and draggy. The demand for top grades of hay is still in excess of the supply, and good top grades will bring the top of the market now. Good green alfalfa is in demand. Hay quotations follow: Prairie—Choice, $21@22; No. 1, $18.50@20; No. 2, $17@18; No. 3, $14@16. Midland—No. 1, $14@15; No. 2, $12@13. Alfalfa—Choice, $30@30.50; No. 1, $28.50@29; standard, $26@28; No. 2, $21@25.50; No. 3, $18@20. Timothy—No. 1, $25.50@26; standard, $23@24.50; No. 2, $21@23. Clover light mixed—No. 1, $25@26; No. 2, $20@25.50. Clover—No. 1, $22@24; No. 2, $18@20. Straw, $8@8.50.

FT. WORTH.

Oct. 4.—Hay moved in slightly increased volume over last week, the gain being in Arizona alfalfa. The immense grass and forage crops in Texas are hindering the normal movement of forage. Values are slightly lower than last week. Quotations: No. 1 Arizona alfalfa, ton, $33; Texas alfalfa, $32; No. 1 prairie, Oklahoma, $28; Texas prairie, No. 3, $22@24; Johnson grass, $20. Inspections: Hay, 26 cars.

ST. LOUIS.

Oct. 4.—The receipts of hay at this point for the week were light and, as usual, consisted mostly of common grades of timothy and clover mixed. Demand quiet; prices unchanged.

Timothy hay continues to rule steady on good No. 1 which is in excellent local request. There is also a fair demand for standard. No. 2 and lower grades are rather quiet, as the shipping demand at the moment amounts to practically nothing. General conditions do not warrant any higher prices. All markets are feeling the lack of outside demand.

Light clover mixed hay steady on good No. 1 bright light clover mixed hay but quiet and slow on the lower grades.

Heavy clover mixed hay continues steady on good No. 1 bright heavy clover mixed which is in excellent local request, but dark off grade hay is dull and slow.

Pure clover hay continues to rule steady, scant offerings and good demand for better grades, off grades dull.

Alfalfa hay steady; offerings of alfalfa are moderate in amount and demand right good for the better grades. Indications point to steady prices on good alfalfa, but the medium and off grades are dull. The milling demand shows some improvement in the last week, but buyers are making offers at lower figures.

Prairie hay market steady; fair demand for limited amount of bright green.

Track sales: Timothy—No. 1, $31@33; standard, $28@30; No. 2, $24@27; No. 3, $20@23; threshed timothy, $12@15. Light clover mixed—No. 1, $27@28; No. 2, $23@25. Heavy clover mixed—No. 1, $26@27; No. 2, $21@23. Pure clover hay—No. 1, $31@32; No. 2, $28@30. Alfalfa hay—Choice, $35@36; No. 1, $33@34; standard, $31@32; No. 2, $28@29. Prairie hay—Choice, $25@26; No. 1, $23@24; standard, $21@22; No. 2, $20@21. Straw, $7.50.

CHICAGO.

Oct. 6.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Oct. 4, also the total receipts and shipments of hay from Jan. 1, 1919:

	Oct. 4, 1919.	Sept. 27, 1919.	Oct. 5, 1918.
Total receipts	5,168	5,436	6,686
Total shipments	327	314	885
Rcpts. since Jan. 1.	184,939	179,771	246,923
Shpts. since Jan. 1.	37,800	37,473	70,394

The market as to prices was practically stationary past week, but the better grades were absorbed readily and the trade looks for an improvement in conditions soon, as all indications suggest that little or no hay is being loaded. Quote Monday's list as follows:

Timothy—No. 1, $29@30; standard, $27@28; No. 2, $24@25; No. 3, $22@24; sample, $18@20; threshed, $10@13.

Clover—No. 1 light, $26@27; No. 1 mixed, $24@25; clover, $23@26.

Prairie—Kansas and Oklahoma, $20@24; Iowa, Minnesota and Dakota, $15@24.

Marsh Hay—Feeding, $13@15; packing, $10@12.

Straw—Rye and oat, $10@10.50; wheat, $7@8.

KANSAS CITY.

Kansas City, Oct. 4.—Flour mills in Kansas City established another new production record this week, making 90,900 barrels. While new business was slow, according to several mills, some reported continued pressure of orders, especially for established brands of hard wheat flour. The week's output was mainly in fulfillment of old bookings, which are said to run ahead 30 to 60 days. Declining wheat prices caused many buyers to hold off on new orders. The United States Grain Corporation made no purchases owing to the congested condition of eastern ports resulting from the British railway strike. The mills here obtained cars for flour by using grain cars coming to their plants.

Prices of flour in carlots, sacked in 98-lb. cotton bags, per bbl.:

Hard wheat—	Oct. 4.	Sept. 27.
Short patent	$11.40@11.90	$11.75@12.00
Long patent	11.00@11.70	11.50@11.85
Straight	10.75@11.25	11.00@11.25
1st clear	10.00@10.75	10.00@10.75
2nd clear	8 50@ 9.50	8.50@ 9.50
Low grade	7.00@ 7.50	7.00@ 7.50
Soft wheat—		
Fancy patent	10.70@11.00	10.75@11.00
Standard patent	10.20@10.50	10.20@10.50
Straight	9.60@ 9.90	9.60@10.00
Clear	9.10@ 9.40	9.10@ 9.40
Low grade	6.50@ 7.50	6.50@ 7.00

The *Michigan Weather and Crop Bulletin* says that seeding of winter wheat and rye is well advanced in all counties; early seedings making good growth and looking strong and healthy. Corn cutting and bean pulling are generally finished.

THE HOG MARKET.

drop in hog values during Septem- from the August high spot will go in trade history, says Clay, Robin- & Co., as one of the worst breaks known in the trade. The high spot hicago on Aug. 13, $23.50, and the he past few days, represent a loss ore than $5.30 per cwt. on the best es; and the commentators named . "We wish to remark that we think rade has not as yet seen the low o'

e causes for this slump in prices arious. In the first place, there is opinion; consumers are up in against the high cost of living and overnment agitation and investi- of the packers' methods has d to upset the whole equilibrium e market. Another factor of de- on is the great steel strike, with 0,000 men involved, many of whom ut of work and likely to remain f work for some time. Another is the depreciation of English ontinental exchange. Germany in ular is practically out of the mar- eing unable to operate on that ac- while the pound sterling value, t about $4.60, normally has an ex- e value of $4.81.

uming up the whole situation, Robinson & Co. say: "The pros- are discouraging and do not point y upturn in quotations. We al- will have gains registered on some famine runs, but with seasonable es arriving we look for prices to dily recede. Until the ratification Peace Treaty the settling of labor ities and the solving of the high living, the working out of labor oms, the course of foreign ex- and the export department and market will continue to be an ainty."

pos the advancing sugar prices United States the *Weekly Statis- ugar Trade Journal* shows that tal crop of cane and beet sugar season of 1918-19 is only 16,350,- ns. This is the crop now in con- on. The crop for the previous was 17,332,955 tons and for the eason 1916-17 it was 16,987,975 howing that the crop in present ption is smallest in at least ears, while the distributive area h larger since it now includes ntral countries of the European ent.

RATES ON COARSE GRAIN.

The Commerce Commission has made a tentative report on the petition of the National Council of Farmers' Co-operative Associations vs. Alabama & Vicksburg Railway *et al.* The complaint was that the present basis of rates on coarse grain are unreasonable and prejudicial. The complaint was dismissed by the Commission.

In the report Examiner Money said that if the maximum increase of 6c were applied but once to the through movement of grain from Western producing points to Eastern markets, it would, as reported by the *Traffic World*, "result in through rates being less than the combination of locals to and from the intermediate markets. That the representatives of the grain markets of Omaha and Kansas City asserted that in all probability the establishment of such through rates would induce shippers to bill grain from producing points to ultimate destination and thereby destroy or damage the intermediate grain markets." The examiner further said that under the present practice of handling grain "there is no such thing as a through movement from Western grain fields to Eastern destinations. The grain usually stops at the first primary market and receives the terminal service as well as grading and inspection. Transportation service from that point to the next market is just the same as if the grain were being handled as an independent shipment receiving terminal service at each market. In adopting the rule whereby each factor of the combination rate was increased the railroad witnesses claim there were used the most practical way of distributing the increases authorized by General Order No. 28, placing no undue burden on any particular part of the movement."

CORPORATION WHEAT.

The U. S. Grain Corporation is bringing considerable wheat from the elevators of St. Louis and Kansas City to the houses of Chicago. They are making consignments of Omaha wheat to Manitowoc and have been forced to withhold lake shipments due to the Buffalo congestion.

Kindly say: "I saw your ad in THE PRICE CURRENT-GRAIN REPORTER."

Exports of Wheat and Flour.

Exports of wheat and flour in July and August as reported by the Department of Commerce and the loadings of wheat and flour from September 14th to 19th amount to 35,597,000 bushels of wheat and 3,701,000 barrels of flour, making a total equal to 52,250,000 bushels, compared with 32,353,000 bushels of wheat, and 4,479,000 barrels of flour, last year, September figures being prorated to September 19th, making a total equal to 52,580,000 bushels. Last year's official figures are supplemented by the army and Red Cross shipments.

Movement of Oats.

Live Stock Markets

CHICAGO PROVISION REVIEW.

CHICAGO, Oct. 6.—Trading in lard was the most interesting in the provision market last week. Prices on all speculative articles covered a good and lower range and closing sales were at net losses of 35c@$2.50 on pork, and 57½@$1.02 on ribs, while lard was up 10@42½c.

A liberal selling pressure was on at times and on the weak spots the market ran into supporting orders. There were periods when the action of the market was contrary to that of hogs, as it appeared oversold and there was not enough selling pressure under such conditions to keep values down. For instance, on Friday, the price for cured product moved up more in proportion than did hogs, as shorts were covering. Buying of October lard was active at times and offerings not large. From the way it was taken it created a belief among close observers that export business with Germany was on and some business was said to have been done, but the low rates for exchange necessitates sellers getting a good price for their product to enable them to secure a profit.

Stocks of lard at Western packing points Oct. 1 were 39,671,692 lbs., a decrease of 5,400,884 lbs. last month and compared with a loss of 2,309,966 lbs. last year, when the stocks were 52,458,295 lbs.; two years ago they were 58,448,309 lbs.

Interest in meats and pork was light and prices were changed more in sympathy with lard than on any other factor. Action of the corn market was a factor occasionally. The cash demand for all meats is limited. The South is not buying, being supplied for the greater part by consignments by packers. The cotton condition is low, 54.4, and the cotton crop small, which is against a bull movement in meats. Cancellation of export orders for shipment to England was announced early in the week and had some effect in creating weakness in the general market and depressing prices to some extent.

Stocks of meats at western points are lower, as will be seen in a statement elsewhere. Packers are selling against the output of the houses as there is not trade enough with export and domestic order, combined to absorb the offerings that are being created by the manufacture of product. Hog supplies are ample and quality of hogs the best at this time in years. For the present the make of lard is liberal and fat backs are being tanked in fair quantities as there is little call for them, for the past two years they have been in active request.

Kansas City Provision Review.

KANSAS CITY, Oct. 4.—Buying of provision products in Kansas City was of fair to light volume this week, having been restricted by unusually warm temperatures for this period of the year. Prices showed a recession of ¼c to 1c a lb. during the week, reflecting the break in the market for live hogs. Southern demand improved considerably, but this was offset to a large extent by the reduced buying of fresh cuts in the East and a lighter local demand. Fresh pork loins maintained a firm tone until late in the week, closing about ½c off. Dry salt and heavy smoked meats were unchanged to ¾c down. Lard was off ½c and substitutes followed a similar course. Fancy hams and bacon were in fair demand.

Total stocks of provision products in Kansas City amounted to 53,930,100 lbs. on Oct. 1, showing a decrease for the month of 9,484,000 lbs. A year ago stocks amounted to 44,868,200 lbs.

Total products.	16,061,000	17,428,150	15,120,900

Farmers to Cut Production.

Illinois dealer, writes C. A. King & Co.: "The farmer for years worked from daylight till dark and never took into consideration the hours of workers in the cities. When the demand came for reduced prices on farm products and shorter hours and more pay for workers, this increasing the farmer's cost of living, he concluded to get into the game himself. The hired help on the farm have cut the time to ten hours and the farmer realizes that decreased production means higher prices with less cost of handling. This is going to make a great shortage of food within a few years."

For quick returns use our Market Place Department, Page 5, for wants and sale announcements.

Hog Slaughterings.

Special reports to THE PRICE CURRENT-GRAIN REPORTER show the number of hogs packed since March 1, 1919, at undermentioned places, compared with previous year:

	To Oct. 4, 1919.	To Oct. 5, 1918.

Cash Meats.

Trading in hog products Monday was of moderate volume, but there was a very noticeable improvement in the tone of the market, influenced by the strength in grain as well as the favorable outcome of the strike in Great Britain, which will help the export situation. Lard trading was the most active, that of mess pork and ribs being comparatively light. Quotations as of Oct. 6, follow:

CHICAGO LIVESTOCK.

CHICAGO, Oct. 6.—Hogs sold the l last week than at any time since 1917. The highest price was on day being $17.75 and was reduced $1. The top on Saturday was $16.8 the average $15.55, compared $16.55 a week ago, and $18.50 last For the week the average was $ against $17.00 the previous week $18.95 last year. Quality was goo the average for the week was 24 against 257 lbs. the previous wee 230 lbs. last year. Receipts were tamed by the drop in prices and c a rally at the last. That there ar ished hogs in the country is show the good quality of the arrivals th few weeks. Toward the last good ing hogs sold at $14 to $14.50.

Cattle sold to better advantag week the top on yearlings being while heavy bullocks reached $18. best in some time. Prices hav vanced $1 to $2 from the recent a feature of the trade being the de for choice finished steers, which weeks ago were neglected. Light rivals at all markets and a bett mand made a good market all and the close showed gains of 25c advance for the week, choice steers making the best gains. T erage price for beef steers for the was $16.00 against $15.60 the pr week and $15.00 last year. Cow heifers made a fair advance with of the intermediate grades doing most of the cows selling at $7.50 Bulls gained 25c for the best better trade all week and the m had a good clean-up.

Range cattle were in good with arrivals of 21,500 received fo days, an increase of 5,000 over the period last week, the bulk of the ness being during that period. feeders reached $13 as the top packers took most of the stock above $12. Most of the good grass sold at $12 to $14.50. Feeders too freely from $12 down to $7.50. ranged at $18.50 to $21.

Sheep and lambs sold to bett vantage, the top on sheep being $ average $8.10, against $8.20 the pr week and $11.00 last year. Cho ewes sold at $8 as the top with sales at $7 to $7.50. Medium fat w touched $9 and fat yearlings ave close to 100 lbs. sold up $11.35. advanced 25c or more and the t $16.50. Average for the week was against $14.50 the previous wee $15.25 last year. Feeder lambs w 75c to $1.00 with fancy $1.25 t higher than the inside of the pr week.

Kansas City Live Stock Mar

Kansas City, Oct. 4.—A further s hogs, irregularity in cattle and an in sheep made this an interesting the trade in live stock in Kansa There were larger receipts of cat hogs, and the arrivals of sheep de sharply.

One of the interesting developm this territory which was felt to a d the market was the inauguratio movement to withhold cattle fr market and to ship only gradually sans are behind this movement, b not being given serious considerati market influence. The movement tle is restricted by the lack of cars. stockmen are holding back in the limiting the heavy losses which them on their grass cattle.

Prices in the hog market decline $1.25, with the top at the close $1 lowest in more than a year. The a lack of shipping demand, and it w the embargo on exports due to the strike was affecting buying. Pigs smaller demand, and closed with a $16. Bearishness still prevails in market. There is some nervousne the effect of the steel strike on t chasing power of consumers.

As expected, cattle trade develop action after last week's upturns. fed cattle, which were scarce. steady, but other grades were 25c lower. Veal calves held steady a of $18. Stockers and feeders were as 50 to 75 cents lower and gras

to 50 cents, with the top on cows op on corn-fed steers was $18. A Nebraska shipment sold at this price. steers sold largely at $9 to $12, with icest grades up to $14. Iowa and were the best buyers of stockers eders, the Southwest continuing to little interest in this branch of the

ers bid sheep up on a sharp drop in vement, and lambs sold up to $16, $14.75 the preceding week. Large re expected, however. There are oldings in cornfields in the big corn and it is probable that receipts will al the remainder of the year. The as a whole was 25 cents up on as much as $1.25 higher on lambs.

Oklahoma Live Stock Market.

Arnelda Haehnke, Correspondent.

Oklahoma City, Oct. 4.—While Northern were generously patronized, the here was moderate and prices steady the first part of the week. were as many steers here Monday received for three days last week. ago receipts for Monday and Tuesday as large as the entire run of the elve days. The market nevertheless been in excellent shape, everything early each day. No small of steers have arrived and they ady to 15c higher. Several loads ng around 1,150 lbs. sold at $10.50. 0 lbs. at $10. Fair to good light averaging 950 lbs., went at $9.25@ mmon to fair grade light weights $8.50@9.

's were eager for the butcher trade and paid 10@15c advance. Butcher lesmen had a good time with their es, it being easier to get $8@8.25 hing in thick weighty cows than in weeks, while $7@7.75 was the r medium killers. For the week d heifers showed a marked ad- ully 25c higher with the best showing an advance of 50c. Canners ers are strong for the week and e can be applied to bulls. We a very active market on calves, eing on an average 25c higher, them have been going at $14, with ld head as high as $15.

has been quite a demand for the assortment of stock cattle and ave been paying steady prices on several loads of well bred white arlings sold at $8.25@8.50. Stock e steady for the week.

nday the better class of hogs sold t times some detected a weak 10c nd on plainer grades. Tuesday cline was the average here, top $.50. Hogs were called $1 lower for caused by the reaction of the rket. Bulk average, however, is ere than some of the Northern

Louis National Stock Yards.

L. Wyatt, Correspondent.

National Stock Yards, Ill., Oct. 4.—The supply, while still moderate and subor this season of the year, is in- and shows a slight gain over . Trading during the entire week y uneven. Prices on good cattle steady and indeed a strong basis. or the week was made on years which brought $17.25, the best ers we had brought $15.65. On m and common grades of cattle et closes 50c to 75c lower than of last week. On the commonest was a mean, draggy affair during week. In butcher cattle the ies sold well but on all other e market was unevenly lower, in much as $1.50. Vealers still hold basis. At one time during the y sold up to $20.25 but are per- lower than this at the week's

market tumbled again this week tent of $1@1.25. The quality of gs is about the same as it has he past several months, it cannot better than fair. At this writing ne in the market seems to be far as prices are concerned but slow and draggy. The week's otations are: Mixed and butchers, good heavys, $16.25@16.45; 3.25@15.75; light, $15.90@16.75; 15.50; bulk, $16.10@16.60.

ep and lamb market is about the week. The run for the most sts of lambs but there are very choice ones available whereby e exact strength of the market. r the week was $15.25, but strictmbs would be worth at least 25c

Omaha Live Stock Market.

J. H. McCulloch, Correspondent.

Oct. 4.—The general condition of ade this week was the healthiest ne. Demand was strong throughi killing supplies were moderate, beef closes 50c@$1 above a with grass steers anywhere from up. Best heavy cornfeds are 6.50@17.50, with yearlings on up upturn was greatest on warmed g around $12@15. It was the asses of westerns that showed ain. The week's top was $13.25. cattle are nominally quoted on with the bulk of the good to rs bringing $11@12.50, and fair ds mainly at $9@10.75. Butcher ed out lower Monday, but by he slump was mode than reces closing 50@75c higher than Monday, or 25@50c above last week's close. Prime heavy cows sold up to $10@11, good to choice brought $8@9.50, fair to good $6.50@7.75, canners and cutters $5@6.50. Heavy cows of all classes had the best outlet, and advanced most. Bologna bulls at $6@6.75 are 50c higher, and heavy calves are some higher for the week, with light veals steady. The week's receipts are 51,247 head, the smallest since five weeks ago. While liberal runs are still coming, the heaviest weeks of the season are past. There was an upturn of 25@50c on stockers and feeders the opening days of the week, but demand slacked off from midweek on, and by the close the upturn had all been lost, the market winding up no better than steady with a week ago. Prime heavy feeders sell up to $12 and better, good to choice $10@11.75, and best stockers $10@11.

On a very moderate week's run, hog values suffered fresh declines. Thursday, when values dropped nearly 50c, was the only bad break, but in spite of a slight reaction on the close, values are 50@75c lower than on last Saturday. Quality of the offerings continues to improve, but receipts show no inclination to broaden, this week's total being only 25,626 head. Bulk of sales today was made at $15.25@15.60, with a top of $16.25.

This week's sheep and lamb receipts were the lightest since July, only 119,722 head showing up. The belated buying on the range by Colorado feeders promises to cut receipts for the rest of the season materially. Course of the market was, as would be expected on such a diminished supply, sharply higher. Both fat and feeding lambs advanced $1 during the week, good to choice killers closing at $15.25@15.75, while on the finish $11.50@13 was buying medium to best feeders. Old sheep showed nearly as much upturn as lambs, scoring a gain of 75c@$1. Supplies are very moderate. Yearlings are selling at $9.50@10.25, aged wethers at $8.50@9.25, and fair to best killing ewes at $6@7.25.

Fort Worth Live Stock Market.

T. O. Walker, Correspondent.

Fort Worth, Oct. 4.—The trend of the steer market has been upward, the gain in beeves amounting to 50c. Best fed steers and choice grassers have sold at $11. The general average has been between $8.50 and $10. Very few fed steers are coming, and the average shipments have been of a medium class of grassers. No steers are coming from south Texas. Calves of a good class have been the only shipments from southern Texas, Oklahoma and west Texas contributing the bulk of the supply of all classes.

Cows in the butcher class have gained from 50c to 75c, bulls remained steady as a rule, with butcher bulls showing strength.

Stocker stuff has increased in value along with beef and butcher cattle.

Calves have been on the decline every day, until the recession has reached $1.50 to $2. Choice veals show less decline than the common sort of calves. Discrimination is also shown in the case of overly heavy calves. At the close, vealers were making $12.50, against $14.25 a week ago.

The hog trade followed the course of the Western markets by declining $1.40 for the first four days of the week. The week's close showed that a dime had been added to the list value in the Friday trading. Top hogs at the close, $16.10, bulk $15.25@16. Pigs have lost $1.50 to $1.75 for the week, choice shipping pigs for feeders selling at $14.75 at the close.

Sheep show a slight gain for the week in spring lambs, and wethers and yearlings for slaughter. The bulk of sheep and goat arrivals is of a stocker sort. Breeding ewes are quoted at $12@13, stocker lambs at $10@12, and goats from $5@6.50. Breeding ewes are moving in considerable number from the Denver and Kansas City markets to restock the ranges in southwestern Texas.

Denver Cattle Market.

Denver, Oct. 3.—Receipts of cattle this week were lighter, if anything, than last; general market sharply higher. All classes of steers 25c to 40c higher except common trashy kinds. Butcher market 25c to 50c higher and very active except on canners and bulls, and they, like little common steers, are barely steady. Eastern markets show some improvement and our big home demand for beet top and pulp feeding is beginning to show marked activity. A continued good market is predicted. Range: Feeders, $5.75@10.25; killers, $6.50@8.50, with $12.50 for choice; stockers, $6.40@8.85, all according to quality.

The scramble for the location of the state-owned elevators and flour mills is still going on in North Dakota and East Grand Forks is the latest bidder for the flour mill and elevator, because it is stated the citizens realize the benefits that would be reaped by their city should the location be made there. One would suppose that if East Grand Forks were a desirable location for an elevator and flour mill such as the citizens describe it to be both institutions would have long since been in operation there through private initiative.

Vienna on Sept. 30 reported flour supplies in that city sufficient for only two weeks.

Movement of Hogs.

Weekly receipts and shipments of hogs at western centers the week of Oct. 4, and totals with comparisons for corresponding time last year compiled by THE PRICE CURRENT-GRAIN REPORTER:

THE RECORDS of the Flour Mill and Grain Elevator Mutual Insurance Companies

show that 80 per cent of all fires in Mills or Elevators start in elevators. The installation of an automatic feeding device which will positively prevent an elevator choking from overfeeding and an automatic relief which will prevent an elevator choking from bin getting full or spout choking, will annually save millions of dollars in fire loss and add at least 50 per cent to efficiency of any stand of grain elevators. These devices are perfected and are available for mill and elevator owners, are very inexpensive and absolutely practical. Full particulars will be furnished, free of charge by this office, on request.

All Millers and Grain Dealers Need Non-Rusting Metal Baskets

INDESTRUCTIBLE

These baskets are made very strong—with stout rope handles that fit the hands. They are made of galvanized steel with double bottoms riveted on that slide smoothly. They outwear any other basket made. Hold grain, dust, hot ashes, etc. Every miller should have them.

CONE-SHAPE GRINDERS

WAYS to GRIND ALL GRAINS

Come to the Grinders. They do the work! Bowsher's Cone-Shape Grinders are the correct principle of Burr Mill construction. They have larger grinding surface and nearer center of Shaft; thus More Capacity, Lighter Draft, Longer Life.

"Desire to express my appreciation of your long-lasting, trouble-proof grinder. Have used a No. 4 ten years and less than One Dollar per year for repairs." *E. W. Watt, Jacobsburg, O.*

Made in sizes; 2 to 25 H. P. Write for free catalogue.

TRADE MENTION.

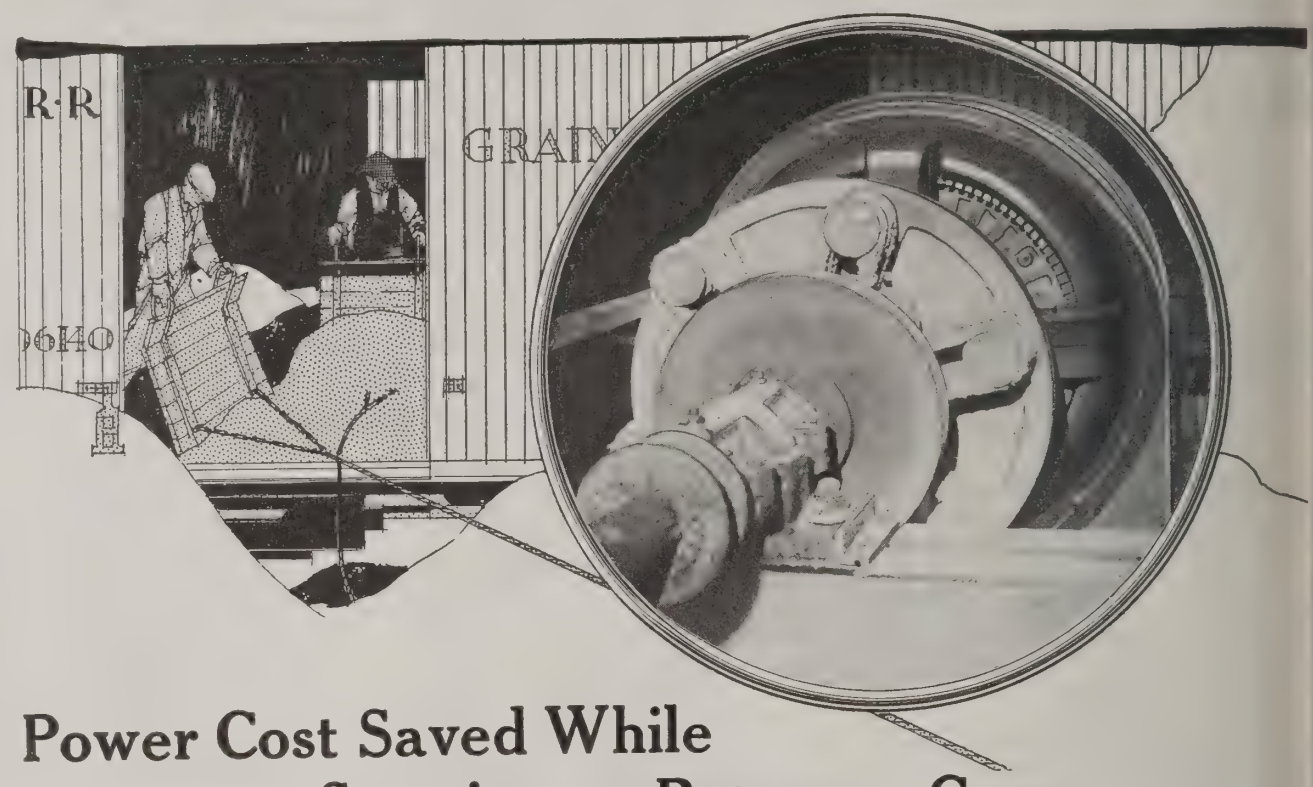
H. W. Caldwell & Son Co., engineers, founders and machinists, specializing in conveying, elevating and power transmitting machinery, are compiling a new general catalogue for distribution about the first of the year.

E. O. Moffatt of Kansas City recently returned from New York. His son, Donald Moffatt, is now putting in full time with the firm, the Moffatt Grain Co., doubtless to continue for decades to come the 30 years' experience of the company as specialists in milo maize and kafir corn.

C. F. Adams is a new feed, flour and grain broker, 102 New England Bldg., Kansas City, Mo. He has been in the game for 14 years; was recently identified with the Lowe Adams Grain Co., Wichita, Kans. The present style of his firm, Adams Brokerage Co., explains itself. There is plenty of room for a live, up-to-date, strictly brokerage house in Kansas City trade circles; and knowing Mr. Adams' ability along such lines, we suggest inquiries from those requiring such service be sent his way, as he has the natural intention of building up his new business along proper lines and to hold trade through good service.

New Gruendler Installations.

The Gruendler Patent Crusher & Pulverizer Co., of St. Louis, was recently awarded contract for the installation of a Screening and Bran Grinder for the new plant of the Joe Daniels Milling Co., of Little Rock, Ark. This plant will be in operation shortly, being under construction now. The Gruendler Co. has also lately installed additional motor-driven screening machines in the Weinmann Milling Co.'s plant, of Little Rock, and similar equipment for the Steger Milling Co., of Bonham, Tex., the Royal Mill & Feed Co., of Memphis, Tenn., and the Acme-Jones Milling Co., of Louisville, Ky.



BROOM CORN.

Field activity is confined mainly to southern and central Oklahoma sections, says *The Broom Corn Review*, although buyers are extending their activity to northwest Oklahoma and southwest Kansas. The Lindsay district thus far has been the most active district, deliveries on street markets have declined to light offerings with buyers taking all offerings and driving. Prices remain firm, ranging usually from $125 to $250, with the general quality not up to earlier offerings and buyers willing to pay around $300 for first grade corn. In the dwarf areas prices run usually from $125 to $200, with poor grade bought as low as $100. However, the amount of $100 corn available is light. Up to $225 is paid for some of the best dwarf crops.

The Wichita market is firm, with the big end of corn changing hands has ranged from $140 to $170, with sales of better grade corn at $175 to $250. Several cars of better Lindsay at $275 to $300 with one car of choice Lindsay were bought by a manufacturer at a shade above $325. Some few cars of cheap stuff have been turned around $115 to $125, being either old Western or stained Texas.

In the central Illinois markets prices remain on the same level, ruling from $300 to $350 on the new crop.

Most of the flour in this country comes from G-E Motor-driven Mills.

Power Cost Saved While Spotting or Between Cars

WITH direct-connected G-E Motors driving your car grain shovels, all power cost ceases except when shovels are actually in use.

While cars are being spotted and doors opened, while planking is being removed, and between cars, the motor can be shut down by a convenient push button.

The type of motor used has no electrical connections between its rotating and stationary parts and so cannot cause a spark, while an enclosing frame makes it rat-proof.

Leading elevators throughout this country are greatly reducing their costs per barrel by using G-E Motors which have operated for many years with practically no upkeep cost.

General Electric Company

General Office Schenectady, N.Y.

COPIES OF BURLINGTON TARIFFS No. 5400A and No. 5600A wanted. Will pay liberally for copies. Address F. W. ELDER, Hastings, Nebr.

INTERNATIONAL GRAIN AND HAY SHOW.

Plans for the International Grain and Hay Show, which will be held in connection with the International Live Stock Exposition on Nov. 29 to Dec. 6, were definitely outlined at a meeting called by Prof. G. I. Christie, superintendent of the International show, on Oct. 9, at the Saddle and Sirloin Club, of representatives of all Middle Western States, with the committee of the Chicago Board of Trade having in charge this Show and the distribution of the $10,000 in cash premiums offered by the Board of Trade and the management of the Live Stock Exposition. It is through the generosity of the Chicago Board of Trade in appropriating this $10,000 to be offered in cash premiums, that the holding of this show has been made possible.

At this meeting the following representatives attended: W. E. Hanger, College of Agriculture, Columbus, Ohio; A. T. Wiancke, Purdue University, LaFayette, Ind.; G. I. Christie, Purdue University and Indiana Corn Growers' Ass'n; W. Q. Fitch, Purdue University, LaFayette, Ind.; E. M. McDonnel, University of Missouri, Columbia; W. R. Heckler, Iowa State College, Ames; D. O. Thompson, Illinois Farmers' Federation, Chicago; J. C. Hackleman, University of Illinois, Urbana; W. E. Holben, Corn Growers' Ass'n, Edinburg, Ill.; W. L. Burlison, professor of farm crops, Illinois University, Urbana; S. C. Salmon, Kansas Agricultural College, Manhattan; A. D. Headoke, College of Agriculture, St. Paul, Minn.; W. W. Burr, University of Nebraska, Lincoln; R. A. Moore, University of Wisconsin, Madison; J. W. Nickolson, College of Agriculture, East Lansing, Mich.

Assurance was given by these gentlemen that the people are interested in this great exposition and that a large number of exhibits of wheat, oats, corn, barley, rye and hay may be expected. Arrangements were completed for a feature exhibit showing a model farm of 160 acres properly arranged with growing crops and live stock, which will show the desirable location and arrangement of farm buildings, fences, etc.

The management will also arrange for other attractive educational feature exhibits. The following states will place educational exhibits at this exposition: Michigan, Iowa, Nebraska, Oklahoma, Wisconsin, Illinois, Kansas, South Dakota, Minnesota, Indiana, Kentucky.

The United States Government will place a mammoth exhibit as will also the Canadian Seed Growers' Ass'n. It was also decided at this meeting to make an additional class for single ears of corn. Prizes will be offered in each of the six regions for the best ear of corn, and a handsome trophy will be awarded for the grand sweepstakes ear of the entire show. The management has also planned to secure trophies to be awarded for the best sample of corn, the best wheat and the best sample of hay.

Announcement was made that a meeting of all representatives of grain growing, crop improvement and corn growers' associations will be held in connection with the exposition on Tuesday, Dec. 2.

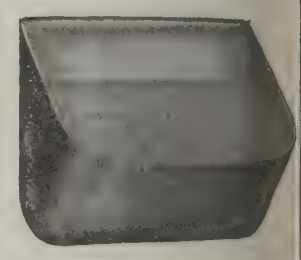
"See How Simply It's Built"

The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.



Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

MILLING WHEAT AT ITS SOURCE

A strict eye on the tailings and bran is the food program of the Nu-Way Mill. It occupies very small floor space; Uses minimum of power; Inexpensive to buy and to operate.

The Simplest, Most Practical, Most Economical Flour Mill on the Market

Cape Mill Manufacturing Company
10 S. Frederick St. CAPE GIRARDEAU, MO.

Work! Work! Work!

That's the motto of "Handy Andy." Never gets tired. Never strikes. Never lets up until you say so.

"Handy Andy," the practical, portable, adjustable elevator, is the strong armed workman that lifts and conveys bags, boxes, bales and other packages without a complaint. Loads cars, loads wagons.

Light in weight. Sturdy in construction. Simple to operate. Saves money.

There is another model of "Handy Andy" for handling material in bulk.

Send for particulars.

...SINESS AND TRADE CONDITIONS

...E failure of the steel strike has awakened the ...ope that the post-war labor crisis has reached ...s climax; but it is not impossible that, as ...t Hooker once said, "Hope beginneth here ... trembling expectation of things far removed ...yet but only heard of." There has been little ... far about the philosophy of strikes—what ...ally mean. The proximate cause is, of course, ...he case of the steel strike as an example, the ...n of the immediate leaders—in this case, ...ick and Foster, and the reluctantly consent- ... now willing Gompers—to make good, as a ...y condition of their own personal future ...s; but back of all is the fact, which labor ...naturally minimize or wholly ignore, that the ...l progress, the higher standard of living, the ...rban surroundings and working conditions ...ch directly workmen pay nothing, have not ...d content but discontent. This has always ...ue and it ever will be true until all men ...e point where satisfaction becomes satiety. ...hose long gone days, prior to August 1, 1914, ...sfaction of wants came by slower degrees; ...he ferment of discontent also came more ...nd less universally to a point of ebulition. ... war brought to all classes of workmen a ...wage such as they had never before dreamed ...with it still greater discontent and extrava- ... desire. Their purely artificial wants have ...ated faster than they have gotten the means ...y them, and the lack of wholesome discipline ...t in the strike, which is only the expression ...ire to have and enjoy that which is imme- ...beyond reach. When the individual strikes ...t harm is done; when a whole industry ...or many industries strike in unison and by ...at, great harm is done, not because striking ...he worker's natural weapon, but because it ...omes "an attempt to move the whole indus- ...anization in which all the parts are inter- ...t and intersupporting." It is like attempt- ...ove a great building without first putting ...upports under the structure itself. It is for ...on that at a time like this the community ...ght to interfere as a condition of its exist-

...t this time the labor world, the majority of ...spaper writers, politicians, lecturers, con- ...l, and to a large degree the Administration ... moreover obsessed of a dogma of wages, the ... on that wages can be raised if the prices of ... be raised, and that there is no practical ... this process; beyond which is the special ...f the labor leaders that production is for ... benefit of "profiteers and exploiters," and ... a detriment to the workman himself, who is ...l of only as a producer, never as a con- ...lthough the real fact is that every man's ...as a consumer is greater than his interest as ...er. In fact, the fundamental defect of most ...economic thought is that it fails to recognize ...mer as the first consideration, that consump- ...e aim and end of all production. The under- ...umption everywhere, as Hobson has pointed ...he question, "How will this or that policy ...e quantity of wealth, rents, profits, interest, ... Never is the question put, How will the ...f wealth produced affect the personal en- ... the physical well-being, the moral elevation ...dation of the race, all of whom are con-sumers? Except for the thought of adjusting supply to demand, to yield profits, the economists, sellers, laborer-producers, manufacturers, have not cared a whoop about consumption from the standpoint of human welfare. The producer's interest lies in scarcity; that of the consumer in abundance, but no extravagance of this latter desire can run counter to the universal interest and universal well-being.

Preliminary to the opening of the National Industrial Conference at Washington last week, the Council of National Defense, the five secretaries, realizing this truth perhaps in some slight measure, issued a manifesto embodying the results of their investigations into the H. C. L. It was impressive; not because it embodies anything that has not been long familiar but because it is the first time the Administration has officially expressed its recognition of these fundamental facts, towit, that production has declined while consumption has increased. Therefore the remedy is, "To produce more goods and to produce them in proportion to the needs of the people." The rest of the manifesto, about profiteering, hoarding, etc., is political froth. Given ample production, distribution will take care of itself. Scarcity cannot stand in the face of abundance, much less can purely artificial scarcity.

The Conference has hardly gotten started as yet. It spent the week making its rules of procedure, and a long "siege of it" is clearly anticipated. The delegates are divided into groups representing "Labor," "Capital" and "The Public," a division which S. C. Barrett of Georgia said left the farmer without any representation at all! It is significant of the Administration's way, that of the five delegates appointed to represent "The Public," two are confessed Socialists, though outside of the Intercollegiate Socialistic Society (whatever may be the exact title), no one would conceive that two-fifths of "the public" are Socialists, even of the long-haired dilettante type though they make much disorder, who are yet like the flowers of the field in that they "toil not neither do they spin." Mr. Gompers tried to commit the Conference to the closed shop by asking that it call on Mr. Gary to arbitrate the steel strike, which brought forth a protest from the Illinois Manufacturers' Ass'n, while "Capital" has laid down "twelve principles" which include opposition to the closed shop, to collective bargaining and to the sympathetic strike, etc.

The outcome of the work of the Conference is not very promising as the Presidential panacea for the industrial chaos which the rabid labor agitator is forcing upon the country or to lubricate and finally remove that friction which in all ages has existed between employers and employes, and which perhaps never can be wholly removed. The sole point at issue now, as in all ages past, is degree of satisfaction that shall come to each man with the allocations of men in life and with life's allotments. It may not be true now but heretofore it always has been true that the studied disposition of these inevitabilities by human agencies can not override what seems to have been Nature's own plan: that the betterments that men enjoy are those that come from men's own efforts; and because of that fact human society works to its higher levels by evolution and not by revolution. So long as there is industry and efficiency and thrift, man will be able to enjoy his span of life through the reasonable satisfaction of rational or even extravagant wants; so long as there is idleness and laziness, sin and thoughtlessness, thriftlessness and inefficiency, there will be want, suffering and moral degradation. Of all of these the world has never had lack, nor ever will. What the Conference may do, if it does well, is to put the loud pedal on the necessity of a moral and industrious life—on good living and clean thinking.

There is another fundamental of social and industrial stability which has been threatened during the past weeks and is still held over the common people: the coal miners' and railroad men's attitude toward private property. Both demand that the properties be taken from their owners and substantially turned over to them—the miners, as part consideration of continuance of their working after November 1 next.

During the past week what are called "negotiations" have been in progress respecting the bituminous coal miners' demands. The situation is the more complicated because the meddling of the Government with the labor situation during the war has naturally given the miners an overweening idea of the relations of the Government to the industry as a whole, which is indeed a private one over which the Government, strictly speaking, can have and should have no control whatever. During the war, however, the Government arranged the trade agreement against which the miners now are threatening to strike, although it was to run until March 31, 1920, unless the war ended sooner. Under that agreement the miners received an increase of 50 per cent, and the price of coal was fixed by the Government at an advance which the operators accepted. Now the miners want another 60 per cent increase, time reduced to five working days of six hours each, and so reducing both domestic and export supplies and raising the price. This Government's promises did not then go the length of Mr. Chamberlain of the Lloyd George government in England, of pledging the nationalization of the mines after the war; but the fact that it intervened in the dispute, "for war purposes," and fixed the price of both wages and coal, undoubtedly gave color to the miners' belief that the Government has in fact power to grant their demand that private property shall be taken from its owners and turned over to the workers therein simply because they so demand.

The week in trade was promising enough, in view of the failure of the steel strike and the return of the men to earning wages again; but in the East a senseless, unexpected and defenseless longshoremen's strike, gone into in the face of agreement not to do so, has tied up shipping of all kinds and in New York threatened the food supply of the city. When the men come back to their sober senses again and kick into limbo most of their leaders and take a new start in self-defense that has reason behind it, trade will go on with a snap. But until employers can place some dependence on the men's word, so that they have assurance that they can enter into contracts, all business must poke along as well as it can in such uncertainty. Even as *Dun's Review* says, "with the general price level, as measured by Dun's Index Number, comparatively little below the extreme high point of the summer, consumptive buying continues of noteworthy proportions, in some cases surpassing all precedent, and the chief complaint in distributing channels is still of inability to fully meet current requirements."

THE effect on American corn prices of Argentine corn is not that Argentine corn comes here in appreciable quantities, but because it may be exported in sufficient quantities to Europe to affect the price

of our corn in that market. Few of our farmers and tariff mongers seem to realize the true state of the case; otherwise it would be understood that putting a tariff on Argentine corn imports to help the American price by keeping Argentine corn out of this country would be about as effective as reviling the moon for changing its phases.

DES MOINES A GRAIN MARKET

THIS is neither a new nor a novel statement. Des Moines has been a grain market for lo, these many years. A score of years ago the Des Moines market furnished a president for the National Association and for many years has given an important member to the Advisory Committee of the same body. Des Moines is in fact old in the game—knows it well and is well known.

But until a few months ago Des Moines dealers were playing the game each one for himself. The game was squarely played; but by a sort of spontaneous conviction, members of the trade all felt that it could be played better and there would be more of it if the market were organized along lines of the other interior exchange markets which are becoming so potential a factor in the trade throughout the country. And so the market was organized and all the machinery of an exchange market set up -official inspection and grades and weights established and the membership placed under the discipline which every exchange contemplates and provides for the benefit of the trade itself and that of the public whom the trade serves.

The effect has been most satisfactory. The business of the market has increased about fifty cars a day in as many days. The shipping trade has welcomed the new order of things and is pleased with it. To hundreds of shippers a dependable nearby terminal has been created, and they like it—they're satisfied that the new arrangement is a benefit. So the Des Moines trade is growing in favor with both shippers and buyers.

DUST EXPLOSIONS

FROM a strictly scientific point of view the "dust explosion" may still call for the examination and classification ordered by the Grain Corporation, just as there may be some scientific value gained by putting an intelligent and educated man on the North Pole or the top of Mt. Everest. It has been stated that a part of the aftermath of the explosion at Kansas City will be a judicial determination of the question, Did fire cause the explosion or did the explosion cause fire?

For the practical man, however, who is operating a grain elevator, further investigations along the lines suggested can have but an academic interest. It has been established fairly well that dust in grain elevators, mills, etc., will explode, conditions being suitable. Both the Port Colborne and the Murray grain elevators were dirty and dusty; that is to say, they were not provided with dust collecting systems which would or did remove the dust as it was released from running grain or grain being cleaned. Just what proportion of such dust to air must obtain in order to cause an explosion in response to a spark of fire may interest the scientist, but the elevator man is up against the fact that some mixture of air and dust, whatever their respective proportions, will explode in response to the introduction of a spark of fire into the mixture. And as long as there is machinery in operation a frictional spark is possible at any time and electric sparks from motors are too common to individually recall. The construction of both houses named above shows that no form of construction is strong enough to resist a possible explosion of dust.

Be clean to be safe; there is no other way.

A VALUED reader and occasional correspondent residing in northern Kentucky writes that in former years, when still active in the grain trade, he was for 30 years a regular crop correspondent for the agricultural departments of the state and Nation. He says, however, that he found it most difficult to get accurate reports from large farmers who always reported to him as they conceived their reports would favorably affect their own interests; hence he preferred reports made by the farm hand, the tenant and the small farmer. From their statements he would make his estimate which was sent to the departments. The method was no doubt sound. The law of averages is the key to accuracy where many reports must form the basis of a single statement.

PRESIDENT GOODRICH'S ADDRESS

WHILE the publication of the proceedings of the St. Louis convention is delayed, as a matter of convenience, to secure for it more careful editing than could be given it for the present number, the trade interest in President Goodrich's views as to trade contact with the great problems of reconstruction will justify the advance publication of the major part of his annual address, found on another page. One can but congratulate the trade on his breadth of view, in that he conceives it to be a part of his duty to point out the relations of the grain trade to the world of business of which it is only a part, interwoven, interdependent and intersupporting. The business of the world is nothing more than the process by which men instinctively unite in coöperative endeavor to get their living, to conquer nature, to overcome their own individual troubles and to seek in their own way their own pleasures and satisfy their ambitions. This business of getting a living is the task to which the greater part of men's lives is devoted and which has more influence over their lives and characters than even their religion. This process is one that each must carry on for himself alone. It must be divorced as far as is humanly possible from all interference of the Government, whose functions should not include any jurisdiction over the works of men which are not penalized by a criminal or moral code. Mr. Goodrich longs for a great leader who can guide us in this matter of living back to the ideals of individualism which characterized the fathers of our Country and the Government they founded, and from which in recent years certain leaders of both great parties have been leading the Government and many of our people. In this he is in accord with and but expresses the desires and hopes of all the representative men of affairs of the Nation.

EDITORIALETTES

THE Bureau of Chemistry is still fining feed manufacturers whose products fail to analyze up to the tag statement literally. In one recent case where the protein content fell 1.81% under the tag statement, the fine was $100. In another case the ammonia in cottonseed meal was 1.38% under statement and the fine was $25. This is all purely technical bunk, and means nothing except a fine.

FARMERS at Franklin, Pa., representing the Venango County Pomona Grange, composed of 1,800 said to be "well-to-do" farmers, all presumably men of good sense, recently adopted a resolution in favor of an eight-hour day for farmers "just like laboring men." Well, if the farmers want that sort of thing why not "go to it"? There's nothing to prevent. Why "resolute" about it?

MINNESOTA is going to invest $35,000 in an experimental flour mill "to determine the flour making value of various kinds of wheats and the returns realizable from by-products." Well, if the mill has the same effect in Minnesota that a similar mill had in North Dakota, it will be of doubtful benefit to any one except the salaried operators. It has been the obsession of Minnesota office holders, who had no knowledge of milling technique or salesmanship, that the greatest millers in the world operating there do not know their business, and so a lot of indifferent office holders are going to tell them all about it.

WEEKLY STATISTICAL SUMMARY

The following tabulation is a summary of figures various statistical exhibits appearing weekly in det "The Price Current-Grain Reporter," these figures r senting the past week, the preceding week and sponding time last year, here assembled for ready ence:

	Oct. 11.	Oct. 4.	Oct. 1
Wheat—			
Primary receipts	11,573,000	13,866,000	12,5

NON-PARTISANISM IN ACTION

THOSE who knew the leadership and methods of the Nonpartisan League of N Dakota long ago predicted the bankrupt that state under the administration of its affair up by the League. That disaster has not come; it seems to be on the way. The failure of the S dinavian-American Bank has called attention t possible fate of another creation of the League, Bank of North Dakota, managed by those com ing the League control.

The Bank is one of the monstrosities of bank an institution apparently prepared in advance plundering without the possibility of legally hol anyone responsible for the outrage. The Ban assured of deposits running into the millions—s and municipal taxes and public income from sources, which must be deposited there; yet the A Attorney General of the State, Frank E. Packard, publicly stated that there is in the law creating Bank no penalty for mishandling of these vast s no penalty for falsifying reports of the Bank's co tion, no punishment of custodians of public f who deposited in this Bank; the directors are bound to examine into or to know its condition, the state Bank Examiner and Banking Boards h no supervision over the Bank. The directors of Bank and magnates of the League are now resist the efforts of the Attorney General and the B Examiner to enquire into its condition for the pu benefit.

If this is the gang's program as to the banks the state, what is likely to happen when they be to run the mills, grain elevators, packing hou etc.? If this is reform—the new order of soci which the high brows of *The Nation* and *The N Republic* as well as that breezy and giddy adviser farmers, the *Country Gentleman*, and certain ot agricultural journals, are hoping for to welcome w open arms—what is likely to be the fate of t "forgotten man," the man in North aDkota wh trying to gain an honest living and live like a cent citizen?

AGO, OCTOBER 15, 1919.

RAIN TRADE REVIEW

prices seem to be gradually ng owing to prospects of larger The general unrest of labor ng capital to go slow on the side; and until this condition or there is a great change in it, slowly declining markets are y expected, with numerous ilges. Under normal conditions nt buying is the mainstay of market when hedging sales are proportions, but this year to be an exception, although no longer agitation over the st of living, notwithstanding then mention is made of the n. Seemingly the West has es- me of the latter, but at that ounts of money are being spent ries and the "sky is the limit" ly.

have advanced somewhat ains have been going down; every other commodity high a strong disposition to wait whether the producer will sell or not. In some sections of Belt there are many who will ng willing to take a chance of higher prices later in the sea- le in others, especially in Iowa, is expected to move early and amounts. Illinois and Iowa re corn than last year and ll be plenty for the terminal It has been some years since ount of contract grades were ted, and with storage room scarce owing to the unprece- un of wheat, it seems impos- secure a liberal stock of corn Wet weather is also a factor determine the extent of the vement, although the latter will dly find a ready sale on account ales to the East for deferred .

op mainly matured ahead of l the latter is very favorable ng. In some sections shelling done on a small scale. A few s of new grain have arrived unusual dryness for this sea- actically all of the corn this erchantable, and the moisture content is relatively small because of the prolonged drought. The Government report, showing a yield of 2,901,000,000 bus., or about 150,000,000 bus. above the five-year average, has attracted little attention, as the final returns are expected to reduce the total due to a revision of the acreage.

Foreigners will hardly take American corn this season when the Argentine grain can be secured at a much lower figure, and financial conditions abroad are such that it is necessary to curtail purchases as much as possible. When the peace treaty is signed liberal credits are expected to be granted by merchants in this country, which should help along general business, but would hardly result in any business in corn. Demands for corn will be from the manufactured commodity, such as hog products. Lard is being taken readily owing to the shortage of fats abroad, but this business has been done on a much lower basis than prevailing for the cash article and is for deferred shipment. The call for meats is slow.

Oats are selling around the cost of production, and in some cases below. The country is not disposed to sell, and at best has less grain than for some years past. Farm consumption of oats, in percentage of the crop, should be larger this season than last, as the light weight will necessitate more grain being fed than in 1918-19. The shortage in North Dakota and Montana will result in part of the South Dakota and Minnesota crop moving westward; and none of the big shipping sales were favored to any great extent this season. Texas oats moved into the Southeastern states in volume, but while the crop in the former section was rather large it was seriously damaged by rains, and a revival in the Southern call is expected before long.

Foreigners have taken some oats of late and a heavy cut is expected to be made in the visible when the shipments get under way. Part of the grain went to the French government, with some to Germany and other sections. While there has been some talk of late about the shortage of live stock in Europe decreasing the demand for feeding grains, this should affect Argentina more than this country, as the crop of 1,220,000,000 bus. is 318,000,000 bus. less than last year's harvest and somewhat less than the average. The amount of old grain coming forward is small, and heavy weight oats are wanted in order to bring up the average of the new.

A much larger percentage of the wheat crop has left farms at this season of the year than last year. Prices have been comparatively high, especially for good quality wheat, and the mills have not been disposed to let the latter get away from them. The mill takings have been very heavy; and with the Government a free buyer there was a disposition to contract ahead for wheat. The European situation is not clear, but those in a position to know say that no burdensome surplus will be on hand on June 30, 1920. Owing to the poor quality it takes more wheat to make a barrel of flour than was the case last season; and with prospects for a heavy reduction in the winter wheat acreage this fall the amount carried over may all be needed. Farmers are organizing in many sections of the belt, and less theory is being injected into the situation than is the case with the Nonpartisan League in the Northwest.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points the past week follow:

	Oct. 11, 1919.	Oct. 4, 1919.	Oct. 12, 1918.
Wheat	11,573,000	13,866,000	12,500,000
Corn	2,033,000	2,230,000	5,539,000
Oats	4,514,000	4,333,000	5,695,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	18,120,000	23,734,000
Preceding week	20,429,000	27,253,000
Since July 1	313,187,000	402,279,000

Corn market has been in a rut and prices have held within narrow limits, fluctuations the past week being only 4⅛@4⅝c, with the close at net losses of 1@1⅝c, the latter on December. The inside figure the past week was the lowest in three weeks, which was taken as indicating a gradual weakening in the situation, and favorable for a lower level of values. As yet the pressure on the market comes entirely from local traders who were forced to cover many times, making sharp rallies. The trade is waiting to see what the attitude of the producer is before getting far from shore. With a limited demand it is feared that heavy sales of new grain to arrive will make a rapid downturn in futures. Considerable December is held by cash houses as a hedge against sales of new grain for deferred shipment.

Oats were dull, but showed independent strength and closed ½c lower to ⅛c higher than the previous week with May showing the most strength. There was a fair demand from the Seaboard at times, although no large quantities were taken. At the same time the arrivals from the interior were small, and with a moderate domestic call the visible has commenced to decrease. The country shows no signs of selling freely. Iowa has been offering some in order to make room for the new corn crop which is now being husked.

Offerings of cash wheat were not large and readily disposed of when choice. Mills continue to absorb the good quality grain at a small premium over the basic for the winters, while springs sell at high figures, a new top for the season being made at Chicago the past week. The withdrawal of the Government from the flour market as the result of strikes at the various ports has had some effect on prices, and mill feeds have declined. The storage room question is rather serious, especially as curtailing exports will cause the grain to back up in the West. Range of prices the past week follow:

			Close		
	High.	Low.	Oct. 11, 1919.	Oct. 4, 1919.	Oct. 11, 1918.
Corn—					
Dec.	$1.26	$1.21⅜	$1.22⅝	$1.24¼	$1.12⅞
May	1.24	1.19⅞	1.21⅛	1.22⅛	.....
Oats—					
Dec.	.71⅞	.70	.70½	.71	.64½
May	.73½	.72	.73	.72⅞	.....

Visible Grain Supply.

The following table shows the stock of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons, as compiled by the secretary of the Chicago Board of Trade for the week ending Oct. 11, 1919 (000 omitted):

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during week ending Oct. 11, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce:

	Receipts.		Shipments.	
	1919.	1918.	1919.	1918.
Timothy, lbs.	589	28,553	359,926	125,309
Clover, lbs.	110,554	23,299	42,762	105,600

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to Oct. 11, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	55,904,000	50,785,000
Milwaukee	3,354,000	7,103,000
Minneapolis	39,369,000	43,510,000
Duluth	4,294,000	28,138,000
St. Louis	27,187,000	28,570,000
Toledo	5,511,000	3,339,000
Detroit	905,000	684,000
Kansas City	45,138,000	38,125,000
Peoria	1,868,000	2,810,000
Omaha	14,055,000	11,088,000
Indianapolis	5,702,000	5,609,000
Total	203,291,000	219,761,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	Oct. 11, 1919.	Oct. 4, 1919.	Oct. 12, 1918.
St. Louis	1,151,000	1,344,000	283,000
Kansas City	1,676,000	2,902,000	393,000
Omaha	684,000	813,000	188,000
Toledo	296,000	354,000	73,000
Detroit	41,000	32,000	64,000
Indianapolis	67,000	60,000	41,000
Peoria	56,000	74,000	33,000
Chicago	2,719,000	3,342,000	764,000
Milwaukee	2,013,000	412,000	650,000
Minneapolis	3,929,000	3,630,000	4,398,000
Duluth	813,000	903,000	5,613,000
Total	11,573,000	13,866,000	12,500,000

World's Wheat Exports.

Exports of wheat last week compared with previous week and year ago specially reported for this paper by George Broomhall's service:

	Oct. 11, 1919.	Oct. 4, 1919.	Oct. 12, 1918.
American	5,107,000	9,246,000	6,825,000
Indian	.....	.....	290,000
Argentine	3,280,000	3,433,000	1,212,000
Australian	1,312,000	4,392,000	690,000
Others	70,000	86,000	96,000
Total	9,769,000	17,157,000	9,113,000

Exports of wheat since Aug. 1, 1919, commencement of European crop year, compared for three seasons:

	1919-20.	1918-19.	1917-18.
American	91,314,000	46,029,000	59,848,000
Indian	.....	2,550,000	5,267,000
Argentine	37,786,000	28,235,000	2,457,000
Australian	23,241,000	7,870,000	14,078,000
Others	741,000	670,000	563,000
Total	153,080,000	85,354,000	82,213,000
Season	.....	529,032,000	501,414,000

World's Corn Exports.

Exports of corn last week, compared with previous week and a year ago:

	Oct. 11, 1919.	Oct. 4, 1919.	Oct. 12, 1918.
American	12,000	30,000	142,000
Argentine	2,516,000	2,300,000	794,000
African	8,000	112,000	74,000
Total	2,608,000	1,532,000	1,010,000

Exports of corn since Nov. 1, 1918, compared with last year and year before:

	1918-19.	1917-18.	1916-17.
American	3,976,000	27,913,000	44,881,000
Argentine	78,132,000	19,314,000	57,610,000

Total	2,774,000	1,540,000	3,432,000

Exports of oats since Aug. 1, 1919, and comparison for three years:

	1919-20.	1918-19.	1917-18.
American	16,002,000	21,713,300	33,689,000
Argentine	4,634,000	9,728,000	1,721,000
Total	20,636,000	31,441,000	35,410,000
Season	.....	113,272,000	140,826,000

The London *Daily Mail* estimates that the business loss to Great Britain by the railway strike approximates $250,000,000. Bills paid by the government amount to $5,000,000 a day for each day of the strike for services, in addition to the unemployment pay of those made idle by stoppage, numbering more than 335,000.

In order to take advantage of the dearness of oats, German farmers have been trying to thresh their oats and sell them, whereby Germany's supply is seriously threatened. The government therefore prohibited threshing and transportation of oats for six weeks.

ADDRESS OF PRES'T GOODRICH

Review of Some of the Work of the National Association—The President's Views as to the Present Needs of Our Country, First of Which Is a Great Leader

The following is in the major part the annual address of President P. E. Goodrich to the annual meeting of the Grain Dealers' National Association in session on Monday and Tuesday of this week at St. Louis. The convention was one of the largest ever held by the Association and a full report of the proceedings will appear in these pages in the issue for Oct. 22. The importance of the President's address, at least of the salient features, justifies its advance publication here.

Mr. Goodrich said:

"When we met in annual convention at Milwaukee a year ago the world was in turmoil and the most destructive war of all history was being fought, and the soil of Europe was again being drenched with the blood of the flower of the young manhood of the civilized world. We as a Nation were straining every nerve to do our full share in the stupendous struggle that was a battle to the death between autocracy and democracy. This war was to decide whether the world was to be ruled by democratic nations or by Germany, the most autocratic government on the earth.

"Our thought at that convention was the war and what we could do to back our soldiers who were fighting on land and sea to avenge the wrongs Germany had done the people of Europe and the insults heaped upon our fair land. Our sole thought was what we could do as an organization to assist in winning the war and doing it in the shortest time possible. From the moment we entered the struggle our organization did all it could to aid the Government. Everything was offered, nothing withheld. When the history of the war is written, I am sure our Association will be accorded as much honor as any other body of men in civil life for unselfish devotion to our Country's cause.

"So it follows that it was not hard to keep the attention of our members, nor to have them follow the splendid leadership of my predecessor in office. He was the man for the hour and put the Association in the first rank among the business organizations of the country. It was but a few days after I was honored by being chosen as your president, that the glad news flashed over the wires that Germany had surrendered and the terrible struggle was over. Then new problems were to be met, more complex and difficult to handle than those of the war. Nearly five years of war had deranged the whole business world. Production of war materials had been doubled time and time again at the expense of almost all peaceful pursuits.

"This expansion of manufacturing plants called for new equipment and new construction at localities, often away from the usual points of distribution, so that labor was shifted from its usual channels. Wages advanced in these special lines to almost fabulous amounts, attracting wage earners from their usual vocations, as well as for patriotic reasons, to work on war contracts. So it appeared that nothing was real and all strange. Extravagance was the rule everywhere, the luxuries of pre-war days are the necessities of now. The war had stopped or largely curtailed the production of the things of daily need, as all the energies of the country were exercised in producing the things to hasten the end of the struggle.

"At the close of the war we all hoped for and many predicted as immediate fall in prices and a hasty return to pre-war conditions of business, but the reverse has been true. Prices of necessities of life have risen until in July values of foodstuffs, clothing, fuel and other items of daily consumption advanced to higher levels than any time during the war, and at this time shows no signs of an immediate return of values to a normal level.

But Now the Future.

"But enough of the things that have been; we are more interested in the problems of the now and of the future. We have not accomplished all that we hoped for nor all the things we have tried our very best to do. It has been our aim to keep this splendid organization true to its past with no step backward or no lowering of the ideals of its founders.

THE OATS STANDARDS.

"The first question of great importance that confronted all the grain trade after I assumed this office was the approval of the proposed rules for grading oats. meetings were held between the representatives of the grain trade and our organization with representatives of the National Agricultural Department in various states, where ample time was given all interests to present their views and make suggestions as to changes thought necessary to make the rules for grading oats more workable. From the data thus gathered were built the present rules for grading. They appear to be workable, and in so far as can be learned by the handling of this year's crop, they appear to be fairly satisfactory. The only serious criticism we have heard is that the moisture content is too high and should be lowered to make oats safe to handle and keep in good condition while in long-time storage.

"Another suggestion has been made, that there is too wide a difference between the quality requirements for No. 2 and No. 3 white oats, on this particular crop, reducing the value of No. 3 white oats about two cents under No. 2 whites, when there is really not that much difference in the feeding value. In the old grades, standard oats filled this gap and covered a large portion of the oats that were too good for No. 3 white oats and not quite good enough for No. 2 white oats.

"Criticism of the rules for grading wheat has been more general. There appears to be an urgent demand on the part of the millers that the moisture permitted in No. 1, No. 2 and No. 3 wheat should be lowered by one point. These three grades are the milling grades. Bread is a prime necessity, the foodstuff of the masses. If the moisture contents are so high as to endanger the keeping quality of our wheat and thus endanger any considerable amount of it for milling and breadmaking purposes, the rules should be changed to meet that condition.

[Mr. Goodrich then took up the special activities of the Association during the year—the investigation of the inspection facilities in the terminal markets; conferences with Agricultural Committee of the House on the act to direct the handling of the wheat crop of 1919 and the matter of margins on grain with Wheat Director Barnes and the zone agents; the proposed uniform sales contract; relations of the National and the affiliated associations; and other details of the year's work. He then continued:]

The Railroads.

"It is not my purpose at this time to discuss this great problem. Men of national reputation, far more able than I, will handle this all-important question. But I do want to recite this fact, that to no business is rail transportation so important as to the buyers and shippers of grain. To country shippers it is of paramount concern.

The terminal market buyers as a rule have many choices of outgoing lines, but the country buyers are not so favored, as over 70 per cent of country grain dealers buy grain direct from farmers at shipping points that have but one railroad. He constructs a costly elevator and keeps it open for business every business day of the year, ready to buy the farmers' grain at its market value. No matter how poor the car supply or the train service or slow the haul, he is there. He cannot help himself and must confine his shipments to that particular transportation line. How important it is then to the grain trade that the present deplorable condition into which our railroads have fallen be righted and that at the earliest possible moment.

"The railroads are the one great industry in this country that have suffered more than any other since the world war began. The steel industry has flourished during this period as never before. The same is true of coal mining, shipbuilding, textile manufacturings, rubber manufacturings, the shoe factories and all other basic industries. Scan, if you will, the market from day to day of the common stock of our well-known industrial corporations as listed on the New York Stock Exchange. You will find that since 1914 there has been an advance in many of these stocks from 100 to 500 per cent on account of the enormous profits made during the period of the war. We have no objection to these profits and concede that they were rightfully earned. But, turn to the stock of the rail transportation lines listed on the same exchange and we find none of them as high as during the pre-war period. Old substantial stocks have declined from 25 to 75 per cent. Railroads that formerly paid dividends have been compelled to pass them, equipment has run down, motive power is worn out. Under Government control more employes are on the pay-roll than ever before to do less work. Railroad employes to about 2,000,000 in number are demanding that the roads be bought by the Government and run in the interest of these employes, and the country as a whole taxed to pay the resulting operating loss. They believe they are right and they are organized to bring this thing about and fasten on the Government a load of debt greater than the world's war has cost us. A no greater calamity could come to our country than that this thing be done, and it will be unless the great majority wake up to the danger of such a course and band together to prevent it. If not the organized interests will put it through.

MINERS' DEMANDS.

"At the semi-annual meeting of the Coal Miners' Federation in Cleveland, O., Sept. 20, there was adopted a resolution without a dissenting vote, demanding that Congress nationalize the railroads, buying them at their present value, issuing over nineteen billion of bonds to pay for them, at the same time declaring when this was done, the next step would be for the Government to buy and operate the coal mines. This adds another 2,000,000 voters demanding Government ownership of railroads, coal mines, packing plants and other large industries, both bodies of men being superbly organized and ready at all times to insist on a hearing. They are capably officered and know what they stand for.

"If the railroads and coal mines are nationalized, why not mills, elevators, shops, stores, theaters, newspapers and lastly farms? Then a socialistic nation and after that what?

What We Should Stand For.

As an organization representing as we do, next to agriculture itself, one of the most important businesses of the country, we should stand for something and should have the courage of our convictions. It is not enough that we oppose legislation that we think is harmful to the business we represent. We should favor measures that look correction of evils in the grain where they exist or vigorously unwarranted interference from G mental agencies.

"We have just witnessed a rema shrinkage in the value of farm ucts. It would be very unpopu this time to criticize Herbert H and I am not now doing this; bu want to use his recent stateme show how any statement coming a Government official is usually much greater weight than the expression by a private citizen. weeks ago a bulletin accredited Hoover was given wide publicity public press, which startled the c and started a buying mania o and other farm products that wer attracting the attention of the s tive public. It stated conditi Europe were appalling; that th ing winter would witness more ing than the world had ever s account of the food shortage, an thousands would die for the w the necessities of life.

"This added fuel to the flam prices of foodstuffs started sk until they rose to a higher leve that reached during the war. A statement emanating from the high authority a few weeks later the same positive assurance of ing the exact condition in E stated that there was an abunda foodstuffs and no danger of a sh as the warehouses at foreign port bursting, being overloaded wit same things that were so scarce a while before. It stated that tho of tons of foodstuffs were rotti cause they could not properly be for. Almost a panic ensued. Pric had been artificially advanced to tumble until farm products ceased to be bought at all. Co clined more than 40 per cent an more than 30 per cent in a few with a heavy shrinkage in the v value of everything produced o farms.

"All this took place and in bo stances without apparent good Dealers in foodstuffs were frig out of the market. Legitimate was stagnated and the profe speculators had it all to themselv a legitimate dealer buys these and performs a real service by h them until they are needed, he nounced as a profiteer, a robber needy, and is looked down upon undesirable citizen. Farmers w alarmed over these unusual con that they have greatly lessene wheat acreage, which may caus high-priced foodstuffs for anothe at least. We should urge:

"*First.* That the Government its control over private business. war is over and there is no warra a continuation of such control.

"*Second.* We should urge in th impressive way possible that th ernment should at the earliest p moment return the railroads to owners with only such legislation restore to the Interstate Com Commission, or some other G mental administrative body, the vision of or making of freight an senger rates, leaving all other que at issue for future needful legis Federal operation of our transpor lines has been so unsatisfactor unprofitable it should end now.

"You may ask, why urge this w is known that President Wilso said that the roads are to be back on Jan. 1 next? No one se believes that the right thing w done when the Government took the railroads. I cannot see how could have otherwise been op Failing to do this might hav longed the war. We must rem that a large contingent of well-orga men with millions at their comma spreading their ideas are dema that the railroads be bought and ated by the Government. Congr making very little progress to needful legislation to return the to their owners. It is not long

lt. If it transpires that nothing is
cplished by Congress previous to
Christmas adjournment, would it
tive the organized interests a fine
ptunity to go to the President and
him, 'The people's representatives
ently elected have done nothing.
roads would go into the hands of
ers if turned back now without ad-
s in freight rates; so why not let
ions remain as they are? Another
on will soon be held and you should
t the people to speak on this all-
tant matter.' Would not this
the whole thing in the political
e and who knows what would be
sult? The President might not
to them or grant their request,
ho knows? The plea would be a
lausible one.

Third. We should demand the re-
f the Adamson law, an example
s legislation that is entirely for-
o the teachings of the Fathers of
ountry. Its enactment into law
ecured by methods not especially
able either to the organized em-
or to Congress who surrendered
demands of the trainmen at a
when the transportation lines,
had been starved for years by
uate freight rates, were almost in
ptcy. Our legislators appeared to
n ear very sensitive to organized
nd were beguiled with the plea
s object was to secure shorter
when it was, in fact, to secure
pay for their members, well
g that train crews could not and
t now working on an eight-hour
y schedule The Adamson law
read discontent throughout the
world by injecting a question of
d into the halls of Congress and
ating it into passing a law that
have failed under any other cir-
nce. It has so lowered the
of railroad employes that it took
of our great railroad lines in
,000 more employes and $40,000,-
re wages to do a smaller freight
ssenger business than in 1917.

Fourth. We should oppose with all
within our power the enactment
Plumb plan of railroad owner-
control. It is a socialistic meas-
he most extreme type.

Fifth. We should oppose in every

rtily endorse the following rec-
ations that will be made by
y Quinn:

That the arbitration deposit fee
ced from $10 to $25.

That an additional arbitration
ee consisting of three members
rized.

That a committee be created to be known as a permanent committee on membership to investigate rejected applications and report to the board of directors.

"The above recommendations I commend to your careful consideration.

"What we need in America at this time is to cease looking so much at world problems and closely scrutinize our own conduct as a people. While those in authority at Washington are bickering over a plan to control the powers of the world, our own people are running wild. Even in staid old Boston public officials, the guardians of the law, are striking for more pay, throwing down the badges of authority and permitting riot to run wild in her streets; loot and murder has its own way. Courthouses and jails are burned in other cities, men lynched by infuriated mobs, while those charged with enforcing the laws shirk their duty. This lawlessness is not confined to one city or state, but appears to be the rule throughout the length and breadth of the land. All these things, together with strikes and lockouts, are prevalent wherever larger bodies of labor are employed, and while these things go on our members of Congress in Washington are spending months in discussing a treaty that is supposed to settle the ills of Europe, that should have been concurred in weeks ago or have been promptly rejected.

"Just now the President of the United States has returned shattered in health from a trip across the country telling the people, whose servant he is, what they should believe and what they should do in regard to the League of Nations. Yet all the time unrest grows and new trouble foments here at home.

"I am not a pessimist, but always an optimist. It is inborn in me, and I always believe that the right will prevail. I have the utmost faith that the Almighty has not forgotten this, His chosen people, but that He will raise up in due time a great and good leader who will not lift his head among the stars and refuse to see and understand the practical, everyday problems about him, but will rather be a man of the people, who will cherish the ideals of the founders of this Republic and will not look so much to world problems, but will know the desire of our own folks. Then the problems of capital and labor will be solved in the interests of the whole people. Now labor is in the saddle and may be riding to a fall. When we speak of union labor, we mention its name in a whisper as though it were a thing sacred and could do no wrong. The time is coming, and is not far distant, when laws will cease to be made exempting them especially from obedience to laws controlling other business organizations.

"What we need now is a leader who will plead for America for Americans and stand for deportation of every foreign agitator who is preaching a doctrine of hate in an alien tongue which we do not understand and will see that this country is a fit place in which native Americans and naturalized Americans may dwell in peace, each striving to attain his ideals without harm, hindrance or hate towards his brother man.

[Mr. Goodrich expressed praise for the special work done by E. A. Reynolds of the Legislative Committee, Henry Goemann of the Transportation Committee, F. E. Watkins of the Trade Rules Committee, Elmer Hutchinson of the committee to investigate terminal market inspection, and Secretary Quinn. He closed by saying:]

"Now, my friends, this in my feeble way is my report. I have not attempted to solve world problems; neither have I striven to give you a detailed report of all that has been done, as I have refrained from attempting to report the work of the different committees. The men who have peformed these things are better able to handle them than I and are entitled to the privilege of making their reports and giving it to you first hand.

"I wish to thank you for your support. I have been royally received by grain men everywhere, whether it be in state meetings, by boards of trade or individual members of the trade. It has been good to be with you and the greatest honor that has ever fallen to my lot was to be placed in the position to serve you to the very best of my ability. When the deliberations of this meeting are over, I am sure that we will return to our homes with a greater respect for our honored calling and with a firmer resolve that we will not only support and live up to its ideals, but will in every way lend our aid to our splendid country in these trying times. New problems are to be solved and new dangers to the liberties of our people are before us. This is no time to try European experiments. They have largely failed. We might well profit by the example of Gideon of old and his followers, by every "man standing round about the camp in his own place." If we do this we will serve our organization well. If we serve it best, we will serve our Country best; and when we do that we will see that the ideals of Washington and Lincoln are the permanent policies of our Country and that this Nation 'of the people, for the people and by the people shall not perish from earth,' but remain for all and not be surrendered to one favored class or group of its citizens."

OCTOBER CROP REPORT.

The Bureau of Crop Estimates on Oct. 8 published the following estimates of crop production based on conditions on Oct. 1, with comparisons:

CROP SUMMARY—ALL STATES.

Crop.	Oct. 1, 1918, indications. Bus.*	Dec. est., 1918. Bus.*	Price Oct. 1. 1919. Cts.	1918. Cts.

[1]Preliminary.

A report on the livestock situation by two specialists of the Agricultural Department says that cattle, sheep and swine in nine countries in western Europe have decreased, but increased in other countries, including United States.

H. A. Wickstrom reports Galveston shipments of wheat of September last as 2,042,743 bus., compared with 593,312 bus. last year.

FARMERS AT THE CONFERENCE

Representatives of the Farmers at Washington Protest at the Neglect of Agriculture by the Industrial Conference—Movement of Wheat.

WASHINGTON, Oct. 11.—[Special Correspondence.]—Although few in numbers, the spokesmen for agriculture in the National Industrial Conference, convened by President Wilson, intend to make themselves heard. They were among the first to present resolutions setting forth the situation from their viewpoint. It is their contention that the farmers have been unjustly accused of responsibility for the high cost of living and that unless the agricultural interests receive their due rights there will come a day when these producers will revolt. The farmers' representatives in the Conference have let it be known that they view with alarm the demand of labor for shorter hours. They point out that farm work is a sunup to sundown propostion and that it has become increasingly hard to obtain farm help as hours of labor in city industries are shortened.

Spokesmen for the farmers in the Conference are C. S. Barrett, Georgia, of the Farmers' Coöperative Union, appearing for the National Board of Farm Organizations; T. C. Atkeson, West Virginia, of the National Grange, and J. N. Tittemore, Wisconsin, of the American Society of Equity. Prior to the conference they protested to no avail because they were not given additional representatives to match the other groups on a more equal basis. Mr. Barrett in presenting the viewpoint of agriculture to the Conference said:

"Can anybody honestly suppose that if an agreement between capital and labor is reached in which agriculture has no effective voice, that agreement will be permitted to stand? Don't allow yourself to be deluded into the false idea that agriculture cannot kick, that it will be forever quiescent, that it will continue to be exploited and made the football of other great national interests. I say I believe in organized labor and organized industry, but I want to warn organized labor that it cannot successfully alone conduct the mighty affairs of the Nation. I want to warn organized capital that it cannot by itself bring order out of what everybody who reads and observes will admit is present-day chaos. The farmer has been falsely held responsible for the high cost of living. During the past few weeks pork has declined in price, beef has gone down and corn receded. Has any manufacturer suggested that in exchange for these favors to the people forced by economic conditions over which the farmer has no control, he should buy his farm machinery at reduced rates?

"Habitual disregard of the farmer and the practice of discounting him in the popular mind as an intellectual and constructive force is responsible for the fact that during the war he received practically no consideration. Capital and labor were given passports which admitted them to the Peace Conference in Paris. It was impossible for farmers to get the necessary passports enabling them to get to Paris, much less realizing their ambition to obtain a place for agriculture in the document now under consideration by the United States Senate. Labor has asked for the right of collective bargaining and through a clarification of the Clayton law has been specifically granted this right. Agriculture has asked that its rights be so defined as to affirmatively and unmistakably permit it to engage in business coöperatively, and now goes up an awful howl from the Wholesale Grocers' Association and other interests who blame us for the high cost of living. I tell you, gentlemen, collective bargaining is absolutely essential to the progress of farm industry. In many localities and with many products the farmer does not receive actual cost of production, and it is the unpaid labor of his wife and children that makes it possible to continue in the farming business. Is it not natural that he will one day, under such circumstances, refuse to produce, or at least only grow enough for his actual needs?

"If the farmer is continually neglected and exploited it is inevitable that he will revolt. The pity of it is, however, that society, through its foolish policy toward agriculture, may cause many farmers to rush into organizations which are not 100 per cent American. In their desperation they will seek relief in bad company, and thousands of them may depart from that narrow path which is laid down by the Constitution.

"The farmer wants no special privileges. He doesn't want any wet nurse. But he does want to be recognized as a factor in the affairs of the Government and to do his bit in peace as he did in war."

SENATE CONSIDERS WHEAT.

The question of the movement of wheat has received some attention during the past week in the Senate and elsewhere. Senator Owen of Oklahoma took the situation up with Walker D. Hines, director general of railroads, and received the following reply:

"All of the ports are full of wheat and we have wheat in cars backed up at each one of them awaiting ships. The movement of wheat from these ports is limited very largely by the foreign vessels available, as the principal receivers, England, France and Italy, will not use American ships for their wheat on account of the high cost compared with their own. Furthermore, shipping to English ports has been curtailed on account of the strike of railway employes. The Oklahoma wheat moves both to Kansas City and to the Gulf ports. At Galveston and the vicinity thereof the elevators are full and we have 3,000 cars awaiting unloading. We are only able to take 50 cars per day into Galveston from both Texas and Oklahoma. Kansas City elevators are full and a large number of cars are backed up awaiting unloading. We are only able to take into Kansas City 125 cars a day from all points west.

"You can see it would be useless for us to continue to furnish cars for wheat when there is no possibility of wheat being taken from the ports in any greater quantities than at the present time. From my investigation I cannot find that the rate of exchange has anything to do with the slow movement of wheat. It may have something to do with the slow movement of coarse grain, but that is a small part of our trouble at the present time.

"For your information, we have moved about 65,000,000 bushels of wheat from the farms from July 1 to date in excess of the movement for the same period last year. For the Southwestern region we have moved from July 1 to date 65,610 cars of grain, which is 16,221 cars in excess of what was moved during the same period last year—an increase of 38.8 per cent. We are giving especial attention to the movement of wheat that is now on the ground in preference to the other."

Mr. Hines also issued a statement to the public in which he said:

"My associates and I have been and are giving most earnest consideration to the transportation of wheat, but it is important to have it clearly understood that the present inability to transport the wheat is due to causes which the Railroad Administration cannot control. On May 2 and again on May 29 the Railroad Administration issued notices to the public that in view of an expected large crop of wheat and the necessity of utilizing all available railroad equipment to the fullest possible extent, the wheat crop would have to be handled under the permit system, under which wheat would not be accepted for transportation until there were facilities for unloading it at destination. The permit system which is administered in connection with the Grain Corporation was put into effect in accordance with public notice on Aug. 1, and since that time permits for the shipment of wheat have been issued only when there were facilities at destination for unloading it."

Senator Gronna of North Dakota, chairman of the Senate committee on Agriculture, takes exception to Mr. Hines' statement of the situation. "Mr. Julius Barnes, director of the Grain Corporation, is responsible for the embargo," said Senator Gronna. "There has been and there is now an embargo on wheat and wheat flour, and that is the reason why wheat is not being exported. Under our tariff law there is a duty of 10 cents per bushel on wheat between the United States and Canada. It seems, however, that these people are a law unto themselves and make their own laws. I am advised by the Secretary of Agriculture that there is no duty on wheat. The law has never been repealed, so far as I know; it is on the statute books of the United States; Canada refused to accept the reciprocity treaty by an overwhelming vote, and why this law has been set aside I do not know. At any rate it has been held and is held today, that there is no duty on wheat imported into the United States from Canada.

The bill repealing the Canadian reciprocity act was passed by the House this week. It is expected it will receive favorable action in the Senate also.

MOVEMENT OF CANADIAN WHEAT.

Below is a statement of the movement of grain crops of western Canada for September 1919 made by the Board of Grain Commissioners:

Owing to the harvest taking place in the three prairie provinces very much earlier than usual this year the movement of grain to the lake terminals has been much heavier. The number of cars inspected during the month is the highest since 1915 and has only been eclipsed three times—in 1913, 1914 and 1915. Oats, barley and rye show the highest increases relatively; 2,630 cars of the new crop were also inspected during August—an unprecedented occurrence.

The following figures will indicate the grading, the amounts received and shipped at Fort William and Port Arthur and the most recent estimate by the Dominion Bureau of Statistics, Ottawa, of the crops, as compared with the last three years. The volume of the September movement is all the more gratifying when it is seen that this year's wheat crop is the smallest since 1914 and the oats crop only 12 million bushels more than last year's—which was the smallest crop since 1914 also.

ESTIMATED CROPS.

	1917. Bus.	1918. Bus.	1919. Bus.

NONPARTISAN LEAGUE FI ING HONESTY.

As an aftermath of the failure Scandinavian-American Bank at through and by reason of its con with the Nonpartisan League, the Auditor of North Dakota on Oct dered the examination of the new of North Dakota, "to determine moneys, if any, have been diver illegal purposes"; but the doors bank were barred by its officials a the Auditor and his employes. advice of the Attorney-Genera seals of the bank's vaults were and the examination begun. It w mediately developed that the Stat had $282,000 on deposit in the Scandinavian-American Bank, al its manager had declared on Oct. only $183,000 was there.

The Bank of North Dakota is stitution founded by the Nonpa League state administration. It der the management of J. R. V former bank examiner, who is c by the State Banking Board wit ing given the Scandinavian-Am Bank of Fargo advance informat to the time examiners would ent bank, thus permitting the bank said, to prepare its records to d its actual condition. It has con approximately $16,000,000, as the law requires that all public fun deposited in the State Bank. Thi re-deposits with private banks m its funds. According to Manage ters, the State Bank had about $ on deposit with the Fargo bank it was closed.

It has been developed since the failure that the League Exchang a corporation controlled by Tc which had a loan of $67,000 fr closed bank, owns 167 shares bank. This is the largest single of stock, and indicates that con the bank actually was held by T through his control of the Leag change, Inc.

Gov. Frazer, Nonpartisan Executive, refused to attend meetings of the State Banking This step was advised by the L chief counsel as part of the de program. The Nonpartisan newspapers advised "farmers' to ignore the order of the State ing Board by which post-dated are held invalid as collateral.

CARS IN BAD CONDITIO

M. H. Ladd, chief weigher a waukee, writes to *Doings in Gr Milwaukee* that 24 per cent, or cally one-quarter of the total n of cars unloaded at Milwaukee tors during August and Sept were found to be in a leaking co on arrival. This is an increas per cent over the four previous m the average from April 1st to 1st, 1919, being only nineteen pe This increase in the number of l cars can undoubtedly be attribu the shortage of cars and to th condition of the carriers' rolling Under these conditions it bel every shipper of grain to give p lar attention to the condition o car intended for loading with grain. In many cases a loss of in transit can be prevented if th per will exercise care in the coo of cars.

REAT INDUSTRIAL PICNIC.

his time, when we are hearing so about Bolshevism, industrial unid strikes, it is refreshing to learn ing of the unusually happy relaxisting between the workers and ifamilies and the management of the Country's most famous industlants.

Saturday, Sept. 20, when many of rkers in the steel industry were g their final preparations for a the 7,100 employes and executf the National Cash Register Co. ton, Ohio, were enjoying what is d to be the greatest industrial and picnic ever held. Fully people took part in a function was arranged and managed enby employes. It was more than a however; it was also a welcome n H. Patterson, president of the y, who had just returned from ess trip to Europe.

festivities started early, the actory force marching to the picunds at Hills and Dales Park, ce of about two miles from the Mr. Patterson, 74 years young, a suggestion that he ride in an ile, and with a committee of es marched at the head of the as shown in the picture.

s a great day at the N. C. R. rs and Stripes were raised over the twenty buildings that come Dayton factory; many of the s wore gay-colored decorations, ry one carried an American flag. ade was enlivened by the antics al clowns; and six brass bands rum corps furnished the music. ark was given to the people of by Mr. Patterson about a year consists of 294 acres of hills s, from which it gets its name, many substantial buildings with aratus and other improvements. ued at one million dollars. Sevxtra buildings and tent structre erected by the N. C. R. Co. ay, including a grandstand with capacity of 6,500 people. An he preparations may be gained fact that a road was built the woods in order to save the a half-mile walk.

The day's events included games and contests of all kinds and descriptions that could be thought of to interest and amuse the big crowd, including a clever sideshow with subjects of especial interest to employes.

The commissary arrangements included one 3,000-gallon water tank, two 800-gallon coffee vats, three 380-gallon cauldrons and steam kettles with a capacity of 2,500 gallons. To prepare the meals 110 cooks were employed and 650 other attendants served the food to the guests. The cafeteria plan was used

GENERAL VIEW OF THE PICNIC GROUNDS.
With Clown Band Parading Across the Athletic Field, N. C. R. Field Day, Sept. 20.

and there were 80 serving stands. Both lunch and dinner were served to every one present. Eight thousand pounds of beef, 91,000 sandwiches, 10,000 gallons of lemonade, 1,400 gallons of ice cream, 7,500 pounds (50,000 packages) of crackers, and 3,000 pounds of candy are but a few of the good things consumed by the picnickers.

Everything in connection with the affair was in the hands of the employes. The N. C. R. Co. paid the bills, which amounted to more than $50,000, but made no attempt to say what should or should not be done. All planning and execution was done without outside assistance and the construction work was done by employes from the factory. The day before the picnic a violent wind destroyed many decorations, demolished signs and exhibits and blew down tents. Hundreds of men worked nearly all night and by morning everything was as spick and span as it was before the storm.

Mr. Patterson was on the grounds until late in the evening. "This is a big family reunion," he said. "It is a big family and we want to do everything we can for them. We want to take this opportunity once a year to meet the men out in the open as man to man. This is the day we put business away and get together. It is a fine thing for all of us to get together, and through this we have more coöperation. When the factory first started and we had only a little room off of an alley, I knew every one of the men; I knew their wives and their children, and I knew if one of them was sick. When we were over in building No. 1 about twenty years ago and had only a small force, we used to get together and talk things over, and I believe there was better understanding between the management and the rank and file by our doing it. We want our people to know something about our worries and some of our troubles. If they don't know these things, when they leave the factory in the evening, they don't think about the business again until next morning. If they know of these things they will help us by thinking about them."

One exception must be made to the statement that everything was in the hands of the employes. Shortly after dark a shower came up and thousands of picnickers scattered in all directions seeking shelter. Before any one had an opportunity to do anything about it, John H. Patterson had taken charge of the situation and soon two thousand umbrellas came from the factory, and all available automobiles were put into service to take the people to the street cars. "No wonder," said an interested outsider, "there is harmony and cooperation at this factory, instead of discord and unrest. No wonder it was a wonderful picnic with a man like J. H. Patterson for the head of the 'big family.'"

Refunds of Taxes.

The transportation department of the Board of Trade of the city of Chicago calls attention that, while the Commissioner of Internal Revenue, on July 16, 1919, amended the regulation governing transportation tax, to provide that on commodities given "in-transit privileges," there is not permissible any refund of tax on charges paid for the transportation from the point of origin to transit point, the commissioner has again amended this regulation to provide substantially that in the final readjustment of freight charges the tax will be collected upon the net transportation charge from point of origin to ultimate destination. Therefore, the carriers are again authorized to refund the war tax in proportion to the amount of freight charges which are refunded.

If this paper pleases you, kindly recommend it to your neighbors in the trade.

GENERAL CROP CONDITIONS.

The composite condition of all crops of the United States on Oct. 1 or at time of harvest was 1.3 per cent lower than their ten-year average condition on that date, as compared with a condition of 1.2 per cent below average on Sept. 1. Final yields per acre of crops last year were about 2.4 per cent below average. The index number of aggregate crop yields this year is about 1.2 per cent greater than last year.

This year the total acreage in cultivated crops is about 0.6 per cent more than last year.

The estimated percentage of yield per acre or condition Oct. 1, or at harvest (100 equals average, not normal), and change from Sept. 1 estimates, was as follows:

Kafirs	126.7	+5.8	Potatoes	92.5	0.0

Iowa	107.7	+0.9	U. S.	98.7	—0.1
Mo.	107.0	0.0			

The total production of important products compared with last year is estimated as follows: Corn, 112.3%; wheat, 100.1%; oats, 79.6%; barley, 77.5%; rye, 93.8%; buckwheat, 104.1%; white potatoes, 87.5% sweet potatoes, 115.2%; tobacco, 95.4%; flaxseed, 72.6%; rice, 109.5%; hay (all), 114.5%; clover hay, 97.7%; clover seed, 92.1%; cotton, 88.8%; apples, 92.2%; peaches, 150.3%; pears, 132.4%; cranberries, 159.7%; hops, 164%; sorghum sirup, 113.4%; sugar beets, 124%; kafirs, 191.3%; broom corn, 89.4%; beans, 72.8%; peanuts, 94.8%.

PRICES.

The level of prices paid producers of the United States for the principal crops decreased about 8.7 per cent during September; in the last ten years the price level decreased about 2 per cent during September. On Oct. 1 the index figure of prices was about .2 per cent higher than a year ago, 4.7 per cent higher than two years ago, and 74.7 per cent higher than the average of the past ten years on Oct. 1.

The prices of meat animals—hogs, cattle, sheep and chickens—to producers of the United States decreased 13.6 per cent from Aug. 15 to Sept. 15; in the past nine years prices increased in like period 2.6 per cent. On Sept. 15 the index figure of prices for these meat animals was about 7.3 per cent lower than a year ago, 5.1 per cent higher than two years ago, and 57.7 per cent higher than the average of the past nine years on Sept. 15.

Unevenly Loaded Cars.

Unevenly loaded cars, usually to be prevented, are causing difficulties to terminal markets. Country shippers after getting the best possible car and properly lining it and providing suitable doors, should if at all possible load evenly, thus insuring a better inspection, easier unloading and better transportation than otherwise.

DES MOINES CROWDING MAP AS A GRAIN MARK

Organization and Personnel of the Des Moines Board of Trade—Establishment of Official Inspection and Weighing Departments—Rapid Increase of Receiving Business—Some Typical Firms

IT HAS been strikingly said: "Des Moines is the focal point from which all Iowa will be built, lines radiating from that city like spokes from the hub of a wagon wheel."

Des Moines is the largest and most important commercial and manufacturing city in the state of Iowa, approximately at the geographical and population center-points of the state.

Nowhere else in civilization can as large an area of as fertile land be found as surrounds Des Moines. Face in whatever direction we may, look to as far as 350 miles from Des Moines (the Corn Belt's hub city), we find Des Moines is the center of a circle having a diameter of seven hundred miles and including more cultivable fertile soil than any other similarly circumstanced tract of equal area.

Accepting a population exceeding 100,000 as entitling a place to be known as a "big city," Des Moines is Iowa's big city. There are in the states that adjoin and surround Iowa only these few big cities: In Illinois, Chicago; in Wisconsin, Milwaukee; in Minnesota, the Twin Cities; in Nebraska, Omaha, and in Missouri, Kansas City and St. Louis. There are rated and substantial reasons for Des Moines' greatness and there also are evidences of that greatness: The city has 150 miles of paved streets, 800 acres in public parks, 150 miles of street railway, $80,000,000 in bank deposits, $1,000,000,000 in life insurance in force in purely Des Moines companies, six concrete bridges on main thoroughfares and one under construction, five boulevards, nine lines of railway, 104 trains arriving and departing daily, $60,000,000 annually in automobile and accessory business, $5,000,000 a year coal and mining business.

AS A GRAIN MARKET.

The primary reason justifying the growth of a place into a great grain market is found at Des Moines: It is a place where different lines of railway meet and interchange freight, and near which grain is produced in large amounts.

Beyond doubt Des Moines measures up to every natural reason for justifying its becoming a great milling and grain market. It is the center of the Corn Belt, and it is served directly by these important railroads operating over many miles: Chicago, Burlington & Quincy, with its aggregate of 9,369 miles; Chicago, Milwaukee & St. Paul and affiliated railroads, 10,576 miles; Chicago & North Western and affiliated railroads, 10,176 miles; Interurban, 60 miles; Fort Dodge, Des Moines & Southern, 141 miles; Wabash, 2,519 miles; Chicago Great Western, 1,496 miles; Minneapolis & St. Louis, 1,646 miles; Chicago, Rock Island & Pacific, 7,548 miles.

It is undeniably true that the geographical location of Des Moines is more than justification for the conviction that the situation of this city is an index pointing to the expansion of its business in grain and the manufactured products of grain and to the development of a great business in the merchandising and transportation of these articles. The state of Iowa itself is an enormous producer of grain. An additional fact is that northwest, west and southwest of Des Moines we find vast regions devoted to the growing of grain for manufacture and shipment; and the situation of Des Moines with reference to the Dakotas, Nebraska, Kansas, Oklahoma (and other states beyond these) is as if these Western states and their lines of railways constituted a fan and the ribs of that fan, with Des Moines situated in the handle, through which the traffic naturally flows to the great grain-consuming population that are east of the Mississippi River. And this situation of Des Moines (as in the handle of the fan) is recognized and reflected in the wide provisions of rates—including proportional and rebilling rates—for the various transit rights and privileges accorded at Des Moines to the grain moving to, through and from this city.

While Des Moines has been handling grain in large quantities for the greater part of a generation, it is only since about Aug. 1, 1919, that the market has been organized and placed upon the plane, or basis, of an interior exchange, with the usual guaranties to sellers and buyers therein of the facilities and privileges which appertain to an organized exchange. Since that date the shipments of grain into the market have increased approximately 50 cars per day, while the number of recognized dealers, members of the Des Moines Board of Trade, has been very considerably enlarged. There are plans in preparation also for a material enlargement of the elevator storage and handling capacity, or enough to run the storage capacity up to a million bushels with proportional handling capacity.

Another feature of the new status of the market is the interest taken in the location by cereal manufacturers, especially of oats. This crop in Iowa is recognized as peculiarly attractive for cereal goods, being practically free from the wild oats which are so objectionable in the use of oats for human consumption.

THE DES MOINES BOARD OF TRADE.

Much has been said about the capital city of Iowa; and from the early days of Fort Des Moines to its revival during the world war as one of the great forts and training camps of the United States, Des Moines has been historically prominent in the growth of our country and the civic and industrial progress of the West. During the days when Indians roamed the Western prairies and traded Indian corn with the settlers at the fort, it was probably not anticipated by even the most far-visioned white man that Des Moines would be a great milling, manufacturing and distributing center of cereals, meats and foodstuffs generally that it has become in these days, through years of natural and progressive growth.

There was nothing hasty or unconsidered, then, in the establishment of the Des Moines Board of Trade; for it was the natural outgrowth of a steadily increasing business in foodstuffs, forming as these do the foundations of domestic and export business in other lines as well. The geographical advantages of Des Moines, located in the heart of the world's greatest grain and livestock producing country, with a network of transportation lines, made necessary such an organization as well as provided the proper setting and assuring the immediate success of the Des Moines Board of Trade. The time had come when the necessities of the trade conducted through this market imperatively called for its organization so that the business could be conducted upon uniform lines, that inspections and weighings could be officially supervised and official reports made; that traffic arrangements should be perfected and safeguarded and handling facilities encouraged and coöperated with where such facilities needed the closer coöperation which an organized market naturally develops; that further elevator capacity could be encouraged and provided when and as needed. All these have been taken care of by and through committees charged with such details. Shippers to the market and buyers of its dealers will recognize, therefore, the value of the services suggested, which are the direct result of the organization of the Board of Trade and which having been thus duly inaugurated will continue to characterize the Des Moines market, which has thus been changed to be a veritable terminal market for country shipments of grain, hay and livestock, and a correspondingly good point of shipment for those buying such products. It is the desire of the members of the Board to handle all shipments and purchases with a kind of service that is based on a complete understanding of trade needs, with which they have been in sympathetic touch for many years, trusting that all will recognize in this intimacy and division of business possibilities benefits that will warrant the patronage of members of the Des Moines Board of Trade and the utmost reliance in their ability to render every service a shipper or buyer has reason to expect.

CLARK BROWN,
President, Des Moines Board of Trade.

A. V. TISCHER,
Chief Inspector and Weighmaster, Des Moines Board of Trade.

BOARD'S OFFICERS.

The officers of the Board are as follows: Clark Brown, president; Fogarty, vice-president; F. H. treasurer; Addison Hall, secretary; I. Sargent, S. E. Squires, R. W. F. T. Fuller and M. McFarlin, directors.

INSPECTION AND WEIGH

Official and dependable inspection weights are now furnished by the authority of the Board of Trade, the ice being under the direction and management of A. V. Tischer, as chief.

Mr. Tischer's entrance into the ness dates back to the year 191 he held a minor position in a G elevator. Finding the work ve esting, he decided to make it vocation. Knowing that it w necessary to learn every angle, a course in agriculture in the stitute at Houston, Texas; a two years of intensive study, he as a test of his practical know follow the harvest from souther to the Canadian line. This and after a very profitable se returned to Chicago. His ex in previous work had taught h railroad experience was absolu sential. Therefore, he entered ploy of the C. G. W. R. R., a various clerical positions with t pany during a period of thre Then he took a position in the v department of the Chicago B Trade; from which he went to t Department of Agriculture, w obtained considerable valuable ence in both the grading and dling of grain at the Seaboard two years with the Department tered the Navy Department gence service), the duties of w sition carried him over the gre growing states of Oregon, Was Montana, Idaho, into the shipya grain elevators of Seattle, Portl Astoria.

Mr. Tischer's actual experien sections of the United States ha of great value to him in mak familiar with the various type acteristics and milling qualities raised in various parts of this and is proving its great practic in his present position.

Leaving the service in the lat of December, determined to pla spicuous part in the grain ga knowing H. Ulrich's ability, in he decided to take his final cour Mr. Ulrich's able instruction, secured a position with him. I six months Mr. Ulrich recom him for various positions; but Moines prospect appealed to h most, owing to the fact that seve of prominence from several la minal markets were doing their land this coveted opening.

The inspection department of Moines Board of Trade is fully e with the most modern applian essary to grade grain in compliance the rules and regulations of the States Grain Standards Act. outfitted by Mr. Tischer's im assistant, J. H. Jones, formerly U. S. Department of Agricult authority on laboratory equipm the technical details necessary grain within the law. He has be nected with the Agricultural ment for the past seven years, ous capacities and one of the of the present Federal Standar provided everything the departm need for accurate work.

At present the Board of T bending its efforts toward infl the railroads to aid in the w inspecting grains. A section o set aside for the spotting of gra until after inspection, is asked,

rgements to secure such considera-
tn probably will be made soon. So
gat has been the growth of business
in the short time that the Board has
bn operating that the necessity has
bn developed for increasing the force
osamplers to ten men. These will
hse to be imported, as experienced men
an necessary.

WEIGHING DEPARTMENT.

r. Tischer is chief weighmaster as
wl as inspector, and though he has
hd but a short time to perfect his
sy em, this department of the Board's
se ice is working smoothly on a sys-
te atic basis and is now issuing weight
ce ificates which are in all things as
le ndable as those bearing the signa-
tu s of weighmasters in much older and
a er markets. And as this service is
of he highest importance to shippers,
ev y resource of the Board will be put
be nd Mr. Tischer to keep it up to the
st dard which the grain trade now ex-
pe s of such service everywhere.

DES MOINES ELEVATOR AND GRAIN COMPANY.

.ne Des Moines Elevator and Grain
Co pany operates a terminal elevator
of seven hundred and fifty thousand
bu els capacity, and is the pioneer ter-
mi al elevator company of the Des
Mo es market.

hey have for years enjoyed an excel-
en trade, particularly in oats, through-
ou the South, where they are most fa-
or bly known, and their superior ele-
va r facilities enable them to grade and
re are the standards of quality re-
ga ed by the trade.

The short haul for the grain shipper and the opportunity for quick returns because of the favorable location of the Des Moines market are advantages expedited also by the rapid handling facilities and prompt returns offered to the country grain shippers by the Des Moines Elevator and Grain Company.

DES MOINES INSPECTION DEPARTMENT.

Notwithstanding that this department has been in existence for a little over a month, the progress made has been remarkable, the various railroads entering this terminal have done considerable to co-operate with the department in handling grain for inspection on the same basis and system now in vogue in such terminals as Chicago-St. Louis and Minneapolis.

The testing apparatus in use in the Inspection Department is the most modern obtainable, the only handicap encountered is the increasing necessity of larger quarters which soon will be remedied, due to the activities of the building committee who are doing their utmost to secure ample quarters, this will require, virtually, an entire building, an announcement of the plans in this regard may be expected at any time.

It is only a matter of time, due to the promising outlook for this market and its increasing receipts, that newer and larger elevator capacity must be considered. Eastern houses have been sending their representatives to this territory to investigate conditions in general. It is rumored they contemplate plans for the construction of public elevators with a capacity of one million bushels or more. Des Moines already has a storage capacity of a million bushels, but this will be far from sufficient to take care of the steady stream of grain flowing into the market. Still others who are interested are the cereal manufacturers, for in no other territory in the country are conditions more favorable or a location more desirable for industries of this nature. Des Moines' geographical position and Iowa grains, especially oats, which are the best obtainable for manufacture into foods for human consumption being most attractive. For instance, the foreign seeds and wild oats so common in other sections of the country do not have to be contended with here, an average Iowa crop of this cereal being 99% creamy white, fat, plump, sound cultivated oats, the kind that take the blue ribbons at all State Fairs.

The milling qualities of Iowa's wheat is daily gaining recognition. The winter wheat is of the hard variety and the spring is of that class and quality that always brings a premium. "Dark Northern." The flour mills located in Des Moines are gaining National prominence, thru grinding Iowa's wheat almost exclusively. Tests and analysis bring out the fact that Iowa's wheat is exceedingly high in Gluten. In three words Iowa's wheat is a "Natural Milling Wheat."

It is needless to mention the quality and fame of Iowa corn. It is world wide. Conditions in general are the best and most favorable for a bumper crop. Watch the returns. The yield will be astonishing. Recent reports are that Iowa is about to break the

GEO. A. WELLS,
Chairman Advisory Committee, Grain Dealers' National Association.

world's record in the quality and bushels per acre, and Des Moines is Iowa's terminal.

DES MOINES AS A MILLING POINT.

Des Moines is an ideal wheat milling center, having great wheat producing areas lying to the north, west and southwest, providing all varieties of wheat and giving it exceptional advantages over many other sections. The Bast-Fogarty Milling Company, the largest mill in this part of the country, mills grain from the hard spring wheat area of the Dakotas, the hard winter wheat area of Kansas, and the soft winter wheat area of the Southeast; and being equipped with the latest types of machinery, this mill can make a flour from a blend of wheats that will meet the requirements of the most particular, whether baker or housewife-consumer.

The organization of the present corporation of the Bast-Fogarty Milling Company, the largest of the Des Moines mills, is interesting, having arisen from the ruins of an older concern which produced two hundred and fifty barrels of flour per day, but nevertheless, failed to meet the success expected. The present mill, one of the finest flour mills in the central West, has a daily capacity of twelve hundred and fifty barrels of white flour and two hundred and fifty barrels of whole wheat flour.

The mill is located on one of the main thoroughfares of Des Moines, near the heart of the city. It has ample track facilities, being situated on the Des Moines Union Railway, the belt, or transfer line, which is operated in connection with every railway and interurban line entering the city.

The new mill is constructed of reinforced concrete with every fireproof construction known to milling science, including steel elevators and spouting. The machinery is all steel-frame construction, including the "Super Type" Double Roller Mills of cast iron and steel.

The exterior presents an imposing, attractive and genuinely refined appearance, being pure white concrete trimmed with Kansas red pressed brick and Bedford stone. Large wired-glass windows admit abundance of sunlight and ample provision has been made for ventilation. Mazda lights throughout the entire building make the night run as pleasant and as efficient as the day run. The entire

PROPERTY OF DES MOINES ELEVATOR & GRAIN CO.

interior is finished in white enamel with a grey base board and all metal work is painted with aluminum bronze. Well equipped comfort rooms with shower baths and double individual steel lockers for all employes have been provided. Drinking fountains are located on each floor, while the well-equipped office for the superintendent, the store room and laboratory are located on the third floor.

BAST-FOGARTY MILLING CO.'S PLANT AT DES MOINES, IA.

In addition to the modern mill building one of the most convenient and commodious office buildings has been erected. This office structure, like the mill itself, is also of fireproof construction and is finished and furnished in mahogany.

The personnel of the firm is as follows: J. F. Fogarty, president; Fred Hall, general manager; C. C. Ash, treasurer; A. D. Fogarty, secretary; E. W. O'Meara, T. T. Fogarty and E. S. Stanton, directors.

IOWA PACKING COMPANY.

One of the largest independent meat packers situated in the heart of this great hog-producing state is the Iowa Packing Company of Des Moines. A daily killing capacity of two thousand hogs and two hundred cattle provides an excellent packing house outlet for cattle for feeders of Iowa as well as of adjoining states, as well as for the hog raisers of Iowa. There are no terminal charges to shippers at Des Moines, no charges for yardage or extras of any description; the shipper simply pays the freight from his station to Des Moines. A great saving on freight is effected for shipper through this centrally located packing house, whose business in recent years has grown through good judgment and enterprise, influenced by its favorable location and this growth recently made necessary the erection of a new cold storage building.

The Iowa Packing Company maintains and operates one hundred private refrigerator cars. It has ample private trackage on the Chicago, Rock Island & Pacific and the Union Pacific Railroads, as well as on the Des Moines Union Railroad, the latter connecting the plant with all trunk and branch roads entering Des Moines.

Need of the Hour.

"While I would not sound a note of alarm, it seems to me that the outlook in this section of Georgia is one that ought to cause serious reflection," says Chas. B. Lewis, president Fourth National Bank, Macon, Ga. "Practically all of our agricultural crops are far below normal. Exceptionally bad seasons and insect pests have done a world of damage in Georgia this year. The cotton crop in all the country south of Macon will be less than half the usual size, and if low prices prevail, the outlook for the winter is not roseate.

"Briefly, my thought on the present situation may be summed up in this way: We need less agitation, less idleness, less reckless spending, and more work, a tremendous increase in production, and more conservatism in money matters."—*The Fourth National Review.*

CONTROL OF TRADE IN ENGLAND.

"Not until there is a free market for wheat all over the world—a happy state of things that is still probably well ahead of us—can British millers expect to come into their own again," says the London Corn Circular. "When the grain trade is once freed from its present shackles, and firms rich in past experience and well-provided with the sinews of war, are again at liberty to do their best for themselves and therefore for the public, then can we expect to see the best wheats and the flours the baker recognizes as his best friends, making their way in a steady stream into our ports. A necessary correlative of that ideal, to be realized, we trust, in the sweet by-and-bye, is, of course, the restoration to traders of the British merchant fleet. But that will come in time, though the waiting for it may be weary work. Not forever will officialdom have its hand on 70 or 50 per cent, or whatever is the right figure, deadening clasp on our shipping. Not forever will the miller buy a parcel of the wheat for which his soul longs, only to learn when his ship is within measurable distance of Tilbury docks, that it cannot come home because it has been diverted elsewhere. We shall some day be freed from the present incubus, and it lies with all traders to hasten as far as possible that happy day."

THE GLOBE COMBINED DUMPS.

With the rapid development of the automobile truck it is becoming increasingly important that every grain elevator be equipped with a power dump that will handle this vehicle as well as a farm wagon or sled. Such a dump is the Globe Combination Auto-Truck and Wagon Dump, manufactured by the Globe Machinery and Supply Company of Des Moines. The Globe Dump can handle all forms of vehicles because it is constructed in two sections (one dump within another), either of which can be raised independently, simply by shifting the tilting power cylinder. Thus the front section of the platform dumps auto trucks while the rear section dumps wagons and sleds.

One of the strong points of this dump is its possible adaptability to all kinds and conditions of grain houses, for the compressor which supplies the air may be placed at any desired point in the elevator—anywhere "from basement to cupola."

"The Globe" appeals to practical elevator men instantly because of the simplicity of its construction and operation, just an air cylinder, air tank and tilting power cylinder, with necessary connections—no gears, sprockets or chains. This dump eliminates ordinary drudgery of dumping by hand power, or the manipulation of the machinery of the ordinary dump; it can be maintained at a minimum cost and is absolutely safe.

It is operated by a single cylinder, on a cleverly designed base. The cylinder is centrally located under the dump platform, and can be tilted backward or forward in such a manner that the piston rod will engage the socket bearing of the truck section or wagon section of the platform at will. This cylinder is sufficiently powerful to dump any truck or wagon load of grain that may be drawn into your elevator. The air compressor can be installed at any point desired.

The air tank is of such capacity that sufficient air can be stored therein to fill the pit with grain, and the same power that elevates the grain can be utilized to recharge the tank. O the strongest points of this dun that the user does not have to sta machinery to manipulate the dump problem is solved by the storage This tank can be placed anywhe sired, inside or outside the bui and connected with compressor three-fourths inch pipe and to t power with one-fourth and three-ei inch pipe.

This dump is very simple to op If a truck is to be dumped, simply the vehicle on the platform, cha rear wheels, throw the tilting pow inder into position to engage bearing of forward section of pla and open-air valve to let air in cylinder. The platform can be or lowered as fast or slowly as de This is accomplished by the ope of two valves,—open the inlet va raise platform,—close inlet valv open outlet valve to lower platfo

If it is a wagon or sled one wis dump, drive the vehicle load of gr the platform, shift the tilting pow inder to engage socket bearing rear section of platform and proc the same manner as for the truck member, you don't have to unhit tugs, and all the precaution nec to take is that you must be sur the tilting power cylinder is und platform you desire to raise. dumping, stop the vehicle so th end is in position over the pit turn on the air and raise the fro to the proper dumping angle, tu the air and hold until empty, l air and lower to normal positi any speed desired.

The operation of "The Globe" trolled from the work floor. On can do the weighing and the ope of the dump, as that is all the required in its manipulation.

As to installation, any carpent can use a hammer, saw and lev install a Globe Dump, it bei straight plank and timber work sections riveted on a single shafting. Furthermore, the sa and door can be used that you h your old dump. A very strong too, is that installation can be on your scale if desired, as it do interfere with the weighing.

Feeders Running Short.

Sheep trade does not show change. We believe the situati very good on choice killers and depends on the country as to wh feeders will bring. They look worth the money compared to th

PLANT OF THE IOWA PACKING CO., DES MOINES, IOWA.

fat stuff is selling and one thin is anybody who wants feeders get in and get them during the thirty days as we believe the ru be practically over by that time attribute this to advices we get the West that Idaho is practicall ped out now, as well as Orego Washington, and the bulk will h come from Montana and Wyomin as Colorado will buy what feed wants from Wyoming, and M has shipped probably 50 per cent up to the present time than ev fore, they will run out of shee lambs sooner. They were compel get rid of them early on acco drouth conditions. Therefore advising you if you want to buy

SHORT HAUL—QUICK RETURNS

Just what all grain shippers are after.
The Western grain trade will find their answer to this demand for quick returns made possible by the short haul through

DES MOINES

The geographical advantage of Des Moines, located in the heart of the World's greatest grain and live stock country, with a network of transportation lines tapping your territory, provides a market which should be to your liking.

Des Moines has OFFICIAL FEDERAL INSPECTION AND WEIGHTS for grain, hay and feed.

DES MOINES HAS MILLS AND INDUSTRIES consuming large quantities of corn, wheat, oats, flax, hay and feeds.

Des Moines has MILLING AND TRANSIT RATES to Southern and Eastern markets and our members know when and how to handle such shipments.

In soliciting consignments and offers of grain and live stock, as well as shipments for Eastern and Southern trade, we offer the services of a terminal market and an established Board of Trade, with a live membership list, composed of firms that keep closely in touch with trade conditions,

Membership of the Des Moines Board of Trade:

Ankeney Linseed Mfg. Co.
Associated Packing Co.
W. H. Bartz & Co.

to get in and get them while the getting is good.—*The Knollin Sheep Commission Co., Chicago.*

TAYLOR AND PATTON COMPANY.

The Taylor and Patton Company operate a terminal elevator of two hundred and fifty thousand bushels capacity, and do a general grain distributing and merchandising business.

They have a large trade for corn and oats throughout the South, and have become an important factor in securing

C. H. CASEBEER,
Manager, Taylor & Patton Co., Des Moines, Ia.

for the country grain shippers in the Des Moines territory the very highest market values for their grain.

They also give special attention to wheat and have been very successful in finding the most advantageous markets for the peculiar quality of wheat produced in this territory.

The Taylor and Patton Company are the private wire correspondents at Des Moines for the Updike Commission Company of Chicago and Omaha, thus having the advantage of constant wire communication with those markets that enables them to give the best possible service and quick action in any grain trade transactions that may be offered to them.

Corn, oats and provisions remain under the influence of labor troubles, excess European credits, Federal cost restrictions and the general world decline in buying ahead. There is further talk of farm combines to hold foodstuffs but this campaign looks unimportant—trival. If there be a long steel strike, it might affect 10 to 20 per cent of the U. S. population and become bearish on provision uses.—*Jos Wild, with E. W. Wagner.*

MR. FLESH RETURNS FROM EUROPE.

Edward M. Flesh of St. Louis, who has been in charge of the London office of the United States Grain Corporation since last January and in that capacity supervised the distribution of supplies sent by the corporation for the work of the American Relief Administration throughout devastated Europe, returned to New York yesterday on the La France.

"All Europe looks upon America as a big brother," declared Mr. Flesh upon his arrival. "But the continent is bankrupt and still further methods of assisting these nations to get on their feet must be devised. My belief is that it has not been borne in as yet upon the minds of the American people the terrible sufferings that Europe has experienced. Before I sailed for home I made a trip through France, Belgium, Germany and Holland. In some of these countries most of the crops have been good. They have sufficient breadstuffs for the moment, but in other sections they are very short of foodstuffs and America will have to provide help for some time to come.

"Only recently people in some of the northern countries of Europe have been entirely without wheat and lived upon ground cattle food mixed with oats. In the near East as late as last May because of the need of meat, they lived upon dogs and cats, even horses in some instances. We have photographic evidence to prove that in certain cities if a horse fell on the streets it immediately attracted a crowd, desperate to secure the meat.

"Probably no other one thing has so endeared America to the nations of Europe as the supplementary meals which Mr. Hoover devised for the rehabilitation of undernourished women and children, which provide them with milk, cocoa, the necessary bread and other essential nourishment. This is the only organization now left in Europe to take care of the women and children.

Discussing the operations of the Grain Corporation abroad, Mr. Flesh declared that the total tonnage of all commodities used in relief work approximated 4,000,000 tons including breadstuffs, rice, beans, peas, meats, milk, cocoa, sugar and clothing distributed by the American Relief Administration, the Grain Corporation expending $60,000,000 a month for six months. Ships employed in transporting foodstuffs numbered over 360 including those chartered by the corporation in moving cargoes from port to port.

"The Grain Corporation staff in London and our various European agencies numbered about 150 men." said Mr. Flesh. "Most of them were volunteer workers assigned from the United States Army and Navy by General Pershing at the request of President Wilson to carry on the work of Mr. Hoover. Of the relief given countries abroad 75% came from America. The Grain Corporation operated through different ports such as Danzig, Hamburg, Copenhagen and Rotterdam for the North; Trieste and Ragusa on the Adriatic and Saloniki, Tilfis, Constantinople, Batoum and Constanza on the Mediteranean. At Danzig most of the shipments went to the Poles and we also operated through Hamburg for the Czechs.

"All of the countries abroad are now anxious to start their industries as rapidly as possible, believing that this will restore prosperity and kill Bolshevism which has been gaining ground so rapidly. France is very short of sugar, England has resumed her rationing system and all Central Europe has a disturbing coal situation. All of these conditions must be remedied by some sort of direct aid before Europe can be on her feet again."

Mr. Flesh was Second Vice-President of the Grain Corporation with headquarters at St. Louis at the time he ceived a call from Mr. Hoover on cember 29th to take charge of the L don office. He sailed on January 4 reaching London January 10th. his departure from England Mr. Fl received decorations from Siberia, F land, Belgium and other foreign g ernments. He will devote the n few months to closing the accounts the London office and making the fi report to Mr. Hoover as Director-G eral of the American Relief Admi tration. He will continue to act Treasurer of the Grain Corporation til it terminates its activities on Ju 30th.

TAYLOR & PATTON TERMINAL ELEVATOR, DES MOINES, IA.

ANNUAL CONFERENCE OF TE MINAL WEIGHMASTERS.

The Annual Conference of Termi Weighmasters and the committee grain weighing of the National Sc men's Association was held at Planters Hotel, St. Louis, on Sund Oct. 12. H. A. Foss, weighmaster the Chicago Board of Trade presid

The program included the follow subjects, viz.: (1) "Dust Collect their Functions." (2) "Capacity of H per Scales." (3) "Proper slope for ceiving garner bottoms." (4) "E draft weighing." (5) "Sweeping clean." (6) "Trapping grain in scal (7) "Preventing mistakes in record weights." (8) "Adequate light in we ing grain and inspecting cars." "Is it feasible to post older type elevators having substantial bin c bing supporting hopper scales?" "Supervising team track weights." "Promiscuous breaking of scales." "Grain tight loading spouts." "Manlifts or passenger elevators grain elevators."

DUST COLLECTORS.

Mr. W. E. Thompson, supervisor scales, state of Minnesota, presen a paper on dust collection and a d ing showing a plan of disposing the dust originating in discharging grain from elevator head to garner scale hopper without the use of tion system whereby the weight of grain would not be affected. He phasized the necessity of elimina the dust as a health provision requ by the employes and also as a fire hazard.

H. L. Goeman, chairman of the S pers and Carriers Joint Committee present and participated in the gen discussion and rendered valuable sistance in advising of the attitud his committee in matters that rel to the "Loss and Damage" case 9009 and the probable ruling of th terstate Commerce Commission in connection, which will probably be dered within the next month or tw

Weighmasters of the principal minal markets of the country present and expressed themselves oughly in the interest of impro weighing conditions at terminal kets.

Some Remarks on Corn.

Considerably less is being said days about the high cost of living. consumer has failed to receive any cial benefit from the agitation p ganda, whereas the farmer and co dealer have been the real suffe With wheat selling far above the anteed price, with labor as high as and strikes the most popular pastim seems illogical to expect corn pric descend to materially lower levels.

Sales of new corn for deferred ment have been heavy. Montana North Dakota have been in the m recently and purchases were sai have been made for later shipm

General business conditions do warrant lower corn values, espe with no notable declines in other modities. In the absence of any rial hedging pressure the marke comes easily over-sold. The shar coveries of the past are a result o over-confidence of the local bear ment.—*Simons, Day & Co., Chicago.*

Movement of Corn.

Weekly Linseed Review.

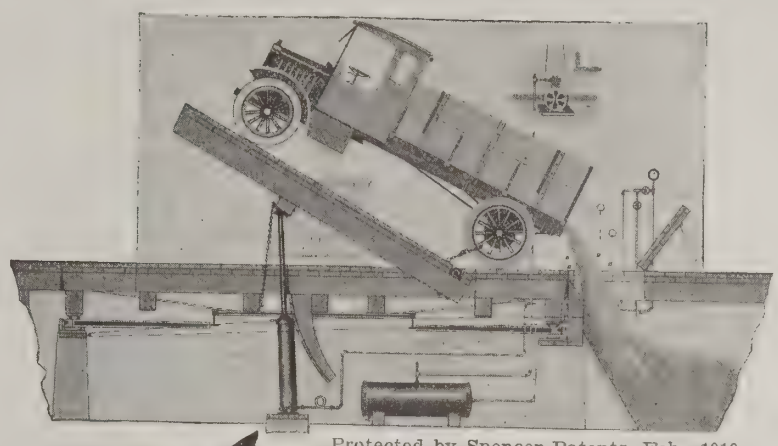
n Kingdom.—The linseed situa- s turned steady. Indian seed n affected by the increase in ntal enquiries. United Kingdom however, appear to be holding Business, on the whole, has been rather small. The demand for linseed oil shows some improvement and a fair trade has been passing at advancing prices.

India.—Arrivals at the ports during the week were light, but it is believed old reserves are still of fair proportion. The agricultural outlook can be considered good, as the weather has been favorable for new seedings. However, in the Punjab some rains are needed.

Argentina.—The new crop option holds firm. There has been large speculative buying of this delivery, and both America and Continent have also been absorbing moderate quantities of the February option. Crop conditions continue favorable and the outlook is excellent. Weather has turned favorable. Old crop seed supplies appear to be decreasing rapidly, and there is less pressure of offerings in evidence. Port conditions are still bad and in addition, there are some fears of a port strike. Railway conditions show no apparent improvement, and the movement of seed from the interior is still on a disappointingly small scale.

The cranberry crop of Wisconsin is estimated at 560,000 barrels vs. 350,000 barrels a year ago. We can still have cranberry sauce for Thanksgiving turkey.

Next Crop Report.



The Price Current-Grain Reporter crop report for next week, Oct. 22, will cover soil condition, condition of new corn with reference to frost, and condition of the hog crop with reference to cholera.

Price Guaranty for Victorian Wheat.

Trade Commissioner Ferrin, at Melbourne, Australia, states that the Victorian government guarantees 5 shillings ($1.21½) per bushel for the growing wheat crop.

Can You Dump All Rigs on Your Scale?

Protected by Spencer Patents, Feb., 1919.

—install a Globe Combination Auto-Truck and Wagon Dump and you can.

WHAT are you going to do when an auto-truck load of grain comes to your elevator? If you can't dump it you may lose a good customer. You can't afford to be without an auto-truck dump, neither can you afford to buy one that won't handle both trucks and wagons, or one that you can't install in connection with your scale.

The Globe Combination Auto-Truck and Wagon Dump will unload either automobile truck, farm wagon or sled. It can be installed in connection with any standard make and size of scale or independent of the scale if desired.

The Dump Platform is in two sections, either of which can be raised independently of the other, by simply shifting the tilting power cylinder either forward or backward and opening an air valve.

The compresser which supplies the air and the tank in which it is stored may be placed anywhere in the elevator—on the work floor or even in the cupola. They need not be placed together if it is more convenient to arrange them otherwise, as the air is easily piped from compressor to tank and then to power cylinder no matter how the three may be located.

Manufactured by

Globe Machinery and Supply Co.

205-211 W. Court Ave., Des Moines, Iowa

—it's the tilting power cylinder

—simply shift it forward under the truck section to dump auto-trucks or rearward under wagon section to dump wagons and sleds—it fits any make or size of scale

GERMANY'S FOOD SUPPLY

An English Official Report on the Condition of the German Population as the Result of Food Scarcity—The Moral and Physical Reflex

"The German population is no longer in a condition to stand such a food shortage as occurred in the winter of 1916-17. It would thus seem that Germany stands face to face with a catastrophe which may involve the death of millions by famine and disease unless she can obtain by importation sufficient food to make up her deficit."

This alarming quotation is not taken from a sensational pamphlet, but from a government white paper, a "Report on Food Conditions in Germany," by Dr. Ernest H. Starling, with memoranda on Agricultural Conditions by A. P. McDougall, Chief Livestock Commissioner for Scotland, and on Agricultural Statistics by C. W. Guillebaud. In a prefatory note Dr. Starling states that two visits were made to Germany in order to make investigations, the first to various towns in the occupied territories, and the second to Berlin and Kattowitz in Upper Silesia. It is pointed out that the places visited are especially favorably situated as regards food supplies. Berlin for political reasons has always been treated well by the food authorities, and Kattowitz can obtain extra supplies from its proximity to Poland. In the occupied districts the average ration has been raised by 20 to 30 per cent, either by importation or out of army stocks. Factories and warehouses, farms, public kitchens for middle and working classes, hospitals, out-patient departments, children's homes and schools were visited. Private dwellings, where the head of the family was in work and of good character, were entered, but slums were purposely avoided. At all these places no difficulties were raised, and any questions, however intimate, were willingly answered, and Dr. Starling was allowed to strip and examine the children. The report is therefore of far greater value than the impressions of visitors derived from cursory observation to which we are generally treated.

Before the war about 85 per cent of Germany's food consumption was produced at home, and the average daily caloric value of the food consumed was 4,020, as compared with 3,800 in France, 3,410 in the United Kingdom, and 3,130 in Italy. But although Germany was almost self-supporting, as far as food was concerned, the cessation of the import of chemical manures and diversion of ammonia and nitrates produced in the country to the manufacture of explosives had a very serious effect upon the food supply, while there was great difficulty in attaining an equitable distribution of the foods actually available. As the bulk was obtained from large and small farms an extremely complicated organization had to be set up for distribution and rationing, and the food producer has been well off in comparison with the inhabitants of the larger towns and industrial areas. Until Easter, 1916, however, "the food supply of the population, as a whole, was not much inferior to that obtaining before the war." The winter of 1916-17 is acknowledged by all to have been the time of the severest scarcity during the war. The weight of the population rapidly diminished on the starvation diet. "On an average it may be asserted that during this time that part of the population who were not producers, and who were not given specially favorable treatment, such as workers in munition factories, etc., lost from 15 to 25 per cent of their previous weight." In June, 1917, wheat was obtained from Roumania, and the bread and meat rations were both increased. "Since that time the rations have been just sufficient to keep individuals alive, but it has never been possible to make up again the great loss in the physiological capital of the nation which occurred in 1916-17."

The food shortage has resulted in a large amount of illicit trading and the farms are said to have made very large profits. For example, a large amount of milk which should pass into general circulation to be distributed among the children of the great towns is kept back for conversion into butter to be sold at high prices. The following table of average prices, in marks per kilogram, in illicit trade makes profiteering in this country seem a very mild affair:

Article.	Average illicit price.	Legal maximum price.	Average price. April, 1914.
	——March, 1919——		
Bread	2.45	0.54	0.29
Flour	7.11	0.67	0.36
Potatoes	0.81	0.24	0.07
Sugar	10.10	1.06	0.47
Beef	16.76	4.89	1.80
Pork	26.75	3.83	1.75
Milk	1.93	0.54	0.21
Butter	49.00	10.94	2.79
Eggs, each	1.15	0.53	0.08

It is still possible to feed in the same way as before the war, but it costs ten times as much, and the poorer classes are unable to supplement their rations in this way owing to the high prices demanded. "Under present conditions the rations, with other food obtainable, are sufficient to maintain the population at their diminished weight, provided that no strain is thrown upon their constitutions, either by work or by infection. But their powers of resistance are reduced to a low ebb, and we should expect them to become easily the prey of any infectious disorder that may be prevalent, and especially of the omnipresent germs of tubercle and pneumonia." The official statistics show the following increases in the civilian death rate on the number to be expected from pre-war statistics: 1915, + 9½ per cent; 1916, + 14 per cent; 1917, + 32 per cent; and 1918, + 37 per cent.

Three years on a diet insufficient both as to quantity and quality, indigestible, tasteless, and monotonous, has not only resulted in reduced output and efficiency, but has had a marked influence on the mentality of the nation. "We found no spirit of resentment among the workmen we spoke to, but simply a condition of dull depression and lassitude. Nor was there any sense of shame at defeat or feeling for national dishonor . . . . the feeling of German nationality, which had been created and fostered with such great care during the last 50 years by the rulers of Germany, seems to have entirely disappeared." Business men seem "hopeless and despairing," and are sending their capital out of the country. "The impression we derived is that the nation of Germany is broken, both in body and spirit. . . . . Several years and a large expenditure on concentrated foods and manures will be necessary before the productive state of the land can be brought to its previous figure; but even assuming these most favorable conditions, and that Germany is treated by the world as a sick child to be nursed back to health, it will take one and perhaps even two generations before she can recover her previous efficiency. After that, whether she is a danger or not to Europe depends on her government. Her docile and industrious people are, at any rate, sickened of war, and represent no longer any active menace to the peace of Europe."

The next harvest is expected to be still poorer than in any of the previous years, and under the peace treaty it is estimated that Germany loses 20 per cent of her production in food and 12 per cent of her population. The daily amount available is expected to be 2,242 calories per head as against 2,433 in 1917-18 and 3,215 in 1912-13, and it will therefore be necessary, if Germany is to be restored to a condition in which she can put forth her total working capacity, to import food amounting to about one-quarter of that normally imported by the United Kingdom. Payment of reparation demanded by the Allies can only be successfully obtained by restarting the "highly efficient organization, human and material, which made Germany so successful as a producing concern," which is still intact but paralyzed by lack of working capital. This can only be done by the provision of capital which should enable the Allies to acquire control over German productive activities, and to obtain the maximum amount possible towards the sums due for reparation. During the next six months Germany can live on the product of the harvest, but industries must be restarted in order to pay for the import of food necessary in the latter half of 1919-20 by the export of manufactured products.—*London Economist.*

Weighs same weight per discharge on all grain—

To give you accurate everyday knowledge of the exact amount of each kind of grain that passes through your elevator.

Fairbanks, Morse & Co.
MANUFACTURERS CHICAGO

Corn in Primary Markets.

Receipts of corn in eleven primary grain markets from Nov. 1, 1918, to Oct. 11, with comparisons with 1917:

	1918-19.	1917-18.
Chicago	63,225,000	93,619,000
Milwaukee	6,891,000	12,025,000
Minneapolis	6,740,000	16,482,000
Duluth	25,000	181,000
St. Louis	19,658,000	24,520,000
Toledo	1,157,000	2,558,000
Detroit	1,677,000	4,060,000
Kansas City	16,343,000	30,723,000
Peoria	19,251,000	34,893,000
Omaha	22,190,000	45,296,000
Indianapolis	16,248,000	19,667,000
Total	173,405,000	284,024,000

Receipts of corn the past week at primary markets, compared with the preceding week and corresponding week last year:

	Oct. 11, 1919.	Oct. 4, 1919.	Oct. 12, 1918.
Chicago	832,000	1,027,000	2,962,000
Milwaukee	43,000	64,000	97,000
Minneapolis	71,000	48,000	336,000
Duluth	.....	.....	.....
St. Louis	227,000	212,000	427,000
Toledo	13,000	17,000	33,000
Detroit	27,000	17,000	116,000
Kansas City	102,000	95,000	198,000
Peoria	378,000	362,000	451,000
Omaha	193,000	192,000	537,000
Indianapolis	147,000	196,000	382,000
Total	2,033,000	2,230,000	5,539,000

The Bureau of Foreign and Domestic Commerce states that exports during August amounted to $646,000,000, $76,000,000 more than in July. For 8 months ended with August exports valued at $5,275,000,000. August imports amounted to $308,000,000, and for 8 months ended with August amounting to $2,263,000,000.

Movement of Wheat.

Following is a statement of the receipts and shipments of wheat at primary markets of the West for weeks named:

Week of—	Receipts. Final 00 omitted— 1918.	1917.	Shi 1918.

The Letter Box

Bought Grain Elevator.

Price Current-Grain Reporter: Gilbert & Co. of McGregor, Ia., have bought the elevator here from W. R. Fleming. The business was formerly the Western Elevator and Grain Co.—*C. Albee, Agt., Dolliver, Ia.*

No Elevator Running.

Price Current-Grain Reporter: There is no elevator here not doing much just now. We have no wheat to sell and the corn is not quite ready. The hay business is rather dull.—*J. S. Ewick, Hedon, Ill.*

New Elevator Built.

Price Current-Grain Reporter: The Huntington Equity Union has built an elevator, warehouse and coal sheds this year which were completed in July. The plant is located on the Wabash road.—*Huntington Grain & Coal Co., Huntington, Ind.*

Wheat Guaranty End.

Price Current-Grain Reporter: Can you inform me when the Government guaranty on wheat expires? My recollection is it is June 1, but some say June 30. I cannot find a copy of the law as passed by Congress and if you can engage me, I will be obliged.—*E. G. Holen, Milwaukee, Wis.*

[The Government guarantee on wheat expires June 1, 1920.—EDITOR.]

Corn Drying Slowly.

Price Current-Grain Reporter: The rainy weather has not tended to cure up the small proportion of the crop to be shucked. Many farmers prefer a good hard freeze on their corn standing in the field before gathering and putting it into the crib.

We hear of but a very limited amount of new corn having been sold as yet by the grower; in fact, the Eastern consumer, so far has been a better buyer than the grower a seller.—*H. I. Baldwin & Co., Decatur, Ill.*

Corn Good Quality.

Price Current-Grain Reporter: The corn in our territory is of exceedingly good quality this year—solid on the cob, and will yield better than the ten-year average. A sample brought in from Butler county, Nebr., which appeared to be an average of a field, showed 24.10% moisture. However, with a frost last night and bright, sunny weather today, Oct. 11, makes us think corn in this vicinity will be dry enough to crib within a month. We think it will grade in No. 3 or better.—*Blanchard Grain Company, Blanchard, Omaha, Nebr.*

Eradicating Weevil.

Price Current-Grain Reporter: I have just recently discovered that I have weevil in my wheat that is in my elevator. Is there any way that they can be destroyed? I have at some time seen a receipt for killing them, but did not save it, so have no idea now what it was. If you know of any remedy, kindly let me know.—*A. S. Mawhinney, Tahboro, Ia.*

[Weevil in wheat may be eradicated by the use of carbonbisulphid. However before using this product, one should become thoroughly familiar with the handling of it, as it is dangerous if not properly used. Grain dealers may write the Division of Publications, U. S. Dept. of Agriculture, Washington, D. C., for Farmers Bulletin 799, which will tell how to handle and use carbonbisulphid, the gas from which is poisonous and explosive.—EDITOR.]

Building Mill—Alfalfa.

Price Current-Grain Reporter: The Gibbon Roller Mills are building a fine new concrete and steel flour mill here with grain bins of the same material and rushing work as fast as possible.

J. P. Gibbons and Co., of Kearney, are contemplating building a 200-bbl. flour mill at Kearney in the near future.

The alfalfa mills in this vicinity are not running much on account of the high cost of alfalfa or low price of meal. The people who raised the alfalfa have made more than all there was in it for two years now. People who bought it to feed have not made money, as a rule, and there has been very little profit in grinding.

The Government reports twice as much hay in the state as last year and whether the present state of affairs is going to continue remains to be seen.—*E. J. Woolworth, Gibbon, Nebr.*

Haying in Pecos Valley.

Price Current-Grain Reporter: The fourth and last alfalfa crop in the lower Pecos Valley has not been cut and baled. This ought to be done now but for the last three weeks we have had a number of rainfalls. Hence, the harvesting of alfalfa has been delayed. It started to rain again yesterday morning (Monday, Oct. 6) and rained all day and night.

The cotton gins, four of them in the lower valley, have been very busy and a great number of bales were shipped out to different markets. Alfalfa and cotton are the two leading crops grown in the lower valley. A large cotton gin was recently built in Otis, N. M., by the farmers and also one in Malaza, N. Mex. Carlsbad has a gin also and is doing good business. There is a gin in Loving, N. Mex., also these are all on the Sante Fé line. All these points take the same freight rates. —*Lange Bros., Carlsbad, N. Mex.*

Roumanian Wheat Crop.

According to official data prepared by the Department of Statistics at Bucharest, the extent of the wheat sowing for this year was 2,964,000 acres for the old Kingdom of Roumania—or about 60½ per cent of the surface devoted to this cereal in normal times.

The crop in general was good and may be estimated, on an average, at 44.8 bushels per hectare (2.47 acres), which makes the total production more than 145,000 "carloads." After deducting from this figure about 40,000 carloads necessary for the next autumn sowing, which will cover a much larger extent of land, and about 60,000 carloads required for feeding the population, it is quite probable that there will remain about 50,000 carloads available for exportation, without counting the excess available in Bessarabia, where the crop has been very good.—*L'Economist Europien.*

When You Are Shipping Grain —

Oats in Primary Markets.

Receipts of oats in eleven primary grain markets from Aug. 1, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	25,547,000	39,098,000
Milwaukee	7,420,000	10,540,000
Minneapolis	5,977,000	11,682,000
Duluth	326,000	1,191,000
St. Louis	5,536,000	6,616,000
Toledo	1,014,000	3,646,000
Detroit	543,000	1,211,000
Kansas City	2,079,000	6,246,000
Peoria	1,721,000	3,053,000
Omaha	2,422,000	5,932,000
Indianapolis	3,315,000	4,715,000
Total	53,903,000	93,934,000

Receipts of oats the past week at primary markets, compared with preceding week and corresponding week last year:

	Oct. 11, 1919.	Oct. 4, 1919.	Oct. 12, 1918.
Chicago	832,000	2,076,000	2,032,000
Milwaukee	43,000	376,000	750,000
Minneapolis	71,000	546,000	1,189,000
Duluth	.....	5,000	342,000

News of the Terminal Markets

RICHMOND, VA.

Aubrey Hawkins, Correspondent.

Business this week on feeds was very good, but grain has been rather slow.

Hay, while being held firm by western shippers, is being sold at reduced prices on track.

The dry spell in Virginia has not been broken. We have not had a rain for about two months.

Pastures are dry, creeks are dry, wells are drying up, and the situation is becoming serious.

The Virginia State Fair closes a week's run today, Oct. 11, having had a record attendance. However, the extremely hot weather occasioned the death of some very fine hogs, sheep and cattle.

Prices quoted to arrive, basis yesterday's close, about as follows: No. 2 white corn, $1.55@1.56; No. 2 white oats, 77@78c; No. 3 white oats, 76@77c; No. 2 white oats 76c; No. 1 timothy hay, $32; No. 2 timothy hay, $31; standard middlings, $47@48; reddog, 100-ds., $67@68; bran, $40@42; 38.62% CS meal, $70@71.

DES MOINES.

A. McArty, Correspondent.

As you all know, the "World's Series" has finally come to a close, and in fact has had quite an effect on the nerves of some of our prominent grain men here, for instance, the manager of one of our largest concerns has today returned to his desk, after being under the care of a physician.

Following are the receipts in this market the past two weeks in cars:

	Oct. 11.	Oct. 4.
Wheat	48	37
Corn	52	30
Oats	89	102
Flax	19	8
Barley	5	3
Mill feed	17	14
Hay	27	29

The following visitors called this week: W. H. Perrine of W. H. Perrine & Co., William Simons of Sawers Grain Co., M. L. Vehon of M. L. Vehon & Co., H. A. Rumsey of Rumsey & Co., and F. E. Abby of Wilson & Co., all of Chicago; F. W. Shepard of Gee Grain Co., Minneapolis; V. H. Benjamin, Atchison, Kas.; Walter Fowler of Inspection Department, Omaha; Dr. F. A. Fenton, Assistant Chief in Etomology, Ames, Ia. Country dealers—J. A. Hale, Collins, Ia.; J. F. Manning, manager, Farmers' Elevator, Granger, Ia.; Roy Johnson, manager, Farmers' Elevator, Alleman, Ia.; J. A. Stokely, Woodward, Ia.; H. C. Lounsberry of Lounsberry Bros., Colo, Ia.; Ed. Wagner of Wagner Bros., Ankeny, Ia.

SIOUX CITY, IA.

Paul Larson, Correspondent.

C. C. Morris, of Lincoln, Nebr., has made application for membership to the Board of Trade.

The Farmers' Terminal Elevator Co., Sioux City, have made application for membership to the Board of Trade.

The Western Terminal Elevator Co. expects to have their tanks completed by October 20th. This will give them a storage capacity of 500,000 bushels. The work house will not be completed until about the 15th of November.

The board of directors of the Farmers' Terminal Elevator Co. met the first of the week in the Grain Exchange building. Matters pertaining to the building of the Terminal elevator at Riverside were taken up and construction of same will commence immediately. Among those present at the meeting were the following: J. J. Gill, president; C. P. Downing, vice-president; A. P. Solberg, secretary; R. N. Rawson, treasurer; C. F. Corr, E. M. Parry, Chas. Frick, Willard Sanders, R. B. Pollock, C. W. Felton, E. B. Kast, G. Harter, J. F. Gamerdinger, J. H. Roghair, F. M. Meyer, H. G. Solem, A. Mathiesen, A. O. Tuntland, Chris. Sandvig, P. J. Baadte.

F. R. Warrick, Jr., will, on Nov. 1, take over his desk as assistant general manager of the Terminal Grain Corporation. Much has appeared in this column regarding this proposition with an elevator of 1,000,000 bushels, capital stock of $2,500,000 and the favorable proportional freight rates under which Sioux City trade is now working. The name of Warrick has been identified with activities in Western markets for many years and F. R., Jr., should continue the activities of his father, who is as active as ever, directing the affairs of the Terminal Grain Corporation. The two should make a good team. One of Mr. Warwick, Jr.'s first trips will be through Nebraska, Dakotas, Minnesota and Iowa, acquainting the trade with Sioux City's facilities and encouraging business for the market in general and the Terminal Grain Corporation Elevators particularly. He has been in the grain business all of his life, just leaving the Carlisle Commission Co. of Kansas City and previously connected with the Glover business of Kansas City and the Elwood business of St. Joseph.

NASHVILLE.

John Leiper, Correspondent.

Receipts of grain at Nashville last week were 144 cars. Stocks at the end of the week were: Flour, 37,300 bbls.; wheat, 587,000 bus.; corn, 42,000 bus.; oats, 516,000 bushels.

Demand for corn meal continues at a low ebb. Southeastern corn mills with capacity of 147,000 bushels, reported output last week of 10,446 bus., or 7.1 per cent of capacity, which compared with 10.1 per cent the preceding week. Quotations: Bolted meal, sacked, per 100 lbs., f. o. b. Ohio River points, $3.30@3.50; plain meal, $3.15@3.20.

Grain trade was quiet last week. Mills are buying little wheat at present, having their requirements covered, with cash wheat very firm. Corn movement is light. Offerings of new Tennessee corn are expected within two weeks. Oats are in liberal supply, with quiet demand. Quotations: Wheat—No. 2 red, $2.30. Corn—No. 2 white, $1.50@1.60; No. 3 white, $1.53@1.57; No. 2 mixed, $1.50@1.53. Oats—No. 2 white, 76½@77½c; No. 3 white, 76@77c; No. 3 red, 73@74c.

DETROIT.

John Barr, Correspondent.

Frank T. Caughey has returned from an auto trip to Erie, Pa.

Shipments of rye from this point to the East were large last week, but there was not much new buying and the market was quiet at $1.42½ for cash No. 2.

G. A. Collier, Bureau of Markets, was in this city last week consulting with hay dealers. He has in mind the establishing of uniform grades of hay and Government inspection.

Beans were in active demand early in the week and the market was firm at $7.50 per cwt., but later the demand appeared to have been satisfied. Trade became dull and the price declined to $7.25.

The Detroit Board of Trade is represented at the Grain Dealers' National Association meeting at St. Louis by A. S. Dumont, M. G. Ewer, J. A. Jossman, F. E. Emmons, H. E. Botsford and Theo. W. Swift.

Buying of oats for local consumption was active and the market ruled firm. There was not much shipping demand and little was done in that line. The market was steady at 74c for cash No. 2 white, 72½@73c for No. 3 white and 71½@72c for No. 4 white.

The corn market was dull and easy during the greater part of the week. Prices are a little lower, but it is so quiet that the market is not much better than nominal. Receipts are small and stocks very light. Quote: Cash No. 3, $1.48; No. 2 and No. 3 yellow, $1.50; No. 4 yellow, $1.48; No. 5 yellow, $1.47; No. 6 yellow, $1.46.

MILWAUKEE.

Erich E. Meyer, Correspondent.

The Milwaukee Chamber of Commerce was closed Monday, Oct. 13, in observance of Columbus Day.

P. P. Donahue, Hugo Stolley, Wallace M. Bell and E. H. Hiemke represented the Milwaukee Chamber of Commerce at the St. Louis convention.

Receipts of grain at Milwaukee for the week ending Oct. 11 were 176 cars barley, 33 cars corn, 225 cars oats, 133 cars wheat, 38 cars rye; 6 cars flax; total, 614 cars, against 665 cars the week before, 956 cars a year ago and 1,008 cars in 1917.

Shipments of grain from Milwaukee for the week ending Oct. 11 were 356,410 bu. oats, 177,940 bu. corn, 89,180 bu. barley, 25,060 bu. wheat, 39,650 bu. rye; total, 688,240 bu., against 722,340 bu. the preceding week and 748,282 bu. a year ago.

In Milwaukee cash grain easier markets ruled during the past week, due to the bearish Government report indicating a large crop of matured corn of good quality, the unsettled economic situation and transportation difficulties. Barley is 4@5c lower for this period, corn 6@7c, oats 1c and rye ½c, while wheat opened easy, but closed firm. The movement is moderate and the demand fair.

Visitors registering at the Milwaukee Chamber of Commerce during the week included the following: J. R. Leadley, Pewaukee; J. A. Fraser, Racine; E. Pick, West Bend; E. C. Bartl, La Crosse, Wis.; R. B. Lancaster, La Fayette, Ind.; John Pank, R. G. Sims, Minneapolis, Minn.; Louis Hehman, Cincinnati, O.; J. H. Cox, Washington, D. C.; H. Mullins, Indianapolis, Ind.; G. M. Shannon, H. C. Putman, Minneapolis, Minn.; Charles DeSate, A. O. Mason, Chicago, Ill.; J. W. DeGuenther, Atlanta, Ga.; Chas. Nurmerdar, Waupun, Wis.; Albert Pieper, Reesville, M. Michaelson, Deerfield, Wm. J. Lowry, Stoughton, Wis.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

Oats show a falling off of almost 50 per cent, but the supply is sufficient to meet the present demand, which is very light. The market is dull and odds are largely in favor of the buyer. No. 1 white grade is selling around 77@77½c a bushel, with lower grades a cent or two under those prices. Receipts for the last period were only 68,000 bushels and shipments 40,000 bushels.

Shippers of ear corn are advised by local authorities to note that shelling and drying facilities have been greatly curtailed by the destruction of the Central Elevator, which had both shellers and dryer. Since the last period two cars of new ear corn have been received apparently in good condition. But feeders are not ready to take hold, as the weather remains warm, and shippers are advised not to rush the market at this time.

Shelled corn is gradually working to a lower level of values. New corn being low in moisture content, it no doubt will come on the market early. The cost of drying, it is understood, will not be so great this year on account of low moisture content and it is suggested that holders of old corn take this fact into consideration. Shelled corn is selling around $1.56@1.57 a bushel. Mixed corn is 2 cents a bushel under yellow grades.

DULUTH.

S. J. Schulte, Correspondent.

B. Stockman, president of the Duluth Board of Trade and manager of the Duluth-Superior Milling Co., celebrated a birthday last Saturday. Members of the board emjoyed the "smokes" at his expense.

An amicable readjustment was reached on the demand of employes of Duluth elevators for raises in wages. On account of the quiet season, fewer employes are on the pay rolls than usual during the fall months.

Earl M. White of the White Grain Co., Warren G. Starkey of Randall, Gee & Mitchell, W. Mayo of the Duluth Universal Milling Co. and C. F. Macdonald, secretary of the Duluth Board of Trade, are attending the annual convention of the National Grain Dealers' Association at St. Louis, Mo., this week. They went to uphold this market in discussing the important topics on the two days' program.

Operators on this market were afforded good trading in rye during the last week. Substantial eastern inquiry was reported, some of it for export, and vessel space was reported to have been taken for rye to be shipped to Buffalo as soon as the embargo against the movement to the seaboard has been raised. Stocks of rye in the elevators here now aggregate 3,750,000 bus.

Grain men and the elevator interests here are still finding themselves unable to obtain anything like the number of cars required to move grain here from country points, and for shipments of flour and feeds from here to points over the territory. It is admitted that the roads have hundreds of out-of-order cars at their terminals here. The situation is made still more difficult by the policy of the roads to give coal shipments the right of way at present. The Regional Director of the Railroad Administration has issued an order to the effect that all cars must be fully loaded with grain, and drawing attention to the fact that some shippers have been lax in carrying out the rulings in that respect.

The slowness of the grain movement this way so far this fall is illustrated in receipts of only 5,805,347 bushels of all grains at the elevators during September, as compared with 21,328,802 bushels during the same month last year. Marketings of wheat were only 2,394,849 bushels, compared with 19,435,766 bushels last year. A comparatively favorable showing was made in rye, receipts of it amounting to 2,767,237 bushels, against 861,275 bushels last year. For this crop year, from Aug. 1 to Oct. 10, the movement of all grains to this market aggregated 10,125,028 bushels, compared with 32,682,837 bushels up to the same period last year. Stocks of all grains in the elevators here at present amount to 6,930,000 bushels, against 20,641,000 bushels at the same time last year.

BUFFALO.

E. Bangasser, Correspondent.

The Eastern Grain & Elevator Corporation has leased the Evans Elevator. It will be run in connection with the big corporation.

There is a feeling among elevator men that the grain held here will soon start to move and relieve the congested condition at this port.

A car of sample oats testing 22 lbs. sold at 72c this week. This is the lightest weight carload ever offered in this market, according to the oldest traders.

Rye was wanted but the price asked for spot No. 2 seemed to have been too high and no sales were reported. The track receipts here last week were only 1 car and that was No. 4.

There was a good demand for wheat, soft or hard, and with offerings light, buyers were ready to pay an advance. No. 2 red sold mostly at $2.29; No. 3 red, $2.26, and No. 4 red, $2.22 on track, to billed.

Receipts of corn were again short demand and the market did not foll decline in the West, although closg lower than last week. The receipts only one car today and that was s $1.53 for No. 1 yellow, leaving the m bare and a good inquiry at abou price. Buyers, however, would n more as sales in transit were repor $1.50. With no market Monday chances are that there will be enoug Tuesday morning, although dealer they have nothing on the way.

The trade in oats was fairly good days and on others dragged, partl at the close of the market which d a shading in order to clean up. Th were not as interested as a week a other buyers wanted mostly good w for which ¼c premium was occasn paid. On the whole, however, it fairly steady market, the decline f week being ½c. Receipts for today only 3 cars. Closing: No. 1 white, No. 2 white, 75¼c; No. 3 white, 74¼ 4 white, 73¾c on track, through bil

Inspections for the week: Wheat-red, 5 cars; No. 3 red, 11 cars; No. 6 cars; sample red, 5 cars; No. white, 1 car; No. 3 soft white, 1 ca 1 mixed, 1 car; No. 2 mixed, 3 cars; mixed, 4 cars; No. 4 mixed, 5 cars; mixed, 1 car; sample, 1 car; No. winter, 1 car; No. 2 hard winter, 1 No. 3 hard winter, 19 cars; No. 4 winter, 3 cars; No. 5 hard winter, No. 1 dark northern, 2 cars; No. northern, 2 cars; No. 3 dark north cars; sample, 2 cars; No. 1 north car; No. 2 northern, 8 cars; No. 3 non 31 cars; No. 4 northern, 8 cars. Cor 1 mixed, 1 car; No. 2 mixed, 4 cars; mixed, 5 cars; No. 4 mixed, 1 car; mixed, 1 car; No. 1 yellow, 31 cars; yellow, 25 cars; No. 3 yellow, 3 cars; yellow, 1 car; No. 5 yellow, 1 car. No. 1 white, 11 cars; No. 2 white, 9 No. 3 white, 54 cars; No. 4 white, sample, 2 cars.

egation of about 20 members of the City Board of Trade, headed by ry E. D. Bigelow, will attend the convention of the Grain Dealers' l Association, in St. Louis, Octo- to 15. The list stood as follows on y: W. B. Lathrop, Allen Logan, loore, R. H. Sturtevant, Charles W. L. G. Morgan, F. C. Hoose, A. D. on, F. B. Godfrey, E. F. Emmons, eward, E. O. Moffatt, Cort Addison, F. L. Bedell, C. M. Woodward and J. F. McElvain.

The coldest weather of the season struck the Southwest on Friday night, the mercury falling to 36° in Kansas City and 28° in western Kansas. There was a light frost here and in northwestern Missouri, while all but the southeastern corner of Kansas had freezing weather. Heavy rains fell in southern and eastern Missouri and Arkansas. Owing to the advanced stage crop maturity, no considerable damage to corn and other important products is thought to have resulted. Warmer weather followed on Saturday and Sunday.

A report by the Kansas City office of the United States Grain Corporation shows that up to October 3 Kansas farmers had marketed 67,300,000 bus. of wheat. Country mills and elevators held 25,500,000 bus., which suggested that 42,800,000 bus. had moved out of the state or been consumed within it. Minus seed requirements, the crop is figured at 129,733,000 bus. Therefore, the shipments from Kansas in the first three months after harvest were a trifle less than one-third of the surplus. Had cars been plentiful, the story would have been vastly different.

Negotiations are pending between the Kansas City Board of Trade and the Guardian Trust Co. for the purchase of the Board of Trade building, now occupied by the exchange under a lease which runs until January 1, 1925. While figures on the purchase price are not given, a difference of $50,000 between the ideas of buyer and seller is said to exist. Some members are opposed to the purchase on account of the location of the old building, at Eighth and Wyandotte streets. The building was erected by the Board of Trade about 25 years ago, but the exchange lost control and has since been a tenant, the property in the meantime passing through several ownerships.

As rains in the last few weeks have moistened most of Kansas, Secretary J. C. Mohler of the State Board of Agriculture has learned through inquiry that the acreage being sown to winter wheat will be somewhat larger than at first supposed. The seeding will be late in many instances, Mr. Mohler says, and much will be without any preparation of the ground other than clearing off the heavy stubble and drilling in the wheat. Some farmers are disking and drilling, without plowing, owing to the scarcity of labor. In a number of western counties, where grasshoppers cut off the heads of the last crop just before harvest, stands of volunteer wheat are in evidence, and these will be allowed to take the chance of making a crop. In event of a poor showing in fields not provided with a proper seed bed, the ground may be turned to spring crops next year.

Cash Grain Markets.

Wheat—Receipts for the week, 1,078 cars, against 2,143 a week ago and 304 a year ago. The curtailed movement was due chiefly to the car situation, which shows no improvement and is still the source of vigorous complaint, from Kansas especially. While Kansas City mills, shippers and the United States Grain Corporation made some inroads on local stocks, reducing the supply here 108,000 bus., to 15,410,000 bus., several elevator men announced that their houses were full and that they had large unfilled shipping sales, owing to lack of cars. Some hope for improved conditions was based on increased tonnage arrivals at Galveston, but the situation there should have improved last month and did not. The best demand here during the week was for account of local and Minneapolis millers, the latter taking the choicer grades of red wheat. Local millers took most of the dark hard that was offered, and were not amply supplied. The better qualities of hard sold 12@14c higher, the top for No. 1 dark showing a premium of 32c over the guarantee level. Inferior grades were unchanged to 2c lower. Red wheat advanced 2@4c. Prices at the close were as follows: No. 1 hard, $2.22@2.52; No. 2, $2.20@2.51; No. 3, $2.13@2.48; No. 1 red, $2.22@2.24; No. 2, $2.20@2.21; No. 3, $2.14@2.18. The United States Grain Corporation has moved about half of the 5,000,000 bus. of wheat which it was authorized to ship September 4. The total to be moved has been reduced to 4,000,000 bus., and the grain is still going out slowly, directed to northern storage points en route to the Atlantic seaboard.

Corn—Receipts, 83 cars, against 85 a week ago and 127 a year ago. Imminence of the new crop movement and lack of southern demand made a bear market for corn. Only white held its own, being taken by millers. The market closed very weak, with white unchanged to 2c lower, mixed 4@5c off and yellow 1@4c down. Prices were: No. 2 mixed, $1.40@1.41; No. 3, $1.37@1.39; No. 2 white, $1.45; No. 3, $1.42@1.44; No. 2 yellow, $1.43@1.45; No. 3, $1.42@1.43. Most of the sales were made on scattered feeding orders. Stocks decreased 4,000 bus., to 53,000 bus., against 498,000 a year ago.

Oats—Receipts, 153 cars, against 128 a week ago and 51 a year ago. The increased offerings met a good demand for shipment to Louisiana and southern states. Local and nearby purchases were moderate, though elevator men took oats on declines. White oats lost ½@1c, but mixed advanced 1@2c and red sold from unchanged prices to 1c higher. The stocks decreased 1,000 bus., to 1,144,000 bus. A year ago the amount held here was 3,135,000 bus.

Kafir and Milo—Receipts, 33 cars against 24 a week previous and nothing a year ago. A firmer tone was imparted to the market by fears of frost damage to the late por-

Did you get one of those free strokers with all the grain grades printed on it? Yours for the asking.

tion of the crop; also by reports that some dealers here who have been very bearish are short in their sales to the eastern and middle state manufacturers of poultry feeds. While the crop is officially reported to be a record breaker, with 28,204,000 bus. in Oklahoma, 27,514,000 bus. in Kansas and even more than either of these states in Texas, the threshing has been delayed in the southern portion of the belt, and further north it has not begun. Certain dealers here have handled liberal quantities of Texas milo on through shipments, which did not count in Kansas City receipts. There is faith in lower prices, dependent upon the movement in November and December, but with strict relation to the action of the corn market. A price of $1.50 per cwt. for kafir or milo has been predicted, but this means 84c a bushel. As kafir and milo may be rated at 10c discount under corn, the latter would have to sell at 94c and there is no general belief that this will happen. The market for kafir and milo this week advanced 5@10c per cwt., to $2.30 for No. 2 and $2.20@2.25 for No. 3. Some cars arriving here were in a heating condition. Local stocks increased 3,000 bus., to 11,000 bus., against 69,000 a year ago.

SPOKANE, WASH.

J. B. Jones, Correspondent.

The Sperry Mills, J. K. Smith, manager, announces that the new unit which will more than double the present capacity of the big plant on East Sprague avenue, is practically complete. It will start running in early November. The new unit adds 16 more rolls, making a total of 30. The first unit, with 14 rolls, had a capacity of a little less than 1,000 barrels a day. The new unit will make a total capacity of 2,000 barrels. In anticipation of the big winter run, J. K. Smith says that the Sperry mills now had about 350,000 bushels of wheat in the mill and elevator. The company is unloading 12 cars a day now, or about 15,000 bushels. At present the company has about 40 employes on its payroll and the new unit will require the addition of about 20 more.

Julius H. Barnes, United States grain director, arrived in Spokane on Saturday Morning, Oct. 11, and was entertained until Sunday morning. This will be the first trip of Mr. Barnes to the Pacific. The agricultural bureau of the Spokane Chamber of Commerce had an extensive program for the entertainment of the visitor and one that enabled him to meet the farmers and business men of the district. Wide publicity was given to his visit and farmers from all over the Inland Empire were invited to be in the city. Newspapers, bankers and the state college cooperated in spreading the invitation as far south as Walla Walla and into Idaho. The principle features of the day was a luncheon at which the general public, farmers especially, heard Mr. Barnes. The meeting extended over the afternoon to permit the fullest discussion of matters pertaining to the wheat crop. W. K. Newell, representing Max H. Houser, Portland, second vice president of the United States Grain Corporation was in Spokane to arrange for the visit of Mr. Barnes. According to Mr. Newell his trip has two objects: To get in touch with all connected with the grain buyers, farmers, millers and dealers, to present the general wheat situation as the Grain Corporation sees it, and to discuss such problems as transportation. The Spokane visit was largely a meeting of farmers at the request of Mr. Barnes, as he hoped to meet the millers and grain dealers at the Coast conferences.

WESTERN CANADA.

A. Caldwell, Correspondent.

There seems to be an unlimited demand for No. 3 c. w. barley and the barley futures are decidedly strong. Farmers are evidently looking for higher prices for this cereal and much of the barley arriving is going into store. The volume of cash business continues small.

Sales of Argentine flax at reduced prices led to a break here since which there have been partial recoveries. There seems to be considerable speculative trading in flax, and judging the world's requirements against the supply, flax seems certain to sell at a very high price during the next six months.

The weather during the past week has been wet and cold and there were severe frosts in many districts on Saturday. It is probable that potatoes still in the ground would suffer considerable damage. At the the time of writing, weather prospects are improving and an increased movement of all grains is expected after Monday's holiday.

The market seems to have reached a period of uncertainty that is confusing to traders; that is not the constant broad export demand that was expected for oats. Ontario requirements, which will be large in the aggregate owing to the short crop there, do not mean heavy inquiry at any particular time. Receipts are much heavier than last year and the market soon feels the weight of arrivals. It is quite evident that unless there is a broadening of the demand larger country shipments will tend to a further easing of prices. There is expectation that the United States, with a short crop of light weight oats, will not figure in the export field and that the Canadian product will be in demand later. Argentine competition is, of course, a factor that cannot be ignored.

NEW YORK.

J. M. Nugent, Correspondent.

Corn goods remains dull with prices nominal in the absence of business.

Cash corn prices displayed a somewhat heavier tone during the week, but trade was on a very limited scale. No. 2 yellow, $1.56¾; No. 3 yellow, $1.56¼; No. 2 white, $1.56¾; No. 3 white, $1.56¼; No. 2 mixed, $1.55¾, and No. 3 mixed, $1.55¼

Included among the visitors upon the floor of the Produce Exchange last week were Wm. Gardiner, J. A. Rankin, E. H. Goodhart and W. F. Fisher, all of Chicago; also H. Quintel, of Montreal; R. Leverich, of New Orleans, and C. H. Hammond, of Detroit.

Owing to the unfavorable conditions at the port as a result of the strike among the longshoremen, it has become necessary for the Food Administration to discontinue the issuance of permits at the present time on grain and grain products for both export and domestic consumption. This also includes extensions and corrections, etc.

The market here for spot oats has remained about steady, with a domestic demand in evidence. Foreign buyers do not appear to be interested at present levels and no business of importance was reported. Quotations as follows: No. 1 white, 82½c; No. 2 white, 81½c to 82c; No. 3 white, 81c to 81½c; No. 4 white, 80c to 80½c; ordinary white clipped, 81c and fancy white clipped, 83½c.

CINCINNATI.

George Mosbacker, Correspondent.

Sherman Boss, manager of the hay department of The Early & Daniel Co., has returned from a brief business trip to northern Ohio.

The Louisville District Freight Traffic Committee, at its session Oct. 15, will hear requests of the Grain Committee of the Louisville Board of Trade, for revision in the shipping rates on grain from Louisville to Southeastern and Carolina territories, to restore the parity existing prior to June 25, 1918, in the rates as between St. Louis, Cairo and Louisville to these territories.

Robert Montgomery, grain and provision broker, and one of the oldest and most esteemed members of the Chamber of Commerce, died last Thursday at his residence on Paradome street. President Edwin C. Gibbs, of the Chamber of Commerce, has named the following committee to prepare resolutions on the death of Mr. Montgomery: Charles E. Roth, William H. Davis, Nicholas J. Hoban, Andrew Rohan and Michael Ryan.

President Erward B. Terrill, of the Grain and Hay Exchange, upon whom also devolves the important duties and responsibilities for the successful management of the extensive grain business of The Early & Daniel Co., is enjoying a well earned vacation, the first in several years. Mr. H. Lee Early, who relinquished all active participation in the firm's affairs, has been obliged to take charge during Mr. Terrill's absence.

Violation of the pure food and drug law was charged against shipments of "Bourbon Hog Cholera Remedy," which were seized by the local U. S. Marshal at Miamisburg and Xenia, Ohio. The attachments against the drugs were issued on statement of Dr. Frost, government chemist, that false and fraudulent claims as to the curing powers of the remedies are being made for them in the labels and advertisements. The drugs are being manufactured at Lexington, Ky.

The following members of the Cincinnati Grain and Hay Exchange left Sunday night to attend the twenty-third annual convention of the Grain Dealers' National Association, to be held in St. Louis, October 13, 14, 15: A. C. Gale, H. M. Brouse, Joseph Costello, John E. Collins, Jr., Wm. R. McQuillan, E. A. Fitzgerald, H. Lee Early, Lon McGlaughlin and Secretary D. J. Schuh. Chief Grain Inspector George F. Munson will also attend and participate in a meeting of chief grain inspectors of the United States.

Demurrage charges of $10 a day and fractions of days have been ordered by the local Railroad Administrator on shipments held for reconsignment. This order has been made effective October 10, and has particular application in the movement of lumber. The order is defended by the Railroad Administration and the interests backing it, as designed to relieve the car shortage by penalizing the unnecessary detention of loaded cars beyond the forty-eight-hour free time period allowed for their unloading. It is to be effective for so long after October 10 as the car shortage may continue.

RECEIVERS AND EXPORTERS

WHEAT - CORN - OATS - BARLEY

CONSIGNMENTS AND C.I.F. OFFERS SOLICITED

PRODUCE EXCHANGE NEW YORK

Cash Markets.

Wheat—The demand for good wheat from local and nearby mills was brisk the past week, and with offerings of the No. 2 grade comparatively scarce a firmer market prevailed and advances of 1½c were recorded. Lower grades and smutty grain also felt the effects of the strength and ruled higher, and in excellent demand. Values are now well above the basic, with a tendency to further advance. No. 1 red winter, track, $2.29@2.30; No. 2 red winter, track, $2.28@2.29; No. 3 red winter, track, $2.23@2.26; No. 4 red winter, track, $2.19@2.20; No. 5 red winter, track, $2.16@2.18; sample as to quality, $2.10@2.25. Smutty wheat discounted from 2c to 4c per bushel, as to grade.

Corn—There was little demand for shelled corn the past week, but prices remained fairly steady under the abnormally small movement. Only an occasional car of white or yellow was wanted by mills, while mixed was almost entirely neglected. Sales of No. 3 white ranged from $1.45 to $1.48, and No. 3 yellow $1.47 to $1.50, and mixed at $1.46. Offerings of new yellow ear corn sold at $1.20 per bushel. No. 1 white, $1.47@1.48; No. 2 white, $1.46@1.47; No. 3 white, $1.45@1.46; No. 4 white, $1.42@1.44; No. 5 white, $1.40@1.42; No. 6 white, $1.37@1.40; No. 1 yellow, $1.47@1.48; No. 2 yellow, $1.46@1.47; No. 3 yellow, $1.45@1.46; No. 4 yellow, $1.42@1.44; No. 5 yellow, $1.40@1.42; No. 6 yellow, $1.37@1.40; No. 1 mixed, $1.45@1.46; No. 2 mixed, $1.44@1.45; No. 3 mixed, $1.43@1.44; No. 4 mixed, $1.40@1.42; No. 5 mixed, $1.38@1.40; No. 6 mixed, $1.34@1.37.

Oats—Arrivals were insufficient to supply the ordinary requirements of local retail dealers, not alone other interests, and a firm feeling prevailed throughout the week. No. 2 white at the close brought 75c, an advance of a full cent over a week ago. There were few offerings of mixed and heavy weight are wanted. No. 2 white, 74½@75c; No. 3 white, 74@74½c; No. 4 white, 73@73½c; No. 2 mixed, 73@73½c; No. 3 mixed, 72@73c; No. 4 mixed, 71@72c.

DENVER, COLO.

H. M. Hayter, Correspondent.

J. J. Owens of the Twidale Wright Grain Co. at Kansas City, called on several grain firms in the city this week.

J. P. Ross, of the Conley-Ross Grain Co., made a trip to the eastern part of the state the latter part of the week.

Mr. Cairns, of the Jackson Bros. Grain Co. at Chicago, was in the city the first part of the week calling on the grain trade.

H. V. George, of the Scott-George Grain Co., of this city, has returned from a business trip through the grain section of Colorado.

The Knickerbocker Bag Co., of St. Louis, which recently had a branch office located at this point, has discontinued the office for the time being. Mr. Kreuse, the manager of this office, will be located with the head office at St. Louis.

Colorado is suffering along with other grain sections from the severe car shortage. Some of the dealers report any amount of wheat piled upon the ground on account of no elevator facilities to handle same. There is no relief in sight at the present time.

The shipping season for pinto beans is just opening in this state, and Colorado is facing a very serious situation in this industry. Bigger marketing problems are confronting the pinto bean producers than last year because there will be no big government orders to be filled as there was during the season of 1918-1919. To assist the bean growers and shippers of the state in marketing this season's crop, Stuart L. Sweet, field agent in marketing for the Bureau of Markets here, has co-operated with H. E. Munger, formerly in charge of the Colorado field station at Greeley, in getting out a bulletin on the marketing problems for Colorado. Anyone desiring information on this subject may get it by applying to the Bureau of Markets, third floor of the Customs House Building.

BALTIMORE.

Robert C. Neu, Correspondent.

The rooms of the Baltimore Chamber of Commerce were closed on Monday, Oct. 13, in observance of the Columbus Day holiday, which occurred on Sunday, Oct. 12.

Supplies of good hay are beginning to clean up fast in the Baltimore market and the tendency is higher on the better descriptions of timothy and good, light mixed hay.

H. F. Marsh, sales manager of the New Prague Flouring Mill Co., of New Prague, Minn., was a visitor on the floor of the Baltimore Chamber of Commerce last week.

The name of Archibald Fries, traffic manager, B. & O. R. R. Co., is posted on the official bulletin as an applicant for membership in the Baltimore Chamber of Commerce.

Lewis J. Lederer, senior member of the grain commission firm of Lederer Bros. of this city, is off on a motoring trip through western Maryland counties and portions of Pennsylvania.

The receipts of new water-borne wheat in the Baltimore market so far this season amount to 1,220,000 bushels, compared with 1,100,000 bushels arrived up to the corresponding time last year.

At a meeting of the Maryland Association of the baking industry, held at Hotel Rennert, this city, last week, M. F. Mc Henry, supervisor of agencies for the Fleischmann Co., spoke on the "Eat More Bread" slogan and discussed plans for a city-wide bread advertising campaign, to be conducted with funds raised by subscriptions from Baltimore bakers.

J. A. Peterson, superintendent of elevators here for the Western Maryland and Baltimore & Ohio railroads, is accompanying Chief Grain Inspector David H. Larkin, of the Baltimore Chamber of Commerce in a Western trip, during which they will visit Chicago, Minneapolis and Kansas City, and also attend the convention of the Grain Dealers' National Association in St. Louis.

The Baltimore delegates to the annual convention of the Grain Dealers' National Association left for St. Louis on Saturday and Sunday. In the party were George Hax and wife, Col. H. C. Jones, E. Richards, Henry E. Wack, J. A. Mang, Joseph G. Reynolds, Wm. E. Harris, Os M. Gibson, D. Yulee Huyett, Traffic Manager G. Stewart Henderson, Chief Inspector David H. Larkin, Chief Weigher E. Kahler, and Superintendent of Elevators J. A. Peterson.

The first new cob corn of the season to arrive in the Baltimore market came on hand on Oct. 8 from Kent Co., Md., consigned to Stevens Bros., commission merchants, and members of the Baltimore Chamber of Commerce. The corn was in good condition for new crop, and

A site for a new elevator already has been chosen in South St. Joseph.

Cash Markets.

Wheat—Receipts of wheat commenced to pick up toward the close of the week, and all classes of buyers expressed demand for samples of choice milling wheat, and there was nearly a complete clearance at firm prices every day. Buyers for mills were more active than for some time past for good color and heavy test samples. Shippers' requirements to fill outside orders were of greater volume and the receipts of good grades of wheat were insufficient to take care of the demand. Cash prices were as follows: New Wheat—No. 1 dark hard, $2.33@2.51; No. 2, $2.30@2.49; No. 3, $2.26@2.47; No. 4, $2.20@2.36; No. 5, $2.18@2.28; No. 1 hard, $2.24@2.36; No. 2, $2.24@2.32; No. 3, $2.15@2.31; No. 4, $2.12@2.26; No. 5, $2.07@2.14; No. 1 yellow hard, $2.18@2.20; No. 2, $2.15@2.17; No. 3, $2.12@2.14; No. 4, $2.08@2.11; No. 5, $2.05@2.07; No. 1 red, $2.21@2.22; No. 2, $2.18@2.21; No. 3, $2.13@2.16; No. 4, $2.10@2.12; No. 5, $2.05@2.09.

Corn—White corn constituted the bulk of receipts all through the week. Yellow corn was in some demand, but was very slow. Feeders were reluctant on taking hold of the corn, awaiting the condition of the market and looking for much lower prices. Oklahoma corn is being offered around $1.20 delivered here, which means less than a dollar track Oklahoma stations. Corn, cash, as follows: No. 2 yellow, $1.44@1.46; No. 3, $1.42@1.43; No. 4, $1.39@1.41; No. 5, $1.37@1.38; No. 2 white, $1.42@1.43; No. 3, $1.39@1.40; No. 4, $1.36@1.37; No. 5, $1.33@1.34; No 2 mixed, $1.41@1.42; No. 3, $1.39@1.40; No. 4, $1.36@1.37; No. 5, $1.34@1.35.

Oats—Only a limited inquiry appeared all throughout the week, and receipts were equal to the demand. Oats were dull all through the week and very little demand from the country. Cash follows: No. 2 white, 68@69c; No. 3, 67½@68c; No. 2 mixed, 65@66c; No. 3, 64@65c; No. 2 red, 66@67c; No. 3, 64@65c.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports for the week ending Oct. 10 were 341,005 bushels of wheat.

The Clifton Cereal Mills Co., Clifton, N. J., have converted their cereal mill into a flour mill.

The following is a list of cars unloaded at Girard Point Elevator during the month of September, 1919: Wheat, 2,417 cars; oats, 53 cars; rye, 20 cars, and barley, 13 cars. Total, 2,503 cars.

Receipts for the week ending Oct. 11 were 1,600 bbls. and 19,828,873 lbs. of flour in sacks; 804,184 bus. of wheat; 2,568 bus. corn; 50,301 bus. oats; 1,426 bus. rye; 6,250 bus. malt and 860 tons of feed.

The United States Grain Corporation has notified the trade that until further notice permits for shipments of wheat will be limited to points of origin within the territory of Pittsburgh, Erie and the East.

Stocks in public warehouses on Oct. 1, 1919, were 108,018 bbls. flour, against 167,817 bbls. Oct. 1, 1918; 1,911,887 bus. wheat and 2,197,823 bus. same period last year; 14,879 bus. corn, compared with 23,604 bus. on Oct. 1, 1918; 251,378 bus. oats, compared with 473,259 bus. a year ago.

The following grain and milling men have been elected to membership in the Commercial Exchange: Geo. H. Bastian, 1937 Passyunk avenue; Woodward & Co., 23rd and Cherry streets; Harlan Grain Company, Kentland, Ind., and the Oxford Grain & Hay Co., Oxford, Pa.

The following cars were unloaded at the Fort Richmond Elevator during the month of September, 1919: Wheat, 1,520 cars; oats, 63 cars; barley, 4 cars. Total, 1,587 cars. At the Twentieth street elevator the following cars were unloaded during September: Oats, 94 cars; corn, 8 cars, and barley, 2 cars. Total, 104 cars.

Exports for the month were 117,525 bbls. flour and none in September, 1918; 5,352,892 bus. wheat, 2,858,967 bus. same period last year; no corn in September, 1919, but 9,352 bus. same month last year; 338,595 bus oats, compared with 201,013 bus. in September, 1918; 62,971 bus. rye and 60,000 bus. a year ago; 80,142 bus. barley and none in same period last year.

Sergeant Harry M. Edenborn, Jr., son of H. M. Edenborn, the well known grain dealer, who enlisted as a private in the American Expeditionary Force, and since promoted to sergeant has been mustered out after being in active service for the past thirteen months, over in France. He was given a rousing reception by the members of the Commercial Exchange when he appeared on the floor last Thursday.

Receipts of flour and grain for the month of September were 447,955 bbls. flour, compared with 131,648 bbls. in September, 1918; 5,253,259 bus. wheat, as compared with 3,284,174 bus. the same period in 1918; 48,085 bus. corn, against 20,442 bus. same time last year; 803,845 bus. oats, compared with 785,028 bus. in September, 1918; 99,297 bus. rye, against 189,354 bus. last year; 31,078 bus. barley and 5,000 bus., September, 1918.

The following flour and grain men were visitors at the Commercial Exchange during the week: Hamilton C. Milne, of William Morrison & Son, Ltd., Glasgow, Scotland; J. F. Utley, grain shipper, Capac, Mich.; Earl Cook, representing Edgar-Morgan Co., feed manufacturers, Memphis, Tenn.; S. P. Davis, grain dealer, Little Rock, Ark.; A. T. Martin, grain shipper, Chicago; J. S. Hockenberry, Boston; Geo. J. Godshalk, Bangor, Pa.; E. S. Weiss, Wilkes-Barre, Pa.; J. B. McCreery, New York City, and Hugo Eberle, Switzerland.

DENVER SIOUX FALLS

WHEN
BUYING, SELLING OR CONSIGNING

In addition to the official committee which will represent the Commercial Exchange at the twenty-third annual convention of the National Grain Dealers' Association at St. Louis, Oct. 13, 14 and 15, the following members of the exchange will attend: Jas. J. Rodgers, of Richardson Bros.; John McGuigan, Jr., local representative of the Taylor & Bournique Grain Co., Milwaukee; Howard Brazer, of W. P. Brazer & Sons; William H. Watkins, of the E. L. Rogers Grain Co.; D. Arthur Karr, representing M. F. Barringer; Morris F. Miller & Sons; Robert Morris, grain and feed broker, and F. J. Faber, of S. C. Woolman Co.

Hugo Eberle, a member of the Swiss Commercial Mission which is studying economic conditions in the United States, was a visitor at the Commercial Exchange during the week, and called on a number of prominent grain men and exporters with a view of establishing business connections in this city as soon as the Swiss government releases its wheat monopoly. Mr. Eberle, who is a miller and grain importer of Gosan St. Gallen, Switzerland, has been in various commercial circles of the United States and is one of a party of 220 business men sent over here by the mission. He says that the Swiss flour mills have been running at about one-quarter of their capacity because of the shortage of grain imports from other countries in Europe.

ST. LOUIS.

E. E. Reeves, Correspondent.

A number of the delegates to the Grain Dealers' national convention arrived early, in time to attend the Veiled Prophet's ball.

John E. Geraghty, of Chapin & Co., was on change last week, shaking hands with his many friends and hustling for business for his firm.

President Julius H. Barnes and Vice-President Edward M. Flesh, of the United States Grain Corporation, will be tendered a banquet by the St. Louis Grain Club Wednesday evening.

Charles E. Slayback, who was president of the Merchants' Exchange in 1882 and who is still actively interested on the Chicago Board of Trade, was a visitor on the floor of the Merchants' Exchange last week.

Senor Perez Revire and Senor Santa Maria, of the Mexican Department of Agriculture, who came to attend the Grain Dealers' National Convention, were visitors on the floor of the Merchants' Exchange Saturday.

Mississippi Valley Ass'n.

The St. Louis share of a $100,000 fund to be raised by the association for boosting the Mississippi Valley and developing the Gulf ports is $15,000. Headquarters for the St. Louis drive have been opened in room 1009, Syndicate Trust building. The members of the committee are: Jackson Johnson, president of the Chamber of Commerce; James E. Smith, president Mississippi Valley Association, and R. E. Adreon, president of the American Brake Company.

The Mississippi Valley Association, which held its first national convention last spring in Chicago, is intended to further the direct interests of a population of 50,000,000, of whom 32,000,000 are farmers.

New Orleans has raised its quota of $10,000 and Chicago has started a campaign tomorrow to raise $20,000. These cities are the headquarters of their respective zones as St. Louis is the headquarters of its zone—No. 4.

Harry H. Merrick, president of the Chicago Association of Commerce, is the head of the Mississippi Valley Association. James E. Smith is vice-president at large, and F. Ernest Cramer, president of the Mississippi Valley Trading and Navigation Company, is vice-president of Zone No. 4.

PEORIA.

L. L. Eckard, Correspondent.

T. A. Grier, one of the oldest members on the Peoria 'Change, who has been seriously ill for the past two weeks, is reported much better and will no doubt be able to return to his office within a few days.

The United States Alcohol Co., which has been closed for several weeks, will resume work in the next few days. Although it will not operate a full force, at least 200 men will be employed the next 30 days. This plant was formerly the Clark Distillery and has a capacity of 45,000 gallons daily.

Arrivals of hogs at the Peoria yards on Saturday were extremely light. The few small lots that showed up were quickly sold at prices averaging 10 to 25c lower. Owing to the light receipts during the past few days, an active market is expected during the coming week. Light hogs sold $14.75@15.10; medium, $14.50@15; heavies, $14.00@14.80; packing grades, $12.75@13.50; pigs, $12@14. The cattle market was slow and 50 to 75c lower for the week. Heavy calves, $8@12; others, $13@16; top beeves, $15.

Corn receipts were somewhat larger during the past week and country offerings of corn were large even on the dull market. Three cars of new corn arrived on Thursday. One car graded 5 yellow, test 20.5 and sold local at $1.26. The other two graded sample, 23.3 and 23.5 test, and sold at $1.20. Saturday's receipts of old corn were 66 cars. The market is unchanged to 1c lower; demand good. No. 1 yellow, $1.39@1.39½; No. 1 mixed, $1.39; 2 mixed, $1.39; 2 yellow, $1.39. Oats steady to ½c lower, with fair demand, 2 white selling 70@70¼c.

LOUISVILLE, KY.

A. W. Williams, Correspondent.

In western Kentucky farmers report that they are cutting their fourth crop of alfalfa, which is much better than had been expected, considering dry weather.

Wheat is now carrying a premium of two to three cents a bushel over Government figures, and is now costing $2.28@2.30 a bushel in Louisville. Wheat is now moving to market very slowly.

The October report of the State Department of Agriculture, issued Oct. 9, shows a corn crop of 77,000,000 bushels, while the final wheat estimate is 10,983,000 bushels, an average of 10.5 bushels per acre. Hemp is a very short crop. The third cutting of alfalfa yielded 1.02 tons per acre. Bluegrass shows 69 per cent; clover, 68 per cent; orchard grass, 80 per cent; alfalfa, 75 per cent.

Oats and corn are in fairly good demand, oats being a little scarce, due to export movement, and slow deliveries on the part of farmers. The demand for corn is also fair, with receipts and offerings light,

Farmers WANT Ankorite Steel Drive Posts

MILLIONS of practical farmers are reading hard-hitting facts about Ankorite Steel Drive Posts in all of the leading farm magazines. They know the posts and they want them—and they want to buy them from YOU.

We're getting inquires from thousands of farmers who want to know where they can buy Ankorite Posts. Many of them come from your territory—can we refer them to you? An Iowa dealer writes:

"Please ship us at once 1000 more of your 6 foot 6 inch line posts. We're sold out and the farmers are crying for more posts, so please rush the order and we will do our part."

"Some Post!"

Dealers who began by ordering a few hundred Ankorite Posts are now ordering carload lots by wire! They can't get them fast enough to meet the demand.

Take advantage of this big, smashing, money-making opportunity. Some live wire dealer in your territory is going to make a lot of money through the exclusive sales rights for Ankorite Posts—and we're going to get behind him with all of the resources of the Calumet Steel Company to help him sell posts as he never sold them before.

We want *you* to be that dealer. Sit down right now and drop us a letter or postcard. Just say "Send me details of your dealer proposition and co-operative sales plan." We'll do the rest.

Calumet Steel Company
208 So. La Salle St., Dept. 7
CHICAGO

many farmers not liking the price, while farmers are generally busy with harvesting, and are not hauling to market. New corn is dry and should be on the market early this season, in fact, some dealers expecting some new corn by late October.

Wheat seeding has been slow this year, due to dry weather, it being reported that the acreage planted is only 74 per cent of nominal, or 33 per cent less than last year. About 11 per cent had been seeded on Oct. 1, but seeding has been more active this month. Many farmers are going back to grass, as labor is high and scarce. The rye estimate is given at 89 per cent, which is about the same as last year. Many farmers are reported to be seeding rye and barley for cover crops.

TOLEDO.

Carl Bryant, Correspondent.

John Monroe, miller of Archbold, O., was a visitor on 'Change Saturday.

J. W. Young of The Young Grain Co. has returned from a two weeks' business trip in the East.

"Ben." Nofster, elevator operator of Rochester, Ind., visited at the offices of J. F. Zahm & Co. last week.

A. J. Burkart of Chicago has succeeded T. C. Burke as floor manager on Toledo Produce Exchange for E. W. Wagner & Co.

Following have made application for membership in Toledo Produce Exchange: H. D. Sturtevant of Pynchon & Co., Chicago; N. J. Cornell, Toledo manager for Pynchon & Co.; A. J. Burkart of E. W. Wagner & Co.

Board of directors of Toledo Produce Exchange went on record at their meeting last week in favor of Government supervision of rye inspection. They are in favor of Federal control in order to bring about uniformity in grading, instances coming to their attention where rye grading No. 2 at Toledo receives a No. 1 grade in the East because of a variation in test weight requirements.

The market for cash grains in Toledo has been in a rut the past week with very little change in prices. Rains have delayed movement of all grains and receipts continue light. There is active bidding on the spot stuff and consigned grain is bringing good prices. No. 2 white oats sold Saturday at 71⅜ to 71½c. A car of No. 1 yellow corn sold Friday at $1.41½, Toledo rate of 23c to New York. Receipts for the week were: Wheat, 219,000 bus. by lake and 101 cars; corn, 11; oats, 26; rye, 52; barley, 1.

"Tim" Burke Changes Houses.

It was just one year ago that "Tim" Burke came to the Toledo Produce Exchange as floor manager for E. W. Wagner & Co., from Chicago where he had been connected with that firm for three years. To say that he has "made good" is putting it mildly, because when a man is possessed of ability and a thorough knowledge of his business he invariably will succeed. In the grain business today that is not enough. It takes something more. Enthusiasm—"pep"—and an ever willingness to serve are essential in the makeup of the successful broker. "Tim" has the quality of being liked by everyone with whom he comes in contact, and the regard with which he is held by the board of directors of the Produce Exchange is evidenced by the fact that that body of men, in the face of a long standing rule prohibiting more private wires on the floor, Friday voted unanimously in favor of "Tim" when he was offered a position as manager of Pynchon & Co., providing they were allowed to install their private wire on 'Change. He will enter upon his new duties as manager for Pynchon & Co. this week and his many friends among the Toledo trade wish him success.

CHICAGO, ILL.

The Board of Trade was closed on Monday, Oct. 13, being a legal holiday.

Vincent L. Lamy has been admitted to membership on the Board of Trade. J. H. Van Dyke has made application for membership, while that of the estate of J. M. Jenks has been posted for transfer.

Julius H. Barnes, president of the United States Grain Corporation, will address the members of the Chicago Board of Trade, Thursday, Oct. 16. The same evening he will be the guest of the Board of Trade at a banquet tendered him at the Blackstone Hotel.

By a ruling of the directors of the Board of Trade corporations, partnerships, pools or associations of members to divide brokerage earnings is not permissible and is prohibited. The absorption by a broker of any of the expenses connected with the business of another member, firm or corporation is a violation of the rules.

Thos. Duncan, market editor of the Chicago Evening Post since April 29, 1890, died on Oct. 5 at the age of 87 years. He was in active service up to the day of his death, the dean of the group of bright men who reported the financial and grain markets of Chicago from day to day. Mr. Duncan was born in Glasgow, but at the age of 21 came to the United States and after a career as a merchant, yielded to his liking for the work that gave him his greatest usefulness.

The provision trader reminds us of the old belief that $12 hogs during times of high prices mean an upward swing to a considerable height. One of these traders, commenting on the present decline in the hog market and the opinion in some country points that $12 will be reached, states that the upward swing will then probably show $20 before the winter is out. The old basis of figuring hogs to corn on the 10½ basis no longer follow the bill to producers, stating that 13 to 1 is now the proper basis.

The outlook for a new Board of Trade building is improving. On Oct. 9 at a special meeting of the directors to hear a report on the cost of needed repairs to the present building, it was learned that these would cost no less than $350,000. It is necessary to cut away a part of the Jackson boulevard frontage to get back to the proper building line; a new roof and new plumbing are needed, as well as new floors. The directors decided it would be cheaper to go ahead with the new building for which plans are already made. There was some newspaper talk during the week of the Board making a trade of real property with the Illinois Trust & Savings Bank and others, taking that bank's present site while the bank would take the entire block bounded by Jackson, La Salle, Van Buren and Sherman streets.

MEMPHIS.

George Williamson, Correspondent.

A. J. Dyas, of the Keller Milling Co., St. Louis, spent a day or so here during the week.

F. R. Marconett, of the Schrieber Milling Co., St. Joseph, Mo., was here during the week and a visitor on 'change.

Mr. Case, of the Marshall Hall Grain Co., Des Moines, Ia., was a visitor among the trade during the past few days.

A large delegation of the local grain and hay trade went to St. Louis Sunday to attend the annual meeting of the Grain Dealers' National Association. Several of them took advantage of the fact that Monday was a holiday.

On the daily call board of the Merchants' Exchange there are few quotations being made, for business is so quiet. On Saturday No. 2 white corn brought a bid of only $1.43, with nothing doing in any other grade. The mills are buying very little and feed people are waiting for new corn to begin to move. Only bids were recorded for oats. No. 1 grade white were 73½c; No. 2, 73c, and No. 3, 72c. Stocks are small and receipts very light.

Business continues extremely light and the dealers think it will be some time yet before activity starts. They assume that the country is feeding its own home supplies, but as they are small it will not be long until they must buy here. The activity in the cotton market, demand having been very active at rising prices, means that there will be less resistance to high cost of feed than expected and buy expected to be very active. Some corn is reported for sale in portions territory, with asking prices around a bushel, but there is not enough bu being done to get a line on what the actually sell for.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

Frank C. Tenney of the Duluth of The Tenney Co. was in Minneapolis t

E. W. Bingham, of Bingham Bros. Ulm, Minn., operators of a line of c elevators, died Oct. 1.

Walter Bleecker, manager of the office of Woodward-Newhouse Co., w iting on 'change Monday.

The Newsome Feed & Grain Co., burgh, Pa., has opened a Minneapo fice in the Corn Exchange building.

The addition to the Minneapolis ber of Commerce trading floor is closed and the interior work is being to completion.

As all other markets were close business was very light the Minn Chamber of Commerce Association to adjourn at noon Monday.

At a meeting of the board of di of the Minneapolis Chamber of merce Association held Oct. 7 the Terminal Elevator was declared regu a public warehouse under license Minnesota Railroad and Warehouse mission.

The following requests for trans membership in the Minneapolis Cham Commerce Association have been p From E. F. Krumdick to Kurtes R. tert, W. S. McLaughlin to Wesley A. fin, J. M. Jenks to David A. Deline, Parsons to W. G. Hopwood.

Cash Markets.

Wheat—Although there is a very demand for choice cash wheat the between top and lower grade offerin decreasing. Buyers are not bidding outlandish premiums for the best northern wheat. Local mills have bee strongest bidders and finally let up All grades of wheat are in ready de and receipts are cleaned up daily. I thing there is a stronger tendency by the lower grade offerings, such as No. 3 wheat. Very thin wheat is in s demand, but is well taken care of o whole. Country offerings are heavi more cars are available for cleanin country elevators stocks in North D No large movement is expected to co as the farmers are selling in a very ited way.

During the past few days some ra fallen in North Dakota and plowing

rushed where the soil conditions have oved.
ne demand for spot winter wheat is fair ood. Buyers are always in the market semi-dark winter, although they are to take the ordinary stuff now and . Durum wheat is in fair to good and, but for the week there was some in premiums on choice stuff.
). 1 dark northern closed today at @2.85, No. 1 northern at $2.60@2.70, 1 red at $2.30@2.50, No. 2 dark north- at $2.60@2.80, No. 2 northern at $2.50@ No. 2 red at $2.25@2.45, No. 3 dark hern at $2.50@2.75, No. 3 northern at @2.60, No. 3 red at $2.20@2.40, No. 1 er durum at $2.23½@2.27½, No. 1 m at $2.21½@2.22½, No. 2 hard winter ut at $2.35@2.42, according to quality.

rn—There are light offerings of corn and a good demand for the choice w. Ordinary corn is in slow demand he average. There is considerable in deferred corn at moderate dis- ts under old crop prices. Shippers are acting quite freely with western rs.

ts—The demand for oats is not very at present and prices are weaker pared with the futures. There is a rate shipping demand for choice of- gs, the kind the elevators want, and premiums are paid by the shippers. ator companies want heavy oats but ot afford to pay the premiums shippers bidding. Thin oats are in slack de- on the whole. No. 3 white sold at er to 2c under December, No. 4 white @3½c less.

e—There is a good milling demand for e white rye and the best of the blue is wanted for milling purposes, but ary blue rye is in quiet to fair de- for storage. No. 2 sells at December to ½c over, No. 3 at 1@1½c less. pts are running light.

x—There has been a strong demand laxseed of late owing to the good oil nd and the small movement from s. Shorts in the futures covered on ts that old crop Argentine flax was ing out and that the new crop was nger from frost. The advance result- slightly increased farm offerings, but ncrease was not heavy enough to sat- the crushers. To arrive offerings in past few days have been very light. rgentine seed has been reported here t, though one of the crushing com- s has 50,000 bushels in transit from York. No. 1 seed on spot sells at over Duluth October price and to at 5@8c over.

TRIBUTION OF FOOD CONTROLLED.

A. Osborne, Secretary to Commer- Attache, Rome, says that by Royal e of Aug. 15 control by the govern- is ordered among others of cereals heir products, beef and pork, fresh preserved; milk and its products, oils and fats. The above classes d products will each be controlled gh the medium of a consortium will acquire the controlled com- ies assigned to it and carry gh the process of distribution as s the wholesale deliveries to the ers. All the consortia's expendi- for purchases, transportation, han- manufacturing and storage will be ursed by the government. The of withdrawal, manufacture and rvation will be assumed by the rtia. The latter will also be paid compensation in the form of spe- ommissions on units of the com- ies assigned to them which they over to other organizations or to duals for further distribution.

INSPECTED SLAUGHTERINGS.

The Bureau of Animal Industry, in *Service and Regulatory Announcements* for May, reports the following number of inspected animal slaughterings for July 1919 and for the seven months ending with 1919 and 1918, as follows:

	July		7 months	
	1919.	1918.	1919.[1]	1918.[1]
Cattle	858,896	1,019,982	5,307	6,055
Calves ...	409,825	354,721	2,312	2,038
Sheep 1,146,464		869,403	6,276	5,050
Goats	2,259	9,794	38	57
Hogs 2,884,325		2,940,491	27,119	23,991

[1]000 omitted.

IMPORTS OF FOOD ANIMALS AND MEATS.

The following statements show the imports of food animals and meats and meat food products inspected by the Bureau of Animal Industry during July 1919 with figures for other periods for comparison:

From—	Cattle.	Swine.	Sheep.	Goats.
Mexico	4,905	2	.....	593
Canada	31,084	560	503	7
Gt. Britain.	111	1	572	.....
July, 1919..	36,100	566	1,075	600
July, 1918..	24,679	234	3,901	2,687
7 mos.—				
1918-19 ...	225,863	17,643	43,739	3,081
1917-18 ...	131,902	1,074	35,883	21,999

Following is a statement of imports of beef and other fresh and refrigerated meat and canned and other meat products, in pounds:

	July		7 months	
	1919.	1918.	1919.[1]	1918.[1]
Beef[2] 3,315,133		1,363,096	19,471	1,723
Other	946,416	287,893	9,892	1,735
Canned ...	309,031	4,012,744	30,245	20,957
Oth'r prod.1,114,713		1,474,974	5,513	4,345
Total 5,685,293		7,138,707	65,121	31,760

[1]000 omitted. [2]In July, 1919, 3,202,812 from Canada.

BOOSTING THE HORSE INDUSTRY.

A meeting of the representative grain, hay and feed merchants of Greater New York held at the Pennsylvania Hotel, recently, to discuss methods for combating the substitution of motor trucks and farm tractors for horse-drawn vehicles. It resulted in the formation of a temporary organization, which was given the name of the Horse Publicity Association of America, of which Fred M. Williams of Power & Co. is general chairman; L. G. Leverich, chairman Grain Committee; H. K. Palmer, chairman Feed Manufacturers' Committee; S. A. Vroman, chairman N. Y. Hay Exchange Committee; Wm. Ladew, chairman Retail Hay and Grain Committee, and H. S. Lockwood, Amer. Steel and Wire Co., chairman, Publicity Committee.

The object of the Ass'n is to give publicity to horse service and to the facts of the comparative costs between gasoline and horse power for haulage and farm work. The attendance at the meeting was representative of all branches of the distributing end of the grain feed and hay trades, together with the feed manufacturing interests. Lively interest was manifested in the subject.

The publicity work has already begun with a circular signed by Chairman Williams calling a general meeting for Oct. 30-31. An informal dinner to be given on Thursday night, October 30th; tickets are $3.00 per plate. Reservation must be sent to the Horse Publicity Association of America, Room 16, Hay Exchange Building, 601 West 33rd Street, New York City, by Oct. 20, checks and money orders made to the order of Thomas M. Blake, treasurer.

It will be 40 days before the chance of liberal December and January corn receipts can be approximated. Meanwhile the Belt has apparently sold an ample amount in advance which has taken by the East. Federal autho insist there will be no let up in paigns to reduce all costs and profits.—*E. W. Wagner.*

Names of 20 farmers in Monroe ship of Madison County, Ind., have furnished to the Secretary of the roe Township Farmers' Federation allege that they were not treated ly by local grain buyers. The law vides the farmers recourse for all treatment, but that they must a once. It seems the farmers oug be treated like other people who n to act upon their rights at the and place specified by the law.

Visible Supply of Wheat.

Official statement of visible supp wheat in the United States, weekl four years:

Oct. 11	30@48	42@46

Other seeds—No quotations.

Don't let your subscription lapse; you may lose valuable numbers.

Carload Shipments.

During the previous crop year the United States Food Administration regulations provided that all carload shipments of grain be loaded to car capacity. By the coöperation of the grain trade, full and satisfying results were shown in a tremendous saving of freight equipment.

In view of the above and the light loading of cars this season, the Administration now requests that shippers show the same generous and hearty cooperation this season by complying with the provisions of these regulations. A survey of the situation will be made and unless there is marked im ment in heavier loadings it will b essary to reinstate and enforce thi

A Sydney correspondent of the *don Times* says that there was first of September 3,285,000 to wheat waiting shipment from Aus to England.

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

The Liberty Milling & Ice Co. of Manhattan, Kans., has been chartered with a capital stock of $200,000 by A. M. Floersch, I. B. Floersch and I. I. Floersch, all of Handam, Kans.

The total loss in the destruction of the Land Mill at Neodesha, Kans., is estimated at between $100,000 and $125,000. There was nearly $75,000 in wheat and flour in storage.

Millers, jobbers and distributors of flour are all searching for buyers for low grades. The feed trade is somewhat relieving this condition and doubtless picking up low-grade flour at attractive prices.

Supplemental certificate has been issued to the Kings Flour Mills Co., Inc., Front Royal, Va., decreasing its maximum capital stock from $800,000 to $100,000 and its minimum capital stock from $400,000 to $25,000.

The Monkton Roller Mills have been organized at Monkton, Md., with a capital stock of $1,000,000 to build a plant with a daily capacity of 2,000 barrels of wheat flour and 12,800 pounds of mixed feed.

The Midland Flour Milling Co. is under incorporation to take over the property of the Midland Milling Co. in North Kansas City, Mo. C. B. Warkentin, president of the Newton Milling & Elevator Co., bought the controlling interest in the Midland Co. recently and formed the new corporation which will start with a paid up capital of $300,000. The concern will operate a 2,000-bbl. plant.

The Standard Milling Co., which controls the Southwestern mill, the biggest mill in Kansas City, earned about 27 per cent on its common stock in the year ending August 31. It paid 10 per cent dividends, the same as in the preceding year, 8 per cent in 1917, 5 per cent in 1916 and 3 per cent in the two preceding years. Profit on the entire investment, $5,960,000 common stock, $6,488 preferred, $4,266,000 bonds and $9,136,000 surplus, were about 8½ per cent. The company owns several mills in the Northwest and one in New York.

Negotiations for the purchase of a controlling interest in the Larabee Flour Mills Corporation of Kansas City by the Washington-Crosby Co. of Minneapolis have closed and the deal is declared to be "off." The Larabee Corporation will continue to be a strictly Southwestern concern under the management of the Larabee brothers and their associates. The death of John Washburn of the Washburn-Crosby Co., may have interfered with the plan of the spring wheat milling concern to invade the Southwest.

Flour Market.

Our correspondents have well covered the general aspects of the market. The mills are running strong; in some sections the production is above normal. In the East the inquiry is active, and in the Southeast very much so. The withdrawal of the Grain Corporation from the market and the New York longshoremen's strike, which is extending to all the Atlantic ports, has put a quietus on the export trade for the time being, but otherwise the market is satisfactory. The large output of flour is reflected in the prices of millfeeds which are going down on the part of a large production and a dull and unresponsive feed market.

FLOUR MARKETS.

BOSTON.

Boston, Oct. 11.—According to the best informed members of the flour trade the market for that staple appears to be thoroughly stabilized. Conditions are not all that are desired by dealers and selling agents, but they are at least sufficient to warrant a feeling of greater confidence than has been noted in the Boston market for a long time. This stabilization has been made in either prices or trade conditions having been at a minimum. It may not be inferred that the volume of new business is as large as desired, for such is not the fact, but it has been fa to average of the current season t it is one of the notable features present situation that so few of t buyers have covered their probable for the remainder of the year, or i coming year. In previous years it h been unusual for the big bakers an jobbers to have their needs covered better part of the next half year. pared with a week ago, small advan noted in prices of patent flours of all the gains ranging from 5c to 25c a Current prices, f. o. b. Boston, in lots, mill shipment, for 196 lbs., in sacks, are $12.50@13.05 for standard patents, $13.25@13.75 for special sho ents, $11.50@12.80 for hard winter p $11.10@11.50 for soft winter patents @11 for soft winter straights, and 10.50 for soft winter clears. Recei the week ending Oct. 11 were 47,6

CINCINNATI.

Cincinnati, Oct. 14.—The firmn wheat was reflected in a decidedly s flour market here this week and prices prevailed with demand the active for some time. Mills grin capacity, and buyers urgently seekir milling grain. Prices, wood basis, Winter patent, $10.65@10.95; hard $12.30@12.80 per bbl.; Kansas bake ent, 140 jute, $10.85@11; corn flour 100-lb. sacks.

DES MOINES.

Moines, Oct. 11.—Flour steady at last prices; the lower wheat prices has en reflected much on flour. Iowa and n flour quoted: Patent, $11.10@12; t, $10.20@11.40; first clear, $8.40@ econd clear, $6.30@7. Northern flour : Short patent, $12.20@13.20; stand- tent, $11.50@12.50; bakers' patent, 012; first clear, $9.10@9.75; second $6.15@6.50.

DETROIT.

oit, Oct. 11.—Millers have been ac- dders for wheat and the market is There is also a brisk shipping de- The flour market is reported quiet eady. Demand is moderate, but the manage to keep running most of ne. The buying of mill feed is slow and market easy. Quote: spring patent, $13.25; fancy winter $12.75; second winter patent, $12; t, $11@11.25 per bbl.; bran, $43; d middlings, $56@57; fine middlings, ; coarse cornmeal, $64; cracked corn, op, $55 per ton, in 100-lb. sacks.

NASHVILLE.

ville, Tenn., Oct. 13.—Sales of soft wheat flour in the Southeast were larger. Prices were not materially . But for the decline of mill feed n price of cash wheat the tendency lower marks, and mention was f some mills shading prices slightly, thers were firmer. Quotations: Soft wheat patents, 98-lb. cotton, f. o. river points, $11@11.40; standard , $10.30@10.60; 100% flour, $10.10@

ville and Southeastern mills, with of 218,190 bbls., reported output turday of 185,030 bbls., or 84.8 per capacity, which compared with 85.3 the preceding week, 66.5 per cent 95.7 per cent in 1917, 70.8 per cent 73 per cent in 1915, and 61.3 per 1914.

NEW YORK.

York, Oct. 11.—The flour market less throughout the week and the of business was the smallest, per- nce the new season opened. Buyers ers were still apart, and there ap- to be little prospect of any early ise. Apparently the trade here is ll supplied with flour and, until the were checked by the labor troubles harbor, receipts were running very and receivers were getting more an they desired. This condition about further attempts to re-sell, ctically all grades of flour were le here on the spot at considerably rices being asked by the mills. irmness in wheat premiums and akness in mill feed undoubtedly o hold the mills at the recent ad- and mills were not disposed to concessions, although they were more disposition to urge sales. were, naturally, very irregular and a wide range, but it seemed to tle difference to buyers who were dy to make new purchases even our was offered to them at seem- ttractive figures. Spring patent s offered from the mills at $11.85@ ile Kansas flours were offered at 1.75 for straights.

DULUTH.

, Oct. 11.—Duluth millers had a ek in the flour trade, orders taken up to the largest proportions in ne. Premiums on spring wheat f 5c all round, but high premiums d for choice cars of dark northern. flour demand was as active as the markets. Prices are unchanged ut.

ions, per barrel, in carlots at mills ow: Family patents, jute, $12.10@ akers' patents, jute, $11.85@12.25; rs, jute, $9.25@9.75; second clears, 5@7.50.

PHILADELPHIA.

elphia, Oct. 11.—Flour receipts for k were 1,600 bbls. and 19,828,873 acks. Stock in public warehouses were 108,018 bbls., compared with bls. same period last year.

The market is quiet with a fair inquiry for spring wheat flour but winters are neglected. Prices reflect no important change over a week ago. Quote per 196 lbs., packed in 140-lb. jute sacks:

Soft winter straight, Western, $10.10@10.40; nearby, $9.75@10.

Hard winter straight, $11.25@11.50; short patent, $9.25@12.25.

Spring first, clear, $9.25@9.75; patent, $12@12.25; short patent, $12.25@12.75.

Fancy spring and city mills patent, family brands, $12.75@13.25.

Rye flour, $7.85@8.05 per bbl. in sacks, as to quality.

BALTIMORE.

Baltimore, Oct. 11.—The recent let-up in flour purchases by the United States Grain Corporation, owing to accumulated supplies of flour at the various seaboard markets and insufficiency of ocean freight room, has deprived the market of its here-

tofore principal support, and with domestic demand quiet, the entire situation is rather dull and featureless. Rye flour also slow sale. Quotations follow: Winter patent, $10.50@10.75; winter straight, $9.75@10.25; spring patent, $12@12.25; spring straight, $11.50@11.75; rye flour, pure to blended, $7@8, all per 98-lb. cotton or jute sacks

KANSAS CITY.

Kansas City, Oct. 11.—Flour sales this week to the family trade continue good, with patent grades of the hard and soft wheat product in best request. Bakers were slow buyers of the straight grade and the Government was not in the market for export flour of any kind. With the straights and clears accumulating, millers had to restrict sales of patent. Operations were curtailed slightly, as indicated by the output, 83,900 bbls., compared to 90,900 a week ago and 60,500 last year. Much of the production was applied on old contracts, which are still plentiful.

Reflecting changes in wheat, the market for hard wheat flour is 20@30c lower than a week ago, but soft wheat flour is unchanged.

Prices of flour in carlots, sacked, in 98-lb. cotton bags, per bbl.:

Hard wheat—	Oct. 11.	Oct. 4.
Short patent	$11.20@11.60	$11.40@11.90
Long patent	10.80@11.50	11.00@11.70
Straight	10.50@11.00	10.75@11.25
1st clear	9.50@10.50	10.00@10.75
2nd clear	8.50@ 9.50	8.50@ 9.50
Low grade	6.50@ 7.50	7.00@ 7.50
Soft wheat—		
Fancy patent	10.70@11.00	10.70@11.00
Standard patent	10.20@10.50	10.20@10.50
Straight	9.60@10.00	9.60@ 9.90
Clear	9.10@ 9.40	9.10@ 9.40
Low grade	6.50@ 7.50	6.50@ 7.50

MILWAUKEE.

Milwaukee, Oct. 11.—The local flour market stands firm with inside price of spring wheat patent being quoted 40c higher than last week. The upward tendency of prices the past few weeks has stimulated buying to a measurable degree. However, the shortage of cars, which is steadily becoming more acute, is handicapping the industry to a great extent. The rye market shows a somewhat improved demand as buyers are taking advantage of the attractive prices, as compared with wheat. The production of flour at the Milwaukee mills for the week totalled 23,000 bbls., of which 18,000 bbls. were wheat flour, or approximately 75% of capacity, and 5,000 bbls. of rye flour. Current quotations, in carlots, per bbl., in cotton, are: Spring wheat patent, $12.60@13.10; straight, $11.60@12.10; first clear, $8.50@8.90; rye flour, pure, white, $7.60@7.80; rye flour, straight, $7.10@7.30; rye flour, dark, $5.75@6.25. Corn flour is nominally quoted at $3.80; cornmeal, white, $3.70, and corn grits, $3.70, all in 100-lb. sacks.

ASSOCIATED MILLS AT KANSAS CITY.

We are glad to report good progress in the construction of the first unit called "Liberty Mills" as a part of the plans of the Associated Mill and Elevator Co. with main offices at 1010 New York Life Bldg., Kansas City, Mo. Incorporated for $5,000,000, with H. C. Nunn, president; E. R. McDonald, vice-president, and Paul Noble, secretary and treasurer, and the O. J. Lehrack Construction & Engineering Co. handling building operations, the early completion of their plans is assured. The first unit, 2,000 barrels capacity, will be finished early in 1920 and the adjoining 350,000-bushel storage should be completed before Christmas 1919. The company owns the Federated Mills of Morganville, Kans., and two elevators there and one elevator at Wilsey, Kans. It is building a fourth elevator at Mound City.

The personnel of this firm is interesting. Mr. Nunn, widely known to the Western trade, was the former chief grain inspecter for Missouri and for the past eight years superintendent of the Kansas-Missouri Elevator of the Hall Baker Grain Co., Kansas City. Mr. McDonald was a dollar-a-year man for Canada in charge of the milling division; while Mr. Noble's extended experience in Wichita, Hutchinson and with Kansas trade rounds out the official roster of the company, indicating that when in operation the property will be a decided asset to the terminal trade at Kansas City as well as country wheat handlers beyond.

Wheat Movement, Flour Production, Exports.

The Grain Corporation's bulletin covering the wheat and wheat flour movement throughout the United states for the week ending Sept. 26, in comparison with the figures for the same period a year ago. The figures given out were as follows:

	1919.	1918.
Receipts—		
Wheat from farms, bu.	25,830,000	31,690,000
Previous week	28,858,000	34,955,000
June 27 to Sept. 26	451,199,000	412,980,000
Flour—		
Produced during week, bbls.	3,512,000	2,999,000
Previous week, bbls.	3,270,000	2,834,000
June 27 to Sept. 26	32,321,000	27,930,000
Stocks—		
Total wheat, elevators and mills, bu.	271,852,000	243,329,000
Previous week, bu.	264,779,000	220,560,000
Change for week, bu.	+7,073,000	+22,769,000

EXPORTS OF WHEAT AND FLOUR.

Exports of wheat and flour in July and August as reported by the Department of Commerce and the loadings of wheat and flour from Sept. 1 to 26 amount to 41,607,000 bus. of wheat and 4,219,000 bbls. of flour, making a total equal to 60,591,000 bus., compared with 39,221,000 bus. of wheat and 4,641,000 bbls. of flour last year. September figures are pro rated to Sept. 26, making a total equal to 60,107,000 bus. Last year's official figures are supplemented by the army and Red Cross shipments.

Milling in Colombia.

Consul Guyant, Barranquilla, Colombia, says the flour milling industry along the coast of Colombia has been paralyzed for more than a year on account of the high duty the Colombian government has placed on foreign wheat, thus making it possible for the flour milled in the interior from domestic wheat to be sold on the coast at a price beyond competition. Before the local mills ceased working they purchased cotton bags in the United States, having imported over 600,000 in 1915 and 1916.

The unit of weight for flour sales on the coast is the "carga" of 250 pounds, and it is always divided into two packages of 125 pounds each. In shipping flour, it is packed in the 25-pound cotton bags imported from the United States and five of these bags are packed in one empty wheat sack or in the large bag used for shipping and containing five of the smaller bags, made of fiber and produced in the country. In the interior the same 25-pound sack is generally used, the supply being obtained from the United States. Though no customs statistics are available, local millers estimate that the interior of the country uses 1,500,000 of these bags annually.

If this paper pleases you, kindly recommend it to your neighbors in the trade.

Argentine October Duties.

Export duties levied by the Argentine government will be as follows for October shipments: Oats in bags, 1.5 pesos per metric ton (2,204.6 lbs.) bulk, 0.845; frozen beef, 5.76; m 10.89; corn in bags, 0.908; bulk, linseed in bags, 9.19; bulk, 7.38; in bags, 2.50; in bulk, 2.48; wheat 1.61; tallow, 28.25. Duties payable gold (1 peso equals 96½c.) Freig U. S., England, France, Italy and are now much below recent rates.

Use our liner advertisement department to sell or buy second-hand equipment.

Elmore-Schultz Grain Co., of St. suggests that, "A few dollars for car lining is a good invest- As many as 25 bushels of grain een found between the inside and e walls of a box car."

WEEVIL DAMAGE EXAGGERATED.

The unfortunate appearance of weevil in considerable numbers in Western wheat has imposed extra duties on the Kansas City inspection departments, again proving that the path of the grain dealer is stoney, never twice the same and always interesting. When the inspection departments for the states of Missouri and Kansas find two or more live weevil in a drawing of wheat, it is termed "weevilly." It is then the privilege and the necessity of the owner to "dope" the car. This means applying about 15 pounds of liquid carbonbisulphid, which forms a heavy gas which settles through the wheat and in a period of 24 to 36 hours kills all live weevil. This application at 12c per pound, or a total of $1.80 a car, is certainly a very simple and inexpensive cure.

Grain dealers have been accustomed to weevil but should not, however, confuse the "bran bug" with the present variety now so numerous in wheat shipments, for the bran bug, you know, does not actually hurt the wheat, eating only the outer shell, and is easily removed in spouting by the draft.

Extra inspection duties must follow the weevil removing process; and J. M. Chilton, Federal Grain Supervisor of the U. S. Dept. of Agriculture, in charge of the Kansas City office, indicated something of this work when he referred to appeals totaling 154 for the week ending Oct. 3 and 167 the week before that, claimed by the owners of the wheat to change the inspection certificates.

We make the above explanation of the reason for so large a number of appeals, because they are in most cases no reflection on the original inspection.

Rye As Food.

Some of the agricultural papers are discovering that during the war "the American people have learned to use rye as an article of diet as never before," but few have discovered that they are not continuing in its use, although rye bread is about as good a food as wheaten bread barring the color. Rye has its uses in the agricultural rotation, but the Agricultural Department's boosting of rye as a Southern crop should be based strictly on its food and not the food value of the grain. It makes a fine pasture and dairy cattle relish the green, succulent plant more than most men, yet dearly like the loaf. The crop as a food grain can is easily overdone.

THE POTATO CROP.

This year's potato crop is smaller than last year and below early estimates. Early potatoes were lighty planted and the yield was cut down by excessive rains in the Southeast. Late potatoes were planted in large acreages than in any season during the past seven years except 1917 and 1918, but dry weather cut down the yield and size of the Western crop, while the Eastern crop was somewhat reduced by blight, rot and insects. The net result is an estimated yield of 350,070,000 bushels, according to the October report of the Bureau of Crop Estimates, compared with 400,106,000 bushels last year, 442,108,000 bushels the year before, and 286,953,000 bushels in the short crop year of 1916, which was the smallest yield since 1905 (260,741,000 bus.).

Details of the crop in principal states as per the October report follow:

	Production—Forecast, Oct. 1, '19.	Production—Estimate, Dec. 1, '18.	Price per bu. Oct. 1, 1919.	Price per bu. Oct. 1, 1918.

U. S.	350,070	400,106	$164.2	$143.6

Grain Movement to Seaboard Stopped.

The shipping permit and transportation departments of the Grain Corporation have placed a blanket embargo on all grains and cereal products destined to move through the port of New York for both export and domestic consumption. It has been necessary for the receivers of grain there to satisfy the corporation that there is ample storage facilities in New York before permits will be issued for the starting of the grain toward the Seaboard from the interior. The issuance of such permission has been discontinued pending the longshoremen's strike. It is understood that the more important grain ports in the North Atlantic Range are already filled with grain which will have to wait until the strike has been settled before it can be loaded into ships and sent on its way to foreign ports.

Field Seeds

Miles City ranchmen report sales of alfalfa seed at 20c to 30c a pound.

Marshall County, Iowa, farmers claim there is a shortage of good seed corn in that section.

Rainbow fed corn is one of the best field varieties grown on the plains of Colorado this year.

The Farmers Coöperative Exchange at Great Falls, Mont., has been organized and will purchase seed corn for the members.

A Montana seed dealer writes C. A. King & Co. that there is no clover seed raised at all in his part of the country, the crop having been killed with drouth.

The average yield per acre of alfalfa seed in Illinois is reported as 2 bushels. The acreage harvested as compared with the usual acreage is reported as 89 per cent for alfalfa seed.

The Clover seed prospect in Ohio suffered further decline in September and at time of harvest the condition of the crop was but 48,422 points below the five-year average. Many of the normally surplus producing sections will not produce sufficient seed this year to supply their own needs.

An Illinois seed law that went into effect on July 1 of this year provides regulations for the handling of all grass seeds. The law does not prevent the sale of impure seed, but requires the proper labeling and tagging of the seeds sold or offered for sale.

The condition of clover seed at time of harvest was 87 per cent in Minnesota. Where rains were favorable for a second and the stand good, the prospects are very favorable, but many fields are spotted, or have a thin stand. The yield of alfalfa seed is 2.5 bushels.

Much of flax, like corn, fully matured, but owing to ravages of grasshoppers in certain sections, especially along the western border of the state, it is not as promising as the corn. However, with a condition of 82 per cent, a production of 2,939,100 bushels is indicated on October 1. This is slightly above the five-year average of 2,560,000 bushels, and not far from the 1918 crop of 3,120,000 bushels.

Clover seed shows a drop of 14 points over the September report, in Missouri, which brings the condition to just one-half of normal and indicates a total production of only 88,000 bus., which is the lowest for a great many years. Delay at harvesting time, together with extreme heat and dry weather during the summer, caused the abandonment of much of the seed acreage. Grasshoppers caused much damage in some sections. Quite a number of the reports indicated that the yield was good for the amount of straw, but there was not much straw.

CHICAGO SEEDS MOVEMENT.

Following is a report of the receipts and shipments of grass seeds at C for the months and weeks named in 1919 and 1918, in pounds (000 omi

St. Louis Seed Market.

ST LOUIS, Oct. 11.—Clover was today higher with sale of 70 sks. choice clean seed to arrive at $48.50 and spot lot (1 sack) at $34.00. Nothing done in other seeds. Quote timothy at $8.00 to $9.00 for low-grade, $10.25 to $10.75 for fair and $11.00 to $11.25 for choice; Alfalfa at $18.00 to $28.00; clover at $46.00 to $47.00 for high-grade up to $48.50 for clean seed free of buckhorn, $38.00 to $45.00 for average country lots, $20.00 to $34.00 for heaviiy buckhorn-mixed and $5.00 to $18.00 for very poor; alsike at $40.00 to $45.00 for high-grade, $35.00 to $40.00 for choice; redtop at $12.50 to $15.00 for machine-cleaned (chaffy less) up to $16.00 for extra fancy solid seed; golden millet at $2.50 to $3.00. Hog millet at $2.90 bulk; sunflower seed the last spot sale was at $10.50.—*Reporter.*

Duluth Flaxseed.

DULUTH, Oct. 11.—Operators flaxseed market were given pl action during the last week. Sh vances were registered as a re active buying at times when the appeared to be bare of supplies. ture was a straight bulge of 3 in the cash and near future on T when bidding by crushers, som on account of Eastern interests, l rush on the part of belated sh cover. Prices were therefore ru chunks. A reaction of 12 cents oped on Wednesday on realizin Full recoveries were made on Th but the market became tired on and declines reaching 6 cent brought about. The net results week's operations were breaks ing to 50 cents in cash and 42 c the November future.

Considerable seed was shipped the elevators during the week, t gregating 145,702 bushels. Recei ing the six days were 88,743 b and stocks in store in the eleva Saturday were reported at 122,00 els.

The Government report on Th was not a factor, as the estimat duction of 10,652,000 bushels show a comparatively moderate gain o figures of the preceding month.

The weaker market tone at t end of the week was attributed ported liberal Argentine import the statement that a round ton seed from down there had been s all-rail from New York to Mc It was estimated by experts that basis of the spreads betwee Buenos Aires and the Duluth m Argentine seed could be laid d New York at around 70 cents low shipments of the Northwest from here.

Closing prices of flaxseed on t luth market on Saturday, as co

Kansas City Seed Market.

KANSAS CITY.—Seed dealers were only lightly disturbed by the frost which occurred Friday night over the greater part of the Southwest. It is expected that the reports will show some damage to matured cane and the sorghum crops, but most of these crops are believed to have been out of danger. There is as yet no sign of a movement of the except in Texas, and no prices mentioned here. Millet seed should be coming in, but dealers say producers are holding for higher prices than are bid. The size of the crop is in doubt. Some of the larger houses handling fair amounts of Sudan grass seed. The new crop of alfalfa seed is known to be small, owing to the growths having all gone for hay, and grasshopper ravages were effective in reducing the yields of both hay and seed in southwestern Kansas. Seed corn has begun, but no thrashing has been reported. The far Western states have marketed some seed. Prices are to be high this year. There are light movements of timothy and clover seed. Crops of both were small in Missouri, the principal producing state in the Southwest. A big crop of blue grass seed has practically all been sold.

Seed prices in Kansas City are quoted as follows, as from first hands: Alfalfa, per cwt., $20@26; timothy, per cwt., $9.50@10.50; blue grass, per cwt., rough, $10@12.75; cleaned, $17@26; clover, per cwt., $35@42; millet, per cwt., $2@2.75; Sudan, per cwt., $7.50@10; cane, no quotation.

French Clover and Alfalfa Seed.

Price Current-Grain Reporter: More precise information is coming in now about the French crop in clover and alfalfa, which we summarize as follows:

Red Clover.—The seeds have ripened under good weather conditions and threshing has already begun in different regions of France. The few samples we have seen so far represent a good quality, though less heavy and lighter in color than the crops of the preceding years. Nothing certain can be given yet as regards the importance of the output, as the clover has not yet been harvested in the center of France. However, it is generally believed that the yield will be somewhat superior to what was expected about one month ago.

The prices paid to the farmers at the beginning have been very high and are still rising, keeping pace with the exchange rate of the dollar. As a matter of fact, it is the exchange question which will rule the market this year and not the production of seed. The result will be a very difficult situation which may have us reserve some big surprises because there is no serious basis to rely on, as the exchange market is entirely of a speculative kind. Some transactions have been carried out on the basis of $42 per 100 pounds c.i.f. New York, October, November shipment. Now, three days ago we witnessed a considerable fall in the dollar price, which from 9.20 francs has gone down to 8.31 francs, and according to informations we received from the principal bankers in Paris, the decline of the dollar is supposed will go on. As a consequence the sales mentioned above would no longer be possible at the same price. Besides, the farmers having obtained very high prices during the past week (Sept. 20), will certainly show some reluctance to accept less; and we expect that the market will be very irregular for some time to come.

ALFALFA—Southern France announces a very bad crop of alfalfa seed. As regards the Center, no positive news has arrived to this date (Sept. 27), and not until some time later will we be able to figure approximately the importance of the whole crop. We judge, however, that it will be insufficient for the needs of our country, and if sometime we shall be able to export some quantity abroad, at others we must have recourse to foreign seed. Germany announces very large needs and this fact will certainly keep prices very high.—*H. Faucet & Cie, Paris, France.*

Clover Seed Crop.

Government report makes clover seed crop 1,015,000 bus., against 1,102,000 last year and 1,488,000 two years ago. Condition 69.8, against 77 last month and 69 year ago. Ohio, Indiana, Illinois, Idaho and Oregon have less seed than last year; Wisconsin, Michigan, Missouri, Iowa and Minnesota have more. Condition lower than last month, but trifle better than year ago. Ohio has the lowest condition, only 48; Indiana is almost as low; Wisconsin, Minnesota and Idaho are the highest.

	Condition— Oct., 1919.	Oct., 1918.	Crop in bushels (000 omitted) 1919.	1918.	1917

—*C. A. King & Co., Toledo.*

Toledo Timothy Seed.

Timothy attracted mighty little attention last week, say J. F. Zahm & Co. It was seemingly in a rut, and been there for a long time. Everyone is waiting—for what? Bulls say for a big European demand. Bears say Toledo is waiting to fill up its bins again. Receipts during week broke all records for any one day. Then they stopped.

An Indiana friend writes Zahm & Co. as follows: "We are not in the least afraid of timothy with conditions existing today. Can hardly see where clover and alsike can go much lower, although there may be some breaks, and with alfalfa extremely high we don't see what will hinder an increased demand for timothy, and with the increased demand you may expect some real action in timothy, and my advice to you is not to get on the short side as there is likely to be something doing. We don't always guess right, but with the information we have can sometimes hit it."

Toledo Clover Seed Market.

Among other things Southworth & Co. on Saturday said: Clover receipts were light during the week, only 500 hogs. This is unusual for this time of year. October increased its premium to 75 cents over December, and considerable seed is expected to be shipped in to apply on October contracts.

Central States clover yield is small. Condition has declined in Ohio to 48, which is 22 points below 5-year average. Many normal surplus sections will not produce enough for own requirements. Indicated Michigan yield is 1.72 bushels per acre, against 1.50 last year. Acreage is small.

The 1919 crop is the one that makes Wisconsin famous. Reports from there, as well as Minnesota and Iowa, indicate good yield. Wisconsin seed that we have seen is of fine quality, bright in color, with good plump berry. Yield running 1 to 3 bushels per acre. However, crop is not going to be as large as anticipated early. Farmers liberal sellers at these extreme high prices.

Forage Plant Seed Imports.

The following table, prepared in the seed laboratory of the Bureau of Plant Industry, Department of Agriculture, shows the amount in pounds of the various kinds of forage plant seeds subject to the seed importation act permitted entry into the United States during the month of September 1919 as compared with September 1918 and during the quarter ending Sept. 30, 1919, as compared with the corresponding quarter in 1918:

Kind of seed.	Sept., 1919.	Sept., 1918.	July-Sept., 1919.	July-Sept., 1918.
Alfalfa	1,644,700	22,000	2,911,000	22,000
Blue grass:

SEED SITUATION.

SEED CROPS—WINTER WHEAT.

CAMP POINT, ILL. (2).—The timothy seed retail trade has been very light owing to the small acreage of wheat being sowed this fall. The crop was smaller than earlier expected. About 95 per cent of this seed is gone to the markets.

The clover crop is about what was expected and farmers are strong holders. We look for a very small retail trade next spring, owing to the small acreage of wheat being sowed, and everyone has caught a first-class stand this year, which is surely very fine now, with an acreage for next year very large.

Wheat is coming up fine and looking fine. About 95 per cent of the wheat has gone to the market.

Grasses of all descriptions are looking very fine, growing fast, and going into winter in very good shape.—*William Vollbracht Co.*

CLIMAX SUPERFINE BRAND.

Readers of our recent advertisement, a little one act play, laid under the open sky, will recall that it repeated a dialogue between a farmer and his son.

In continuing the story, we offer another drawing showing two farms, one very prosperous looking, the other run down, and the owner of the former is tactfully but nevertheless seriously asking the other, "Bill, did you ever buy seeds, put out in convenient size bags by W. H. Small & Co.?"

The owner of the poor farm says, "Yes, one time, 17 years ago, and I guess I shall go back to their seeds and make some money."

The successful farmer replied, "Yes, Bill, you will have to if you expect to run with me in producing bumper crops. I buy all my seeds from them, six different brands, and their bushel bags make a hit with me, as there is no loss of time or seed in buying from my dealer."

CLIMAX SUPERFINE BRAND.

CLOVER SITUATION UNPARALLELED.

LIGONIER, IND. (7).—The clover situation in our section is unparalleled in the history of our fifty years' experience in the grain business. This is a very large clover-producing section, clover seed being one of the largest money crops produced in this section. We have never seen anything so closely approaching a failure as the clover seed crop this season. There is not enough seed raised in this county to reseed it. The acreage is small and the turnout is not to exceed a peck to the acre.

We now estimate that we have approximately 15 per cent of a normal crop. Farmers are selling very freely at the price, none being held back.—*N. Wertheimer & Sons.*

Louisville Seed Market.

LOUISVILLE, Oct. 11.—Seed demand is slow, there being a fair demand for timothy for fall seeding, now that weather conditions permit working the fields. No. 1 timothy is quoted at $12@12.50 a bushel, cars or less than cars. Kentucky bluegrass is quoted at $3.25 a bushel for 21 lb. seed, and is in light demand. Orchard grass is also quoted at $3.25 and is dull. There is very l demand for red clover, at $50 a bus and no sales are being reported.

Farmers are now asking $9 for ye onion sets and $11 for whites. Bu for January and February deli should begin shortly, but right there is no demand. The potato as a result of rains is looking fine, prospects of a big seed crop.

A great deal of wheat is in dange loss in Nebraska, having been pile the ground because of the shortag cars.

eans and Potatoes

e Ohio state report says that Sepr rains over the late potato section oved the outlook for this crop, the nt prospect being for 9,405,000 bus.

Minnesota the state agent reports a he potato crop shows a slight imoment in the estimated production, at Sept. 1 was estimated at 27,-0 bushels.

Indiana the state field agent says arly crop of white potatoes is pracl a failure in all sections and the crop not much better. Indicated production only 3,700,000 bushels.

isconsin report says that favorable ull in central counties of that state g September added slightly over lion bushels over the potato pros-26,438,000 bushels being fore-t.

e field agent of New England re-an increase in the estimated ook potato crop during September. vet and cloudy weather, however, maging to beans, many of which on the vines, reducing the yield uality.

he New England states, the Amer-Steel & Wire Co. report says, po-range from fair to normal, with ported from some states; in the rn states generally potatoes are good, especially in quality; in the , sweet potatoes generally good to good.

*National Weather and Crop Bulle-*r the week ending Oct. 7, says n New Jersey sweet potatoes and are doing well; in Pennsylvania otato fields are generally good; in and and Delaware, late potatoes oing nicely; in Wisconsin there reased potato rot in lowlands.

BEAN SITUATION.

BEANS IN PRIME SHAPE.

AY CITY, MICH. (9)—Regarding situation: There is no movement y beans here as yet. Very small e was planted, but nearly all the are harvested in prime shape. It like about 10 to 12 bu. per acre e average. Today's prices do not igh.—*Lewis Steele.*

BEAN THREshING.

CHARLES, MICH. (8).—Bean threshill be completed in a couple of . The crop is of good quality, but reage is not as large as last year. ield is running from 14 to 18 s to the acre. Farmers are not g to sell on present basis of price. *Charles Flour & Feed Co., by A.*

BEANS DRAGGY.

IGAN.—Threshing has not started About ten days will find delivery heavy. Some old beans are still farmers' hands, who are holding . Most of growers are satisfied 6.50@6.75 per cwt. I find the mary draggy, but hope to demand ick-ups soon.—*D. R. Stiles, Argen-Mich.*

BEANS HARVESTED.

HTON, MICH. (9).—The bean acrer 1919 was not over 25 per cent vingston County, compared with and the yield per acre is about me as in 1918. The weather has good for harvesting and all the were secured in good condition, a very few that were late planted. 18 crop is about all out of farmnds.—*A. C. Stewart.*

Bean Contract.

Michigan Bean Jobbers' Ass'n at ent general meeting ordered conuse of the old form of contract, ade two additions: (1) to allow rth of 1 per cent in weight and notify seller of acceptance or re- of beans within three full busiays, date of arrival not to count. eceiver waives right of rejection done within time named.

BEAN AND POTATO PRICES.

Quotations follow for lots of good quality and condition beans and potatoes, sacked, per cwt., unless otherwise specified as of Oct. 11:

Beans—

Boston—Limas, $12@12.50; Conn. Val., $3.75@4.

Chicago—Pea beans, hand picked, ch. to fancy, $8@8.50; brown Swedish, $5.50@7.00; red kidney, $11.50@12.

Cincinnati—Navies, $8@8.50; marrowfats, $12.50@12.75; red kidneys, $13@14; limas, $13@13.50.

Detroit—H.-p. pea beans, $7.25.

Denver—Pintos, $6@7; navy, $8.50@9.00; limas, $10@10.50, wholesale.

Montreal—There is still a fairly good demand for Ontario hand-picked beans, and we hear of two carloads selling at $4.50 and $4.52½ respectively, two to three pound pickers at $5.00, and 5 to 6 pound pickers at $4.50 to $4.75.—Trade Bulletin.

Minneapolis—Navies, h.-p. fancy, $9; soy, $5; Cal. limas, $11; brown, $6.

New York—There is little change in the situation of the market. Trade holds dull on all lines, with limas alone showing activity. Nothing doing in domestic white beans. Imported beans under neglect and tone generally easy. Red kidney quiet. Red marrows very dull. Limas hold strong, though not much doing; one sale reported at $14.50 in a jobbing way. Advices from the Coast indicate that new limas are moving well at the opening price. Peas quiet and unchanged. Quote per cwt. Marrow, ch., $11.50; com. to fair, $10.50@11.25; Manch., $11.50. Pea, ch., $8; com. to fair, $7@7.75; medium, ch., $7.75@8; com. to fair, $7@7.50; Lady Washington, Calif., $7.75@8; small, white, Calif., ch., $7.75@8; Tepary, Calif., $5@5.75; Kotenashi, $6.75; Ohtenashi, Japanese, $7.50@8; Chufuku, Manch., $7.50@8.50; Daifuku, Manch., $8.50; Triguito, Chilian, $7.50@8; red kidney, ch., $13.50@13.75; com. to fair, $10.50@13.25; red marrow, $10@10.50; Kintoki, Manch., $4@5.50; white kidney, $12.25@12.50; imperials, $10.00; Kumamoto, Manch., $8.50; Cabellero, Chilian, $7.50; Bayou, Chilian, $6@6.50; Cranberry, Manch., rnd., $6.75@7.25; long, $6.50@7; short, $5 50@6; Calif., $7@7.25; yellow eye, $7.25; pink, Calif., ch., $7@7.50; lima Calif., ch., $14.25@14.50; lima, Madagascar, $12.50. Peas—Scotch, ch., 1918, $6.75@7; Scotch, ch., 1919, $7@7.25; green, Wis., $6.50@7; Idaho, $7.25@7.50; Wash., $7.50@7.75; Calif., $7.50@7.75; Japan, $8.30@8.50; Korean, $7.50@7.75; Australian, $7.75@8; splits, yellow, $7.50; green, $10@10.50; black eye, Calif., ch., $6.25; white, small, Manch., $5.75@6; white, large, Manch., $8@8.50.

Pittsburgh—Limas, $15.00@15.50; red kidney, no market; Cal. navy, $8; Mich. f. o. b., $3; Roman, $3.25; Mich. navies, $3.75.

St. Louis—Quote white beans in car lots—choice, hand-picked Michigan at $7.75 per 100 lbs., prime machine-picked, $7.50; orders and small lots, higher; pinto beans, $7. California black eye, $7; choice lima beans at $13; California pink beans at $8 and white $8.50.

Potatoes—

Boston—N. B. and Aroostook, $2@2.50. Sweets, bbl., $4@4.25.

Cleveland—Me., 150-lb., $4.50; Mich.-Wis., $4.25@4.50; Ohio, $3. Sweet—Va., bbl., $3.60@4.

Chicago—Minn., Ohio, $2.60@2.70, bulk; Wis.-Minn., blk., rnd., wh., $1.90@2.00. Receipts for week 473 cars, last week 438, year ago 482. Some orders at a sacrifice, but generally the market was firm.

Cincinnati—Minn. early Ohio, bbl., $3; Wis., round wh., $2.60@2.75; early Ohio, h.-g., bbl., $6.50@7. Sweet—N. C.-Jer., $3.75; Va., bbl., $4.

Dallas—$3.50@4.

Detroit—Mich. cwt., cobbler, $3.75; giants, $3; several bbls., $4.

Jacksonville—Wh., 150-lb., $4.75@5.25. Sweet, cwt., $3.

Kansas City—Minn. Red River, $2.75@2.90; poor to ordinary, $1.50 up; Idaho, $2.35@2.40; h.-g., bu., $1.50@1.70; Tri., $2.70@2.75; North'n wh., $2.50@2.55; West'n wh., $2.30@2.40. Sweet—H.-g., wh., 90c@$1; Jersey, $1@1.25; So., $1.25@1.40.

Milwaukee—$2.25@2.75.

Minneapolis — $2.35@2.45. Sweet — Va., $5.25; Jer., hpr., $2.25.

New Orleans—Early Ohio, $3; Va. giants, $3.25; Colo., $3.25. Sweets—Ala., Miss., La. yams, $2; wh., $1.25@1.40.

Pittsburgh—N. Y., blk., $2.20@2.40; Pa., rnd., wh., sk., $4.35@4.50; blk., $2.70; Mich., No. 1, sk. (150 lbs.), $4.10; c. l., sk., $3.90@4; r. wh., blk., $2.50. Sweet—Jer., hpr., $1.75@2; E. Sh., bbl., $3.50@3.75; Wis., sk., c. lts., $4.40; N. J. giants, 150-lb. sk., $3.75@4.

San Francisco—Salinas, $3@3.10. Sweets, lb., 4¾@5c.

St. Louis—Sales of skd. Northern rurals at from $1.50@2.30 per 100 lbs., according to quality and condition; Red River E. Ohio at $2.75; Western russet Burbank at $2.50@3 and brown beauty at $2.60@2.75. Wyoming russet Burbanks at $2.90, del.; Minn. rural at $2.25, del. Sweet—Steady. Longs, large hpr., Tenn. Nancy Hall, $1.25; h.-g. Bermuda at 75c, red and yellow Nansemond and Nancy Hall at 90c to $1 per bu. box loose.—Reporter.

Montreal—Receipts last week were 3,227 bags, against 9,512 bags the week previous, and 14,775 bags last year. The market is well supplied with Quebec white potatoes, car loads of which have sold at $1.40 to $1.45, one car of ordinary selling at $1.35 per bag of 90 lbs.—Trade Bulletin.

BARLEY MARKETS.

BUFFALO.—Barley dealers had some good heavy barley to sell, but maltsters here were not ready to buy and nothing was done. They say that there may be something doing early next week. Old malting was quoted at $1.45@1.52 and new $1.35@1.42. Feed $1.29@1.42 on track or in store, Buffalo.

DETROIT.—Barley is quoted 10c higher this week, at $2.50@2.60 for No. 3, cost per cwt., but there is little to say here.

ST. JOSEPH.—There was considerable demand for good grades of old barley, with heavy test, but prices are too high for feeding value, as compared to corn. Kansas barley is coming in slow, but ranging in test from 32 to 38 lbs. and very light, but of fine color. Barley quotations were $1.20 to $1.24 for No. 3 and $1.17 to $1.20 for No. 4.

DULUTH.—Fair inquiry was received for barley during the first four days of last week, and its market held firm. Interest then appeared to die away and cash handlers found difficulty in marketing the light current receipts. Final prices are unchanged at 6c off at $1.06@1.32 for spot. Receipts for the six days showed a still further falling off at 37 cars against 67 cars last year.

MILWAUKEE.—The local barley market ruled easier with prices for the week being 4@5c lower, under a slack demand from both industries and shipping buyers, and moderate offerings, largely ordinary stuff, which is difficult to place. Receipts for the week were 176 cars, against 144 cars a week ago and 64 cars in 1918. Current quotations are: Good to choice, 48 to 50 lb. test is quotable at $1.35@1.37; bright, $1.38@1.40; fair to good, 45 to 47 lb. test, $1.28@1.35; low, 41 to 44 lb. test, $1.22@1.32; 36@40 lbs., $1.12@1.22; feed, $1.12@1.25. Iowa quoted $1.20@1.36; for light to fancy; Wisconsin, $1.25@1.40; Minnesota, $1.20@1.35; Dakota, $1.20@1.35; feed and rejected, $1.12@1.25.

MONTREAL.—Barley receipts during the past week were 65,128 bushels, against 146,493 bushels for the week previous and none for the same week last year. The market is quiet and more or less nominal, as the English market is cabled 8c to 10c lower. Prices here are nominally quoted at $1.45 for No. 3 Canadian Western. Ontario barley is poor quality this year. Feed barley is quoted at $1.33.

PORTLAND.—Barley shows but little improvement and the demand at present is small. Ample stocks are held at tidewater warehouses and buyers can easily secure whatever they need, says the *Commercial Review*. An easy tone prevails and trades seem to lack orders. No one can explain this lethargy, but dealers figure that a better demand will exist when the weather gets colder. Values for No. 3 blue barley are $63.50, feed $62.50 and Eastern barley $61 per ton.

KANSAS CITY.—Movement of barley from the West to this market continues limited for two reasons. Car shortage is one cause of restriction and another is the fact that prices have been at a discount under oats, considered on the pound basis. All that arrived this week found a good demand, largely for shipment to feeders, or to grind locally, and prices had an upward tendency. At the close the market was 5@8c higher, with No. 3 at $1.24@1.25 and No. 4 at $1.23. Receipts were 11 cars, against 9 a week ago and 13 a year ago. Ground barley feed is quoted in carlots from $2.60 to $3 per cwt., and is in moderate request.

SAN FRANCISCO.—The barley market is dull and very little new business is being done. Sellers are holding off in expectations of increased values; since the decline no one cares to sell. Outside business is small and local trade is of a retail character. There is said to be a sentiment among growers that the shortage of barley and some other varieties of grain is apt to advance prices materially when the foreign demand is resumed, and they may be holding back their grain on that account. Much of the malting barley used in the United Kingdom, in previous years, was obtained here. The early crop in the state is of fair grade and contains considerable barley of a malting grade. But the quality of the late crop is poor, and the total crop is much reduced from that of recent years. We quote shipping grades $3 to $3.10. Feed from $2.90 to $3 per cental.—*Commercial Review*.

CHICAGO.—The barley market was a rather listless affair all week. Early in the week offerings were ample and buyers slow. Maltsters took some of the heavier varieties but there was little demand from the feed men and still less from the industries. Toward the close of the week, offerings were less free and the week closed with a good tone, especially for good barley; low grade barley is almost unsalable. Some shipping demand appeared, but export inquiry was nil. Range of prices ap in tables above. Visible supply where.

MINNEAPOLIS.—There is a limit mand for barley and that is confi the choice bright stuff. Thin bar in slow demand and weak in tone. vator companies have considerabl stock on hand and cannot hedg poor barley advantageously. Re are very light compared with yea totals.

The Institute of Agriculture at reporting on barley yields for Sco Italy, Canada, United States, Japa geria and Tunis says there is an ciable decrease in the yield for all countries except Scotland and J Compared with the 5-year averag yield this year was slightly in by 2.4 per cent for the United and larger by 39.1 per cent in Ca

THE FEED MARKET.

orrespondents do not report any ate revival of the demand for fs, although there will no e a normal winter demand for rates and the mixed feeds both le grains and the by-products s. For the present the coun-ull of natural feeds. Late rains erywhere revived the pastures pretty general absence of frost le the grass lush and nutritious. r the Southwest the grass is l abundant. The same is true Eastern dairy districts and in gland.

rices are down now, it would ood policy to urge consumers up while the market is favor-able. The Department of Justice has declared its intention to take a common sense view of this sort of procedure and to recognize the difference, which men of good common business sense, not posing for political lightning to hit them always understand, between hoarding and holding commercial supplies in amounts which trade warrants. This should relieve the apprehensions of conscientious business men who would go to any length to avoid controversy with the Government, even at the expense of their legitimate business and income.

Aside from alfalfa which is in somewhat larger supply this season than last, tho' not all of as good color, perhaps, protein feeds are scarce. Mill feeds and bran are still high with not much prospect of declining; there are only limited quantities of brewers' and distillers' grains; beet pulp is not in general distribution even were it abundant, and the discolor to the cotton-crop gives no hope of cheaper cottonseed meal, in spite of the Kansas live stockmen's wail that meal is now $25 per ton too high. Seed and meal are both scarce and truly to be so for some considerable time, while linseed meal is even harder to get at a price buyers are satisfied with.

In fact, while hay is abundant, the largest crop on record—it is the only feedstuff that is in surplus or will be when frost comes and the present splendid pastures are killed for the winter.

FEED SITUATION.

FEED MARKET DULL.

NEW ULM, MINN.—The feed market is very dull—no demand and prices declining daily. We find no interest displayed in the principal markets. Prices here, Oct. 6: Bran, $36; middlings, $46.50; red dog, $63.50.

GOOD DEMANDS FOR MILL FEEDS.

EAST LIVERPOOL, OHIO.—We have a large stock of wheat bought direct from farmers, and it is still coming. The wheat is fine in quality and therefore produces flour of fine quality. There is a large demand for bran and middlings. —*The Faulk Brothers Co.*

MARKET CONDITIONS TRYING.

BINGHAMTON, N. Y.—In this territory at least, business has been exceedingly dull for the past several weeks, due perhaps to the bears having the upper hand on the market situation.

Due to the almost ideal summer conditions, existing at this late date, feeders have not fed anywhere near the normal amount which is fed during October, which has caused the purchasers, feeders, the retail feed dealers, to roll in upon them, causing over-crowded warehouses and sadly depleted bank accounts. When these two conditions are "abroad in the land" the likelihood of the average human being is to assume a hypocritical attitude toward the goods delivered. This microscopical condition of the mind springs on unwarranted disputes and cancellations which causes a great deal of worry and anxiety on the part of the wholesale distributor.

We believe that we had it coming to us, for the reason that during the past year or two we have been working on a steadily rising market, and some of us had almost forgotten what trouble was, as it has been our experience that the average consignee very seldom refuses shipments which may be delayed by not being shipped or delayed in transit when the market price on arrival of goods is from $10 to $15 a ton higher than invoice price. *But* when the market price is $1.00 to $2.00 less than invoice price, we believe that the great majority of the feed and grain trade will agree with us when we state that sometimes the consignee intimates very strongly that shipment was not as contract or goods were not as purchased.

This is a funny old world and we hear much these days about the double standard of morality, but we believe that the double standard of acceptance or declining goods purchased is just as strongly recognizable.

With kind personal regards and best wishes, and with the hope that your paper is meeting with its well deserved success.—*Empire Grain & Elevator Co.*, *MacLean Wilson, Vice-Pres., Asst. Mgr., Thomas A. Wilson, Second Vice-Pres.*

FEED MARKETS.

MINNEAPOLIS.

Minneapolis, Minn., Oct. 13. — There has been no improvement in the millfeed situation. Offerings are plentiful and the demand is limited. Prices are holding well because of the stubbornness of the millers. Interior mills are offering more freely of late. There is a moderate demand for deferred feed at good discounts under spot values. Millers refuse to sell freely for forward shipment at prices bid. Quotations in car lots f. o. b., sacked in 100-pound sacks, bran, $34@36; standard middlings, $42@44; flour middlings, $52@54; red dog, $61@63; rye middlings, $42@44; ground barley, $57@58.

TOLEDO.

Toledo, Oct. 11.—Although the demand for millfeeds was weak the first part it gained strength the latter part of the week and supplies at local mills were inadequate to meet demand. Prices were: Bran, $45; middlings, $57 per ton, bag basis, f. o. b Toledo. Flour production of Toledo mills was 42,500 barrels, as against 47,000 last week and 47,750 barrels a year ago.

MEMPHIS.

Memphis, Oct. 13.—Quietude continues the chief feature of the feed market, but in the cottonseed meal section there is still the same old uncertainty as to what the stuff is worth. Meal of the 7 per cent variety is quoted at the mills at $64 to $65 a ton, but there is no general demand yet and the wildness in the cotton market of the

past few days, with its resultant effects on the seed market, has unsettled values and caused holders to be firm. It is expected that more clarified ideas of the market may be had when trading in meal starts on the Memphis Merchants' Exchange next Monday.

Mill feeds are still not very plentiful, but they are offering freely enough to fill the limited demand. Cash wheat bran is quoted at $37 a ton, while shorts are selling around $56 to $57.

There is no snap in sweet feed demand, as it is between seasons.

ST. LOUIS.

St. Louis, Mo., Oct. 11.—The feed market is quiet on all kinds of feeds, but bran is steadier and oat feed is weaker. Quotations are as follows: Bran, spot, $36@37, with futures about 50c less; gray middlings, $53@58; red dog, $66.50; white hominy feed, $53; oat feed, $24; alfalfa meal, No. 1, $36@37; No. 2, $33 per ton, in new sacks.

NEW ORLEANS.

New Orleans, Oct. 11.—The demand for bran has ceased and at the same time offerings are not large. Bran has been offered delivered New Orleans at $1.95 per hundred Some indications have been made at $1.90; whether sales have been made at this figure have not been verified.

DULUTH.

Duluth, Oct. 11.—Weakness developed in the feeds markets during the week. Bran broke $2, shorts $5, red dog $5, Boston mixed $3, and rye $2. As a result of the irregular market and expectations of a lower price range operators continued to confine their buying to current needs only. Prices per ton follow: Bran, $37.50; ground oats, $48.25; No. 1 ground feed, $53.75; No. 2 ground feed, $52.50; No. 3 ground feed, $51; shorts, $47.50; flour middlings, $60; red dog, $64.50; Boston mixed, $46.50; cracked corn, $56.75; rye feed, $38.

PHILADELPHIA.

Philadelphia, Oct. 11.—The market for feedstuffs is dull and lower under a light demand and liberal offerings. Quotations are for carlots to arrive, in 100-lb. sacks, at cost, per ton. Winter bran, $41@41.50; spring bran, $41@41.50 flour middlings, $57@58; standard wheat middlings, $47@48; red dog, $68@69; shorts, $47@48; low grade flour, $68@69; rye middlings, $48@49; fine yellow hominy, $57.50@58.50; fine white hominy, $58.50@59.50; reground oats feed, $26.50@27.50; cottonseed meal, 36% protein, $70.50@71.50; cottonseed meal, 41% protein, $76@77; cottonseed meal 20% protein, $59@60.

DES MOINES.

Des Moines, Oct. 11.—Markets on feeds have all worked to new low levels during the past week. Receipts have been heavy and all offers have been taken: Bran, $36 per ton; shorts, $47 per ton; middlings, $51 per ton; tankage, $99 per ton; oilmeal, $70 per ton. Feeders are buying heavily at present prices and we do not look for further declines for some time.

NASHVILLE.

Nashville, Tenn., Oct. 13.—Easier tone continues on mill feed, with inactive demand for bran and middlings. Other ground feed continues in moderate demand. Some complaints are heard of car shortage at mills. Quotations: Soft winter wheat bran, 100-lb. bags, per ton, $40@42; middlings, $58@60; horse and mule feed, $45@57; dairy feed, $56@57; hog feed, $68; poultry feed, $67@71.

PITTSBURGH.

Pittsburgh, Oct. 11.—Receipts of feed remain about the same as they were last period and prices show no material change. A total of 25 cars were bulletined in the local hay and grain exchange, most of which consisted of white middlings. Four cars of bran were included. Demand is improving and little difficulty is found in placing all arrivals at good prices.

MILWAUKEE.

Milwaukee, Wis., Oct. 11.—The local mill feed market required considerable attention during the past several weeks, with constantly varying prices, reflecting a downward tendency. During the week the market ruled weaker, bran being quoted $1.50 lower, while middlings is also working off closer to bran basis, standard middlings showing a drop of $4.50@5 and flour middlings a drop of $3@3.50. There has been a slightly improved demand for bran, while business generally is reported as only fair. Pasturage throughout the state is still reported in splendid shape for out-of-door feeding. Current quotations are:

Bran, per ton, $36.50@37; standard middlings, $44@45; flour middlings, $54.50@56; red dog, $62.50@63.50; hominy feed, $59; rye feed, $42@43; old-process oil meal, $72; cottonseed meal, $75@82; brewers' dried grain, $60@61; gluten feed, $63, all in 100-lb. sacks.

BOSTON.

Boston, Oct. 11.—Offerings of feeds of kinds were moderate during the past week and a fair demand reported. Practically all feeds were quoted lower than last week. The following prices were being quoted at the closing: Bran, spring, sacked, $43 per ton; bran, winter, sacked, $43; middlings, sacked, $54@56; mixed feed, sacked, $53@58; gluten feed, sacked, $69; red dog, sacked, $71; second clear, sacked, $73; stock feed, sacked, $61.50; oat hulls, reground, $30; hominy feed, sacked, $61; cottonseed meal, sacked, $73. Receipts for the week ending Oct. 11 were 50 tons.

CINCINNATI.

Cincinnati, Oct. 14.—The market for all kinds of mill feeds was extremely dull and easier. Quotations, representing 100-lb. sacks, at the close of the week were: Bran, $39@39.50; mixed feed, $47@47.50; brown shorts, $52.50@53; gray middlings, $55@56; standard fine middlings, $51@53; hominy feed, $55@57. Two cars of sacked middlings sold as low as $48 on auction at the exchange.

BALTIMORE.

Baltimore, Oct. 11.—The tone of the general feed market is easier as a result of a slow carlot demand and a tendency of supplies to accumulate on sellers' hands. Western advices easier. Quotations follow: Western spring bran, per ton, in 100-lb. sacks, $43@44; Western middlings, per ton, in 100-lb. sacks, $57@58; city mills' winter wheat bran, per ton, in 100-lb. sacks, $55; brown middlings, per ton, in 100-lb. sacks, $58; white middlings, per ton, in 100-lb. sacks, $68.

LOUISVILLE, KY.

Louisville, Oct. 11.—Feed is in fair demand only, mills having fair supplies of mill feed and ready to ship promptly. In carlots, cotton, bran is quoted at $43 a ton; mixed feed, $58; middlings, $63; scratch feed, $70; cracked yellow corn, $61; corn and oat feed, $60; corn and oat chop, $60; hominy feed meal, $55.

NEW YORK.

New York, Oct. 11.—Mill feed prices experienced another sharp decline during the past week and offers were heavy. The mills, apparently, have quite a large accumulation which they are trying to dispose of, and this has been pressing on the market here but without finding buyers very responsive. As a matter of fact, consumers in the East have been impressed by the weakness in the coarse grains and have not been inclined to load up with mill feed. The unusual amount of rain in the East this fall has produced very luxuriant pastures and this has an important bearing on the Eastern feed situation. Western spring bran is offered here as low as $41.50 per ton, while standard middlings were quoted at $47.50@48; flour middlings at $59@60; and red dog at $68@69, all in 100-lb. sacks.

Cottonseed Feed Up $1 a Ton.

KANSAS CITY, Oct. 11.—Colder temperatures in the important feeding territory and unfavorable weather conditions for picking and general progress of the crop were bullish influences in the market for cottonseed cake and meal in Kansas City this week. Pices were up about $1 a ton, with the 43 per cent protein grade being quoted at $73.75 a ton, Kansas City, for full October shipment. The 41 per cent grade was held at $71.75 and cold-pressed cake was offered at $57. Inquiry was light.

The Missouri crop report for Oct. 1 says that wheat seeding for 1919 is later than in recent years because of the August drouth which prevented plowing.

SUCRENE FEEDS

In Their 20th Year of Popularity

One dealer, who has handled Sucrene Feeds for many years, writes: "We have had increasing sales on Sucrene Feeds each year. When we sell a feeder Sucrene he is generally a regular customer. Have handled a number of other feeds but they are hard to start and generally fall off. In the long run we consider Sucrene our best seller."

QUALITY FIRST AND ALL THE TIME
THE SUCRENE FEED SLOGAN

It gives you a grip on the feed business which competition can not break.

Our new feed mill at Peoria, Ill., the greatest and most modern plant in America, devoted exclusively to the manufacture of mixed feeds, will soon be ready for work. In the meantime our Owensboro, Ky., plant is running double shifts to keep up with the demand for Sucrene Feeds.

We solicit your order for Poultry Scratch Feeds in any quantity. The late fire did not affect this branch of our manufacturing facilities. Address Main Office at Peoria, Ill.

Southern Mill: Owensboro, Ky.

Going in for Feeding.

A Missouri feeder of many years' experience says that, "While a great many stockmen are refusing to feed out any cattle of consequence this fall, owing to the uncertain condition of the market, I personally believe that the future prices of cattle will justify a feeder taking on a few droves at present and finishing them for the Christmas trade. The very fact that so many stockmen are holding back is sufficient to convince me that prices will rise above their present low level in several months from now. This condition will arise from a decreased production which will eventually come to pass. It is surprising to see how few cattle are on the pastures throughout the corn belt.

"Another factor that must be taken into consideration in determining the merits of fall feeding is the low prices prevailing for feeder cattle. Purchases can now be made of good fleshy material at comparatively low figures. Recently I purchased several cars of very good feeder steers at $8.75. Adding the freight and all they did not come to more than $8.90 at the most. These same cattle if bought a year ago would have cost $13 in all probability. While some people feel relieved over the lowering cattle market, it is really the worst condition that could happen at present for not only the producer, but the consumer as well. When meat is bought over the retail counter the purchaser shares in a very small portion of the lowering cost. However, the farmer feels the effect greatly and is retaliating by lowering the volume of production. It is but another case of killing the goose that laid the golden egg."

Movement of Feeder Sheep from Omaha.

All former records of sheep receipts for a single month at the Omaha market were broken during September this year, when 849,811 arrived there; 29 per cent were sold to slaughterers and 71 per cent sent to the country. Nebraska and Iowa took the larger percentage of the feeder shipments. The nearby country districts have been favored with an abundance of rough feed and this has caused a good many farmers to take hold of sheep who have never before attempted to feed this class of stock; the heavy receipts, which included a larger percentage of ewes than usual, are attributed to the drought conditions in Montana and Wyoming. The following table shows the movement of feeder sheep from Omaha and destination by states for the month of September, also total shipments for September and August 1919:

Iowa	294,821	Kansas	3,671
Nebraska	202,019	Texas	2,731
Missouri	31,591	New York	696
Illinois	31,412	Alabama	381
South Dakota	19,502	Indiana	305
Minnesota	9,760	Wisconsin	125
Michigan	7,577	Wyoming	116

Total shipments to all states during September, 1919: 604,707.

Total shipments to all states during August, 1919: 432,607.

Burro Fed Hogs.

We have heard of all kinds of hog feeds, but an enterprising feeder and rancher in Texas has sprung a new one. The bordering counties of this great state that touch old Mexico are alive with donkeys (burros), small, worthless animals that having in late years been allowed to roam wild in the mountains, have become more of a pest than might be imagined. They are open game; and the plan of the hog feeder mentioned is to slaughter these donkeys mainly for the value of the hides, which justifies the freight to the killing pens, and cooking the meat and grinding the bones for hog feed. It is thought to form a suitable substitute for tankage feeds.

Stockers and Feeders.

Extreme range of prices, bulk of sales and average price of stockers and feeders at Chicago for September 1919, with comparisons, as compiled by the *Daily Drovers Journal:*

	Extreme range.	Bulk of sales.	Average price.
1919	$6.00@13.25	$8.75@11.00	$9.90
1918	6.00@13.25	9.75@12.00	10.90
1917	5.75@13.00	7.50@ 9.75	8.50
1916	4.40@ 7.80	5.75@ 7.40	6.70
1915	Closed by Government regulation.		
1914	5.00@ 8.35	6.25@ 8.00	7.15

HOG PRICES LOWEST IN TWO YEARS.

The hog market continues on a downward journey. Receipts the first half of last week, numbering 67,000, were not quite as heavy as what arrived the corresponding three days last week, nevertheless buyers were in very bearish mood and the result has been that prices worked sharply lower. A decline of 75 cents to $1.00 since Saturday, October 4, brought quotations down to the lowest point in force since the latter end of July, 1917. A feature of the trade of late has been a reduction in the supply of sows, which means that the old crop of hogs is near the end of its string. Wisconsin, Indiana and Iowa are already sending in hogs of this year's raising, quality of which is good texture. Weights of this class are largely from 140 to 190 lbs., with offerings uneven in size. A narrowing of the spread between best light and heavy hogs can now be expected right along. Choice light shipping hogs which have been enjoying greatest favor will lose some of their popularity, while prime heavy hogs will gradually work in favor. Eastern shipping orders have been very scarce at Chicago of late, due to the fact that new hogs are arriving freely at eastern markets. The run of pigs at Chicago has been quite light, indicating the absence of cholera in the herds. —*Clay, Robinson & Co.*

Hog Health and the Supply.

THE PRICE CURRENT-GRAIN REPORTER says it would appear that there is not only a general reduction in the number of hogs being fattened for market this year, but also a reduction in the number of brood sows being carried over the winter for next year. If that be true, we will feel the effect of this shortage next spring, and if there be a good demand for hog products at that time, then hogs can have a very liberal advance again. Our own reports from the country are that the hogs are healthy; and any time the hogs are healthy there is never any scarcity, at least during the winter packing season. We have had no sick hogs on the Chicago market; and although there was a report of sickness among the hogs going to the Indianapolis market, a very prominent packer says that his investigation shows the report is unfounded. —*W. G. Press & Co.*

Average Hog Weights.

Hogs coming to market in recent weeks show the effects of longer feeding and are weighing heavier than they were at this time last year. The proportion of brood sows, "grass widows," is not noticeably larger than a year ago, but corn is more plentiful and cheaper and in some cases the hogs have been held a few weeks longer than usual in the hope that the market would recover, says the *Journal-Stockman* of Omaha. The following table shows the average weight of the hogs at seven leading Western markets for September as compared with the month previous and the corresponding month a year ago:

	Sept., 1919.	Aug., 1919.	Sept., 1918.
Omaha	275	255	264
Chicago	254	251	247
Kansas City	181	193	172
St. Louis	181	183	174
St. Joseph	247	237	241
Sioux City	273	265	267
St. Paul	230	256	234

New York Oats Market.

Oats receipts last week, 416,100 bus. There were further sales for export early in the week, but latterly the demand quieted down and very little new business reported. Spot trading, however, was in increased volume, as holders of export contracts were unexpectedly called upon to load out oats, and were compelled to enter the open market to fill sales. The result has been to absorb to a large extent available supplies and caused a further advance of premiums. Local dealers showed more interest, their purchases being in fair volume. The port is now completely tied up because of an unexpected strike of longshoremen, and the railroad tow boatmen have gone out in sympathy. Harbor deliveries are at a standstill, and the Railroad Administration has ordered that no further permits for grain, either domestic or export, be issued for this market. This also has affected cash values which should move constantly toward a higher level until it is once more possible to permit the forwarding of oats in this direction.—*L. W. Forbell & Co.*

Cuban Molasses to United States.

A report from the vice consul at Matanzas, Cuba, says that 27,098 tons of sugar were shipped direct to the United States in American vessels during September and 23,025 tons of molasses; also 5,671 tons of sugar in foreign vessels.

COTTON SEED PRODUCTS

(Monday Weekly Letter and Buyers' Guide)

MARKET: The week has been unfavorable for picking and development of the cotton crop in the western portion of the belt. Excessive rain, together with cool, cloudy weather, has had a Bullish effect on mills and producers. Buying has been light during the week but slow production has maintained values.

Our prices subject to confirmation, car lots only 20 to 30 tons for prompt and October shipment, closed Saturday as follows:

	43%	41%	Coldpressed Cake
Chicago	$76.00	$74.00	$59.50
Indianapolis	76.50	74.50	60.00
Des Moines	76.00	74.00	58.75
Milwaukee, Wis.	76.50	74.50	60.00
St. Louis	74.50	72.50	58.50
Kansas City	73.75	71.75	57.00

Texas Corn Moving North

Texas corn grown in considerat plus this year made its appeara the St. Louis and other Southw markets very early. It proved t white elephant, carrying as it di siderable weevil. It is our gues heavy cattle feeding operations, a due to cattle shipments from the areas of the Northwest to the ranges, will require before the is over much of the Texas corn was shipped out of the state. It have been held there.

the discolored or brown hay
ed on southern and southeast-
s, but that territory, as well as most other buying sections of the United States, prefers the pea-green alfalfa. The result, of course, is that producers have held their off-colored alfalfa and applied their better quality hay on orders. New Mexico's alfalfa crop, produced mostly under irrigation, was of moderate to large size. Much of this hay, however, was taken by alfalfa millers. The later crops in Oklahoma, that is the second, third and fourth, have been generally light, a combination of labor shortage, army worms, a super-abundance of moisture early and followed by severe drouth later, tending to reduce the production.—*Hoard's Dairyman.*

Alfalfa Protein.

Alfalfa belongs to that wonderful family of legumes, having the power to extract free nitrogen from the air and convert it into the compound known as protein.

This protein is absolutely essential to animal life, inasmuch as it supplies the different elements necessary in the formation of lean meat and kindred tissues, in the formation of milk, development of fetal growth, the making of eggs, the growing of wool, hair, horns, hoofs, hides, etc. As no growth can take place without food containing adequate amounts of this element, the importance of alfalfa as a cheap source of protein is evident.

By grinding alfalfa every particle of the plant is consumed by the animal, there being no waste of stems or coarser parts. Its palatability and digestibility are increased. One great advantage is the ease with which it can be combined with grains or molasses in compounding a balanced ration. Grinding also lowers the cost of transportation and likewise reduces its bulk.—*Mealology.*

Alfalfa Meal Market Quiet.

KANSAS CITY, Oct. 11.—A generally quiet tone prevailed in the market for alfalfa meal in Kansas City this week. Only few new bookings were made, and inquiries from consuming interests were light, indicating the hesitancy on the part of buyers in entering the market. Some of the larger handlers in Kansas City reported a slightly improved demand from the South and Southeast, with sales to Memphis and surrounding points. Chicago and other Eastern districts also bought small quantities. In no instances, however, were purchases in large lots.

Choice alfalfa meal was quoted around $38@39 a ton; No. 1 held around $34.50 @36; No. 2, $29@31; and brown, $28.

Cooler temperatures in the important feeding belt was a stimulating influence in the alfalfa mixed feed trade, and a slight increase in the volume of business resulted. Feeders still are making use of pastures, and trade is naturally limited. There was little inquiry from the East. Hog producers bought on a moderate scale. Prices were unchanged, closing as follows: No. 1 alfalfa molasses feed, $40@42; No. 2, $37@39; brown, $35@37; alfalfa grain molasses feed, $42@52.

Alfalfa and Lamb Feeding.

An item from live stock markets of interest to the trade in hay, particularly alfalfa, is the reported heavy buying of feeding lambs by the feeders of the northern part of Colorado. Northern Colorado is the heaviest professional sheep-feeding district in the United States. It has been hesitant about stocking up on sheep, but is now a heavy buyer. Alfalfa is one of the principal parts of the rations for sheep used by Colorado feeders. If they purchase lambs on a large scale, the amount of surplus alfalfa to come out of the state from the 1919 crop will be reduced. The next few weeks will reveal the extent of the probable demand from Colorado lamb feeders in the market for alfalfa hay.

K. & E. NEUMOND, Inc.
Manufacturers, Dealers & Exporters of Feed.
New Orleans St. Louis

"Some demand is developing for alfalfa and other varieties of hay from cattle feeders in Ohio, Indiana, Illinois and surrounding territory east of the Mississippi River," declared C. M. Funk, of Funk Bros. "Cattle interests who have recently made purchases of stockers to rough through the winter are still making use of pastures, and their entrance into the market has not yet become general. Without any broadening in the movement of hay to market, a strengthening tone doubtless will result from the buying by feeders."

CASH PRICES FOR GRAIN.

Following is a statement of the weekly range in cash prices for grain as mentioned in the leading markets of the country for the week ending Oct. 11:

Hay Department

South Carolina and Florida are still making hay.

Hay listed in Minnesota for sale to Montana points exceeds 30,000 tons.

Upland prairie hay grown in North Dakota is selling in Montana now at $23 to $24 per ton.

A stockman of Merna, Wyo., reports that the summer drouth cut the local hay crop pretty short, but most ranchmen still have some carried over from last year.

Stockmen from Kammerer, Wyo., report no shortage of hay in that locality and that recent rains have improved the pasturage so that there is feed enough now available locally and in adjacent country of Idaho and Utah.

The Commissioner of Agriculture of Montana reports that eight counties in that state, covering all sections except the southeastern, indicate that the shortage of hay is not so acute as it was thought to be six weeks ago.

Toberman, McKay & Co., of St. Louis, Mo., report a good demand for high-grade timothy and very choice light clover mixed; also fair demand for high-grade prairie and clover. Consignments of these goods are recommended.

A stockman from Harrison, Nebr., says that very little hay is being offered for sale in the northwestern part of the state. Most farmers have sufficient for their own use, but they are not selling any. The nominal price locally is $15.00 per ton.

It is reported that unfavorable rulings of hay shippers and buyers during the busy days of the forage branch of the army are in some instances being reversed. We suggest to those who had important claims refused that they be brought up and submitted for further consideration.

The "Big Piney" country of Wyoming is said to be in very good shape for the winter, although comparatively little hay was out during the season. Those who have no hay are now paying $25 00 a ton. The drouth, however, was relieved during September and the ranges are now in very good condition.

WHERE THE HAY IS LOCATED.

The Bureau of Crop Estimates made its last preliminary estimate (prior to the final review as of Dec. 1) of the hay crop of this year on basis of the Sept. 1 condition. The figures by states of total yields of wild and tame hay, also of timothy and clover separately, are given in the following table, which will show the location of the hay surplus to be distributed this season:

	Hay, tame. Production.		Quality.	Hay, wild. Production.		Timothy—Yield per acre		Timothy—Production.		Alfalfa.—Yield per acre		Alfalfa.—Production.

[1]Final 000 omitted.

The yield per acre of tame hay is 0.15 ton better than the 10-year average; of wild hay 0.14 ton better than 9-year average. The quality of tame hay is 0.9 per cent better this year.

The greater part of the timothy hay is located in ten states which have produced in excess of 500,000 tons. The wild hay is located mainly in Minnesota and the Dakotas, which will send much to the bare ranges westward, Iowa, Nebraska, Kansas and Oklahoma. All of these states have much more wild hay (1,294,000 tons) than last year.

The great alfalfa states are South Dakota, Nebraska, Kansas, Oklahoma, Wyoming, Colorado, Idaho, California, Arizona, Utah, Nebraska, Washington and Oregon. These states duced 19,181,000 tons, or 3,39 more than in 1918. This is to about 82 per cent of the e of the country and the increas states is a little over 77 pe the entire increase for the ye 000 tons). The quality of the W falfa is not all as good as last first cuttings in some of the h ducing states having been da harvest rains.

STATE OF THE HAY MA

W. D. Power & Co., of N City in a current review of market says that the marke better position now than at since the middle of August. ply of hay is ample and an ment in price cannot be exp the balance of the crop seas menting upon market condit circular says:

"The result of the Canadian vest was practically the sam States, from both a yield an standpoint.

"With the Government ou market to anything like the ex it was a year ago, it means shippers of an outlet, for an quantity of hay. Canada is cally the same condition as t try. Europe will not need near the forage it did during t

"All of this means a very l creased supply of hay in the the farm as compared with ings of last year. Considering 1918 crop of 89,000,000 tons cient to provide for farm, ma war needs, what reason has mer for expecting other tha moderate price for his 1919 cr is 15,000,000 tons over the duction?

"What farmers should do crease to the fullest possibl their holdings of stock. Fe common and poor hay, and d the good hay through the reg kets. If this is not done t will be an immense amount their hands when the 1920 cro ered. If farmers are not a these facts, shippers should them with the exact situation delay.

"With the Government fre

BALTIMORE.

he local hay market is rather ted now, with a fair outward noted in medium to prime nothy and light mixed hay, but w grade, and damaged stuff is drag even when offered down. t burdensome.

all kinds is selling lightly, al- spot stocks limited, prices are ned. Quotations follow: No. 1, $31; standard, $30@30.50; No. 3, $25@27. Light clover , $29.50@30; No. 2, $27@28.50. —No. 1, $27.50@28; No. 2, $25 @27. Clover, nominal—No. 1, $27; No. 2, $25.

Straw—No. 1 straight rye, $17@18; No. 1 tangled, $14@14.50; No. 1 wheat, $12@13; No. 1 oat, $14@15.

NEW YORK.

Oct. 10.—The New York Hay Exchange reports as follows:

	Hay	Straw
Receipts for week, tons	4,735	390
Receipts last week	5,124	400
Receipts Sept. 1 to date	25,493	1,740
Receipts same time last year	36,194	1,860

A little hay has worked out from day to day, and there is no excessive accumulation at any harbor point, but trade has been very slow throughout and market has gradually lost tone under some pressure to sell; and at the close the situation is generally in buyers' favor.

The car situation is as follows:

	This wk.	Last wk.	Prev. wk.
In N. Y. C. terminal yards	403	163	120
On N. Y. C. shed (unsold)	48	69	41
In Brooklyn E. D. T. yard	17	64	75
On Brooklyn shed (unsold)	60	51	68
On Lehigh Val. pier (unsold)	19	25	26
On L. I. R. R., Bushwick sta	27	48	30
On L. I. R. R., Flatbush sta	2	—	2
Totals	577	420	362

Of the 403 cars on the New York Central 325 cars are for 33rd St. and 58 for Brooklyn.

We hear of only one sale of No. 1 timothy hay in large bales at 33rd St., this sale being effected at $33, which seems to be about the best price obtainable at the close though several cars have worked out the past day or so in Brooklyn at $34; No. 1 small baled hay is nominal in the absence of offerings. In No. 2 timothy $31 is becoming an extreme price unless strictly up to grade, and we hear of some business from boat as low as $29; and in small bales, while $30 is still possible in Manhattan, there are reported sales in Brooklyn at the close down to $26. No. 3 and shipping hay ranging about as quoted, with bulk of sales of small bales at our inside quotations, market on such being somewhat overstocked at the moment and weak.

Rye straw has weakened, with closing sales of No. 1 at $15@16, some Jersey straw reported selling at $14. Oat straw continues very scarce, in demand, and buyers would pay up to $16 at the close. A little wheat straw on the boat is offered at $13. Quotations:

	Large bales per ton	Small bales per ton
No. 1 hay	$33.00@34.00	$32.00@33.00
No. 2 hay	29.00@31.00	26.00@30.00
No. 3 hay	26.00@28.00	25.00@26.00
Shipping hay	24.00@25.00	23.00@24.00
Fancy light clover mixed hay	@30.00	@29.00
No. 1 clover mixed	27.00@29.00	26.00@27.00
No. 2 clover mixed	23.00@25.00	23.00@24.00
No. 1 rye straw	15.00@16.00	.....
No. 1 oat straw	15.00@16.00	.....

Effective Oct. 9th, the Regional Director of the United States Railroad Administration has placed the transportation of hay and straw intended for delivery at Brooklyn Eastern District Terminal under the "permit" plan. Application for "permits" are to be made by the receiver and if approved will be sent to the shipper who in turn should surrender same to the railroad agent as authority to ship. Shippers should keep in touch with their receivers and endeaver to use every "permit" sent them; in case "permit" is not used, it should be returned to the receiver immediately.

PHILADELPHIA.

Oct. 11.—The market for hay is steady under moderate offerings and a fair demand for choice qualities. Low grades are dull and favor buyers. Straw is quiet and unchanged.

Timothy—No. 1, $32; No. 2, $30; No. 3, $24@27. Clover mixed—Light mixed, $28@30; No. 1 mixed, $26@27.

Straw—No. 1 straight rye, $14.50; No. 2, $12.50@13; No. 1 tangled rye, $13; No. 2, $12@12.50; No. 1 wheat straw, $12.50@13; No. 2, $11.50@12; No. 1 oat straw, $12.50@13; No. 2, $11.50@12.

BUFFALO.

Oct. 11.—No interest in hay has as yet been shown by dealers except to supply their regular trade at the moment. Farmers are asking too much money. No. 1 was quoted at $27@28; No. 2, $24@26, on track. No offerings of straw. Quoted $10@12 for wheat.

LOUISVILLE, KY.

Oct. 11.—Receipts of hay are fair with offerings good. Demand is good. Prices are a dollar a ton higher than last week, while clover and timothy, No. 1 grades, continue at the same price. Principal quotations are: No. 1 timothy, baled, carlots, Louisville, $31 a ton; No. 2, $29.50; No. 3, $25.50; No. 1 clover, $31; No. 2, $28; light timothy and clover mixed, $29.50; No. 1 mixed, $28.50; No. 2, $27; wheat straw, $11; rye, $13.

OMAHA.

Oct. 11.—Receipts were light on both prairie hay and alfalfa. The demand is fair. Market steady with no change in prices.

Upland prairie hay—No. 1, $19@21; No. 2, $15@18; No. 3, $12@14.

Midland prairie hay—No. 1, $18@20; No. 2, $15@17.

Lowland prairie hay—No. 1, $14@15; No. 2, $11@12; No. 3, 8@9.

Alfalfa—Choice, $30@31; No. 1, $27@29; standard, $25@27; No. 2, $22@24; No. 3. $17@19.

Straw—Oat, $9@10; wheat, $8@9.

DETROIT.

Oct. 11.—The market held firm during the early days of the week but weakened at the finish and closed with a decline of $1. Receipts are increasing and there is a well-sustained demand. No. 1 timothy, $28.50@29; standard and light mixed, $27.50@28; No. 2 timothy, $26.50@27; No. 3 timothy, $22@23; No. 1 mixed, $24@25; No. 1 clover, $24@25 per ton.

MILWAUKEE.

Oct. 11.—The local hay market continues steady but shows slight price concessions in a few instances. Receipts are only fair but sufficient to supply the demand, which is not overly pressing. Choice timothy

Bale Ties
THESE OLD AND TRIED TIES have passed through years of refinement in manufacture and trial in actual use until they are now standard of the world. Much depends upon the strength and reliability of a bale tie. Heavy commercial loss results from the use of ties of unproven worth. No other form of wire calls for more care in manufacture, beginning with the earliest stages of steelmaking down to the finished tie—no other form of wire has to stand more strain and abuse. Bale tie wire MUST be made in the highest perfection possible—anything less invites heavy damage and loss.

and No. 1 timothy are quoted 50c lower than last week. The weather continues mild and pasturages throughout the state are reported in elegant condition for outside feeding, which is keeping consumer demand at a low mark. Current quotations are: Choice timothy, $28@28.50; No. 1, $27@27.50; No. 2, $26@26.50; No. 1 clover, $22@23; light clover mixed, $25@25.50; red top and timothy mixed, $25@25.50; marsh feeding, $14@15; packing, $10.50@11; rye straw, $10@10.50; oat straw, $8@8.50.

CINCINNATI.

Oct. 14.—The hay market was sluggish with a tendency to sag during the entire week, and prices for the best quality were sustained only because of the light movement. The demand has been extremely small for several weeks with practically no shipping outlet, and only fair buying by the local trade who now prefer to purchase for immediate needs and are not stocking up to any extent. The market seems to have reached a position from which a downward fluctuation in prices is about all that may be expected, at least for the present, or until the large stocks of poor hay still in the hands of Southern dealers are materially reduced. Country loading, however, continues small, and may steady the situation until an improved demand develops.

Receipts for the week totaled 151 cars. Cars in the terminals on Saturday, 23.

Quote:

Timothy—No. 1, $29.50@29.75; standard, —$28.75@29.25; No. 2, $28@28.75; No. 3, $22.50@24.50; threshed, $14.50@16.50.

Light clover mixed, $27.50@28.50.

Clover mixed—No. 1, $26.50@27.50; No. 2, $24@26.

Clover—No. 1, $29@30; No. 2, $25.50@27.50.

Sample, grassy, $20@23.

Alfalfa—No. 1 western, $38@39; No. 1 local, $34@35; standard, $32@33; No. 2 local, $29@31.

Straw—Wheat, $6@8; rye, $11@12; oat, $6@8.

DES MOINES.

Oct. 11.—Receipts of strictly high grades of hay have been very light with only fair demand, considerable medium and low grades arrived which move very slow at unsatisfactory prices. However, it is generally thought that farmers will be in the corn field for some time, so are not likely to move much hay until they get through gathering their corn. If this should be true those who can move hay at this time should strike very satisfactory prices. Quote:

Timothy—No. 1, $24@25 per ton; standard, $23@24.

Prairie—No. 1, $19@20; No. 2, $17@18.

Choice pea grain alfalfa, $30@31.

ST. JOSEPH.

Oct. 11.—The hay market continued steady with a slow and draggy market on the lower grades. Good top grades are in urgent demand, the supply being limited. There is no indication for any advance in prairie hay. Mills are in the market for good alfalfa, and the supply is not large enough to fill this demand. Hay quotations are as follows:

Prairie—Choice, $21@22; No. 1, $19@20; No. 2, $17@18; No. 3, $12@16.

Midland—No. 1, $14@15; No. 2, $10@13.

Alfalfa—Choice, $30@30.50; No. 1, $28.50@29.50; standard, $26.50@28; No. 2, $21@25.50; No. 3, $18@20.

Timothy—No. 1, $25.50@26; standard, $23@25; No. 2, $21@24.

Clover light mixed—No. 1, $25@26; No. 2, $20@22.

Clover—No. 1, $22@24; No. 2, $18@21.

Straw, $8@8.50.

PITTSBURGH.

Oct. 11.—Receipts of hay are still below normal for this time of year but as demand is not stimulated at all the market is dull. Prices, however, are still above the average. There is no surplus of hay here and there is little or no speculation. Buyers are taking what they need at prices quoted. Clover and clover mixed hay of good quality is finding a ready market. Quotations follow: No. 1 timothy, $29.50@30; No. 2 timothy, $28@28.50; No. 1 light mixed, $29@29.50; No. 1 clover mixed, $31@31.50; No. 2 clover mixed, $26@28; No. 1 clover, $31.50@32; No. 2 clover, $25@28. Receipts amounted last week to 1,284 tons, a slight decrease from the same period a year ago.

The demand for straw is not urgent but receipts have been somewhat lighter in the last period and prices are holding steady around $11.50@12 a ton.

NEW ORLEANS.

Oct. 11.—Receipts of hay have been heavy here recently but holders are firm in their views and the large stocks have not caused them to cut prices. Quote market nominal, No. 1, $34; No. 2, $32, and No. 3, $30.

NASHVILLE.

Oct. 13.—Hay trade is routine and without features. Quotations: No. 1 timothy, carlots, $34.50; No. 2 timothy, $32; No. 1 clover, $33; No. 2 clover, $30; alfalfa, $34@36.

DULUTH.

Oct. 11.—A better market has prevailed in hay of late. Dealers experienced a good demand for the best grades of timothy and prairie but midlands were easier. Operators here are counting on good shipments to drouth-stricken North Dakota and Montana later on. Quotations are unchanged as follows: Timothy—No. 1, $25@26; No. 2, $23@24. Mixed timothy—No. 1, $24@25; No. 2, $16@20. Prairie—No. 1, $23@24; No. 2, $21@22; No. 3, $16@18. Midland—No. 1, $15@16; No. 2, $10@12. Straw—Rye, $9@10; oat, $9@10.

MINNEAPOLIS-ST. PAUL.

Oct. 11.—Receipts of hay at the local markets for the week ended Oct. 11 were at Minneapolis 401 tons and at St. Paul 52 cars. St. Paul shipped 21 tons. Prices of hay of standard quality on Oct. 11, compared with the previous week were:

MINNEAPOLIS.

	This week.	Last week.
No. 1 timothy	$25.00@26.00	$25.00@26.00
No. 1 upland	22.50@23.00	23.50@24.50
No. 1 midland	17.00@19.00	17.00@19.00

ST. PAUL.

No. 1 timothy	$23.00	$24.00
No. 1 upland	24.00	24.00
No. 1 midland	16.00	17.00

The very inadequate car supply affected the movement of hay materially during the past week, and the already light shipments decreased. The small supply compared with the demand resulted in some strengthening of prices, particularly of the grades in most demand. The late fall has resulted in prolonged pasturage for stock, and somewhat reduced the demand in that way, but stocks are below the normal.—Market Reporter.

BOSTON.

Oct. 11.—There is very little change to report in the local hay situation this week. Receipts were light, especially of the best grades, with prices on these grades unchanged from a week ago. There is a little better feeling noticeable for top grades and the lower grades, but medium grades are in over-supply with some an accumulation reported, especially of No. 2 medium Canadian. The trade, however, is only meeting most pressing needs and there is no disposition shown by buyers to purchase ahead of their wants. Receivers generally are holding the best grades firm, with an occasional sale made over quotations when the hay is exceptionally nice and wanted by the buyer. The market on No. 1 timothy hay in large bales is held at $33 per ton, but extra cars would bring $33.50@34 per ton if wanted. Small bales are quoted at $31@32. No. 2 timothy is steady at $30@31 for large bales and $28@29 for small bales. No. 1 Eastern remains unchanged at $28@30, and No. 2 Eastern at $25@27. No. 3 hay ranges at $24@26. The range on clover mixed, all grades, is $26@28. Fine hay is a shade firmer with light offerings at $23@25. The demand for poor and damaged is also better with the market firmer at $18@20. Receipts for the week ending Oct. 11 were: Local, 71 cars.

A quiet market on rye straw with choice held at $17 per ton for the bulk of the offerings. Oat straw is held steady but quiet at $14@14.50 per ton. Receipts for the week ending Oct. 11 were: Local, 7 cars.

MONTREAL.

Oct. 10.—The outlook for the Canadian crop of 1919, from a monetary standpoint, is not as florid as that of 1918, owing to the export trade showing up in a less favorable light. Although the English hay crop is short, the scarcity of freight and high rates are against any extensive export trade. With the government's showing of a total crop of 17,699,145 tons in 1919, against 15,218,000 tons in 1918, we shall need a much greater export outlet than in 1918, so that at the moment it would seem that the better policy for the farmer would be to commence selling instead of holding; but, of course, they have a right to their own opinion and judgment, especially as they are in a position to follow it from a financial point of view. A year ago the government was in the market offering a big bonus of $5 per ton, a factor that is now entirely out of the question, as the government is not buying nor is there any probability at present of its going into the hay business. The farmers of Canada have therefore 2,480,445 tons of hay more than they had at this time last year to dispose of. With larger supplies on hand and less demand than at this time last year, one would be apt to conclude that from a purely commercial standpoint it would be more in the interest of producers to sell than hold.—Trade Bulletin.

The receipts of hay during the last week at Montreal were 5,311 bales, against 15,480 bales for the same week last year. The market is firm with sales reported at $23@24 for good No. 2 timothy, but the latter figure is said to be difficult to get. Canadian hay is being shipped from Boston to Glasgow.

SAN FRANCISCO.

Oct. 10.—Receipts show a further decrease and no doubt the reason is the clearing of the fields and the lack of cars.

The car situation is becoming most stringent and it is almost impossible at some points to obtain any transportation on this account. Hay continues to arrive freely by boat from the hay and river districts, but these receipts will no doubt drop off rapidly from now on as, with but a few

ths, it might be said that most of
l are cleared at this time.
g rains, although light in most dis-
ere very erratic and in some sec-
y had quite heavy showers which
c or less damage to such hay as
n under cover. These rains have
effect of making the farmers quite
u especially where they have con-
c of their crops still out, and
a efforts are being made to obtain
c lean up. The railroad companies,
re are unable to furnish anything
h equipment demanded and it is,
o to be hoped that the rains will
o for some time yet until these
c be moved without becoming wet.

TOLEDO.

T -Demand for hay only fair. Re-
c inue light, although dealers an-
a avier receipts and lower prices.
No. 1 timothy, $28; No. 2 timo-
7 No. 1 light mixed, $27; No. 1 clover, $29; No. 1 alfalfa, $30, f. o. b. Toledo.

ST. LOUIS.

Oct. 11.—Receipts of hay are light and are mostly of ordinary or low grade timothy hay.

A much improved demand is noted during past week for good No. 1 timothy hay, receipts of which are exceedingly light and demand urgent on local account. There is also a fair demand for standard timothy, but the medium and lower grades are rather quiet, and especially No. 3 and no grade hay. Considerable of this class of hay is arriving for which there is little outlet.

Light Clover Mixed—Light clover mixed hay continues to rule very strong on good No. 1 light clover mixed, also a fair shipping demand for the No. 2 grades, but common dark hay or hay that is any way musty or stained is dull and slow.

Heavy clover mixed hay scarce and wanted. There is an excellent demand here for heavy clover mixed hay containing at least one-half clover. This hay can be readily placed to advantage. Dark or musty hay is not wanted.

Pure Clover Hay—Pure clover hay continues in excellent request, receipts are very light and demand readily taking anything offered at full prices. This applies only to good sound clover hay, as hay that is any way unsound or musty is not wanted.

Prairie Hay—Prairie hay market steady, offerings of prairie moderate and demand right good in a small way for No. 1 prairie hay. The medium and lower grades are dull and neglected.

Alfalfa Hay — Alfalfa hay continues to rule steady with little change to note. There continues an excellent local demand for good No. 1 bright alfalfa hay suitable for dairy purposes, also a fair milling demand. Offerings are moderate.

Timothy—No. 1, $32@34; standard, $29@31; No. 2, $24@27; No. 3, $20@23; threshed timothy, $12@15; headed timothy, $20@22. Light Clover Mixed—No. 1, $29@30; No. 2, $23@25. Heavy Clover Mixed—No. 1, $26@28; No. 2, $24@25. Alfalfa Hay—Choice, $35@36; No. 1, $33@34; standard, $31@32; No. 2, $29@30. Clover Hay—Choice, $32@33; No. 1, $30@31; No. 2, $29@30. Prairie Hay—Choice, $24@25; No. 1, $23@24; standard, $20@21; No. 2, $19@20. Straw—$7.50@8.

MEMPHIS.

Oct. 13.—Hay continues steady and very quiet, with only an occasional transaction. Better grades are firmer than the lower and prices are about as they were a week or so ago. Cash No. 1 alfalfa sold at $33.50 and that figure bid for more, but offers are small. Same grade for November delivery was offered at $35, indicating a firm undertone. No. 1 timothy sold at $30, while No. 2 sold at $26 a few days ago. No. 2 alfalfa sold at $29. Receipts have been light and there is not much disposition to bring in much until demand shows signs of picking up.

CHICAGO.

Oct. 11.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Oct. 4, also the total receipts and shipments of hay from Jan. 1, 1919:

	Oct. 11, 1919.	Oct. 4, 1919.	Oct. 12, 1918.
Total receipts	4,631	5,168	4,965
Total shipments....	486	327	318
Rcpts. since Jan. 1..	189,570	184,939	251,888
Shpts. since Jan. 1.	38,286	37,800	70,712

The bad weather of last week restricted sales somewhat and a little hay was held over from day to day. In spite of this, however, prices advanced on the information that the hay in transit was only a few days' supply. Closing prices for the week (Monday was a holiday) were:

Timothy—No. 1, $29@31; standard, $28@29; No. 2, $25@26; No. 3, $22@24; thresh., $10@13; sample, $18@20; No. 1 light clover, $27@28.

Clover—No. 1 clover mixed, $24@25; clover, $23@26.

Prairie—Kansas and Oklahoma., $20@24; Iowa, Minnesota, Dakota, $15@24.

Marsh hay—Feeding, $13@15; packing, $10@12.

Straw—Rye and oat, $10@10.50; wheat, $7@8.

THE HAY SITUATION.

NEW YORK FARMERS HOLDING HAY.

BATAVIA, N. Y. (2).—Hay in this section was a very good crop, and it has been moving out quite freely; but farmers are now not inclined to sell at the price, as all say that other kinds of feed are so high it is the cheapest feed today. I think it will about be fed out at home.—*M. S. Dunlap.*

FARMERS SLOW SELLERS.

BELLEVUE, OHIO (4)—The farmers in this section are not inclined to sell their hay at prevailing prices. We have had a fairly good demand for it, with markets a little weak during the past ten days, but on the whole our business has been quite satisfactory since July 1st.

Oats are very thoroughly cleaned up in this section, and all over northwestern Ohio. Many elevators are explaining that they have already received all of the oats that will be brought to their elevators for this entire crop year.

The corn crop will be of most splendid quality and we believe fully up to the average year in bushelage. It has been many years since the quality was as fine as it is this year. We have had no frost, and all corn is out of frost danger.—*The Irwin T. Fangboner Co., Irvin T. Fangboner, Pres.*

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

It is the belief of Mr. North of the Midwest Hay Co. that a good crop of alfalfa was grown in Nebraska from Kearney, West. He feels, however, that this surplus will only be available after Western alfalfa millers use their requirements and that the remainder will be marketed in Kansas City.

"Apparently too many cattle have been moved away from the drouthy areas of Montana, Wyoming, Idaho and other Northwestern States to stimulate any buying of hay for winter needs," declared J. C. Kerr, of the Kerr Hay Co. "Many of the Northwestern cattlemen have shipped their stock to territory farther east, into Minnesota, Wisconsin and Michigan, and into Texas and elsewhere in the Southwest. A few inquiries have been received for hay from the Northwest, but the trade has made few shipments in that direction."

Literature and hay buying and selling may not be companions, but J. A. Brubaker, of J. A. Brubaker & Co., an extensive handler of hay in Kansas City, has turned author at the request of his friends in the forage business. For many years Mr. Brubaker has appended little essays on various topics to his weekly market letters on hay. Many who read the letters asked that the essays be published in book form. The result is "The Broken Unit," a book of 112 pages. The principal book stores of Kansas City are handling Mr. Brubaker's book. "The Broken Unit" is dedicated to "those whose life stories are still in the making."

"While relief is in sight from the present acute shortage of cars, shippers are still encountering serious difficulty in moving their hay to market," reported Roy D. North, of the Midwest Hay Co. "A large handler in Oklahoma reports that less than fifty cars of hay have been loaded at his station thus far in the summer and early fall, while normally more than 200 cars of hay are shipped from that point during the same period. And considerably more hay was produced in that territory this year, with the result that much hay is being held in the open. Improvement in the car situation, however, is expected with the progress of the season, an easier car supply being witnessed around the latter part of October generally."

"With an abundance of feed in the country, it will be difficult for the hay market to maintain values around the present level," said F. F. Bushmeyer, of E. B. Bruce & Co. "Hay values have not been depressed along with other feedstuffs, including corn, oats, bran and shorts, cottonseed and linseed feed, and prices today are considered out of line with the more important commodities used in feeding live stock. The market for hay is holding up today principally because of the small supply moving from the country, this resulting from the shortage of cars. Another influence in the light movement is attitude of growers. They have become accustomed to high prices for hay and naturally are unwilling to part with their stocks at current levels. But the growers will be less inclined to hold after further depression in prices for other products. As for cars, freer supplies are generally witnessed in the later period of the year, around the holiday period. The trade also must take into consideration the fact that the Government Forage Branch and the drouthy areas of Texas, the two principal buying forces a year ago, are practically out of the market. Texas, in fact, is a surplus hay state this year. The drouth-stricken areas of the Northwest are taking little hay, too."

The replacement of sugar cane by cotton in parts of Zululand is being considered by the local sugar industry, cotton proving a more profitable crop than sugar cane.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Oct. 13.—Conditions in the provision trade last week were little changed from those of many weeks past. The packers had the market largely to themselves and were the mainstay to values most of the time. At the close pork was $2.25 higher for October with business extremely light, while January showed a loss of 25c. October lard was bid up by packers who claimed to have made large sales to Germany and Belgium, and prices gained 70c. November, however, lost 42½c and January was unchanged. Ribs 52½@80c lower.

A fair business was on in lard, while in other lines little interest was taken, especially in pork. The make of lard is being increased, as it is regarded as higher than other product, and packers here and at some of the Western points are cutting more stuff to the tank than for months past owing to there being less demand for the product and to the profit in making lard. As to profits the present price for hogs make it profitable to sell January product and as there is a profit in manufacturing. Cash lard was in fair demand from the East and export sales of 10,000,000 lbs. are said to have been made of late by local packers, which is for Germany. Part of the time cash lard brought 10c over October for city packers, while outside lots were at October price. Sales of 250,000 lbs. refined lard were made at 28½c track New York to refiners and the latter were also buyers of other lots at times, as they are filling sales made previously at higher prices than at present. Leaf lard sold at $27. Shipments of lard for the week were 10,794,000 lbs., against 12,375,000 lbs. the previous week, and 7,696,000 lbs. last year.

Shorts were good buyers of lard at times and a local packer picked up considerable in the closing days of the week, advancing prices. Considerable changing in the way of buying October and December and selling January was on.

A small improvement was noticeable in the trade in pickled meats, especially picnic hams and bellies, some of the packers and distributors having more small orders, mainly from the East. Packers are shipping liberal quantities of product to their branch houses, but the South is not buying heavily. Hog supplies were good early in the week and lighter later as prices declined to the lowest level in two years. Trade sentiment remains bearish and most of the selling pressure is on January delivery, the talk of the trade being favorable for 12c hogs later in the season. At present most traders say they see nothing new on which to base purchases except for occasional quick turns.

Range of prices in September and previous and for the week follow:

	High.	Low.	Close Oct.11. 1919.	Close Oct.4. 1919.	Close Oct.12. 1918.

Kansas City Provision Review.

KANSAS CITY, Oct. 11.—An improved demand developed in the provision market in Kansas City this week, resulting doubtless from the colder temperatures. Local buying showed a sharp spurt, particularly for the better grades of fresh pork, including loins. The East also was a good buyer, while demand from he South was comparatively heavy, owing to progress in picking cotton in that territory. Prices for provisions were generally lower for the week, declining in sympathy with the sharp downward trend of the hog market. Declines on fresh pork ranged from ¼c to ¾c, and the cheaper grades were off as much as 1c. The export outlook also was more favorable, and packers and other provision interests displayed optimism over the outlook for foreign trade. There was improvement in foreign exchange rates, and settling of the strike abroad was a favorable development. Dry salt and heavy smoked meat were off ½c. Fancy hams and bacons also declined fractionally, while lard displayed a firm tone.

Summary of Live Stock Markets.

Highest prices for hogs in leading markets last week as compiled by the *Daily Drovers Journal* were as follows:

	Mon.	Tues.	Wed.	Thur.	Fri.	Sat.

Preceding week	28,388	9,265	47,530
Last year	26,979	3,222	86,121

The death of Dr. Cyril G. Hopkins of the University of Illinois is reported from Gibraltar, where he was taken ill while en route home from Greece. He had gone there a year ago to undertake the redemption of wornout soils of that country. His death is deeply to be regretted, as he was one of the most valuable scientists agriculture in America had in its service.

Hog Slaughterings.

Special reports to THE PRICE CURRENT-GRAIN REPORTER show the number of hogs packed since March 1, 1919, at undermentioned places, compared with previous year:

	To Oct. 11, 1919.	To Oct. 12, 1918.
Chicago	3,988,600	4,016,600

For the week hogs are called since the same time of last week. have been rather light but quality ing to be good. At present $15.25 aid for good butchers.

Denver Cattle Market.

Oct. 10.—Receipts for the week t normal for the time of the year. arket has been good—best cattle ass strong and active. Medium on kinds weak to 25c lower, but g good. The small bunches of the heifer, feeder, stocker and tions Tuesday are not to be mis- d. They were all good enough for show purposes on any market. Future prospects are very good, though early shipments are suggested.

Omaha Live Stock Market.

Bruce McCulloch, Correspondent.

Omaha, Oct. 11.—This week's cattle receipts were several thousand head in excess of expectations. The run totaled 64,400 head, beating the record made three weeks ago by slight margin. Cornfed receipts were very light. No long fed steers were offered, and they are nominally steady at $15@18 for good to prime. Even shortfed cattle were scarce, and at $12@14.50 they look about steady for the week. Western beef held up well in the face of liberal receipts. Very fancy steers equaled the season's top of $15.50, while good to choice kinds continue to sell mainly at $11@12.50, with fair and plain kinds downward from $9.50 to $7. Butcher stock was uneven. Canners and the choice heavy cows were in good demand and held fully steady all week, but in the in-between kinds slumped 25@50c, closing very dull. Prime heavy cows and fancy weighty heifers brought $10@11, with bulk of the good to choice offerings downward from $9 to $8 or less. Fair to good went largely at $6.50@7.50, and canners and cutters are bringing $5@6.25. Bulls were firm all week, bolognas selling at $6@6.75, and butcher grades at $7@7.50. Best light veals held about steady at $13@14, but plainer light calves as well as heavies and medium weights, which were relatively high a week ago declined 50c@$1. Best calves weighing 250 and more were selling from $11 down, as compared with a top of $12 a week ago.

The stocker and feeder trade was also irregular. Demand was broad for good to choice quality stuff, especially of light and medium weight, and these kinds sold firm all week in the face of record supplies. Plainer kinds were dull, and cleared poorly even at declines of 25@50c. Best heavy feeders sell mainly at $11.75@12.50, and an outside top of $13.65 was made. Good to choice go mainly at $10@11.50, which range also buys best yearling stockers.

It was another week of declining hog prices, and despite persistently moderate receipts, packers are gradually getting values down toward the basis that has been predicted for the bulk of winter marketing. After the bad break Wednesday the market was the lowest it had been since October two years ago, and while the decline was pretty well checked before the close, prices today are generally $1 lower than a week ago, with the bulk selling at $14.40@14.60, and the top at $15.10.

...SINESS AND TRADE CONDITIONS

...ERE can be no real progress in the permanent ...ehabilitation of the industries of this or of ...ny other country until the craze of the work...ople to use the products of industry with...lously working and saving shall have passed; ...til the supremacy of the ignorant but forceful ... is broken and the inherent common sense of ...erican workman regains possession of the ...mind, the industrial situation will probably ...he worse. The morale and the morals of the ...men who countenance the present chaos into ...labor has plunged itself have been broken ...y the erroneous teachings of their leaders; ...re seems no one ready to teach the truth or ... to the goal to which radical labor is rushing. ...losophy of the situation is ignored; no effort ... to educate those who most need instruction ...ouragement to think of their position in the economic laws and to consider thoughtfully ...ure of the things the agitators expound to ... essential to their well-being. There can be ...nable objection to any degree of enlargement ...orkingman's income and his hours of leisure. ...ts to live better and he ought to. But until ...orkingman understands fully and puts into ... in his daily vocation the truth that, "Every ... output is increased and the cost of produc...uced there is an increase of the funds out of ...ages can be increased," the increase of wages ... cost of the product means deprivation and ... living for all except those to whom price ...othing, not benefit to any. It is but stating ...iversal in its application to say that, "Where ...tity produced at any stage of manufacture is ..., with the lowest cost of production in propor...he total cost of the product, there wages are ...est"; and where the reverse is true, there ...re the lowest. And there is this corrollary ...kmen should not forget, that "simultaneously ... increase of average wages there has been a ...nding steady decrease in the average earn...capital," which is exactly the reverse of what ...s say in order to create unrest and disorder.

...ork of the Industrial Conference during the ...k did not appear to be proceeding along very ...tive lines. The Conference seems indeed to ...aded largely by the prevailing opportunism ...ore and more is burying under the make... politicians and shortsighted representatives ...yers the few permanent settlements on the established principles, which should be the ...d the accomplishment of statesmen. The ...n the Conference representing "The Public" ...eculiarly animated by the opportunism so ...ristic of Washington.

...abor Group naturally is excessively interested ...ing immediately a "compromise" of the steel ...he success or failure of which means so much ...up of national leaders personally in respect ...e income and prestige. This group so domi...es everything the Conference should do cen... recognition of the "right to collective bar..." which, in a way, no one questions. Yet this ...cult problem, indeed. As interpreted by the ...roup it means the closed shop and with it ...nergence absolutely of the individual in the ...as practiced in the immediate past (and as ... for the future by those who look to the "one ...n" as the *ultima Thule* of the Federation of ... the individual should disappear, except as a payer of dues, and surrender the keeping of his material well-being and that of his family into the hands of a small group of men over whom he has in the last analysis only the remotest influence and no immediate control whatever. The incentive to excellence and to greater industry would disappear, since neither quality, nor both combined, could have any influence on his earnings, upon the amount of which the entire nature of his individual life depends. The "collective bargaining," which contemplates the open shop and the shop union and also the character and worth of the man himself, or any arrangement which contemplates participation by the workers in the profits of the business, in addition to standard wages, with loss of such a distributive share in the profits of the business in case the business earns no profits—in short, any direct incentive put before the workman to strike to increase the production and to reduce the cost of the product in order to increase his own income as distinct from that of others, or his share in the profits, and to insure a continuance of both—is all opposed by union leaders. Therefore such opposition (which is directly involved in the current interpretation of the meaning of the term "collective bargaining") is against the interest of the individual and means a step toward his ultimate and permanent fixation in the worker class; since this is the logical, inevitable and necessary end of the present tendency of radical unionism toward the "stabilizing" of men and wages, toward collectivism, or, in short, socialism (if there be any real deference in the terms). This tendency the "Public" group in the Conference thus far seems to be fighting only half-heartedly.

At this time, so far as we may depend on press reports, the only workmen in the world who are seriously at work again are the Belgians and the Germans. The German, like the Belgian, is naturally industrious and thrifty. Especially is the German obedient. He has little initiative but he is subject to discipline. He takes counsel from his industrial as well as from his political leaders. So he has gone to work again; and, of course, there has already been heard the "hue and cry" that Germany is "conquering" the trade of Central Europe and is taking economic possession of Russia, etc. Under ordinary circumstances one might expect no less than this; but whether such trade activity is in fact going on now may be a question, seeing that the currency situation in Germany as well as in Russia is approaching, if it has not already reached a condition where trade is becoming impossible except as barter pure and simple is resorted to. However, a people who work will have something to trade, and trading means the increase of wealth through the exchange of that which to the owners is of less worth than that which others have to trade. Each profits by the trade, and individuals, not nations, do the trading. The propinquity of Germany to Russia and all the Near East makes inevitable the German's ultimate preëminence in that trade by reason of his industry and the intelligence of the master minds, just as our own proximity to Canada and to Mexico should give our people the greater share of the trade of both countries and would but for the influence of self-seekers and their aids and accomplices, the politicians and lawmakers on both sides the lines—those evil forces in government which commerce has in all ages been compelled to fight for its existence.

The foreign trade of this country is temporarily favorably affected by abnormal conditions; but, sooner or later, as James S. Alexander of the National Bank of Commerce in New York has pointed out, there must be a return to the ordinary processes of trade as they existed prior to August 1914 and as they will grow to be again in the future. "It is axiomatic," he said, "that what is bought must be paid for and that [the people of the] nations engaged in foreign trade in the long run pay for imports by exports. The existing unpaid and unbalanced state of trade between America and Europe has been made possible by credits granted by the United States Government to the governments of Europe. These credits have now largely ceased to be available for the support of the export trade, and our exports are now going to Europe largely on open account. There has come, as a consequence, a dramatic break in virtually all the European exchange rates and the foreign exchange markets are badly demoralized. It is recognized on the part of all of us that in the absence of special emergency measures the exchange rates will continue to fall until American exports to Europe shall be so checked that imports will pay for them"—or there will be no exports except to buyers who can pay, like those in ex-European countries. This condition will certainly obtain until the labor of Europe returns to full production and ceases to depend on this country for the essentials of living.

Meantime at home the Federal Trade Commission, that first expression in bureaucratic form of the paternalism of the "New Freedom" of Mr. Wilson, has broken out again in its attacks on domestic business in Part IV of its "Report on the Packing Industry." The previous parts have been shown to be so grossly *ex parte*, unfair and partisan that no intelligent man takes seriously any of the maunderings of this Commission. It is coming indeed to be recognized as a sort of public nuisance, which is due to apologize for its continued existence. The present Part IV attacks the "Big Five" as a monopoly in the handling of such farm produce as poultry, butter, eggs, etc.; but, as Swift & Company, one of the Big Five, in a public statement said, a business which after at least twenty years of activity now handles only 6% of the entire trade in this particular line can hardly be conceived of as a monopoly. The trouble with this Commission is that its personnel is hardly of a calibre commensurate with the job entrusted to them, and we have, in consequence, only the small mind's estimate of business matters which are beyond their power of comprehension or exposition. However, as their method of attack (in the typical demagog manner) will appeal to the prejudices of the people and to their ignorance, the Report will, of course, have its intended effect of creating further popular discontent and misconception.

In spite of strike troubles pretty nearly everywhere, the extravagance of the people generally continues to make the retail trade excellent, and all those shops and industries which are not affected by strikes are as prosperous as usual. The steel strike is petering out and the harbor strike in New York is going the same way. All the textile industries are running strong, the West being a particularly persistent buyer on a large scale. The farmers are as extravagant buyers of everything as factory girls in a lingerie shop. Land buying, especially, next after flivver exuberance, has become in the West a veritable craze; and Western bankers as well as conservative farmers are viewing this orgy of land speculation with more or less misgiving. A great deal of this buying is pure speculation, on margins, or small payments on contracts due March 1 next, and much of it is not by farmers. Now, this latter sort of buying did not cause the furore which was

promoted by the farmers themselves, but it is having an undesirable effect on land values and on tenant movements, and so is infinitely more threatening to agricultural stability as an industry than any amount of "board of trade gambling," of which these same land-speculating farmers may themselves complain.

THE ST. LOUIS CONVENTION

THE St. Louis Convention of the National Association was a "record breaker" in the matter of attendance. It was notable also for the positive character of its approval and disapproval of the policies which have actuated the administration of national affairs. Grain dealers are naturally of all shades of party affiliation. But party seems to have wholly disappeared in its consideration of the bureaucratic tendencies of the Government in recent years. The grain and allied trades handling grain products, owing to the disposition of men generally to believe that, as Colbert said nearly 150 years ago, "the dearness of food from which they suffer is the effect of artificial manœuvers" and not due to natural causes (a condition which the Government industriously inculcated during the war and still sanctions), have during the past three years suffered greater derangement by needless restrictions than any other class of business men. But no complaint has been registered by its members, except that like a trial lawyer, when interrogating witnesses, it has "saved its objections."

The war being over, the time has arrived for the trade to demand the speedy and entire, not piecemeal, withdrawal of all semblance of further control of the trade and the end of all price making and margin regulation, of the control of railroads and communication wires, and the recognition of personal initiative as the essential condition of free commerce and continuance of the liberty of the individual to make the most lawfully of his opportunities in life; and the Association said so.

President Goodrich throughout his year of administration of the Association's affairs has, on all occasions and under all circumstances, advocated the relief of the trade from bureaucratic restrictions. He has accepted such control as was deemed expedient by the Government as a part of the war program, but beyond that he at no time has admitted the principle of such control to be sound. We believe his personal insistence on this broad view of the privileges of the grain dealer as a citizen and as an economic factor in the handling of grain and grain products of the Nation and the right of honest men to conduct their business without interference by bureaucrats, did much to put the "backbone" into the Association, which found its unequivocal expression at St. Louis. The tone was unmistakable and it is to be hoped that the American Congress will have gumption enough to grasp its meaning.

THE COUNTY AGENTS

THERE has been for a long time a justifiable feeling that the "county agent" is becoming a community disturber by meddlesome interference with the relations of farmers and local business men. Now, where this functionary is employed and paid wholly by the farmers themselves, there can perhaps be no just criticism of his activities on behalf of those farmers who hire him. But the "county agent" has so far been an employe of the Government (state and national) and as such has been paid out of taxes or a fund to which others than farmers contribute. It would seem entirely legitimate then that the Grain Dealers' National Association should question the propriety of the Government permitting, much less encouraging, as it undoubtedly has, the activity of the county agents which is designed to and does tend to injure the business and disrupt the friendly relations of other contributors to this support fund and the farmers.

It is very doubtful if the activities of the county agents as buyers of feeds, seeds, etc., has been of any substantial benefit to the farmers concerned. It would certainly tend to discourage men from going into the business of handling locally such supplies, and where modern facilities for handling them do not exist unquestionably their cost is enhanced. The common sense of this matter was expressed by John W. Shorthill in his address at St. Louis, printed elsewhere. The most economical service is that which is provided by the local dealer or merchant having the facilities and technical knowledge and experience as well as facilities. Where there is business of any considerable volume there is certain to be local competition enough to ensure right prices; in any event the intelligent farmer can never be deceived as to prices, to which so great publicity is always given that deception which counts is practically impossible for any length of time.

MR. BARNES ON PROFITEERING

IT WAS as creditable to Mr. Barnes' moral courage as it was to his penetration as a business man into the heart of the things in which he is personally concerned as a public administrator, that he should point out, as he did at St. Louis and again at the Board of Trade banquet in his honor later at Chicago, the fact that in the rise of food prices since 1914 the farmer has gained more than the wholesaler of the product and far more than the retailer. This sounds like a paradox, but we are ready to accept Mr. Barnes' exposition of the facts.

Mr. Barnes has, of course, no quarrel with the farmer. He wants the farmer to have the limit as an inducement to greater production. He is opposed to price fixing, not because lawmakers who profess to believe in the efficacy of price fixing may act upon that belief in order to benefit the farmer, but because the artificial stimulus so created is certain in the long run to become a permanent injury rather than a benefit to the farming industry as a whole.

Mr. Barnes is a trained grain dealer. He has, as a public administrator, executed a law which he had not sanctioned during the progress of its enactment or since, and he has executed it in a manner that no man in America perhaps could have improved upon, and he has done this with less friction than most men would two years ago have thought humanly possible. He therefore understands, as smaller men cannot, that the natural course of production is for the farmer commercially the best and that the free and open market for his products is the safest, where prices are fixed by the law of demand acting on known supply and adjusted by the competition of the buyers of the world and not by an agency representing a government which in due course ultimately ignores economic laws. Add to these the economies of the private dealer seeking to make a profit and yet serve the public, producer and consumer, to the best of his ability, and we have an ideal marketing program, the bureaucrats of the Agricultural Department to the contrary notwithstanding.

Mr. Barnes is entitled to the credit of so conducting the Cereal Division of the Food Administration that the farmer has through its operation profited more than did either the wholesaler of the products or the retailer; and it is further to his credit as a citizen that he has declared that in spite of the acknowledged success of his administration in the execution of the law the principle of the law creating the Food Administration is a wrong one, and its retention as a permanent feature of our trade and commerce in a time of peace, is a proposition that can have no rational sanction.

EDITORIALETTES

THE city of Grand Forks, N. D., has pledged itself to sell $1,000,000 of state bonds to finance the construction of the North Dakota state mill and elevator, and will give the concern ten acres of land as a site bonus if the Nonpartisan League government will "come across" with the state industries planned. Well, ten acres probably won't break Grand Forks business men, and selling a million of such bonds is quite a different affair from buying and hoarding them, though probably to get rid of the lot the citizens will have to come across for them, too. still has a chance to bid.

THE State Market Commissioner of South I complains that some grain dealers test whe grade without first cleaning it, getting their tes the dirt included, which is in violation of the law for handling grain. But if he does clea wheat he comes into conflict with the rule to th trary of the zone agents of the Wheat Directo where is the dealer "at" up there?

WEEKLY STATISTICAL SUMMAR

The following tabulation is a summary of figure various statistical exhibits appearing weekly in d "The Price Current-Grain Reporter," these figures senting the past week, the preceding week and sponding time last year, here assembled for ready ence:

	Oct. 18.	Oct. 11.	Oct.

JUDGE-MADE LAW

IN A RECENT case in a reputable court of in Cook County, Ill., where a broker sued a f client for moneys advanced to carry on his t in grain, the trial judge ruled that,

Perhaps these transactions are legal transaction our Supreme Court seems to take the view that it is apparent the party that buys or sells never in to receive or deliver the commodity it is a ga transaction. So far as the broker was concerne was a legitimate transaction, according to the ru the Board of Trade, but the customer only wan make some money if he could make it. This cas gambling transaction pure and simple.

Now, restraining any disposition to criticiz personal temper of the court, one can hardly stand how a judge sitting in Illinois in such a with an open mind can arrive at any such judg The opinion itself is, we think, evidence tha court did not give the case the benefit of an mind, nor did he give weight to the repeated co interpretation of the law by the Supreme Co this state, that such transactions are not gam under the law, whatever may have been the tomer's" intent when giving his order to the b or making his plea when in court.

The court's further statement that, "The at to eradicate the speculative fever from the h mind is as impossible as trying to stop the o flow of the Falls of Niagara," may be true en but that fact hardly warrants the court in m the attempt in this way to stop this Niagara which is not unlike the toper's efforts in beh the temperance cause to guzzle all the booze hi

te and mixed. Chicken feed
urers are also taking the yel-

low. The visible is not large and shows signs of decreasing. Were cars furnished freely the movement might increase considerably.

Aside from the persistent buying of oats by seaboard exporters the situation presents nothing new. There has been more or less mystery regarding the destination of the oats reported sold for export. Belgium is spending around $4,000,000 per month for foodstuffs in this country and a further credit of $25,000,000 is being arranged, although the loan King Albert seems to have been promoting in this country has been postponed. Part of the grain sold is going to Antwerp and part to France. The crop of the latter country is very short, nearly 200,000,000 bus. under the pre-war average. While recent cables have claimed that the demand for feeding grains would be less than expected owing to the shortage in cattle, official reports show that the live stock is not, in fact, materially short in Europe, practically all of the reduction being in Germany, and that not heavy, while England has as many as before the war. The shortage in livestock in Europe is in hogs, supplies of which have been cut the past five years. The country shows no disposition to sell other than to make room for new corn.

A reduction in the wheat acreage in practically all the world's exporting countries is indicated by the latest reports, which more than balances the prospects of an increase in Europe, which is trying to get back to pre-war totals. Reports from all the big wheat growing states in this country show a decreased area as compared with last year. In some sections seeding is very late, because of dry weather earlier in the season, which prevented plowing. The latter has progressed slowly in the American Northwest, but in Canada it is about up to the average for this season. Ample moisture is generally reported from all sections of the grain belt, although rain would be beneficial in sections of the Southwest.

Storage room for wheat is getting scarce, and the strike at the Seaboard is preventing the grain from moving from Western terminals to the ports as fast as expected. This is causing grain to back up in the country and efforts are now being made to save the wheat piled on the ground in parts of the West where elevator facilities are not sufficient to take care of it. An official statement shows that Kansas, Oklahoma and Texas have 99,000,000 bus. of wheat yet to be marketed.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points for the past week follow:

	Oct. 18, 1919.	Oct. 11, 1919.	Oct. 19, 1918.
Wheat	10,324,000	11,573,000	16,854,000
Corn	2,859,000	2,033,000	6,152,000
Oats	4,856,000	4,514,000	7,714,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	18,039,000	30,720,000
Preceding week	18,120,000	23,734,000
Since July 1	331,226,000	432,999,000

Corn futures were lowest early in the week and highest at the close with the finish at the top with net gains of 3⅝@3⅞c, December leading. At no time was there much pressure on the market and short covering was persistent. Sentiment showed considerable change and at the last prices had recovered the greater part of a three weeks' decline, the range during that period being around 7c. Country offerings were not large and shipping demand somewhat better. Weather conditions during the week were favorable, and husking is progressing rapidly. So far the new grain received at terminal markets shows excellent quality.

Oats held within narrow limits, the range for the week being 2@2¼c with the close at the top with gains of 1¼@1⅝c. Houses with seaboard connections were the best buyers, while longs took profits. Country offerings of cash grain light and exporters made fair purchases in the West. The strikes at the leading ports prevented a larger business. Sentiment was generally favorable to the buying side, but there was a lack of outside interest. Supplies are decreasing.

While the movement of wheat to terminal markets has been relatively light, winters show little change in prices. Southwestern markets were somewhat higher on soft red, and hards were a shade easier, while at Chicago hard winters were in demand from mills, while the red sold rather slowly. Springs easier, as fears of Canadian grain coming into this country caused demand to be less active. Premiums paid for the choice springs are still very large. Mills are grinding heavily, with many sold ahead for 60 days, the limit allowed under the regulations. Range of prices the past week follows:

			Close		
	High	Low.	Oct.18, 1919.	Oct.11, 1919.	Oct.19, 1918.
Corn—					
Dec.	$1.26⅝	$1.20⅞	$1.26½	$1.22⅝	$1.18⅜
May	1.24⅞	1.19⅝	1.24¾	1.21⅛	.....
Oats—

Corn in Primary Markets.

Receipts of corn in eleven primary grain markets from Nov. 1, 1918, to Oct. 18, with comparisons with 1917:

	1918-19.	1917-18.
Chicago	64,472,000	96,791,000
Milwaukee	6,984,000	12,214,000
Minneapolis	6,795,000	16,632,000
Duluth	25,000	181,000
St. Louis	19,987,000	24,977,000
Toledo	1,174,000	2,581,000
Detroit	1,706,000	4,218,000
Kansas City	16,428,000	31,005,000
Peoria	19,796,000	35,560,000
Omaha	22,381,000	45,827,000
Indianapolis	16,516,000	20,190,000
Total	176,264,000	290,176,000

Receipts of corn the past week at primary markets, compared with the preceding week and corresponding week last year:

	Oct. 18, 1919.	Oct. 11, 1919.	Oct. 19, 1918.
Chicago	1,247,000	832,000	3,172,000
Milwaukee	93,000	43,000	189,000
Minneapolis	55,000	71,000	150,000
Duluth	.....	.....	.....
St. Louis	329,000	227,000	457,000
Toledo	17,000	13,000	23,000
Detroit	29,000	27,000	158,000
Kansas City	85,000	102,000	282,000
Peoria	545,000	378,000	667,000
Omaha	191,000	193,000	531,000
Indianapolis	268,000	147,000	523,000
Total	2,859,000	2,033,000	6,152,000

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to Oct. 18, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	57,842,000	51,976,000
Milwaukee	3,464,000	7,630,000
Minneapolis	43,668,000	50,126,000
Duluth	4,984,000	34,395,000
St. Louis	28,447,000	29,220,000
Toledo	5,680,000	3,467,000
Detroit	975,000	725,000
Kansas City	46,090,000	39,313,000
Peoria	1,939,000	2,829,000
Omaha	14,748,000	11,263,000
Indianapolis	5,778,000	5,671,000
Total	213,615,000	236,615,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	Oct. 18, 1919.	Oct. 11, 1919.	Oct. 19. 1918.
St. Louis	1,260,000	1,151,000	650,000
Kansas City	952,000	1,676,000	1,188,000

GRAIN DEALERS IN NATIONAL CONVENTIO

Proceedings at St. Louis—Some Notable Addresses by Men of National Fame—Plain Speaking on National Affairs—Trade Problems Acted Upon—Officers Elected

THE annual convention of the National association is now history—pleasant and gratifying history. Pleasant, because St. Louis proved a most delightful host; pleasant, because "everybody was there." and few old friends missing. Satisfactory, because the proceedings showed that the Association is doing its work in a systematic and efficient manner and because of the high quality of the public addresses made to the convention both at regular sessions and at the banquet.

The Association has found itself. It recognizes that it has became a power in the land and means to be heard. And having the courage of its convictions it said what it wanted and called upon Congress to take notice. It has done this before; but never before with such determination that what it said should be thoroughly understood.

MONDAY MORNING SESSION.

President GOODRICH opened the proceedings promptly at 10 o'clock on Monday morning. Rev. WM. C. BITTING, pastor of the Second Baptist Church, invoked the blessing, and Mayor HENRY W. KIEL made the address of welcome on behalf of the city; E. C. ANDREW of the Merchants' Exchange on behalf of that body, and Senator Wilfley, as reperesentative of the Governor, on behalf of the state of Missouri.

The response was made by C. C. ISELY of Garden City, Kan., whom the chair introduced as a "wonderful fellow." Mr. Isely's theme was that this convention being a talkfest, this is a "time for sobriety of speech." It was carelessness in speech a few years ago that led us to indulge in thoughts of pacifism and unpreparedness. It was drunkenness or insobriety in speech in Petrograd, where hundreds of orators on soap boxes were speaking illusions to men hungry for the truth, that caused the peaceful processes of the Russian revolution to descend into the tremendous excesses and chaos in which Lenine and Trotsky and their people have plunged that country. So I think Mr. Barnes in his letter to Senator Gronna was right in counseling us to sobriety of speech at this time. We should be careful what we say." Mr. Isely spoke of the great illusion behind the apparent cause of the war, which was a misconception of the means to commercial progress and social reform, which was to the Kaiser and the Bolshevik leaders, the law of might only. "As I understand the genius of American institutions, there is one underlying thing. The fathers said: 'We create the Constitution to give a man the right to have life and pursue happiness and liberty.' Those are fundamentals, and bound up in that we have always understood the ownership of property as a fundamental right. We know a man doesn't get along well unless he accumulates a little property. It is an incentive to work. The right of property is a fundamental instinct in the development of Americanism, what are we going to contribute to that? Shall we left these things drift? A man said to me yesterday: 'These things will all come out right.' That is the way we talked in 1915 and 1916. But they don't come out right. We must address ourselves to the task. Shall we let the agitator and the parlor socialist determine these things and stir up trouble? Shall we ask the politician to settle these things? He lives by the most votes. He pays attention to the big crowd. If he were guiding a ship and the sharks were calling for something to eat, he would throw overboard the fellow with the least votes. In this country we are still a bourgeois country. The I. W. Ws. and the Bolsheviki call us so, and I hope and think it is right."

Mr. Isely's solution of the labor trouble is profit-sharing with the men. His own business, employing 50 men in ten plants, is conducted successfully on that plan.

THE PRESIDENT'S ADDRESS.

PRESIDENT GOODRICH then made his annual report which appeared in these columns last week. The report after the reading was sent to a committee of five for consideration of its recommendations.

The Secretary's Report.

SECRETARY QUINN then read his annual report. He opened with a summary of what the Association has accomplished during the fiscal year as follows:

"The Association has received 87 arbitration cases and disposed of 86 of them by its three arbitration committees and its arbitration appeals committee.

"It has watched carefully your interests at Washington through its legislation committee and has studied thirty-nine bills that have been introduced and that affect your business.

"It has compelled the Railroad Administration to withdraw or to amend every one of its many orders affecting the trade and which orders were issued since the carriers went under control of the Federal Government.

"It has defeated the railroads before the Interstate Commerce Commission in the famous Docket No. 9009, covering loss and damage of grain in transit.

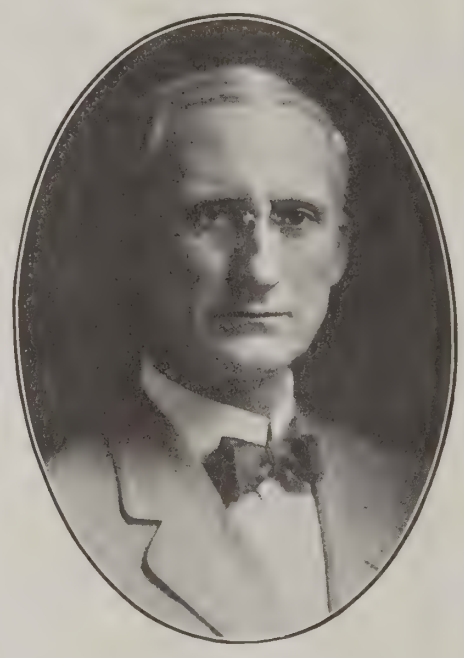
"It has studied with the greatest care the railroad problem and the other problems growing out of the war, so that in the reconstruction legislation that will be passed by congress the American spirit of individualism as opposed to the European idea of socialism will be preserved.

"It has answered several hundred trade rule questions asked by dealers in all sections of the country.

"It has launched a merchant marine committee to help in the work of solving the problem of the maintenance of our overseas shipping.

"It has, in common with other associations, fought for the return to their owners of the telegraph and telephone lines of the country.

"It has brought two more state associations into the National, increasing the number of affiliated Associations to eleven.



"It has secured 361 new direct and associate members, the largest number of new members ever brought into the Association in any one year since its organization. It has conducted the most successful booster campaign in its history. It has seen all records broken in point of membership with a grand total of direct, associate and affiliated members, of 4,307.

"It has spent more money on transportation, legislation and food control matters than it received in total revenue a few years ago."

After reverting to the general condition of business throughout the world the secretary sketched the work done by the various committees, about which he would report later on.

PRESIDENT GOODRICH.

GOV. GOODRICH OF INDIANA.

As to arbitration he recommended that there be an arbitration committee for about every 400 members. He recommended also that arbitrations be confined to grain and grain products (other than flour) and take no part in hay controversies, or other feed products not derived directly from grain. Five members were expelled for failure to arbitrate or to pay judgments.

BOOSTER PRIZES.

President Goodrich will follow the custom established by his predecessors of giving booster prizes. Four prizes will be awarded at this convention, the winners being: First prize, D. M. Cash, of the Urmston Grain Co., Indianapolis; second prize, Alex W. Kay, of Hales & Edwards Co., Chicago; third prize, Jno. C. Bennett, Nashville, Tenn., and fourth prize, Picker & Beardsley, St. Louis, Mo. Mr. Cash secured 25 new members, Mr. Kay 23, Mr. Bennett 12 and Picker & Beardsley 11. A remarkable record for individual work was made in the last year by Alex. W. Kay, of Hales & Edwards Co., Chicago. Mr. Kay broke all records for the number of new members brought into the Association in any one year by a single booster. He secured 46 new members, breaking the great record of 41 made last year by Director J. H. Beusse, of Athens, Ga. Mr. Kay ought to receive a vote of thanks from this convention for his brilliant work. When a man, without thought of compensation, gives so much of his time and talent to the building up of the Association the members should their appreciation in some sponta way. Mr. Kay may truthfully be the greatest booster the Associati produced.

FINANCIAL STATEMENT.—The fir statement of the Association, co the period from Sept. 21, 1918, to O 1919, was as follows:

After the appointment of specia mittees the session was adjourne

MONDAY AFTERNOON SES

PRESIDENT GOODRICH opened th day afternoon session by intro Hon. Max. Thelen, Director of Service of the Railroad Administr

MR. THELEN spoke first of his co with the Association committee o 57 on loss and damage claims, whi modified; on G. O. 15 on maintena siding, which also was modifie then explained that the Division lic Service is one of ten divisions Administration. It has jurisdictio rate changes; and the Director is man also of special freight claim c tee and of committees to investiga problem and on freight car efficien a suggestion to improve the servic division handles about 4,000 let week, which cover all these subjec

Just now the complaint is abo shortage. Mr. Thelen said: "Our show that for the week ending Oct last figures we have available, th ber of cars loaded exceeds the l of cars loaded during the same w last year by 7,800 cars. And you member that last year in the mo October the whole nation was on in an effort to produce as large a could of food, munitions of war a plies for our armies abroad as our people at home." Notwithst the tremendous efforts then, the ment was 7,800 larger than then.

"With reference to the grain sit The monthly crop report for Sep timated the total wheat crop of th try this year as 923,350,000 bus. Railroad Administration estimat of that crop it will be necessary to transport from the farms 824, bus. The difference of 100,000,0 represents seed wheat and other which will not be offered to the ra for transportation. Of this total 515,000 bus., the Railroad Adminis

ansported from the farms by Sept. 1,199,000 bus., of 54.7%. On Sept. last year the Railroad Administra- ad transported from the farms 412,- 0 bus., or 51.2% of the whole. In words, we have done better this than last year by 3.5% of all the to be transported this year.

e chief complaints that have come e Railroad Administration with nce to failure to transport wheat come from the states of Texas, Ok- a and Kansas, and to some extent Nebraska, and slightly from Colo- In Texas there were still, on Sept. ,250,000 bus. to move from the ; in Oklahoma, 13,402,000; in Kan- 5,224,000; in Nebraska, 24,062,000, a Colorado, 9,673,000. The total still to be transported from the in those states is 124,611,000 bus., out one-third of the entire crop of states.

e states of Oklahoma and Texas or- y look to the Gulf ports for their and primarily to Galveston; but veston the elevators are full. There 786 cars standing loaded on the there, and no place to put the e. And 1,006 cars more are on ay, and no place to put the wheat it arrives. There you have a m no longer a rail problem, but f storage and ships. These ele- at Galveston must be emptied, t we can transport to them the now lying in the fields of Texas klahoma, and the only way to at is to get ships to take the and the Railroad Administra- as no jurisdiction to take over We are not going to stop on questions of jurisdiction, how- The Railroad Administration ken up with the Wheat Corpora- he matter of getting ships to ston. Cablegrams were sent to d, and responses from England ed, and in the last two or three rrangements were made by which nglish cargo vessels will be di- from New York and North At- ports to Galveston to clean out elevators."

Kansas, Nebraska and Colorado oblem is a little different, but it a question of storage.

m advised that the elevators at s City are full, and those at nearly so. I am advised that f that wheat has gone to Chicago, eir elevators are full or nearly e must find some place to put the in Kansas City and Omaha; oth- you cannot bring any wheat in he plains of Kansas and Nebraska. is one place where there is stor- ft. Within the last two or three he Railroad Administration has that question up with the Wheat ation, to see wether arrangements made to take the grain out of s City and Omaha and put it in lace where there is storage ca- left. I cannot say positively that rangement will be made. I hope ink it will be; and if it is made, he Railroad Administration will dy to do its part and send trains s loaded from Kansas City and and bring them back empty to me places for reloading, entirely less of expense, because it is no a matter of expense but a ques- protecting the crops.

tructions have been recently is- o the effect that the grain lying ected in the fields of the Middle rn States shall have preference in g. I am not certain that those tions are being carried out. Terminal Grain Corporation

SIOUX CITY, IOWA

Our new, entirely modern 1,000,000 bushel elevator, storage and work house is now available for a general business in receiving and shipping grain. A Morris continuous flow drier with a daily capacity of 12,500 bushels and complete receiving, conditioning, storing and shipping facilities are at your disposal.

Merchandisers

Consignments

ern Kansas and Nebraska are getting their proportion of the cars. If those sections are not getting their fair proportion, steps will be taken to get them the share they are entitled to. The Director General is personally giving attention and consideration to the transportation of this wheat. He has arranged a conference in Chicago this week between the Federal managers and regional directors in the territory affected, and he will attend that conference himself to make sure that everything the Railroad Administration can do will be done to help out in this situation.

"This situation is of course more or less a temporary one. In a few months this particular problem will be behind us; but the general problem of what the railroads of the country under private operation should do in fulfilling their obligations to the public will still be with us. As Director of Public Service I have naturally been much interested in questions of public service, and I am very much interested in the question of public service after the railroads are returned to their owners for operation. I have been thinking as to the constructive things which the Federal government has done during the Federal control in the way of public service, and I have been wondering to what extent those constructive things may be saved when the railroads are returned for private operation. I want to mention a few of the things of this character which have been accomplished by the Federal Government, and which I hope, in the interest of the public service, may be retained by the carriers under private operation."

Among these is pooling of equipment, unification of terminals, consolidated ticket offices, disregard of written instructions, elimination of competitive train service, representation of shippers in the initiation of rates, speed in the adjustment of rates, speed in the handling of freight claims, etc.

A great many more problems were put up to Mr. Thelen, which he answered, explained or agreed to investigate.

CLEAR RECORD CAR CLAIMS.

H. I. BALDWIN of Illinois: Has there been any ruling of late whereby claims for non-leaking cars would have accumulated can be presented for payment with any prospect of payment? These are cars where the railroad claim agents do not show any leaks in transit. They therefore decline the claims because they show no leaks on the railroad records.

MR. THELEN: I am not entirely familiar with that situation, but I believe the matter is covered by G. O. 57. We are all awaiting the decision of the Interstate Commerce Commission in Docket No. 9009, which will finally and definitely settle that question. Until the Interstate Commerce Commission decides the case, I think the local officials will have to be guided by G. O. 57.

ELEVATOR SITE RENTALS.

The elevator site rental charge is a matter concerning the railroad corporation, not the Railroad Administration. As to the question of liability for fire—this is now under the control of Regional Director Aishton at Chicago, and that clause on leases now in use is "a fair and just clause."

CLAIM PAPERS.

A new rule on G. O. 57-A provides that when a claim is refused payment, all the papers, the claimant's and the railroad's, shall be sent to the local agent, or to the claimant by a traveling auditor, so that the railroad side of the case shall be available to the claimant.

Henry L. Goemann's Report on Transportation.

Mr. GOEMANN's report covered a number of important matters; claims, orders, rates, transit, etc. As to the first, the Commerce Commission has set for oral hearing Docket No. 9009 on Nov. 8,

at Washington. In this connection is G. O. 57-A. which will be settled by a ruling on No. 9009.

As to settlement for losses based on value of the grain at time and place of shipment, the clause of the B/L to that effect has been sustained in the McCaull-Dinsmore case by the U. S. Circuit Court of Appeals. This decision takes care of the new B/L and claims will be settled on basis of initial value.

On protest of the Millers' Federation and this Association, the proposal of universal transit was dropped.

The report recommends that, "The addition of the 'Without Recourse' clause on the face of the bill of lading, when signed by the shipper, becomes notice to the carrier that all charges must be collected from the consignee and preventing the carrier, in event of such failure, from billing on the shipper for the claimed amount. The clause should be used by every shipper."

The matter of the 30-inch loading line for grain cars "is now under further discussion between the Bureau of Markets and Railroad Administration at the request of the grain shippers, who are insisting upon a clean certificate of inspection as to grade of grain on inbound road or on initial inspection. "I am," Mr. Goemann said, "in hearty sympathy with the request of the railroads for co-operation in promoting car efficiency, but I feel that carriers should not in tariff publish rules that will take away the shipper's right and privilege of protecting himself by proper loading to secure clean certificate of grade on initial inspection. The Bureau of Markets states it is necessary to have 30-inch space for sampling purposes in order to give this clean certificate, and until they change their position I believe we should insist on tariff rule of 30 inches as a basis for minimum car loading. The carriers need have no fear of not getting heavily loaded cars of grain. The car shortage whenever it exists automatically enforces heavy loading. The quality of grain varies with the seasons and when nature gives us a poor quality crop the tariff should be such as to enable the shipper to load safely."

Order 15.—The situation as to side tracks and their maintenance is the same now as before G. O. 15 was issued: "whatever practices were in effect by the various carriers prior to March 26, 1918, are continued and where the railroad company was taking care of the maintenance of side tracks such expense shall be borne by the U. S. Railway Administration and not by the industry, as heretofore provided by General Order No. 15. The order also states it is not necessary to sign contracts. This leaves the situation, when leases are submitted to shippers to sign under the Railroad Administration, optional with the shippers, whether they desire to accept the conditions of such leases, including liability clause. Furthermore, the railroads are permitted to enter into such contracts as to the liability clause as they individually consider proper."

Supreme Court decisions have recently been made in two instances, one being Chicago & North Western Ry. *vs.* Oche. Docket No. 159. This was an order of the State Railroad Utilities Commission of Minnesota requiring railroad companies to extend a side track, partly at its expense, from its main line to a manufacturing plant. In this case the court held that the side track is a public and not merely a private siding and that it became additional trackage for public use and becoming property of the company and an integral part of its system. The question of requiring the railroad company to build, at part of the cost, does not involve a taking of its property without compensation and without due process of law. The decision further states as a common carrier the railroad company assumes and must discharge the obligations which inhere in the nature of its business. Among these obligations is that of providing reasonably adequate facilities for serving the public.

Another case of important effect is Lake Erie & Western R. R. *vs.* State Public Utilities Company of Illinois *ex rel.* Cameron, argued and submitted March 13, 1919, decided April 14, 1919, Supreme Court Docket 204.

As to leases and liabilities thereunder and the matter of siding construction, Mr. Goemann has concluded (1) that the weight of legal authority is to the effect that a railroad cannot contract for exemption in whole or in part from liability for loss by fire or otherwise in carrying out its duties as a common carrier; and (2) that, as to sidings "We believe that the better policy to follow would be the application to state railroad commissioners, seeking an order compelling the installation of side tracks adequate to the needs of the community and its industries and after securing such an order it would be immaterial to the carrier whether the same be constructed wholly upon its own property or whether it be the extension of so called private side tracks; and carriers would not then hesitate to extend so called private side tracks or refuse to build new ones, especially when the same is built over the property of the industry or industries to be served."

Mr. Goemann was requested to continue work on Order 15 and on the loading rule.

The Advisory Committee.

Two reports were read by Mr. WELLS of Iowa for the Advisory Committee giving (1) the history of the conference with Mr. Barnes from which eventuated in the present arrangements for handling the wheat crop by guaranty and (2) the enquiry into the cost of handling a bushel of wheat through country elevators. With both these topics the reader should be quite familiar.

The closing report was one on the telephone and telegraph service. I read for M. L. Jenks, the chairm Duluth, Minn. He was unable present, but reported that unde Burleson administration complaint been unsatisfactorily handled, bu that wires are again in private service will improve.

The session was then adjourned

TUESDAY'S SESSION.

The convention was called to at 10 o'clock a. m. by Pre Goodrich, who spoke of the sta the President's health, and at hi gestion all stood for a moment in prayer for his recovery. Then " ica" was sung.

The chair then entered a prot the carelessness which charact the daily newspaper mention of th ceedings, which in this case mad attack the Commerce Commi whereas the grain trade has alway ported that body. Mr. Goodrich introduced as the speaker, Thos. E son, of Wilson & Co., of Chicago, a of the packers whom every sma politicians and some newspapers a great deal to say about."

ADDRESS BY THOS. E. WILSON.

MR. WILSON said high prices ar a local, but a world problem. The the aftermath of the great destr of the war and present "extrava beyond all reason." All countries a lot of money and all are spendi some because they have fought an fered and now want to enjoy life; because the money is intrinsicall worth keeping as its value is unc over night. He thought the cry of eering is much overdone. As to the ing industry, the Government d the war permitted it to make 9 pe on its capitalization; it actually but 5.6 per cent. It was permitt take 2.5 per cent on its turnover;

DELEGATES AT ANNUAL MEETING OF NATIONAL ASS'N AT ST. LOUIS.

y took 1.6 per cent, or 1.6c per r of sales. The "big packers had siness of 2,400 million dollars and 40 million in all profits, or 25 mil- less than the Government had said would be allowed to make. And they are attacked by the Govern- in the person of the Federal Trade mission as a profiteering monopoly. hat leads us to the question as to all these attacks on the packing ness, if that statement is correct. is a problem. I think I can best ss my feeling by quoting the words -Governor Stokes of New Jersey, address he made within the past or four weeks:

Now there is a close affinity, a very sympathetic relation, between the packers and politics. The beef try is not the chief product of the packers. It is only a by-product. chief product of the meat packers providing nourishment for our poli- is. They are our sure and best allies. we politicians run out of issues, ever we grow stale, whenever our arity begins to wane, we become ribunes of the people and attack eat packers. (Laughter.) And we 's count on the Federal Trade Com- on to help us virtuous politicians. lause and laughter.) What the al Trade Commission cannot think ve do. Checking the meat packers safe and popular sport, and there closed season for it. They have v votes; there are so few of them. it is utterly impossible for them rect the multitude of inaccuracies which the politicians feed the pub- Our talk is not as hygienically in- d as to accuracy as your product to purity.'"

Wilson apologized for "giving too " of the packers, "but there are a things about the business I know nen are interested in. You are ess men, and I think you are really is of the packers. You are han- the grain product. Many of you, I assume, are producers of grain, and you know that 90 per cent of the corn and 90 per cent of the oats raised in this country is fed to live stock; 50 per cent of the barley and 40 per cent of the rye is fed to live stock. Therefore, your business has close relationship to the packing business and to the production of live stock. . . .

"I want to discuss a little further with you the workings of the packing business, because there are things I will say to you that you won't read in the Federal Trade report and scarcely ever in the newspapers, because they are things that are favorable to the packing industry; and I think you are broad enough and big enough to realize that there should be and must be in this country closer affiliation between the different industries of the country. I am strong for industrial coöperation, for teamwork among the industries of this country. I think we are waking up to the necessity for it; and I think the time will come soon when you will be deeply interested in the problems of the packers, bankers, railroads, and the producers of all sorts of stuff in this country, the steel concerns and all, and they will be interested in your problems. The time is fast approaching when, if we are to go on and maintain our trade supremacy, we must do teamwork.

"I would like to mention here one or two things you will not find in the Federal Trade reports. I want to mention the accomplishments of the meat packing industry and the producers of live stock, because we couldn't operate without them any more than they could operate without us. Germany built up the greatest military machine in the world, but they overlooked one thing. They overlooked the fact that there had been developed in this country what was capable of feeding an immense army of men three thousand miles away from its base—something the world never accomplished before. But when we stop to realize that this country not only fed its own army in foreign lands, an army of millions of men, but helped materially to feed the armies of our Allies, you will realize the development of the industries that accomplished that. You men are directly interested in that, because the feeding of the grain was vital also.

"In February, 1918, when our country was snowbound from coast to coast, and it was almost impossible at that time to move products over the railroads, as chairman of the Packers' Committee, in coöperation with the Food Administration, I was called on long distance on one Wednesday afternoon, and not requested but given orders to have rolling the following week to the Seaboard 60,000,000 pounds of perishable product. That is not all. On top of that I had orders to have rolling the following week 70,000,000 pounds of perishable product. I was told at that time over the telephone that the situation in Europe was critical; that unless food was gotten there, our Allies and we were defeated; that nothing should be spared to accomplish that undertaking. They realized and stated that it was almost an impossible thing to do, but it had to be done. And I want to say it was done, and that no organization less efficient than the organization of the packers at that time and today could have accomplished it. You heard nothing about it. There was no grumbling, no breaking down. The feat was accomplished, and I want to say, in answer to one of the clauses of the Kendrick and Kenyon bills, where they are advocating the taking away of the refrigerator cars from the larger packers, that had that condition existed at that time, that feat could not have been accomplished. (Applause.)

"In order that I may not overstate it in my enthusiasm, I want to give you the words of the Government itself in connection with that undertaking. This is a statement made by Mr. Stephen Chase of the United States Food Administration in a bulletin recently issued. In connection with other things, he says: 'In February, 1918, extremely urgent demands mere made by the Allies for pork shipments to meet the immediate, absolute needs. In fact, the further prosecution of the war was shown to be directly dependent on the immediate meat and wheat supplies sent to them. At that time a program was worked out in detail, calling for 300,000,000 pounds of pork products per month for the following three months.' Those are immense figures, gentlemen. That was 300,000,000 pounds in one month of perishable product that had to be handled properly. 'It was an undertaking that many people considered entirely impossible, but the program was carried out.' And I will say to you that the packers, large and small, did their duty at that time, and they put to the Seaboard 300,000,000 pounds of perishable products during the month of February, the same during March and the same during April. (Applause.) And I say again that no organization less efficient than the packing organization at that time and today could have accomplished it.

"Those two bills (Kenyon and Kendrick), gentlemen, are similar. They are different only in detail of operation, but the important points of the two are, first, the licensing of the packing industry, the elimination of packer ownership in stockyards, the taking away of the packers' cars. Those are the important points. Briefly, the ownership of the packing people in the stockyards is not, from my standpoint at least, vital. If that ownership is not helpful to the producers of the country, then I would say take it away from the packers. Let them dispose of it. Personally, I believe it is helpful. I believe that the ownership of those yards by some of the packers is more efficient than if we inject the politicians into it. My position on that is that the point should be thor-

DELEGATES AT ANNUAL MEETING OF NATIONAL ASS'N AT ST. LOUIS.

oughly investigated, that it should be determined without question of doubt whether it is of benefit or not to the producers, and if found not to be a benefit, I think there will be little opposition on the part of the packers to disposing of their interests.

"The question of the cars I think I have answered. There is no question but that the car situation should remain as it is. There is no question but that the refrigerator car is as much a part of the equipment of the packer as the knife in the butcher's hand. We cannot operate and buy the product of the producers unless we are sure of our facilities to move that product when it is ready to be moved.

"The question of the licensing is a different proposition. I am unalterably opposed to that. I think any man in business today who has had business experience will be opposed to it. That is a problem that touches not only the packers, but every industry in the country. If that principle is adopted in this country by our Government, the principle of supervision and licensing of all businesses will soon follow. It will not remain with the packers alone, but will extend to all big business in the country."

Mr. Wilson's peroration was a defense of the makers of the Constitution under which in 130 years our country has so wonderfully prospered as a whole and as a nation; has developed men like Sergeant York of Tennessee, who by pure intellect and courage and the habit of initiative single-handed captured a thousand Germans; which made the boy fighters who made Chateau-Thierry possible; which has gone through all these 130 years with but four changes up to the time of the eighteenth amendment. I say, gentlemen, we should think deeply before we permit any idea to prevail that would change the operation of that great document. And I feel it deeply that when we do concede that, we have sacrificed our individuality and the prosperity of our country. (Applause.)

On motion of Former President Eikenberry, the convention rose to its feet to express its appreciation of the address and the speaker's sacrifice to be present to make it.

A Word from Canada.

The Association has about 50 members in Canada, representing whom was Dr. McGill, secretary of the Winnipeg Grain Exchange, who was then introduced. Having expressed the greeting of the trade in Canada to friends on this side, Dr. McGill said:

"Commercially, Canada and the United States are very closely associated. There is a great deal of American capital north of the boundary line. There are a great many Americans settled on praire land, a great many of the associations, from the associations of laborers up to those of great financiers, work on both sides of the boundary line. So far as the grain industry is concerned, there is a large amount of American capital in our Canadian grain industry. There are a great many able American brains operating in grain north of the line; and we feel that in all these ways and in others we are very closely associated with this country of yours. Indeed, after listening to the fine address of Mr. Wilson, and after hearing of the accomplishments of one of the major American industries, even a Canadian like myself cannot help feeling something of enthusiasm and of pride in the fact that the great Nation with which we are so closely associated has been so successful, has taken such a mighty place among the leaders of humanity, and sometimes one cannot help feeling that if one were not a Canadian, one would rather be an American than anything else. (Applause.)

"At this point particularly in this period of reconstruction we feel we are not altogether strangers. When you speak of your agitators and of the social unrest, we cannot help thinking we have heard of things quite similar, almost identical, north of the boundary line. (Laughter.) And when we hear of your ideals for the future development of this country, we cannot help thinking that whether you realize it or not, you are standing on ideals of wider sweep than this country; you are trying to express the ideals that are the ideals of humanity; and we feel as much enthusiasm as do you, and should be delighted to assist you in carrying them out; and we hope you will not altogether be jealous or annoyed if we carry something of your expressions of these ideals back to our own people, and tell them that in our opinion the great controversy is the same, the great ideal should be the same, and there should be an ever-growing friendship and coöperation between Canada and the United States." (Applause.)

A Word from Mr. Armour.

Before making his own report A. E. Reynolds of the Legislation Committee, said he had been asked to invite J. Ogden Armour to address this convention. But. Mr. Armour had told him he simply could not make a speech, but he had sent a short letter which Mr. Reynolds than read as follows:

Out of such meetings as you are holding here will come the inspiration and co-operation between men and groups of men which will carry our country past post-war problems as important and as trying as were the problems incident to a triumphant war against autocracy. I feel flattered that you should want to hear from me at a time like this and in assigning to me the subject of pending legislation—its intents and effects—you give me opportunity to discuss a matter of tremendous import.

There is at this time a too general disposition to depend upon new legislation to solve economic problems. Business men such as you are must recognize the fallacy of such procedure and must lead, not only in acquainting the Nation with the impotence of political remedies for economic ills, but also in the discovery and application of the real remedies. There must also a wider realization of the interel and interdependence of men and indu which at first glance may not seem cl allied. A law designed to gore one r ox may cripple some other oxen v owners did not know that they wer fected. In considering legislation gr out of national readjustment conditio is important that business men e where and in every line pay close tention so that business welfare and l welfare, which are one and the same, be safeguarded.

In viewing our reconstruction per sometimes marvel that we are as w as we are. After a great war and a upheaval, surpassing all precedents transcending all previous experience find ourselves with an abundance of ready to do and dare almost anythi surely a twentieth century phenom Several panics in our history have c more acute distress than the afterma a world-war. We have had ample de stration of the recuperative powers great and vital nation. Even our unr must believe, is to no inconsiderable e the outgrowth of our vigor rather t squirming under hard conditions. Me struggling not for existence so mu they are struggling for fuller life. I such circumstances I cannot ally r with alarmists, or feel that the philoso and revolutions which develop out of ger and despair are ever going to lay grip on America.

Yet I know that the American peopl worrying. They are pondering un over the high cost of living. I conf have done some worrying myself. are limits to the comfort that one ca tain from selling high-priced meat. glad that I have no dictatorial powers prices. I should tremble at the respor ity. It is bad enough to be suspect having such powers, but actually hav would be infinitely worse. I do not any man to have dictatorial powers the price of meat, not even a duly thorized agent of the Government. not want to see any man have dicta powers over any communities; for prices cease to be made by the demo forces of supply, demand and compet our real troubles will have just begun

But. I say that the American peopl uneasy over the high cost of living. M facturers, merchants, and the publ large have felt it in one way or an as a weighty and serious problem; there is a general sentiment that thing ought to be done. Well, if some ought to be done, let us do it. B us be cautious of the means and met and be sure that we are on the right In the feverishness of our anxiety and

are today, sailing for unknown seas -making on utterly fictitious hy- s. Monopoly and profiteering have veritable bugbears. Far be it from vouch for the honesty of all my countrymen, and to say that there rofiteering in our land. If there is, hunting gnats with a bludgeon, for ve that American business on the goes to the well-established prin- hat "honesty is the best policy." If any monopoly, I have not been able ver it. I want no monopoly for my- would be a white elephant on my I do not believe that any thinking ants monopoly. Monopoly has not roven; it has simply been asserted. ith what measure of truth it has serted, I must give you an instance. ckers are said to have so thoroughly the food business of the country mpetition in the food lines is totter- its last legs. Many people believe d are willing to stand for any kind al legislation to correct an evil so ng. Let me give you the facts. The le grocers of this country, last year, usiness of four billion dollars, and meat packers together did a busi- grocery items totaling $100,000,000, mately 3 per cent. Legislation based on 3 per cent monopolies and imaginary profiteering will never prosper. Agitation in behalf of such legislation may befuddle a certain portion of the public for a time and obscure the real issues with respect to the high cost of living; but the day of reckoning will come. And I say to you that I look for the time to arrive speedily when any Governmental investigating body that proves recreant to its trust and misleads the public with misinformation about the bread and butter problems of the Nation, making assertions at absolute variance with the facts—I say that I look for the time when such a body will be repudiated by the public in terms so emphatic that it will mark a new era. When that time arrives it will be popular to stick to the real issue.

"There are real issues. They are economic issues. I am anxious for the people of our country—the rank and file of householders of the land—to know more about the businesses which supply their daily necessities. I should be glad to have them know more about profits and what constitutes a fair and reasonable profit in this or that line of endeavor. I should be glad to have them know more about the great problems of distribution and the functions of the middleman. I should be glad to have them know more about production and its relation to prices. Only as we have widespread information on these important themes can we hope to have mutual understandings; and reasonable, concerted efforts toward the readjustment of our economic difficulties.

"It is not my purpose to offer here any sovereign solution for the high cost of living. Yet one step is so obvious that I cannot refrain from mentioning it. We must look to production. There is no simpler way of increasing the buying power of the dollar than by increasing production. There is no alternative that will succeed. Buying power and credit have outstripped the yields of our farms and industries. I hear rumors that some farmers are considering the advisability of cutting down their output, and I regard such proposals with the greatest misgivings. I would remind the farmer that his best interests will not be conserved by lessening production but by studying every means available for reducing production costs, so that he may increase his output to the maximum. For though inadequate production means high prices for farm commodities, it means likewise high prices for farm help and high running expenses.

It is my conviction that never was there a better day for capital and labor to enter into combination with each other to the advantage of both than at this moment, when the whole world is calling for production. There must be mutual understanding and co-operation, and a doing away with those destructive inroads on production by strikes and lockouts.

What we need today is understanding. We need mutual confidence, faith in each other. Only on such a basis can national prosperity and happiness be built. We have had somewhat of a superabundance of incrimination of business, big and little, and of Governmental activity of that kind which inflames the mind of the public with universal distrust and of proposed legislation of a penal rather than of a corrective character. I do not believe that the high cost of living can be legislated out of existence. I do believe that the problem which it presents can be solved by the united and democratic efforts of the people of our country.

The Legislative Report.

Mr. Armour having been thanked for the paper, Mr. REYNOLDS proceeded to his own report. He prefaced the particulars by a reference to the current phases of Governmental meddling with business; and said the issue has really come to be one to determine, "whether a Nation conceived in Liberty and dedicated to the proposition that all men are created equal, can endure." "There seems to be more doubt about it now," Mr. Reynolds said, "than when Lincoln uttered those memorable words at Gettysburg sixty years ago"; since "further encroachment of the Government in business cannot be reconciled with a principle for which the war was fought."

Of the legislative work of the association in the past only the Grain Grades and the Pomerene acts have been achieved. Of the former the report says that while great benefits are being derived from it, its execution is accompanied by extravagance and unnecessary expense in the supervision, and shows that, "The U. S. is notoriously the poorest conducted business institution in the world." The Pomerene act waits on the return of the railroads to their owners to work its greatest benefit.

Agitation against future trading for the moment is quiescent, but "is liable to break out at any time." It is "sure to bob up again in the near future. I urge every one, who has a constructive idea on this subject, to present it, so we may be ready when the fight on future trading is resumed."

Pending bills include the following:

S. 810, which proposes to establish county coöperative marketing incorporations to handle all farm products. Its aim, of course, is to eliminate all present middlemen and create a new agency to handle all food products. This new agency is to be fostered and supported by the Government at Government expense. The first appropriation for administration is to be $24,000,000 with provision for loaning these organizations, by the Government, $100,000,000.00 more. The measure is so ridiculous and preposterous that it seems impossible to pass it. But is it? I think every opposition possible should be marshalled against this measure. Up to date, we have had no opportunity to be heard on it."

H. 8342 (Haugen) to regulate feed production and distribution. "The bill provides a somewhat cumbersome method of arriving at the results desired, but its general tenor is fair. The practice of putting into manufactured feeds wholly worthless materials is unjust, and unfair, and unworthy of the support of the grain trade." But the regulations of this bill are not entirely fair or practicable.

H. 8624 (Haugen) for the control and distribution of food products and fuel. The provisions, in my judgment, are excellent. It, however, exempts the producer from the operation of the measure. This is a species of class legislation which deserves our strongest condemnation. If it is desirable to conserve food and control waste, it is just as desirable for the producer to exercise such conservation as for any other class to do so."

Cummins R. R. bill. Mr. Reynolds thinks the roads are entitled to "fair remuneration on their investments" and that strikes on railroads should be forbidden.

S. 2202 (Kenyon)—"It is to be condemned on the broad principle that further interference of business by the Government is unwarranted and dangerous."

Speaking of the H. C. L., the report, among other things, says: "In my judgment, the present Government investigation is all political buncombe. It will probably result in fooling part of the people for a time, but in the end it cannot result in any lasting good. The present action of the Government in forcing ordinary surplus stocks of food on the market doubtless will lower prices temporarily, but what of the future when these stocks are exhausted, and we must adopt a hand-to-mouth method of supplying food? Large visible supplies of foodstuffs, or, in other words, hoarded supplies, have always been and always will be a menace to advancing prices. No stocks, or very limited stocks, of supplies, have always given great impetus to advancing prices. Just what will happen if our Government succeeds in distributing all supplies of food stored up for future rainy days, and prevents such storing in the future, remains to be seen. Personally, I look on the situation with some trepidation. The laws of supply and demand cannot be ruthlessly infracted without a penalty following. Any artificial reduction in prices on a large scale will bring along a whole train of evils. Prices are rarely unduly high unless a scarcity exists."

Mr. Reynolds then reviewed the cause of high prices and the remedy (more production) and closed by saying:

"The insatiable greed exhibited by both laborer and producer in the past does not give us great faith in our safety in their hands. If the demands of the producer are to be met, they will very soon absolutely control the food of the Nation. It is generally believed that quasi-monopoly of the Nation's food is held by the so-called 'middleman.' It has not been proved to be so and absolutely is not so; but if it were, can we believe that the people are to gain by placing the monopoly in the control of the producer? Personally, I doubt if anything is to be gained by such a change. A fair Governmental supervision and control of the food supplies of the people is doubtless advisable, but the undue fostering of the producer at the expense of the Government is certainly not in accordance with democratic principles and fair play.

"The planting of seeds of discord, anarchy and confusion has gone far enough. The people should turn their attention now to correcting evils rather than augmenting them. The present period of economic adjustment is not the time to indulge in extreme optimism or pessimism. A careful course of level-headed thinking and acting is vastly better than either. Legislation may temporarily control evil tendencies, but education alone can permanently cure them."

The report was received and the thanks of the association extended to Mr. Reynolds and the committee.

Membership Committee.

MR. EARLY, Texas, reported for the membership committee as summarized by Secretary Quinn, and the distribution of prizes to the boosters was made, with special emphasis on the work of Mr. Kay, to whom a "consolation" prize of a scarf pin of a diamond set in platinum was given.

The session was then adjourned.

TUESDAY AFTERNOON SESSION.

The afternoon session opened by a report on uniform grades and an address on the same subject by Mr. Beasley, of the Bureau of Markets, who said the "principal complaints coming to the Federal grain supervision during the past year might be divided into two classes; first, complaints against lack of intensive supervision of grain as it was arriving at markets; in other words, the inbound grain was not supervised to the extent the outbound grain was supervised. Second, complaints against lack of uniformity between markets." The resolution of the Milwaukee convention setting forth these causes has been answered by removing the Board of Review to Chicago when the work of inspectors and supervisors alike is supervised. The record of appeals growing from 348 in July-Dec., 1917, to 3,838 in Jan-June., 1919, "illustrates to us that the appeal feature is becoming more popular," but the changes of grade have fallen from 68% to 46%. "That may sound still large, but the point is it is gradually being reduced. Our interpretation of that is that as we go along in our work, we are gradually getting to the inspectors more clearly our interpretation." As to uniformity between markets tracing of cars between six markets shows that, "Out of one market into other markets, uniformity 72 plus per cent. Out of another market in the central West into other markets 70 plus per cent. Out of the third market into other markets, 76 plus per cent. Out of a fourth market into other markets, a percentage of 74 plus. Out of the fifth market into other markets, a percentage of 70 plus per cent. Out of the sixth market into other markets a percentage of 93 plus. I don't know that it is fair to include this seventh market. It is a large shipping market. We only have in this case 58 cars and four cargoes, and probably should leave it out, but I will state there was 100 per cent in that one particular case. While we do not feel altogether satisfied and are not at all proud of that brief report, our contention is that it will give you concisely as nearly as we have been able to follow the uniformity between markets what the percentage is, and it ranges between 70 and 80 per cent. We feel, if we have an opportunity to report on this same thing next year, that will be increased further, for the reason that we have absolute knowledge that last year and the year before when we were in operation the percentage was a great deal smaller. Practically ever since the operation of the Grain Standards Act, which became effective December 1, 1916, we have been laboring under abnormal conditions."

As to the 24-in loading rule, Mr. Beasley said that the department can issue instructions, and will if it is the desire of the trade, to inspectors substantially as follows: that where a car of grain is loaded to within 24 inches of

the roof, in our work under the act we will issue a grade memorandum of clean certificate on that car, provided there is nothing to evidence, except the 24 inches, that the car is not uniformly loaded. We feel that under ordinary conditions, with 24 inches of space, and no other evidence to the contrary, we can consider the sample we get of that car a representative sample. If it is the desire of the trade to have inspectors follow that general rule, I think we can ask them to do it. The investigation we have made indicates quite clearly that, I won't say inspectors, but samplers, of organized inspection departments, use too freely the notation "Heavily loaded car." We do not believe in all cases they have been justified in putting that notation on so many certificates, and I think we can clear that up with a little coöperation on the part of inspection departments, which I am sure we will get."

Moreover, to this, he said: "We believe if a truly representative sample of the car can be obtained within 30 inches, it can be within 24 inches; in other words, that 6 inches is too small a matter to quibble about when it comes to getting an absolute representative sample of the car.

The Farmers' Representative.

President Goodrich then introduced JOHN W. SHORTHILL, of the National Council of Farmers' Coöperative Ass'n, of Omaha, as a "man of national prominence and great ability," representing 30,500 elevators and 400,000 farmers, which Mr. Shorthill said, "Reminds me of a question asked some of us in Washington one time, 'How many farmers are there in the United States anyway? We have had one fellow and another come down here representing the farmers, and we have made a calculation and we find acording to the total there are 100,000,600 farmers in the United States.' (Laughter.) I want to correct the chairman by saying we have 3,500 elevators and not 30,500. (Laughter.)

"Now, I am going to start this thing off, and it is for you to cry 'enough.' The reason I say that is because I am feeling fine, for several reasons. There are many reasons for that and I have selected a few I want to mention. One is that I have this splendid privilege of visting this magnificent city of St. Louis and the grain market. It is a splendid place to be, and it makes anybody feel good to be here, and I haven't been any place that any of you fellows haven't been, either." (Laughter.)

Some other reasons for feeling fine were given, this one, the "greater reason: I cannot help but say that I feel fine because I have that special privilege of being a free American citizen at this day and age of the world, and have a part in the conduct of the affairs of our Government. (Applause.) There is only one thing I have to regret in that connection, and that is the fact that the average good law-abiding citizen, the worth-while fellow in this country, has not awakened to the fact of what his responsibility and duty to this Government are, and what his concern is in this hour of trial, and he is not doing what he should be at this time. We had an illustration of it in Omaha some time ago. The thing we need most is to awaken to our duty, and that concerns you individually and directly in the conduct of the business in which you are engaged, because the prosperity of your business depends on the peace and prosperity of the country.

"I am wondering if we have struck the keynote of what is wrong at the present time. I think we are all trying to lay it on the other fellow. The average man seems to take the attitude that every man is after him, and the Government is after all of us. We think the high cost of living is due to what the other fellow is doing, or what the government is doing or isn't doing."

Mr. Shorthill then discussed the difficulties of law making and Government for so great a country with its diversified industries and interests, and generally the purposes of Government, among which is to protect the individual in his opportunity to participate in an even start in a fair race.

Naturally, the problems of the farm called for some comment, all pertinent. As to the relations of the farm to the grain buyer, he said:

"There is a lot of talk about putting the middleman out of business. Some say they are not necessary. But I have known farmers to come into our office and say, 'Where can we buy a car of corn?' They say, 'We would like to buy directly from the farmer and save the middleman's profit.' I have said, 'I don't know. I know of concerns that handle corn and farmers that grow corn,' and I gave him their names. He would come back and say, 'I called up all those farmers, and none of them were ready to sell. I called up the elevator man, and he said yesterday he had a car but he sold it, and he will have another in a couple of weeks.' I said, 'The thing for you to do is to go down to a grain merchant and he will furnish it to you, because he is in that business.' That man was performing an economic service to the farmer, because the farmer had spent more money in railroad fare and hotel bills and telephone tolls, to say nothing of his own time, than the grain merchant would have charged to handle the car of corn. All the farmers' organizations can hope to do today is to fill that field and fill it in that way, and if they succeed, they must do it better than you do; and if they can't do that, they can't succeed permanently.

"I am not in favor of the farmers of the country handling all the business of the country, because I am not persuaded that it is the more economic thing to do. I notice at times the price a farmer puts on his corn if there happens to have been a drouth and he has the only crib of corn in the neighborhood. I am not roasting the farmer; you fellows will do the same thing when you have a chance. The farmer is no different from anybody else. What we want in this country is efficient business organization that is serving the public, and if that is not done properly by the men in business, they must step out of the way for someone else who can do it better.

"I have concluded that the proper solution of marketing is a good live, efficient coöperative business concern in competition with a good, live, honest, on-the-square private concern, the coöperative store being there for the purpose of regulating in a reasonable way the margins taken, and the private concern being there for the purpose of injecting efficiency into the proposition. I do not think anybody has much ground to fear farmers' coöperative concerns. I have operated and managed several, and have learned in competition with other people that the hardest kind of competition I had to meet was the fellow across the way who always gave honest weights, fair prices and courteous treatment to his customers. I couldn't do anything to him, and, more than that, I didn't try. I had nothing to fear from the fellow who is up five cents today and down five cents tomorrow. And I know many places where these institutions are working together harmoniously and are giving the highest service to the community. It is the other fellows who build the coöperative institutions in this country. It is true that an idea has been started which has rolled on and on, but the start has lain in the thing I have mentioned to you. There is a lack of the proper kind of service to begin with, and it is evidenced by the fact that there are many places in this country where there are private institutions serving the public so well it is impossible for a coöperative institution to succeed in that community. But whatever comes or doesn't come, the thing for us to do today is to work together in an open, frank, honest, constructive way.

"Probably the next included in this grain industry is the miller. I need not comment on his efforts to develop to the highest point of efficiency his plant for the production of food. It is not necessary to speak of the exporter, who takes the surplus of the grain and holds it until there is a world demand for it, and then sends it to a foreign country. They are all necessary in this industry, and if we are wise, we will stand together, man for man, for the development of this grain industry, and cause it to contribute to the prosperity of this country of ours."

Mr. Shorthill then commended the efforts of St. Louis to develop the use of the waterways in the valley, cheap communication being vital to the country's prosperity and to the grain industry.

"I think the Government should give some attention to the practice of leasing private wires. I am not ready to say that the private wire business can be abolished without doing some injury, but I do not know but it can. But it is not fair to one grain merchant to compete at the rates and with the service the public has with some other dealer who has exclusive privilege of and the very advantageous rate of a private wire operator. This should be carefully considered, because nobody in the grain industry will want any factor in that industry to have an advantage over any other factor.

"As to the Government as a price-fixer, about all I can say is that, if I understand them correctly, the farmers of this country have already had enough of Government price-fixing. I think the farmer will be satisfied if he can sell his stuff at all times in the free and unhampered market on the basis of the world's supply and demand. (Applause.) But if there is anything in the idea that any power is being exercised to reduce the cost of living, and it has had anything to do with the recent reduction in the price of farm products, while the farmer is willing to accept a reduction in the price of his products, for he is anxious to see a reduction in the cost of living, wouldn't it only be fair and just, if there is any power that has been hammering prices, to let the prices of the farmers' products rest a little while and hammer some one else along the line? (Applause.)

"We are spending a lot of money and time in going to Washington to take care of matters down there, and while we are gone the organizer is staying at home and organizing the malcontents in our absence. The only way to offset this proposition is for you and me and everybody else who wants to see this country be America for Americans, and for those who want to be Americans, is for us to get into a campaign of organization that will counteract the campaign or organization the agitator is putting on. And we cannot solve that by going to Washington; it is a local proposition.

"It has been suggested that the solution of the condition is increased production. That may be true, but there are a lot of people in this country who seem to have set their heads on the notion that they are not going to increase production. The thing we must do is to get behind those fellows, and show them the public is sympathetic to them and help them in their stand to increase production, even if someone else does everything he can to get them to decrease production. When we all work together, we will get close enough together so that we shall be able to remove the fellow we have no use for in free America. We will be able to determine who this fellow is who doesn't want to be an American, and we will be able to handle him sanely in time of peace without waiting to handle him expeditiously in time of war." (Applause.)

On motion of Mr. Metcalf, of Illinois, a vote of thanks was extended to the speaker.

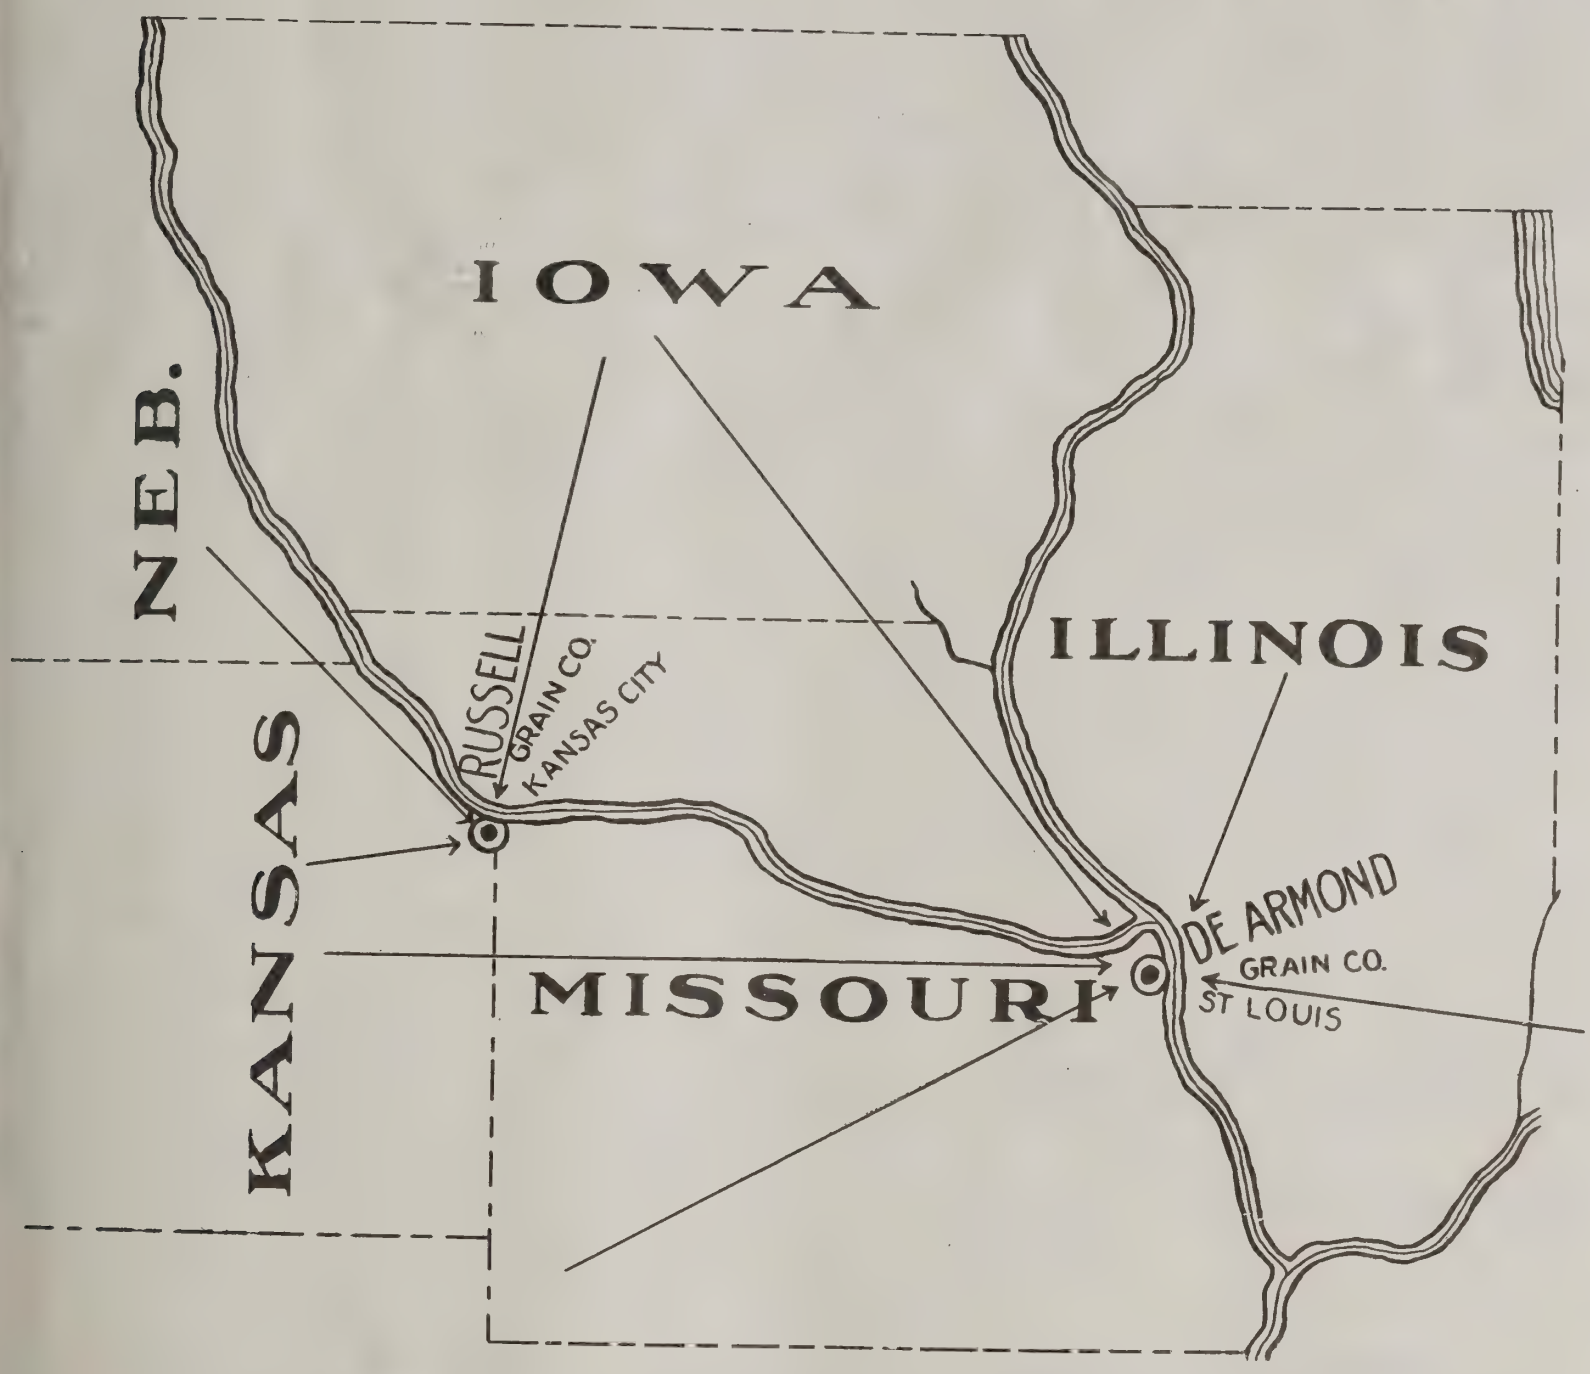
The next address was by Chas. F. Curtiss, of Iowa State College, on "Improved Methods of Grain Production."

Report on Trade Rules.

The report of the Trade Rules Committee was made by F. E. WATKINS, chairman. Mr. Watkins said that the uniform confirmation blank had been the subject of a joint conference between Adolph Kempner, representing the Council of Grain Exchanges, Mr. Steinhart for the farmers' companies, and Mr. Watkins for the Association. T found many forms in use, and n who never used any form at all. form proposed by Mr. Kempner for grain exchanges was recommende the exchanges and approved by Chi St. Louis, Indianapolis, Cleveland, ledo, Baltimore and Peoria and P delphia tentatively; rejected by exchanges, including Kansas City, neapolis, Milwaukee, New Orl Omaha, etc., and not acted upon by affiliated association or the Tern Elevator Ass'n.

As to the trade rules of the Ass tion, there have been many request interpretations but suprisingly criticisms. Mr. Watkins said:

"The marvel is that our rules d ply so exactly and universally to conduct of the grain business, and if they are constantly held in mind observed, a large percentage of th necessary misunderstandings and agreements in the trade are avo While the work of the Arbitration Trade Rules Committees is increasi our membership grows, the compara ly small number of transactions w find their way into litigation or ar tion is infinitesimal, compared wit total transactions which are comp without difficulty. To expedite the of our Arbitration and Trade Committees, we recommend that se consideration be given to the matt publishing all arbitration decisions dered to date (with provision for f decisions in book form, with sp attention to thorough indexing. members of these committees are g generously of their time to the ass tion and they should have all assis possible in their work. Beyond this sideration, however, appears the to all of us, of such a compilatio precedents, supplementing and illum ing our trade rules, and assisting avoid the rough and thorny places i conduct of our business."



The committee recommended th lowing amendments to existing Note—The words in CAPITALS in ing the proposed changes:

Rule 10. Sample Grain:—It shall b duty of the seller of grain by samp furnish grain fully up to sample. WORD "SAMPLE" USED IN THIS NECTION SHALL MEAN A POR OF THE SHIPMENT, OR OF THE FROM WHICH SHIPMENT IS T MADE; AND IS PRESUMED TO RE SENT THE IDENTICAL GRAIN SHI OR TO BE SHIPPED. THE W "TYPE SAMPLE" SHALL MEAN PLE OF LIKE CHARACTER BUT NECESSARILY IDENTICAL IN RESPECTS WITH THE GRAIN SHI OR TO BE SHIPPED. Shipments re on account of quality, shall be com with the sale sample, by either the In tion Committee, or some other dul thorized or agreed committee of the ket in which such rejection is made the finding of said committee shall be Should the finding be in favor of the the buyer shall at once notify the by wire, and it shall be the duty o seller to make satisfactory adjustment the buyer within twenty-four hours; expiration of which time, if not adj the shipment shall be subject to the of the seller and it shall be the duty buyer to buy-in, cancel, or extend th faulted contract and notify the seller action. Should the buyer and selle to arrive at a basis for adjustment would enable the buyer to handle grain not up to sample, and should grain be finally rejected, it shall b duty of the seller promptly to reim the buyer to the full amount of mone vanced on such a shipment so rejected

Rule 32. Carload:—A carload shall sist of bushels as follows: Wheat, ( ); shelled corn, MILO MAIZE, KA CORN, AND FETERITA, 1,000 (corn, 700 ( ); rye, 1,000 ( ); b 1,000 ( ); oats, 1,500 ( ); Pro That where rules of carriers lawful file with the Interstate Commerce Co sion or State Railway Commissions p for minimum carload weights in exc the above, such minimum weights constitute a carload within the mean this rule.

Rule 38. Condition Guaranteed Arrival:—WHERE GRAIN IS SOLD CONDITION OR GRADE GUARAN AT DESTINATION IT SHALL BE DUTY OF THE BUYER TO ASCER BY INSPECTION OR OTHERWISE CONDITION OR GRADE OF THE G WITHIN FORTY-EIGHT HOURS ARRIVAL AT DESTINATION. IN THE BUYER FAILS TO ASCER THE GRADE OR CONDITION, AS VIDED ABOVE, HE SHALL WAIV RIGHTS UNDER THE GUARAN THE CONTRACT. DIVERSION OF SHIPMENT BY THE BUYER TO POINT BEYOND THE BILLED DES TION SHALL CONSTITUTE AN

SHIP EITHER WAY

CORN and OATS SHIPMENTS

Rule 39, Exchange and Collection Charges:—IT SHALL BE THE DUTY OF THE BUYER TO PAY EXCHANGE AND COLLECTION CHARGES ON DRAFTS, WHEN THE TRANSACTION IS MADE "TRACK POINT OF SHIPMENT." IT SHALL BE THE DUTY OF THE SELLER TO PAY SUCH CHARGES IN ALL OTHER CASES.

On motion of Mr. Scott, of Kansas, the association voted to retain the present form of confirmation of sale and purchase without change.

On motion of Mr. Green Rule 10 as amended by the committee was adopted.

Rule 32 was also adopted, the carload figures being those printed in the text.

Rule 38 was also adopted as amended by the committees, as was also Rule 39, the latter with the further amendment by Mr. Scott:

The inherent right of the seller to collect his drafts through the bank of his choice cannot be questioned.

And also with the word "domestic" inserted preceding the word "grafts."

The session was then adjourned.

THE BANQUET SESSION.

The banquet session was held at the Missouri Athletic Club, and was a splendid entertainment in every way. President ANDREWS of the Merchants' Exchange, presided, and when the cigars had been served, he introduced as toastmaster that "most unmitigated monumental story teller of the world" (great laughter), JOHN L. MESSMORE, who received an uproarious welcome. It is rank cheating of the reader to suppress his multitudinous and inimitable stories, but space here is limited. As the first speaker, Mr. Messmore introduced GOV. DAVID R. FRANCIS, a member of Mr. Cleveland's second cabinet, a governor of Missouri, and Mr. Wilson's ambassador to Russia during the war, as well as a man who, when a trader in St. Louis, conducted one of the largest grain and commission businesses in the West, the business which he founded being still a member of the Merchants' Exchange.

Mr. Francis also proved to be a story teller of skill and experience. He congratulated grain dealers on their sincere patriotism during the war. "I am proud of being a grain man," he said. "I am especially proud to be one of your comrades, because I do not know any class of men in this country whose business has been interfered with to the extent that yours has been (applause), and those of you who did not enlist deserve credit for your contribution to the success of America and our Allies. You didn't complain, nothwithstanding your business was interrupted. You always bore a cheerful countenance. I remember thinking of you when I was in Russia. I said: 'The grain men of the United States are undergoing severe hardship; they are confronted by great difficulties, but they will surmount them.' And I am proud to say that you did surmount them. Every other class of business in this country that was interfered with—and none was interfered with as yours was—has had the restrictions removed. Even the army has been demobilized. But the grain men of the country have restrictions placed upon them, and they are not complaining. That is true patriotism. Show me a man in the grain business, and I will show you a good citizen. (Applause.)

"You have not only borne your restrictions without complaint, but a man who distributes the grain of the country, which is the food of life, is entitled to as much credit as he who grows the grain. (Applause.)

"I was never so impressed with your work as I was in Russia. That immense country is a great grain producer, as you know. When I was in the exporting grain business, I always watched the Odessa market. But more people have died from famine in that immense country of Russia than the number of Russians slaughtered in the war; and Russia lost more men in the war from death and disease, notwithstanding she withdrew from the struggle before it ended, than did any other country participating in the war. Russia lost over two million men in that contest. But the people who have starved to death in Russia since the Bolshevists came into control of the government two years ago will exceed two million souls.

"To what is this attributed? To Bolshevism? Nay, that is not all. That is only a part of the crime the Bolsheviki have been guilty of. The Bolshevists withdrew Russia from this war one year before it ended, and thereby caused the killing of at least 400,000 men of the British, French, Italian and American armies, more than would have been killed if Russia had lived up to her obligations to her Allies.

"I went to Russia under the Imperial Government there and served as American ambassador eleven or twelve months at the imperial court. The abdication of the emperor brought the provisional government into power. I recommended to my Government the recognition of that provisional government; and I was the first ambassador to recognize it, notwithstanding France, Great Britain and Italy were the allies of the Russian government and had ambassadors in Petrograd. I recognized the provisional government on the 22d of March 1917. The provisional government was in the saddle about eight months. One of its first acts was to issue a decree pardoning all political offenders. Prison doors were thrown open, and not only the political prisoners but the criminals were let loose on society. Exiles came trooping back from Siberia and the foreign countries where they had resided for years.

"The most distinguished exiles that returned to Russia, the most contemptible and base, were Lenine and Trotzky. Lenine had been in Switzerland for a number of years. He was driven out of Germany because of his extreme socialistic doctrines. He took refuge in Switzerland, whence he continued to write radical doctrines which advocated the overturning of every organized ernment on the earth. But Gern made an alliance with Lenine. Le returned to Russia through Gern two or three weeks after the March revolution. He came through Gern in a special car. He was given the tinguished consideration of a promi member of the nobility. Upon his ar in Russia he immediately began to burse money. He had led an impe ous existence in Switzerland; upo arrival in Petrograd he immedi sought to undermine the provis government and to demoralize the a

"The provisional government ha sued a decree or proclamation t Russian people stating that it po to prosecute the war to a successfu mination, and to fulfill all of Ru obligations to her allies. We came the war fifteen days after I recog as the American ambassador, this visional government of Russia. W ognized it on the 22d of March 1917 by resolution of Congress fifteen later, we declared a state of wa isted between our Government an German government. . . .

"Trotzky is an adventurer. He on the East Side in New York when the war broke out, and cont there until the March revolutio 1917. After this general pardon e ed by the provisional government turned to Russia. He was taken the steamer at Halifax, but was rel after two weeks' detention, and th lease, I have since learned, was ef by the American Government on t tition or appeal of two or three known American citizens, among was Lincoln Steffens, who subseq went to Petrograd with William C litt, and reported that the sovie ernment should be recognized b government and our Allies in the

"I was astounded on returni America to find such ignorance p ing concerning the soviet govern I learned soon after arriving i country, after an absence of three

Russia produces ent of the oats grown on the d 14 per cent of the rye; but nly produces 1.8 per cent of the l corn, as you know, is 28 plus of the entire grain of the world. roduced this immense quantity notwithstanding their agricul- lements were crude and primi- notwithstanding only 5 per cent area was under cultivation.

magnificent country has vast . Lumber within two decades me the main source of supply mber of the world. In 1917 we $240,000,000 worth of lumber n we exported. Russia with ense area and her 180,000,000 s only 46,000 miles of railroad, have 261,000 miles. I do not Russia ever prosecuted the war sfully as she did while she was n it.

I learned in Petrograd in April 1916 that she had called 16,600,000 men to the colors, I was astounded; and she issued a call shortly afterward calling two and a half million more men to the colors, eighteen million men, the greatest army in history. They marched up to fortified places and attacked well-equipped German troops, sometimes without arms. An American, Dr. Hurd, who had gone to Russia early in the war, and before we entered, told me he saw a brigade ordered into action with only one gun for every two men, and the man without the gun was ordered, if he survived the man with the gun, to take that gun and go forward.

"Notwithstanding this scarcity of arms and munitions, the Russians obeyed oders and went to slaughter. Are you surprised that these men, who had been engaged in war over three years, listened to Lenine and Trotzky when they held out false hopes to them, made misrepresentations to these soldiers that if they would return to their homes they would be given land and peace and luxury and would even have the property of the rich men divided among them?

"Now what is the remedy for this condition? If it is not remedied, Germany, which understands Russia better than any other people or country or government on the globe, will utilize the immense resources of this great Russia, and organize its man power, so that Germany will be as strong ten years from now as at the beginning of this war.

"We could have saved our face before the armistice was signed. I do not say that I recommended it, because that would be undiplomatic (laughter), and would violate the rules of the Department, and I do not say it (laughter). But if any single country except America were to send in its soldiers now, after the armistice has been signed and after the peace has been negotiated, it would only have the effect of strengthening the Bolshevik rule in Russia, because the motives of every European government are suspected by the Russians, who are very jealous of the integrity of their great country. I see no remedy for this situation other than the adoption of a league of nations (applause). We went into the war to end all wars. We owe it to our dead who lie in Flanders fields that there shall be no more war. We owe it to the world. We owe it to the living. Another such war as we have gone through would decimate all peoples who engaged therein, and if the survivors had not lost faith and hope and spirit, they would have to organize a new civilization on the remnants of the old. I am told by those who should know that if this war had lasted six months longer there would not have been a city in Austria or Germany with over 100,000 people. Science has made such progress in discovering elements of destruction that the propagation of the human race has not been able to keep pace with it."

Mr. Francis said also that Russia "will come back," and if we give her aid now, we will make her our friend again as her imperial government was in the past.

Governor Goodrich of Indiana.

Toastmaster Messmore then introduced in characteristic way Gov. Goodrich of Indiana, a man who in the present strike trouble has been "a governor equal to the occasion." The whole "Country owes a debt of gratitude to Indiana's executive." After making felicitous reply to the nice things said of Indiana and of himself, Gov. Goodrich continued:

"We have just passed through the greatest war in history—a war that has affected the entire world and shaken to its depths the foundation of our civilization. This, gentlemen, is a most critical period in the history of our Republic.

"The institutions of our allies in Europe are being challenged today as never before. France is facing the future with an appalling burden of debt and without so far having taken a single step to pay even the interest upon her vast obligations. It appears that, on account of the unrest among her citizens, she fears to impose the burden necessary to save her from bankruptcy. England is now grappling with the labor organizations of the Empire. The railroad strike has just ended, but the demand for the nationalization of her mines and means of communication and transportation is still insistent.

"The situation in this country is not without danger, yet I am certain we in America can meet the challenge and safely weather the storm. I have faith in the broad mind and big heart of the average American. In his heart there is a spark of justice which, though dimmed from time to time by the shadows of events, will, when the call for Americanism comes, leap into flame and destroy the insidious forces of selfishness and greed that seek to dominate American life. I am ecouraged in my present confidence by the compelling facts of history. America has already to her credit two complete victories over classes that sought to pervert the purpose of her existence.

THE FIGHT AGAINST PRIVILEGE.

"In the middle of the nineteenth century, America disposed effectively of its first great problem of class control. A great and powerful class in the South, in the pursuit of its own selfish interests, sought to control the Government in behalf of human slavery and to fasten the yoke of this sinister control upon the entire nation. Americanism was equal to the challenge and on the battlefield destroyed the first great menace of class control.

"In the closing quarter of the last century, the tide of American population had reached the Pacific, the frontier had disappeared and the magnificent body of free land, which invited our people to the Far West and afforded an outlet to industrial pressure and social discontent, was occupied. Our rapidly growing population, swelled by millions of emigrants, began to press back upon us.

"With the growth of population came the national development of our extensive system of railroads, the most efficient in the world, and the growth of the great industrial corporations and the trusts. These corporations had performed a great service. Without them our rapid development would have been impossible. Drunk with power, made arrogant by the success they had achieved, there soon developed a disregard of the public welfare, a sort of 'public-be-damned' policy. The trusts insisted that the property was theirs and they had a right to do with it as they pleased. They stood definantly for a policy of unrestrained individualism. Trusts and combinations grew in numbers and influence. Using their control of railroads through rebates and unfair practices they often crushed competition and openly asserted that the chief purpose of Government was to protect their business.

"It became apparent that if the corporations and trusts were to be permitted to go on without restraint, they speedily

would control the whole country and dictate its policy; our Government would degenerate into one dominated wholly by a particular class. The public mind became inflamed against them. The anti-rebate law, the Sherman anti-trust law, the law creating the Interstate Commerce Commission and many other restrictive measures were enacted to curb the abused power of the corporations and make impossible the domination of the Republic by the capitalistic class.

THE RESULT.

"That the pendulum swung too far in the direction of control is now apparent. The severe restrictions applied to our transportation companies stifled the development of our railroads and led naturally to the breakdown just before we entered the world war. The American people must pay for that breakdown in the billions of dollars irretrievably lost and in the prodigious inefficiency and failure of Government operation. It is not too great a price to pay, if it rids us forever of the dangers of Government ownership and operation.

"The application of the Sherman anti-trust law, while it dissolved some of the trusts and may have prevented the formation of others, failed to accomplish its intended purpose. Our people soon discovered that a corporation should not be judged by mere size; that it is neither good nor bad by reason of its size, but by reason of the manner in which it conducts its business. These defects, however, were merely incidental to the great conflict. The battle had been won. America had determined that the part is not greater than the whole; that the country would not be dominated by the capitalistic class.

THE FIGHT AGAINST CLASS.

"That conflict is behind us. We are now engaged in a conflict just as dangerous to the Republic and upon the outcome of which depends, in a large measure, the future of our country. While the present issue has been precipitated by the world war, it appeared as a cloud no bigger than a man's hand at the beginning of this century. It was seen first in the enactment of laws made to apply to a particular class of our people. Given acts were made unlawful if done by one class and lawful if done by another. Law, thereupon, ceased to be a fixed rule of conduct prescribing what was right and prohibiting what was wrong, but the rightness or wrongness was to depend wholly upon the class or group responsible for it.

"The cloud first appeared ominous in the passage of the Adamson law. The actual facts surrounding the enactment of this law were clouded by political considerations, and it has been difficult to unravel the truth because of conflicting assertions and claims. A. B. Garretson, president of the Order of Railway Conductors at the time of the enactment of this law, in his testimony before the congressional committee recently, undertook to clear up the situation. What he said, in this connection, is important, and I quote from his testimony before the committee: 'The point I want to make,' said Mr. Garretson, 'is that the four brotherhoods, in being forced on to Congress regarding the passage of the eight-hour act, were unwilling participants. Only the influence, the power and the personal prestige of the President of the United States ever got us there. We came there on his demand that we should come there for adjudication of the question that we desired to settle by our own methods. But, out of regard for the interest that the President had shown and respect for the position which he held, and our respect for the office of Chief Magistrate, we accepted his request to transfer the matter in controversy to the halls of Congress. No living senator or representative ever heard a demand from one representative of the four Brotherhoods as to what they should do.' If this is true, and I have no doubt it is, the responsibility for this piece of class legislation attaches directly to the President of the United States.

ADAMSON ACT.

"As a matter of fact, the Adamson law was supplanted by an agreement between the Railroad General Managers' Ass'n and the workers' organizations interested, pending the determination of the constitutionality of the law, and though the law has since been declared constitutional by a divided vote, the men have been, and are today, working under this agreement reached before the constitutionality of the law was determined.

"I believed then that the passage of the Adamson act involving the surrender by the Railroad Brotherhoods of the principle of collective bargaining for legislative wage fixing ultimately would lead to their own ruin. I believed this because it involved a transfer from the wage determining machinery of the labor organizations to the halls of Congress of the very functions for which the organizations were created in the first place, thereby destroying their most vital and fundamental principle. I have never changed my opinion. But it is the effect of the legislation on the country of which I am now thinking.

"Some months ago the Plumb plan bill providing for thinly disguised government ownership and operation of railroads was introduced in Congress. It was the first step, some of its advocates said, toward the nationalization of railroads, coal mines and other productive industries. There was a threat expressed or implied from at least a part of the forces behind the bill of a nation-wide strike if something were not done immediately to increase wages or reduce the cost of living and it was asserted that the adoption of the Plumb plan would be accepted as an alternative. The country, however, had had about enough of Government operation and anything that approached it seemed too big a price to pay. As it stands now, while the radical leaders of the brotherhoods most earnestly advocate the Plumb plan, it is unsupported by any vote of the membership which is represented as favoring it, neither has it received the endorsement of any convention of the membership. Even were this true, I am convinced that a powerful minority, at least, of the railroad workers are bitterly opposed to it. Fortunately, Congress shows a disposition to deny the arrogant demand, unless after full debate and investigation the public interest requires the enactment of the law.

POLICE STRIKE.

"Lately there has been an attempt to organize the police and firemen of the country and thus divide the allegiance of those who are pledged to enforce law and protect property. Some of their leaders have said very generously that they would not call out the police in a sympathetic strike, thus substituting for allegiance to the public and loyalty to their sworn duty the will of a particular class of citizens. We can draw courage from the fact that these attempts have been successfully resisted.

SOCIALIZING INDUSTRY.

"The steel strike is now on. The question here has appeared to be whether the steel industry shall be conducted as an open or closed shop. The real purpose of Foster and Fitzpatrick has no serious concern with the open or closed shop, wages or working conditions. Their ultimate object, as shown by their declarations, is the seizure of this great basic industry and the organization of its control as a soviet unit of production. A large majority of the strikers, of foreign birth particularly, are concerned only with the seizure of the industry and care little about anything else.

"T. J. Vind, general organizer for the American Federation of Labor, says, 'the strike won't stop until the steel workers become the lawmakers at Washington.' The New York *Call* (Socialist) says, 'If this fight is won, no other industry will remain strong enough to make war on the trade union movement.' Foster and Fitzpatrick assert, 'We are going to socialize the basic industries of the United States,' and 'this is the beginning of the fight,' while the same purpose is shown in the New York printers' strike. 'We want the print shops for the printers,' they say. 'It is the historic mission of the working class to do away with capitalism. The working class and the employing class have nothing in common.'

"The leader of the printers' strike, James G. Bagley, is openly and frankly against our form of Government and stands for the control of all industries and the Government by the working classes. He looks forward to the day 'when the present system of private ownership will be driven from the field and the absolute dictation by the workers of all the terms of production substituted.'

"I do not believe the trade union organizations ever were intended as instruments of threats or violence. They were conceived and set in motion to improve the condition of their membership by peaceable and orderly processes in conference with organized employers where as reasonable and reasoning beings, concessions on both sides would control their mutual deliberations.

"In any contest between employers and employes there is concerned a third party—the hundred million American people—who, as consumers, are affected by the outcome of the game and who have a right to sit in it. The outcome of the game does not concern the employer so much as we might suppose, because whatever increased wage he pays will be added to the price of the product and passed on to the consumer. The butcher, the baker and the candlestick maker will all get their bit and in the end the consumer alone must settle.

"I concede the right of the worker to organize, bargain collectively and in every legitimate and patriotic way to advance the interest of his class, just as I concede to every worker the right not to belong to an organization if he so elects. But it is clearly apparent for the time being that the organized workers in many lines of industry in America have fallen under the control of radicals like Foster and Fitzpatrick, while Gompers and some others of the conservative type are no longer able to control its policies. The influence of these radicals in America has been materially widened by the encouragement that has come in numerous ways from the administration at Washington, but conspicuously in turning loose upon us the intemperate ideas and philosophy of foreign agitators. Foster, Fitzpatrick and their group are openly and frankly direct actionists and if they win their fight, the American Federation of Labor, with all its vast power, will pass under their absolute control.

"These radicals would nationalize railroads and coal mines first and then all the other instruments of production. They would bring this nation of ours under the domination of the class to which they belong. They would substitute for private ownership and individual initiative communal ownership and operation and thus reduce man to a dull instrument of production and dry up the impulses of his ambition. Just as we fought the domination of the slave oligarchy in the middle of the nineteenth century and the capitalistic class in the latter part of the nineteenth century, so must we fight the domination of this other class in the early part of the twentieth century.

VICTORY IS VITAL.

"A victory for America in this struggle is vital to every citizen of the Republic. I am glad to say that the solid, capable workingman in this country is still American to the core, is still a bulwark of the Republic, a believer in our ideals and our institutions. Much of the agitation and unrest of today is due to foreign influence and foreign leadership. This influence must be nullified and this leadership eliminated. There should be no red tape in dealing with foreign agitators who are entirely out of sympathy with American thought, who take advantage of our liberty only for the purpose of destroying us. Their place is not here,' a they can not become America spirit as well as in name they s immediately be sent back from w they came.

"There is no more dangerous operating among us today tha class-minded man, whether he is borer, capitalist or farmer—th who demands a privilege for his at the expense of the American While conceding to every man the to work for the legitimate inter the group to which he belongs, th who would subject the national li all of its interest to the will group is an unrighteous and a di citizen. He is unrighteous beca would substitute selfish aggra ment for fixed principles of justic is disloyal because he denies hi giance to his country and gives the particular class to which longs and beyond which his n vision and perverted purpose d reach.

THE INTERMEDIATE MILLIONS.

"What of the great unorganize defenseless masses of Amer What of the 'intermediate milli clerks, ministers, teachers, new writers, small business men, hands, unorganized laborers in tries, office help, stenographers a multitude of segregated and u workers? Upon these toilers wi the burden of sustaining the which, by threat and force, exact selfish demands. But the secretary and this committee shall examine into each case and report their recommendations to the Board of Directors."

(3) Change Sec. 1, of Art. 6, of the Arbitration Rules, to read as follows: Before a case can be submitted to a national committee both parties shall file with the national secretary an agreement in writing to abide by the award of the committee and release the members of said committee from all responsibility for any errors in judgment that may occur in any respect whatsoever, and from the damage or loss resulting from their acts. The agreement shall be accompanied by the arbitration deposit fees of both parties of $25.00 each. This is to apply to all parties, namely, direct, affiliated members, no-members and affiliated association or board of trade."

These recommendations were adopted.

Mr. Barnes Addresses the Convention.

At this point Julius Barnes, Wheat Director, appeared, and was immediately introduced to the convention. Expressing the pleasure at being with the Association for the third time, and saying that as some things he might say would remain in the record, he would read his address from the manuscript, substantially as follows:

"I did not believe in the guarantee price for wheat by law. Neither the advice of Mr. Hoover nor myself was asked when Congress, in its wisdom, decided on that guaranty as a national assurance of production. I believe there are more flexible and more natural means of production stimulation. But the pledge, once given to our producers, must be carried out without question, and as good citizens, responding to the express request of the President, the gentlemen associated with me in the Grain Corporation and myself have, greatly against our inclination, assumed another year of public service.

"I do not need to tell you that the entire atmosphere in which we must administer the functions of this office has altered for the worse. The war motive to sacrifice has gone. Resentment against restrictions justified only by war conditions, might easily increase to violent opposition. It is a pleasure to me to bear testimony that to a large extent and with few exceptions the same coöperative spirit is manifest today as in the days when every restriction and every limitation was cheerfully observed in the prosecution of a righteous war.

"As good citizens, you will approve, I know, our determination that, having accepted service, we shall play our part to the best of our experience and ability and, as good citizens, you will respond for such call as we shall find necessary to make upon you. No one recognizes more clearly than myself the evil effect of the injection of Government control into business after the war. No one recognizes more clearly than myself the necessity of patient study and examination, of thoughtful and well-considered action, that, under these conditions, we shall cause as little distress as possible.

"No single agency, Governmental or otherwise, of Nation-wide scope and necessarily therefore of right structure, can without a measure of injustice and consequent distress or loss fix an exact and undeviating relation of markets, of sections, of grades, and of qualities. It can minimize those evils and can by policies that permit the widest and most flexible play of competitive individual judgment, secure the nearest approach to the free trading which best serves the public interest. when war's exigencies have passed.

"I am convinced that, at the earliest possible date, the injection of rigid Government interference into a great trade should be terminated. At the earliest possible date the broken and disused trade connections should be encouraged to reknit. At the earliest possible date the facilities that, when the Grain Corporation is withdrawn, must carry a great marketing movement, should be taught to function.

"Studying this question from a Nation-wide responsibility, recognizing the far-reaching influence of any deviations from uniform principles and policies, it is not always easy to ascertain the exact time nor the proper steps which lead to this desired functioning of private trade in place of Governmental. The trades should have this in mind, however, and their policies should be framed with full knowledge that such restriction as, for instance, the import and export embargo, existent for the past two years, should be withdrawn at the earliest practicable moment and possibly necessarily without other advance notice than can thus be given.

"The fabric of international trade has suffered many shocks, almost fatal in their effects. The importing trades in no country abroad are yet capable of carrying the burden of overseas imports in the great volume of a nation's need and under the strain of high price levels whose partial collapse, for any reason, would destroy private resources. They must be helped and strengthened by the strong arm of those Governments. Probably long after our exporting trades are prepared to resume their functions, the foreign importing trades will still be unable to stand, unsupported, for their full duty. Meantime, it has been our conception that we should serve the public by placing before them the exact information which comes to this office. The weekly reports of 7,000 millers and 17,000 dealers furnish more accurate trade information than has ever been possible and this is placed, weekly, through the public press, for the guidance of every interested citizen.

"For the first time in the age-long dispute between buyer and producer we have by contract with the millers and dealers set up a simple arbitration machinery for the settlement of disputes as to grades, dockages, or prices. We have made it possible for the aggrieved producer, by the expenditure of a 2-cent postage stamp, to submit his cause for arbitration to the disinterested Grain Corporation officers and the dealer has by contract bound himself to abide by such decision. I recognize that much of this crop has sold at prices above the guarantee basis, and we have no duty to pass upon any price except that it must be fairly representative of not less than the guarantee basis; yet it is, I think, gratifying evidence that the great majority of the grain trades desire to deal fairly and justly that out of four and one-half million wagonloads of wheat marketed, to date, we have had this appeal on less than 300 cases.

"In another direction also we have placed within reach of the grain trades the very excellent investigation work of the Department of Agriculture as to the cause of grain dust and mill explosions. There is a remarkable story here. From September, 1917, to May, 1919, during two years of extra war hazards, when underwriters required extra lights, guards, barbed wire fences; when the Grain Corporation had enormous values at stake, at one time as high as $360,000,000.00, the record stands that the Grain Corporation lost not a dollar by fire. I attribute the reason for this remarkable showing largely to the system of card pledges, signed to the extent of 45,000 by the employes of these warehouses and mills, pledging themselves to observe the few simple rules that spell security and to see that their fellow workers did the same. I am confirmed in putting this emphasis on the practical worth of that moral obligation by the fact that with the relaxing of this war pledge began a series of disastrous explosions, occasioning loss of life and property. We are maintaining at considerable expense the field work of experienced men in investigating and advising elevators, warehouses and mills, and, while we have no authority to enforce their recommendations, it is inconceivable that this valuable service should not be used by the trades and safety secured. I mention these particular phases of our activities, for I wish to impress upon you that we desire to be helpful and sympathetic, even while we discharge with fidelity the obligations of our office.

"You have a right to weigh the results of two years of food control of Food Administration policies in this country and to see whether in their contact with the various sections of our people and the various industries they have been sound and helpful. During the war period, for instance, making effective the fair price between producer and consumer recommended by the President's Independent Price Commission, it is now a matter of history that that 'fair price' was a stabilized price.

"It is not yet generally appreciated that the effective maximum price control was the right to requisition for purposes of common defense and that with the armistice the motive of common defense was eliminated and maximum price control vanished. But the record stands that during the actual war the price was stabilized. Who shall say how much of the concentrated war prosecution energy of our people was released in other directions by the assurance that the staple foods were fairly controlled in the interest of all our people? That 'fair price,' stabilized as it was, was also an attractive and stimulative price to the grower, as

shown best by the extraordinary wheat acreage increase.

PRODUCTION AND PRICE.

"The Food Administrator and his assistants never lost sight of the importance of preservation of production. We knew the relative importance of the great basic industry of agriculture. We knew the census of 1910 gave the value of productive farm property in this country at 41 billion dollars, against 18 billion for manufacturing, 17 billion for railways, and four billion for mines and quarries. But we knew also that the annual agricultural yield of six billion dollars in 1910 had increased to ten billions in 1914, and to twenty-one billions in 1918, and that showing indicates the Food Administration, touching that basic industry at many points, was not restrictive or oppressive. Rather, together with the increase in the acreage of the ten principal crops from 297 million acres in 1914 to 326 million acres in 1918, it showed those policies to be stimulative to a high degree. Judging those Food Administrative policies also from the standpoint of the consumer, we find this to be true:

"That in the case of wheat, as compared with 1913, before there was a war influence of any kind, the farm value of wheat increased 166 per cent. The retail price of flour increased 118 per cent; and the retail price of bread increased only 75 per cent.

"Moreover, this same relation is true as to the twenty-two standard foods recorded monthly by the Bureau of Labor statistics and representing the food commodities in general use. The *Labor Review*, of August, 1919, in their monthly tables show that, from June, 1913, to June, 1919, farm products increased 130 per cent; the wholesale price of foods increased 101 per cent; and the retail price of foods increased only 8 per cent.

"Moreover, the healthy condition of the trades engaged in the translation of farm products to ultimate consumer shows that the Food Administration policies, by the very elimination of extra hazards and by the security which those policies afforded, actually reduced the spread between farm and table.

"I lay particular emphasis upon this, the official record, for it is so contrary, as to foods, at least, to the popular impression that there is an increasing toll taken by every handling facility, and particularly the retailer.

PRICE MAKING BY LAW.

"If we are to intelligently correct those undoubted evils that accompany the expanded cost of living we must get the exact and correct data on which to base our remedies.

"I am particularly disturbed to see how general the conception is that price fixing by law can make the necessary corrections. Price fixing, as popularly suggested, has always failed and will always fail. Price and distribution must go always together. Flexible and relative prices have always been the motives which influenced and secured distribution. Trade margins in times of emergency may be perhaps directed and controlled by constituted authority, though always with great care that the trade facilities themselves be not utterly destroyed.

"Price fixing outright has always had certain results, these only: The utter destruction of production, driving out of the market entirely the article on which prices are fixed or the segregation of trade in that article into illegal or illicit channels. I speak thus strongly so that no one shall point to the Grain Corporation as an instance of successful price fixing. For it was not that. The Grain Corporation was a great trader, larger in the magnitude of its transactions than generally appreciated, dominating the market as a legalized monopoly. In two years the Grain Corporation turned over food products to the value of 5½ billion dollars, larger I think than the financial transactions of any American organization, not excepting the Steel Corporation. In those two years it shipped overseas over two billion dollars' worth of food products. It was established as a great agency to stabilize the food prices for our own people and to secure maximum surplus food contribution overseas to our allies. In that conception it tried to so administer these enormous transactions that no profit would attach to these services. I am glad to report to you and to the American people that the profit of about twenty million dollars actually accrued after two years' operation is almost exactly the profit taken on that portion of the business which could be assigned to neutrals. As to neutral business, we had a conception that these neutrals, generally, were selling to us and our Allies their ocean freight carriage at enormous ocean rates which the war necessities of ourselves and our Allies forced, and that in return we had a right to openly demand a national profit in that portion of our business which we could, in justice, allot to them at all.

"I submit to the approval of good Americans the soundness of both of those policies, namely: A profit on neutral business, and no profit whatever on the resales to our Allies and to our own people. So far as is humanly possible in the complexity and magnitude of its operations, the Grain Corporation has been able to adhere to both.

"I have made clear that the Grain Corporation was not a price fixing agency in the sense of fixing prices by law for others to trade upon. Much the same explanation attaches to the other foods stabilized by the Food Administration. The Sugar Equalization Board bought the entire crop of the Island of Cuba, arranged by agreement for a refining bargain upon that raw sugar and for the reflection of its own purchase price through the various trade facilities by license regulation prescribing handling charges, and not prices. Rice and oils were stabilized by great trade agreements with producers, refiners and handlers, and not by price edict.

"Again and again, for the past few months, I felt it my duty as Wheat Director, with adequate supplies of wheat at home, to press upon our people the fact that they had at hand the means of an immediate reduction in the household budget. I have pointed out that our flour consumption for the past year sank to 171 pounds per capita, against a pre-war normal of 235 pounds. I have emphasized that the mere restoration of flour consumption to the normal would save one billion dollars per year. And I am glad to say that I see every evidence that this truth is being appreciated, and acted upon.

"Since the beginning of this crop year, and to date, the flour consumption of this country has exceeded the similar period a year ago by five million barrels, and it is probable that the bulk of this represents an increase in domestic consumption. The increase to this extent of the cheaper wheat flour, and the displacement of higher priced foods thereby, would cumulatively increase that relief by the reduction in price on these other foods which would follow their lessened use. The fall in the price of such foods as has taken place in the last sixty days also would seem to again confirm that the American household, with its usual common sense, is helping to solve its own problems.

LOWERING THE PRICE OF WHEAT.

"I want here to speak about that particular phase of the Wheat Director's responsibilities which has probably been most in your minds, and that is the question of a resale price of wheat lower than the guarantee basis. Pressure on this office since the legislation of last March has been so continuous and severe that we should announce a resale reduced price of wheat and assess the difference on the National Treasury. The legislation passed by Congress to make the guarantee effective included the extension of war powers and the extraordinary appropriation of one billion dollars. It was assumed at that time that our whole problem was the purchase of an enormous crop of wheat at the guarantee price in the protection of the producer's pledge, and that the resale policy of such accumulation could be directed effectively by the National Agency.

"I think I may claim that the authority in the Act and the Appropriation were both on my recommendation. I conceived that the national agency had not only the obligation to make the guarantee good to the producer but also an obligation that the consumer should be able to buy his flour and bread at such price, as nearly as possible, representing a price uninfluenced by the guarantee. If it had developed that the world price of wheat was clearly below the guarantee, then the Wheat Director would, in making the guarantee effective, have secured most of this crop of wheat and would have directed its resale to our consumers at that world price, charging the loss to the National Treasury as the liquidation of a war contract. But when it became apparent through crop losses that the world price was clearly not less than the guarantee basis, then that rightful obligation to the consumer vanished. When it became further apparent that buyers in this country other than the Grain Corporation were willing to absorb the producers' wheat at above the guarantee basis and the national agency therefore could not purchase, then legislation, made on the assumption of securing the crop solely by purchase, became totally ineffective. There is, today, no effective control of the maximum price of wheat except the natural pressure of the crop and that pressure has not been severe enough for all wheat, or even the bulk of the wheat to land in the hands of the Grain Corporation. An effort today to name a resale price of wheat would be probably ineffective. If, as was desired months ago, a declaration had then been made by the Wheat Director establishing a definite resale price of wheat, the futility of it would have, today, made that office a laughing stock.

"I lay this down as a general economic principle, corroborated by the experience of Britain, France and Italy, who have tried the contrary, that when the price of a commodity is artificially and arbitrarily based, that commodity thereby loses immediately its natural influence on other commodities and the relation is definitely broken. The price of bread maintained abroad artificially low, at great expense to their national treasuries, has had no influence whatever on the prices of related foods which have soared to new heights, perhaps even exaggerated by the very artificial cheapness which was expected to sympathetically affect them. Believing as I do in the far-reaching and disastrous effect which such artificiality would have on production and distribution, I do not believe any man in this country should have the right to name an arbitrary and artificial price on one of the staple foods. The moment you eliminate as the measure of value the supply-and-demand factor, ascertained as accurately as possible, then you have entered the realm of pure theory and dangerous practice. If $1.50 is in the public interest as the price of wheat, would it not be increasingly in the public interest to make it even lower, say $1.00? And if $1.00 is a great social boon, would it not be better to give wheat away, entirely? You can see the absurdity of such reasoning—you can appreciate the menace to the sturdy self-respect of our people.

MENACE TO PRODUCTION.

"More dangerous is the constant menace to production. No matter how completely the guarantee is made effective for the present crop, the producer of wheat, having before his eyes the lower consumptive level of the product of his wheat, could not but be affected in his production plans. Abroad, artificially depressed bread has been met by artificially inflated wheat guaranties until the vicious circle is choking the economic life of those countries. In all conscience I could not consent that this should be fastened round the throat of America. The way to [illegible] and lasting relief lies solely th[illegible] adequate production. This is beg[illegible] to be so generally recognized a[illegible] generally expressed that there i[illegible] ger its vital meaning be lost by r[illegible] tion. Adequate production, a[illegible] tural and industrial, will solv[illegible] problems as nothing else can d[illegible] until our people learn the truth o[illegible] there will be much distress and [illegible] unrest.

"I picture it to myself this wa[illegible] perhaps this illustration will he[illegible] to get a clearer comprehension o[illegible] it means. If there were a self-cor[illegible] community of ten men, producin[illegible] consuming for that self-containe[illegible] and if by reason of shirking [illegible] other cause, the production shr[illegible] nine articles of general use, wou[illegible] not be the result: That on the [illegible] some there would be an effort t[illegible] provide their own requirement[illegible] the part of others, to anticipat[illegible] profit the shortage that would [illegible] develop. On the part of othe[illegible] alarm that they may not be p[illegible] and an attempt to protect the[illegible] by payment of premiums bef[illegible] certain exhaustion of supply, an[illegible] not all these factors cumulativ[illegible] crease the price, inviting all ma[illegible] speculation in anticipation of th[illegible] increase? If, on the other han[illegible] ten men produced eleven articles[illegible] the result not be such ease of m[illegible] reassurance of adequate protec[illegible] consumers' needs that there w[illegible] naturally set up the orderly a[illegible] mal marketing process, and i[illegible] undue burden?

"Now, you may multiply th[illegible] men by ten million, and mult[illegible] simple articles of such a sm[illegible] munity into the thousands of [illegible] articles that such a vast cor[illegible] must use, and, consciously or [illegible] sciously, by indirect influenc[illegible] direct purposeful planning, th[illegible] would be the same. Thus to[illegible] result of inadequate production [illegible] lines is the root of many of o[illegible] There is a vacuum here and a[illegible] many of the real needs of civi[illegible] istence. This vacuum results [illegible] partial starvation of commod[illegible] kets by diversion of productio[illegible] during years of war. To overc[illegible] vacuum and restore the norm[illegible] and normal processes of life r[illegible] intensity of effort on the pa[illegible] workers, whether of head or [illegible] No man has a right today to [illegible] part in reinstating the balance[illegible] except for the most vital of gi[illegible] Industrial relations never seer[illegible] difficult of proper solution th[illegible] but they will be solved with e[illegible] sanity and common sense and[illegible] that has marked two thousand[illegible] real progress in human righ[illegible] important, however, that in e[illegible] this solution, in the false s[illegible] wrong methods that may first e[illegible] there should be laid no found[illegible] future strife and bitterness if[illegible] be avoided.

"I lay especial emphasis or[illegible] I am reminded that less than s[illegible] ago, in this city, there was h[illegible] vention of the Chamber of C[illegible] under radically different indus[illegible] economic conditions than ex[illegible] I recall that, with a broad visi[illegible] obligations of employers as s[illegible] zens, that convention expres[illegible] in no uncertain terms and in [illegible] that met widespread approv[illegible] upon employers, everywhere, [illegible] tate the re-absorption of th[illegible] soldiers into industry. Six m[illegible] every American agency was [illegible] the task of readapting indus[illegible] war production to the ordina[illegible] commerce in such a manner [illegible] should be full employment f[illegible] released from service. Only [illegible] ago the War Department offic[illegible] that, of the four million m[illegible] from service, less than four[illegible] were still unplaced in indust[illegible] it with full conviction that [illegible] spirit and sure enterprise of [illegible] have facilitated that ha[illegible] change of the last six month[illegible] also, with full conviction, that e[illegible]

bld indeed if we did not see the

n rican organization, under authority of the Supreme War Council, distributed coal, the life blood of Europe, and again across conflicting and warring frontiers, creating in Europe the fullest activity possible and materially aiding the reinstatement of employment and the social order that follows employment.

"And the head and front of all that American organization—the personification of the ability and devotion which it typified, the outstanding figure in the reconstruction period of stricken Europe, was he under whom we have delighted to serve—Herbert Hoover. I recite as typical of the character of this leader that, amid all the many cares of these complex duties, he had an eye to note and the heart to feel the condition of the children of Europe. With the same practical helpfulness there is being fed today in Europe four million unfortunate children, and in the American fashion—sympathetic, but effective. Every child not over twelve certified by competent medical authority as being underweight or underheight or of clouded mentality, receives an extra meal a day especially suited to such children—milk, cocoa, and cereals. The record of that vast philanthropy is that in the average, from ninety to one hundred days, these children are restored to their normal birthright of health, wrenched from them by the savage hand of war.

"Americanism still lives here and abroad. The land that registered fourteen million men for military service without disturbance and the land where twelve million housewives by voluntary effort accomplished miracles of food conservation, keeping our Allies in the war until we could come to their aid, has not lost that idealism overnight. It seems to me the American way that we have helped to rescue and free these people abroad, that we have restored their children to health and strength, and that it is the American way now to establish their boundaries and status, to facilitate the credits and furnish the raw material that revives their economic existence, capitalizing their character and their future resources in this time of desperate need and that it is the American way also to take these people by the hand, protect them and guide them in their present halting steps until they have learned to walk upright in the society of nations."

Mr. REYNOLDS: I move you that the Association extend to Mr. Barnes its thanks for the splendid address, and also for his high-minded, honest administration of the affairs of the Grain Corporation; and that we again extend to him a vote of full confidence in the administration of this high trust which has been imposed upon him.

Seconded by Mr. Sager, and carried unanimously by rising vote.

Trade Rules Again.

Rule 36 was taken up again and the recommendation of the committee adopted.

Rule 22 was amended to read as follows:

Car lots of grain and assorted feedstuff. These rules shall also govern transactions in feedstuffs in straight car lots, and grain, feedstuff and flour in assorted car lots. By feedstuffs is meant all animal feed that is derived from, or is a product of, grain.

On Merchant Marine.

The report on Merchant Marine prepared by CHAS. ENGLAND of Baltimore was then read and the resolutions suggested referred to the Committee on Resolutions.

The report recited the recent action of the Shipping Board under Judge John Barton Payne, and the operation of ships by the Government. The Board now recommends private ownership (1) to give our overseas trade full benefit of competitive service; (2) to leave steamship operators free to render the competitive service; and (3) to impart to present and prospective operators that confidence which they must feel before they can be expected to invest their money in existing ships and to place orders for new ones. The Chamber of Commerce of the U. S. advocates private ownership; National Foreign Trade Council is opposed to continuance of Government operation; the Trans-Mississippi Readjustment Congress, Merchants' Ass'n of New York, American Importers' and Exporters' Aid, National Ass'n of Manufacturers, American Manufacturers' Ass'n, Philadelphia Board of Trade also agree to the above policies, but the Kansas City Chamber of Commerce is for Government ownership and private operation and the National and Pennsylvania State Granges are for Government ownership.

"The question has frequently been asked, and very properly, why the United States Shipping Board has not furnished more vessels for the transportation of grain, thereby relieving the congestion at American ports which has made it impossible for interior grain shippers to obtain shipping permits. Generally speaking, the Grain Corporation makes its sales of wheat to foreign governments, or foreign buyers operating through their respective governments, with the understanding that the foreign buyer must furnish the ocean tonnage and the time of shipment of grain depends upon the promptness with which the foreign purchasers send their vessels here for loading. In a very recent report of the Shipping Board this is referred to and attention is called to the fact that many American ships are engaged in the coal carrying trade. With the approach of winter there is great menace to life in Europe for a lack of coal. To avert a world shortage America must export upwards of 81,000,000 tons. This Nation's pre-war export of coal was less than 20,000,000 tons per year. This excess over pre-war exports which must be supplied by this country, if the world shortage is made up, is approximately 61,000,000 tons. To make up the deficit America would have to export within a few months more than four times as much coal as it ever exported during an entire year and attention is called to the fact that European nations are using their own tonnage in trades best suited to their maritime interests. Italy is practically the only European government which is extensively using its own vessels in carrying coal from the United States for Italian relief. It appears certain that the people of France, Belgium, Holland, Italy, Denmark, Norway, Sweden, Spain and Switzerland will be among the ones that will suffer most for want of coal and the shortage will fall with no less weight upon Germany and Austria-Hungary. That it may be better understood what this shortage means it would require 1,249,000 cars of 50 tons each to meet the shortage and 12,500 vessels of 5,000 tons capacity would be necessary to carry this amount of coal across the ocean in one trip. More than 60,000 men would have to dig coal at top speed for a year to produce the tonnage.

"During the past three-quarters of a century the American people have shown a remarkable degree of indifference to the steady decline of American shipping until we reached the humiliating position of American ships being practically banished from the seas and the American merchant flag seldom seen in foreign ports. The World's war has awakened the Nation from its lethargy and it is now demanding a return to our former sea prestige.

"Historians say that our Constitution was dictated by commercial necessity more than any other cause. With the return of peace after the Revolutionary war general attention was given to building up a merchant marine and many of the first laws enacted under the Constitution related to this subject. In 1789 23.6 per cent of American exports and imports were carried in American vessels. Under wise laws the carrying trade steadily increased until 1826 when 92.5 per cent of our exports and imports were transported in American ships. After this time there was a steady decline, and in 1914 only 8.2 a per cent of our exports and imports was carried in American bottoms. In the past two years this country has again taken place among shipbuilding nations. In 1918 and until August 29, 1919, a period of about 20 months, there was launched from shipyards under control of the Shipping Board 8,199,791 tons of shipping. In June 1914 the total gross tonnage under the American flag including the Great Lakes was 4,287,000 tons. In June 1919 our gross tonnage was 11,983,000 tons, an increase of 278 per cent chiefly in ocean going steamships. The steam tonnage under the American flag is now 24.8 per cent of the steam tonnage of the world and our seagoing personnel consists of 51,560 officers and men.

"This showing exemplifies American energy and resources and there is much in it to restore our maritime pride and revive our love for the sea, but the Government must sooner or later cease its shipbuilding activities which were essentially war necessities. Therefore it is not only a matter of national pride, but the duty of every American citizen whether residing in the Coastal or Inland sections to co-operate in the further development of the merchant marine, until we are no longer dependent upon our commercial rivals to transport our products and that American products may be carried to the markets of the world in American built ships, manned by American seamen and sailing under the American flag.

Arbitration Committees.

The arbitration committees reported the statistical details of their work. The report of Mr. Strong for the appeals committee recommended:

(1) "That the arbitration appeal fee of $25.00 be increased to a sum that will more nearly compensate the Association for services rendered to litigants.

(2) "That all telegrams, or copies of telegrams, be submitted as sent by the Telegraph Company and, if code words are used, that a correct translation appear on the same telegraph blank below the main body of the message.

(3) "That where copies instead of originals of papers, documents, telegrams, expense bills, etc., are submitted in evidence by litigants, that an affidavit must accompany such papers showing that all the copies submitted are true and correct. One blanket affidavit to this effect in each set of papers is sufficient."

The recommendations were agreed to except that the appeal fee named was made to read $35, not $25.

On Insurance Question.

C. A. McCotter, secretary of the Grain Dealers' Fire Ins. Co. of Indianapolis, read a paper on "Relief or Prevention—Which?" the publication of which herein will be postponed temporarily.

A Friend of the Horse.

A resolution was here presented by permission by J. VINING TAYLOR, of the National Hay Ass'n, seconded by L. W. FORBELL of New York, which was adopted as follows:

Whereas, The decrease in the use of the horse and the substitution of the motor-truck and tractor to perform the work formerly accomplished by that faithful animal has been increasingly noticeable during the past few years; and,

Whereas, Recent investigation has developed some startling facts in relation to the horse as a power unit, both on the farm and in the city, especially in comparative data pertaining to the cost of operation as against the motor driven vehicles.

Whereas, We believe the tractor and truck have its place, but the time will never come when we can dispense with the horse as a motor, furthermore, the horse interest has suffered by neglect, on the part of its friends, to give publicity to its use as an economical means of motor power.

Whereas, The expensive advertising campaign conducted by automobile, motor truck and tractor manufactures has in our judgment created a wrong impression on the public mind which should be removed through a campaign of education, and,

Whereas, To encourage the production and utilization of the horse on the farm and in the city, as a motive power, therefore, be it

Resolved, That the Grain Dealers' National Association join in with the Horse Publicity Association of America, Inc., the National Hay Association, Inc., and others interested in a campaign of this nature; and, be it further

Resolved, That this Association appoint committee to attend a meeting of the

above Association in New York City, Pennsylvania Hotel, Oct. 30th and 31st.

On Crop Reports.

The report of the Crop Reports Committee by W. A. Cutler was read by the Secretary. In substance, it recommended certain things to the Department of Agriculture for the improvement of the report and deprecated the wasteful "publicity" that has been put out in mimeograph form by the Bureau of Markets which, "we found, upon considerable inquiry, go directly to the waste basket, due to the fact that the same information has already reached the dealer's desk through daily market reports, trade journals, etc."

On motion of C. F. MacDonald of Duluth the Market Survey Committee was ordered made a permanent committee.

The Resolutions.

HIRAM N. SAGER of Chicago made the report of the committee on resolutions, who recommended the adoption of the following, which were adopted, with the addition of resolution of thanks to Gov. Goodrich and Ambassador Francis:

Asks the Government to Withdraw.

Whereas, The system of marketing the grain crops of this country which was in operation before we entered the Great War is the result of the experience and best thought of several generations of grain merchants, and is believed by us to be the best and most satisfactory system yet devised for the economical distribution of grain from producer to consumer; and,

Whereas, During the period of the war the many regulations and restrictions relative to the sale and distribution of grain and grain products as promulgated by the Government and its agencies have been patiently and patriotically observed by the grain trade; and,

Whereas, In time of peace these war-time regulations and restrictions are, in our judgment, neither necessary nor advisable, therefore, be it

Resolved. That the Grain Dealers' National Association calls upon the Federal Government and its agencies (as soon after the conclusion of peace as is consistent with the national welfare, and with existing contracts and obligations) to entirely disassociate themselves from grain control and return to the people the grain business as nearly as possible in the same condition as it was before the war.

Resolved, That a copy of this resolution be forwarded to President Wilson, to Mr. Julius H. Barnes, president of the United States Grain Corporation, and to each member of Congress.

Opposes Government Control of Business.

Whereas, The unparalleled prosperity of this country and its wonderful progress in industry, commerce, agriculture, manufacturing and transportation have resulted largely from the private initiative, enterprise, courage and industry of its citizens, unhampered by Government control or regulation; and,

Whereas, The citizens of the United States should be allowed in their occupations the largest liberty consistent with the rights of others; therefore, be it

Resolved, That the Grain Dealers' National Association is opposed to a Governmental policy of licensing interstate business and subjecting it to rules and regulations promulgated by Governmental agencies or commissions, and urges all members of Congress to oppose such policy and to defeat any legislation intended to inaugurate such a system of Government control of business.

Resolved, That a copy of this resolution be sent to each member of Congress.

The Budget System.

Whereas, The vast expenditures of the Federal Government impose upon the people of these United States a burden of taxation unprecedented in our history; and,

Whereas, The people have a right to expect from this Government an intelligent, efficient and economical disbursement of public funds; and,

Whereas, The present method of making appropriations for the different departments and activities of the Government without consideration of how much money altogether will be spent, and of levying taxes without complete and accurate information as to how much revenue must be raised, is neither intelligent, efficient nor economical, and leads to extravagance and waste; therefore, be it

Resolved, That the Grain Dealers National Association urges the adoption of a budget system for the Government, and urgently requests the Congress to enact the necessary legislation during the present session.

Resolved, That a copy of these resolutions be sent to President Wilson and to each member of the Congress.

The Plumb Bill.

Whereas, Certain proposed legislation pending in Congress and generally known as "The Plumb Bill" would if adopted compel the Government of the United States to purchase the railroads, and thereafter require the operation of said railroads for the joint benefit of the employes of said railroads and of the public; and,

Whereas, This is "class legislation" designed to confer especial benefits upon one class of citizens at the expense of all other citizens, and is contrary to the spirit of our institutions and to the public welfare; therefore, be it

Resolved, That the Grain Dealers' National Association is opposed to such legislation and urges the members of Congress to defeat it.

Resolved, That a copy of this resolution be sent to each member of Congress.

Production Urged.

Whereas, The waste and destruction incident to the Great War and the accompanying and unavoidable interruption of manufacture and industry have resulted in an unprecedented scarcity and shortage of supplies; and,

Whereas, This dangerous situation can only be corrected by largely increased production from mine and factory and farm; and,

Whereas, In this emergency the United States expects every man to do his duty; therefore, be it

Resolved, That the Grain Dealers' National Association deplores and condemns the tendency in some branches of industry toward lessened efficiency and reduction of output and urges upon all men the patriotic duty of increased effort and increased production to the limit of their capacity and efficiency in order that the burden of "high cost of living" may be lightened to our people and normal conditions be restored to our country; and, be it further

Resolved, That whereas enlightened self-interest is the greatest stimulus to industry, we commend to the business men of this country the advantage of co-operation with their employes.

Enforcing Grain Standards Act.

Whereas, The "Grain Standards Act" at the present time confers on the Enforcement Division of the Bureau of Markets, the power to suspend or revoke licenses of Grain Inspectors for cause; and,

Whereas, The attitude of the Enforcement Division up to this time has been that of leniency because of the shortage of competent help on account of many inspectors having been called to the service of their country, and for the further reason that the work of the inspectors under the licensing system and according to Federal Standards was a new project; and,

Whereas, These conditions are now largely corrected by the return of the men from service, and their better understanding of the Federal Standards and the requirements of the licensing system; therefore, be it

Resolved, That the Grain Dealers' National Association favors a more strict enforcement of the disciplinary powers of the Enforcement Division of the Bureau of Markets against individual inspectors who continually, through incompetence, or who intentionally mis-grade grain, and be it further

Resolved, That the matter of the sampling of grain is of such vital importance to the efficient work of the inspector, that we would recommend to the earnest consideration of the Bureau of Markets, the advisability of placing samplers under license and supervision.

War Tax on Transportation.

Whereas, The Treasury Department through the Collector of Internal Revenue, has recently issued ruling known as T. D. No. 2889 prescribing certain requirements which must be fulfilled to secure exemption from war tax on transportation on the inland movement of export traffic, including grain, from point of shipment to port of export, which requirement cannot be complied with by the grain trade due to the existing and customary methods of marketing and handling grain at the export markets; and,

Whereas, The export grain markets have jointly conferred with the Collector of Internal Revenue at Washington, and proposed certain modifications which would give the desired relief; and,

Whereas, The Collector of Internal Revenue after giving careful consideration to the proposals of the export grain markets has replied at great length, giving legal reasons why he cannot grant the modification asked for, due to the existing interpretations of the Revenue Act and the Constitutional Exemption covering tax on exports; therefore, be it

Resolved, That inasmuch as the tax assessed will be borne by the producers of the grain who are represented by this Association the Legislative Committee be instructed to proceed toward securing the passage of an amendment to the Revenue Act that will exempt from Transportation Tax the inland movement of grain from the shipping point from which it is consigned on the bill of lading to any export elevator and concerning which declaration is made on the bill of lading by the shipper that the grain is for export; such amendment to further provide that the exemption so obtained shall not in any manner be precluded by the necessary suspended movement, sale, temporary storage or grading necessary in conformity with the U. S. Grain Standards Act at the port of export before final delivery to the vessel.

Re the County Agents.

Whereas, The Agricultural Department of the United States Government in the performance of its functions in relating to agricultural interests of the country, is rapidly extending its services and multiplying its activities; and,

Whereas, The Bureau of Markets and Extension Service of the Department of Agriculture is co-operating with the State Governments through the agricultural colleges of the states; and,

Whereas, There is a growing tendency and evident purpose on the part of the Bureau of Markets, acting by and through the County Agents to extend the operation of this department into the field of marketing and grain distribution thus interposing direct government interference and competition with purely private business; and,

Whereas, Such activities are contrary to the spirit of our institutions and threaten an important branch of the grain handling industry; therefore, be it

Resolved, That while the Grain Dealers' Association appreciates and commends the useful and important service rendered the agricultural interests of the country through instruction and demonstration work of the County Agents, it is the sense of this Association that all commercial or trading activities of County Agents should cease. Be it further

Resolved, That a copy of these resolutions be forwarded to the Secretary of Agriculture and to members of Congress.

Federal Trade Commission.

Whereas, The Federal Trade Commission was created because, as stated by President Wilson "The business men of the country desire something more than that the menace of legal process be made explicit and intelligible. They desire the advice, the definite guidance and information which can be supplied by an administrative body, and interstate trade commission"; and,

Whereas, After the bill creating the Federal Trade Commission has been passed President Wilson stated that, "A Federal Trade Commission has been created with powers and guidance and accommodation which have relieved business men of unfounded fears and set them upon the road of hopeful and confident enterprise"; and,

Whereas, Business men had therefore the right to expect friendly co-operation, assistance and guidance from the Federal Trade Commission; and,

Whereas, Wide spread dissatisfaction now exists concerning the attitude of the Federal Trade Commission toward business, and grave doubts are entertained by a large proportion of business men concerning the usefulness of the Federal Trade Commission; therefore, be it

Resolved, That the Grain Dealers' National Association recommends a Congressional investigation of the Federal Trade Commission and its activities to ascertain whether it really is a necessary adjunct to the Government and useful to either our producers or consumers.

Oppose Government Ownership of Railroads.

Resolved, That the Grain Dealers' National Association is opposed to Government ownership of railroads and urges the Government at the earliest possible moment to return the railroads to their owners with only such legislation as will restore to the Interstate Commerce Commission the supervision of or making of freight and passenger rates, leaving other questions at issue for future needful legislation. Be it further

Resolved, That we are opposed to legislation intended to deprive the Interstate Commerce Commission of its authority to grant exceptions to rigid long and short haul rule as provided in the fourth section of the Interstate Commerce Act.

Resolved, That the Grain Dealers' National Association favor, as soon as a proper basis can be established, that all ships owned, or in process of construction by the United States Government be sold to American citizens or to corporations acting under Federal charter. Further, that shipping and navigation laws be so amended that American shipping may be able to compete with foreign nations in the world's carrying trade, also the revision of any financial laws and regulations detrimental or burdensome to American ship-building, or the operation of ships by American citizens.

The President.

Whereas, President Wilson is reported as being seriously ill, be it

Resolved, That the grain dealers of the United States, as represented in this their annual convention, do hereby express sorrow for his illness and hope for his speedy and complete recovery.

Thanks to Officers and Hosts.

Whereas, The unusual and troublesome times of the past year growing out of the World's War and the necessary laws, rules and regulations resulting therefrom and affecting our trade have required extraordinary sacrifice of time and effort on the part of our various officers and committees, therefore, be it

Resolved, That we extend the thanks of this Association to those officers and committees and especially to President F. E. Goodrich, Secretary Charles Quinn, Henry L. Gorman, A. E. Reynolds, Elmer Hutchinson, C. D. Sturtevant, R. A. Schuster, S. L. Rice, Alex W. Kay, all of whom have so loyally and so freely given of their time and energy.

Whereas, The cordial welcome and the many gracious courtesies extended to the members of the Grain Dealers' National Association during the period of this convention, have added greatly to our pleasure and comfort, and will ever be treasured in the storehouse of our memory with sincere and grateful appreciaion; therefore, be it

Resolved, That a vote of thanks be and hereby is extended to the ladies of St. Louis; to the Merchants' Exchange of St. Louis; to Honorable Frederick D. Gardner, Governor of Missouri; to Honorable Henry W. Kiel, Mayor of St. Louis; to the Planters Hotel for their kindness to us and for their highly successful efforts in our behalf.

The Election of Officers.

Lee G. Metcalf reported for the nominating committee that the com recommended the election of t lowing officers, and that the r suspended, and the Secretary i ed to cast the unanimous vote Association for these officers an tors as submitted by the commit was so ordered.

The Officers.

President, P. E. Goodrich, Win Ind.

1st Vice-President, H. I. Baldv catur, Ill.

2nd Vice-President, H. E. B Detroit, Mich.

Directors—Joy M. Hackler, kee; Jesse J. Culp, Warrensbur B. C. Moore, Kansas City; LeR frey, Minneapolis; C. D. Stu Omaha; Marshall Hall, St. Louis Greely, Great Falls, Mont.; A. Donald, Boston; J. H. Beusse, Ga.; Robert Ryon, Lansing, M. C. Armstrong, Seattle.

After President Goodrich ha his inaugural address,—

Mr. SCOTT: This is a record b meeting in attendance, and I th should spread that news where go that we attended the biggest convention we have ever attend

The SECRETARY: There were registrations. Those were me There were 200 or 250 ladies making a total attendance of 1,600 and 1,700.

Adjourned *sine die*.

TERMINAL MARKET NE

A Protein Problem.

ice Current-Grain Reporter:
with interest article in your
th issue in the "Feedstuffs"
t, under the head of "A Pro-
lem," taken from the *Na-
ckman and Farmer.*

One thing that was overlooked in this article was the fact that the green alfalfa contains the highest per cent of protein and that dairymen who are wanting feed to increase the production of milk should buy quality rather than haggle over the price, as many do.

Further on the article states that alfalfa is now selling at Kansas City at $22.00 to $27.00 per ton. This is all very true, but the choice dairy green alfalfa, of which we are speaking, is selling at the present time from $30.00 to $32.00 per ton track Kansas City and there is more demand than can be supplied.—*Carlisle Commission Co., Kansas City, Mo.*

EARL C. BEAR DEAD.

It is with extreme sorrow that we have to chronicle the death of Earl C. Bear, who was one of the nicest, cleanest, most likeable men that one could wish to meet. Practically his entire lifetime had been spent in the grain business. His early experience was acquired in Toledo, working for Mr. Churchhill. About sixteen years ago he entered the grain business with his father-in-law, Dr. Reed, at Hicksville, Ohio, as the Reed-Bear Grain Co., buy-

THE LATE EARL C. BEAR,
Hicksville, O.

ing the old B. & O. elevator, and later on became sole proprietor of the Bear Grain Co., at this place.

Mr. Bear has always been active and interested in association work and a faithful attendant at grain conventions, and was at one time a director of the terminal. It was while president of the Ohio Grain Dealers' Association, of which he had been also vice-president, that he was first taken sick and that winter he spent in the South, in hopes of recuperating. The sojourn was of much benefit to him and he felt for a time that he was on the road to perfect recovery. Later he felt the need of complete relaxation from business and disposed of his grain elevator to the Moser Grain Co., and retired from the grain business.

In the passing of Mr. Bear, the Ohio trade loses one of its most valued fellow grain men and one who will be greatly missed from the council of the association affairs. A Fort Wayne paper, in a notice of his death, said:

"Perhaps no other citizen in Hicksville did more in the way of philanthropy during his residence here than did the subject of this sketch. Besides countless deeds of splendid achievement that can be credited to his account, he has been a benefactor to every worthy cause and individual which came under his notice. Mr. Bear served four years as a member of the village council and this was followed by an election to the office of mayor, which place he filled with signal honor to himself and splendid credit to the city. While in this office he coined the slogan for Hicksville: 'The town worth while,' and in all the years of his residence here has always looked upon his home town as embodying the sentiment of its slogan. He was an honored member of the Methodist church and the Masonic and Odd Fellow orders of this place."

He is survived by his wife, two sons, Erwin and Wayne, and his aged mother who resides at New Washington, O., and one brother, Otis J. Bear, of Danville, Ill. He was aged forty years.

FLOUR PACKAGE WEIGHTS

Bill for New Standard of Weights for Flour Packages Ready for Action in the House—Would Investigate Oklahoma Movement of Wheat.

WASHINGTON, Oct. 18.—[Special Correspondence.]—Action is contemplated by the House within the next two or three weeks on legislation establishing the standard of weights and measures for flours, hominy, grits and meals and all commercial feeding stuffs. The pending bill as introduced by Representative Vestal of Indiana and reported favorably from the committee on coinage, weights and measures of which he is chairman, is on the House calendar and will be reached, it is expected, before the recess which is contemplated the middle of next month. A report submitted to the House by Mr. Vestal summarizes the bill and its purposes thus:

"The purpose of the bill is to standardize all packages of flour, meal and all commercial feeding stuffs. The present unit for a barrel of flour is fixed by some state laws and generally by custom, at 196 pounds net. This is an odd unit which does not fit into our system of weights and measures at all, and the unit is not divisible into a ton, which is the large unit by which things are bought and sold in this country. It was shown by the hearings on this bill that not more than half of the states have adopted a standard for the flour barrel. This bill proposes to raise the standard from 196 pounds to 200 pounds. The fractional units then will become even units, down as low as 5 lbs. From the standpoint of the consumer as well as of the trade itself the committee is of one mind and unanimously recommends the bill to the favorable consideration of the House."

The bill has been indorsed by the Millers' National Federation and both the wheat millers' and corn millers' associations.

The Bureau of Standards of the Department of Commerce in indorsing the bill sent the following letter signed by F. C. Brown to Representative Vestal: "The Bureau of Standards has examined with care the draft of the bill. The principle involved in his proposed bill is that mandatory standards be established for packages of wheat mill and corn mill products and that these standards be on the hundredweight basis. This principle has the unqualified endorsement of this Bureau, and in our opinion this bill is excellently adapted to carry the purpose into effect. It is one which is urgently required on account of the discrepancies of standards established by law in the various states, which cause great confusion in interstate commerce, and unfair competition between brands manufactured in a state and those shipped in for sale from points outside the states. The Bureau is strongly of the opinion that this proposed legislation will do a great amount of good for the consuming public and for the manufacturer; that it represents a long step forward in standardization and deserves the favorable consideration of Congress."

The bill makes it unlawful to pack or ship or offer for sale wheat mill and corn mill products, namely, flours, hominy, grits and meals and all commercial feeding stuffs, in package form, except in one of the standard sizes and bearing the net weight upon the package. A fine of not exceeding $500 is provided. The provisions of the act do not apply to packages intended for export. Regulations for the administration of the act are to be made by the director of the Bureau of Standards.

WANTS THE OKLAHOMA EMBARGO INVESTIGATED.

Senator Owen of Oklahoma, who has taken an interest in the failure to move wheat from states in his section of the country as rapidly as desired, introduced a resolution for an investigation of the whole situation. The resolution was approved and Senator Gronna of North Dakota, chairman of the Senate committee on Agriculture and Forestry, by which the inquiry is to be made, announced that he would begin hearings within a few days. The text of the resolution follows:

Resolved, That the Committee on Agriculture and Forestry immediately investigate the reasons for the embargo on wheat and why transportation is not available to move the wheat of Oklahoma, Kansas, Texas, Colorado, and other states, and what steps the Grain Corporation has taken to obtain ships for the movement of such grain, etc.

Senator Gronna said that Julius Barnes, United States Wheat Director, would be one of the first witnesses. Senator Gronna in a letter to Mr. Barnes declared that the latter had aided speculators by keeping an embargo on wheat exports during the harvesting season and now after the grain is stored in elevator bins is preparing to let down the export restrictions. He described it as "injustice and a blunder." "If the practices of discriminating against the farmers of the United States are to be continued, it can only result in under-production and you must be willing to accept the responsibility for this injustice and blunder," Senator Gronna wrote Mr. Barnes.

MR. BARNES' REQUEST HELD UP.

A request by Mr. Barnes to President Wilson for the issuance of a proclamation removing all export and import embargoes upon wheat is being held up by the President's illness. It is expected that it will be issued as soon as the President is able to give attention to the transaction of official business.

Fearful lest the raising of the import embargo would mean the entry of a large quantity of Canadian wheat Representative Young promptly introduced a bill in the House imposing import duties of 25 cents per bushel on wheat, 13½ cents per barrel of 196 pounds on wheat flour and 10 per centum ad valorem on semolina and other products of wheat. Mr. Young, although himself a member of the Ways and Means Committee which handles tariff legislation, admitted that there was no chance of action on the bill in time to be effective this season.

DEFINING A CROP FAILURE.

A bill introduced by Senator Curtis of Kansas defines a crop failure as an average yield of five bushels or less per acre. His measure provides that farmers in the drought-stricken regions of the Northwest, the Central West and the Southwest who borrowed money from the Government shall be released from repayment in case their yields averaged five bushels or less per acre.

Disturbed because agricultural elements of various kinds and food producers, manufacturers and consumers are not represented adequately at the National Industrial Conference, Representative Dickinson of Iowa has introduced a resolution in the House providing for a conference of these particular groups to be called by the President.

Crop Reports

Compiled by GEO. A. WELLS

According to the general reports published below, the germination and growth condition of the winter wheat crop is generally "favorable" throughout the entire winter wheat belt; the sowing, however, is late in the southwest because of the lack of soil moisture during the early fall. The corn is almost completely matured throughout the entire corn belt and will be ready for marketing soon after Nov. 1.

SOIL CONDITION.—The soil condition is reported almost entirely "favorable" throughout the surplus grain producing states except "too dry" in some localities in North Dakota and South Dakota and Kansas.

CORN.—The crop has matured almost completely without damage by frost, according to the reports of our correspondents.

The percentage of the corn crop in each state being matured is as follows: Ohio, 99; Indiana, 97; Illinois, 97; Missouri, 83; Iowa, 97; Minnesota, 100; North Dakota, 97; South Dakota, 98; Nebraska, 96; Kansas, 99; Oklahoma, 94.

HOG CHOLERA.—Hog cholera is prevalent to a greater or less extent, the loss reported being from 1 to 20 per cent in various localities although a large percentage of the reports indicate that there has been no loss by cholera.

General Reports.

The general reports given below regarding germination and growth condition of winter wheat and also as to when farmers will begin marketing new corn are self-explanatory.

OHIO.

Upper Sandusky (4): Winter wheat is looking just as fine as it can look.

Sidney (2): Winter wheat germinating and growth could hardly be better; 95% is up and growing fine. Farmers will sell new corn freely soon as dealers will buy it, which will be about Nov. 1.

Agosta (5): Hog cholera is raging around here. It seems farmers have neglected to vaccinate and nearly all have more or less cholera in their herds. Wheat germinating nicely. New corn will begin to come to market early in November.

Bryan (1): Winter wheat getting another good start this fall. Weather has been exceptionally good for starting wheat. Corn will start moving here about Oct. 25.

Greenville (2): Wheat mostly sown late and not much growth shown yet. Late rains will now make rapid growth. Think condition favorable; about 75% of average crop sown. Farmers commencing to husk corn and will sell in limited amounts as soon as dealers will receive. With favorable weather expect some movement by Nov. 10.

Eaton (2): Condition of winter wheat good. Corn will not move for some time in this locality.

Xenia (3): Germination and growth of winter wheat all that could be desired. Farmers will begin to market new corn about Nov. 10.

Circleville (6): Some wheat almost hides the ground, balance looking fine. No reports of fly as yet. New corn will move this week.

Portsmouth (6): Wheat is coming up nicely, although a great deal is not yet sown, as the ground has been too hard until the last week.

Bucyrus (4): Germination and growth condition of winter wheat is 95% good. The farmers of this locality do not sell any corn. It is all fed.

INDIANA.

Lawrenceburg (9): Wheat sown coming along fine. Farmers will be slow to market corn.

Rushville (8): Wheat certainly looks fine and is getting a good, sturdy root and healthy growth. New corn should do to market by at least the 1st of November.

Tipton (5): Wheat all planted and starting nicely with conditions favorable.

Wabash (4): Weather conditions excellent and germination perfect. Some corn will be marketed by Nov. 1. Heavy feeding territory here and only small amount will be offered for sale.

Kendallville (7): Wheat is all sown and in fine shape. Weather and soil conditions very favorable.

Princeton (3): Very small per cent of winter wheat sown; delayed by rains since Oct. 1. If rains cease corn will be ready for market by Oct. 25; very little to sell.

Angola (7): Winter wheat is all sown. Good stand and growing rapidly. No corn is ever shipped out. All fed in county where grown. Light but not killing frost this morning.

South Whitley (7): Winter wheat looks fine. It is getting a good growth. Don't think there will be any corn marketed here; all will be fed.

Monticello (1): Germination of wheat sown is 100%. There is very little corn husked now. If cool, crispy weather prevails husking will be general by Oct. 27.

Waveland (2): Winter wheat looking fine. A few farmers sowing this week; shows some signs of fly. No corn here to be shipped out. Will feed it if cholera doesn't prevent.

Jasper (3): Germinating of winter wheat is 100%; that is, of what has been sown, but 25% yet to be sown. Farmers will not be free sellers of corn.

Frankfort (2): Germination of winter wheat good. Growth all we could expect considering length of time since seeded. With favorable weather expect new corn movement within two weeks.

Brook (1): Farmers will market corn Nov. 15. Winter wheat starting fine.

Portland (7): Everything is as good as it could possibly be. Good corn. Wheat is up many places, covers the ground. Pasture looks like spring. Never have seen everything look so perfect.

ILLINOIS.

Rockport (2): Very little of wheat has been sown around here. Has been too wet. New corn will begin to move in about thirty days.

Mt. Pulaski (5): Wheat germination is good, also growth. No new corn selling.

Belleville (3): About 70% wheat is up, will all be up this week. Have had no frost here yet. Are getting new corn now. Corn will move freely end of this week.

Eureka (1): Condition winter wheat A-1 except some a little late.

Mt. Carroll (4): Corn husking just started; none coming to market. Think there will be no surplus here; all fed on farms.

Riggston (5): Wheat is not all sown; some is up fine. Seems coming good. There will be no new corn marketed before 1920 unless price is $1.25. Will not sell it for $1.

Highland (6): Winter wheat coming fine. A few farmers have not yet sown; they will probably have a hard time getting it in now, as we have heavy rains.

Lostant (4): Winter wheat up and looking fine. Farmers will begin to move new corn about Nov. 1, providing weather stays good.

Rantoul (5): Very little wheat sown. Just beginning to husk corn.

Sidell (8): Growth condition and germination of recently sown winter wheat apparently O. K. Marketing new corn will commence about Nov. 1. Farmers will be free sellers at present prices.

Wenona (4): Winter wheat has made an excellent start, but acreage is small this year. No disposition to market new corn at this time.

Sparta (6): 85% winter wheat sown. Drouth during August and September caused delay in plowing and now it is too wet.

Decatur (5): Winter wheat growth very good. Corn harvest in about thirty days.

Marshall (8): Wheat sown late, drouth and insects preventing. Coming up fine. Very little corn will be sold unless hogs go below $14 per hundred.

Morris (7): Winter wheat looks fine. Farmers will not market any to speak of until Jan. 1.

Tuscola (8): Winter wheat coming up fine. Farmers waiting for cooler weather to husk corn. Commence marketing about Nov. 1.

Freeport (4): Winter wheat has come up in good shape and looks fine. Farmers will market new corn in about thirty days.

Vermont (2): Winter wheat mostly up and looking fine; about a normal acreage. New corn should be moving freely first two weeks in November if weather conditions remain favorable.

Odell (7): No wheat sown. Farmers are not offering corn, as price looks low compared with prices of everything they have to buy. Very little corn cribbed.

Pocahontas (3): Winter wheat is germinating nicely. No corn to market; failure.

Ashton (4): Winter wheat good growth. New corn will move about Dec. 1.

Princeton (4): Growth of winter wheat very good. Farmers will commence marketing corn about 1st of December if market remains the same as now.

Earlville (4): Winter wheat excellent. Farmers will start husking soon now and some will market corn when have carload husked if price is O. K.

Minier (5): Wheat looking fine. Fields green. Marketing of new corn about Nov. 10.

MISSOURI.

Marionville (3): No corn to market. Farmers will have to buy; 85% of corn and oats fed.

Clinton (1): Early planting is up and in good shape. Some yet to plant. There will be little corn come to market here.

Bethany (1): We will have the best corn crop in five years.

Carrollton (2): The growth of winter wheat is fine. The late sown could stand a little rain. Farmers will not sell new corn until prices get better.

Salisbury (4): Our corn has about all matured and we have had one light frost, but did not damage the late corn.

Chillicothe (1): Some fields are looking fine and good stand, but lots of farmers still sowing and much to be sown yet. Farmers will begin marketing corn in about two weeks.

Higginsville (2): Wheat is coming up in fine shape. Farmers report a good stand.

Corning (1): Winter wheat not all sown yet, but what is sown is coming fine, as there is plenty of moisture. There will be no corn marketed here until Dec. 1 to speak of.

Marionville (3): No corn will be marketed here. Only what is shipped in.

Lamar (3): On account of dry fall season wheat sowing is late this fall. Only about 30% of which has been sown is now up, which shows favorable. Very little corn here. Yield very light. No surplus for shipment. Corn will be ready for market about Nov. 15.

Charleston (9): Winter wheat has good growth; in fact, is rank. Farmers will start moving corn next w small way.

IOWA.

Avoca (3): Everything fine.

Allison (4): No wheat at this Think farmers will commence to corn about Nov. 15.

Gilbert (5): No winter wheat. drying weather corn will begin t not later than Nov. 1.

Kirkman (2): There is hard wheat; too wet here. Our whea was a bad one. Corn will come t ket in December.

New Sharon (5): Not much being sown. Farmers interested ting corn in crib. Too early to tel about maketing. A few selling cember delivery.

Clemons (5): Wheat is growin ly, but the corn is damaged in the by the rain. Farmers said that down corn is growing on the e lots of the ears that stick up ar aged by rain.

Keokuk (9): Winter acreag small. Gemination and growth New crop corn will start to mov in the next three weeks. Moistu showing that it will grade No. 3 a very short time.

Lowden (8): Farmers have tinued sowing of wheat, as it d pay; yield is too poor. New co not move from here before Ja Farmers inclined to hold the gr better prices.

Onawa (2): Winter wheat ger ing fine with the ground well with the first sowing. Do not k a free movement of new corn at th ent prices; from present indicati farmers are going to hold for money.

Randolph (3): Wheat that is s doing fine. Corn will not be ma freely at present prices.

Indianola (6): Wheat sown p days up and looking good. Consi wheat will be sown this week, abo last year acreage.

Hull (1): Corn is still a little to crib. No cholera losses as y some complaints of it.

Truesdale (1): No winter whea here. I think there will be son corn marketed here by Nov. 15.

Guthrie Center (2): Wheat and stand are satisfactory. Cor ing will begin next week and ma should begin Nov. 1 to 15.

Williamsburg (8): Winter w good shape. There will be no mo of new corn.

Whitten (4): No wheat in thi tory. Corn in fine shape and are picking.

Henderson (3): Fall wheat is fine. Farmers will market ne about Nov. 15.

Oakville (9): Winter wheat up looks well, but sowing continu The marketing of new corn will come general before December. corn will be on the market next

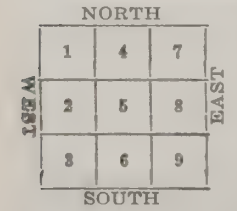
Belmond (4): Soil condition mate has been ideal in this com for winter wheat, but there is pra no acreage around here. What t has made good growth the l weeks. Corn will move 1st of De

Marcus (1): Winter wheat dry. Corn is being fed to catt lieve there is 100% more cat sheep on feed than any othe Prices of corn going down the c feeding.

Osceola (6): Germination sown wheat good. Farmers wil ably market some new corn abo 1. The "Kenyon beetle" is now s investigating all stored wheat.

Washington (8): Corn husk begin in about another week.

Wright (5): Owing to excess weather fall wheat went into about two weeks late.



Wall Lake (2): Very little wheat seeded in this territory. look for much new corn to mov latter part of November.

Tama (5): Very little if any wheat sown. Expect new corn t by Dec. 1 if weather is favorable.

Glidden (2): Winter wheat i

LOCATION KEY.

Explanation.—In order to give the reader as intelligent an idea of the districts from which all crop and local trade condition reports are received, they are numbered to correspond with divisions shown in the accompanying diagram, the numbers 1, 2 and 3 representing the western one-third of the state from north to south; 4, 5 and 6 in central third, and 7, 8, 9 the eastern third. Figures indicating these locations will appear in all crop reports, in letters referring to trade situations in beans, feed, hay, etc. Each state will be treated as a square body.

Farmers will begin marketing new out Nov. 20.

MINNESOTA.

Welly (2): No winter wheat. Not born to market.

Belt Lea (6): Farmers would start ging in new corn in a couple weeks elt that we could handle it this ut we are going to try to stave f as long as possible before we a. Corn crop will have to be the naker for our farmers here be- nall grain crops were very dis- ng and we realize more from day e damage in the way of quality tage in yield.

NORTH DAKOTA.

7): There is no winter wheat No report of cholera. It is cold , 30% of plowing to do.

Thomas (7): Too dry for fall rye; e fall plowing done. Land very

rgton (5): No corn for sale.

(8): Very little corn to be mar- Will be fed to overcome crop No winter wheat. Wheat be- eted freely.

on (8): Corn all in before inest condition. No hog cholera rt of the country.

(7): Corn will be fed to stock.

(7): No winter wheat but rye fine. Farmers are not inclined wheat; are holding for higher

SOUTH DAKOTA.

Kings (8): Our corn crop well and new corn will be offered arket in a couple of weeks in ay.

Clau (8): New corn may be of- ingly last of November, but no ment indicated until Dec.

Water (8): Farmers will mar- orn about Dec. 1.

Ward (9): Very small acreage of eat sown here. New corn not e before latter part of Novem-

(9): Corn will move Nov. 15.

(9): Very little winter wheat there is is fine. Farmers will w corn at present prices.

NEBRASKA.

(9): Wheat coming fine. ill be slow to sell corn.

Holt (9): Some wheat up, some ng for wheat. New corn should me in couple of weeks.

(9): Winter wheat growth t. No hurry about marketing

on (7): There has been but r wheat sown here.

(9): Wheat coming fine. matured and ready to crib in d averaging 35-50 bushels.

t (9): Wheat is coming fine.

(9): Wheat shows splendid think farmers will be slow to sent price for corn. No corn yet.

City (9): Wheat that is up fine but some wheat is still to Corn, in our opinion, will ed about at normal time in farmers have not started to far.

8): Will be marketing new Thanksgiving.

7): Winter wheat good stand, out 50% of last year.

7): No winter wheat in this ew corn will not be on mar- east thirty days.

(9): Cannot say much re- owth of wheat; most of it

(9): Wheat seeding de- equent showers that seeded rapid growth. Acreage will ast 50%.

6): Wheat is fine promise r. Will sell new corn, some ys.

(9): Winter wheat nearly me early sowing up. New for market in thirty days.

ity (9): Corn husking has Weather wet, will delay

(6); Wheat coming slow. r three months. Two light st week. Wheat coming und past few days.

KANSAS.

Wakeeney (2): Winter wheat is in excellent condition. We have had about fourteen inches of rain since harvest which spoiled fully 25% of unthreshed wheat. New corn will all be used here.

Alta Vista (8): About two-thirds of the wheat is sown and is coming up fine. Will have to ship in corn and oats.

Ashland (3): Not over 60% of last year's acreage will be sown to wheat. Have had no rain to speak of for three months and farmers, as a rule, will not sow wheat unless we soon have rain.

Junction City (7): Conditions favorable to new seeded wheat. Very little corn will be marketed.

Concordia (4): Germination and growth of wheat seems to be perfect. Will be little corn to market.

Belleville (4): Winter wheat seeding delayed on account of dry weather until three weeks ago. Since then it has been too wet most of the time. No corn for market here this year.

Oswego (9): Have just begun to sow winter wheat here. Our corn crop very short; will not be enough here for the local use.

Athol (4): Winter wheat could be better. Corn will be marketed about Dec. 1.

Seneca (7): Farmers are about done seeding. Too soon to know anything about its germinating qualities. Farmers will begin to sell corn in about a month.

Hillsboro (5): Some wheat is coming up and most of the wheat sown was sown this week after the rain. No corn will be marketed in this section. We will have to ship in corn for home consumption.

Madison (9): Good rain. Slight increase in sowing wheat acreage.

Horie (1): Threshing progressing slowly. Too wet to thresh. Seeding progressing good.

Mahaska (4): Wheat sowing late account late rains. Lots of ground just being plowed. Only small per cent sowed but coming fine. Corn a failure here. Will ship in corn later on.

Schroyer (7): Wheat is coming fine, a little to be sown yet. Practically no corn to be shipped.

Uniontown (9): We have had no frost yet. Winter wheat, not very much sown yet. Have not had enough rain to soften up the ground.

Neodesha (9): Our corn crop is a small one. Not over 25% of a normal hog production this year. Wheat seeding will be late for this section.

Wichita (6): Just drilling wheat. No new corn to market here.

Plainville (4): Wheat seeding about finished. Weather conditions very favorable.

Pittsburg (9): A great deal of wheat will yet be sown owing to late rains which have put soil in excellent condition. Probably 30% of wheat up and looking fine.

Sedan (9): It has been so dry that few farmers have planted their wheat. Corn now ready for market.

Logan (4): Winter wheat seed is now being drilled in. Soil condition excellent. Corn will not be ready to move for sixty days.

OKLAHOMA.

Marshall (5): Farmers now busy sowing winter wheat. Plenty of moisture, frequent showers. Corn will not be husked or marketed till after wheat sowing is finished.

Driftwood (1): No corn for market. Don't raise much corn, most all wheat.

Cordell (2): No corn will be offered for local needs. No oats will be offered for market here.

Miami (7): Marketing corn now. Is much better quality than expected. Farmers will sell very few oats as short.

Geary (2): New corn moving to market for past two weeks. Quality excellent. None being shelled owing to car shortage making shipping impossible.

El Reno (5): Marketing now. Very few oats will be marketed through this section.

Marshall (5): Beginning to husk corn now. No movement of oats until after corn husking.

Enid (4): Wheat planting progressing nicely the last week after good rains. Will be rushed to a finish and nearly an average crop should be sown.

Miami (7): Very little wheat up. Just now planting as has been too dry. Some little new corn coming in now. Farmers too busy putting in wheat to do anything with corn.

El Reno (4): Early sown wheat up to good stand. Recent rains have made conditions ideal. Corn coming to market in small quantities.

Kingfisher (4): Rains came in abundance last week.

Geary (2): Sowing delayed owing to drought in September. Acreage will be reduced for same reason. Plenty of moisture now so should develop good stand on acreage being seeded.

Wheat Receipts, Flour Production, Etc.

The Grain Corporation's bulletin covering the wheat and flour movement throughout the United States for the week ending Oct. 3, in comparison with the figures for the same period a year ago, are as follows:

	1919.	1918.
Wheat—		
Rcpts. from farms, bus.	24,187,000	27,559,000
Previous week	25,830,000	31,690,000
From June 27 to Oct. 3	475,386,000	440,539,000
Flour—		
Produced during week, bbls.	3,316,000	2,754,000
Previous week, bbls.	3,512,000	2,999,000
From June 27 to Oct. 3, bbls.	35,637,000	30,684,000
Stocks—		
Wheat in elevators and mills, bus.	281,671,000	253,337,000
Previous week, bus.	271,852,000	243,329,000
Change for week, bus.	*9,819,000	*10,008,000

*Increase.

WOULD LIFT EMBARGO.

Julius Barnes, wheat director, has asked the president to raise the export and import embargoes on wheat, and in response, Rep. Young of North Dakota, immediately introduced a bill levying a duty of 25c a bushel on wheat imports.

Representative Young also said that Mr. Barnes had advised them from Missoula, Mont., that:

"I have advised the grain trade generally everywhere that I am convinced that export and import restrictions of all kinds should be eliminated at the earliest possible moment, and trade should be prepared for such."

Besides the levy on the wheat imports, Mr. Young's measure would levy a duty of $1.32½ a barrel on wheat flour and 10 per cent, *advalorem* on all other wheat products.

Oats in Primary Markets.

Receipts of oats in eleven primary grain markets from Aug. 1, 1919, with comparisons with 1918:

	1919-20	1918-19.
Chicago	25,745,000	42,068,000
Milwaukee	8,135,000	12,045,000
Minneapolis	6,112,000	12,525,000
Duluth	350,000	1,613,000
St. Louis	6,059,000	6,971,000
Toledo	1,102,000	3,795,000
Detroit	636,000	1,308,000
Kansas City	2,248,000	6,456,000
Peoria	1,862,000	3,248,000
Omaha	2,662,000	6,502,000
Indianapolis	3,518,000	5,064,000
Total	58,759,000	101,648,000

Receipts of oats the past week at primary markets, compared with preceding week and corresponding week last year:

	Oct. 18, 1919.	Oct. 11, 1919.	Oct. 19, 1918.
Chicago	2,198,000	832,000	2,970,000
Milwaukee	715,000	43,000	1,551,000
Minneapolis	465,000	71,000	843,000
Duluth	24,000	.....	422,000
St. Louis	520,000	227,000	358,000
Toledo	88,000	13,000	149,000
Detroit	93,000	27,000	97,000
Kansas City	169,000	102,000	210,000
Peoria	141,000	378,000	195,000
Omaha	240,000	193,000	570,000
Indianapolis	203,000	147,000	349,000
Total	4,856,000	2,033,000	7,714,000

Visible Grain Supply.

The following table shows the stock of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons, as compiled by the secretary of the Chicago Board of Trade for the week ending Oct. 18, 1919 (000 omitted):

News of the Terminal Markets

DES MOINES, IA.

A. McArty, Correspondent.

Cash oats markets ruled rather strong all week, good No. 3 white selling from 66c to 68¼c.

Receipts for the week—Wheat, 32 cars; corn, 55 cars; oats, 97 cars; flax, 7 cars; barley, 4 cars; mill feed, 22 cars; hay, 20 cars. Last week—Wheat, 48 cars; corn, 52 cars; oats, 102 cars; flax, 19 cars; barley, 5 cars; mill feed, 17 cars; hay, 27 cars.

Des Moines Exchange was represented well at the national convention in St. Louis last week, the following being present: Addison Hall, S. E. Squires, V. S. Beall, Wm. Ferrell, W. H. Bartz, C. A. Tower, W. G. Kelley, Geo. A. Wells, L. N. Hart, C. H. Casebeer, A. McArty.

CAIRO, ILL.

J. E. Clancy, Correspondent.

John Thistlewood has returned from a two weeks' sojourn at West Baden feeling much improved in health.

One car of new corn was received the past week but offerings are light, there being a shortage of corn in this part of the state.

The heavy rains the early part of the week have delayed the sowing of wheat. A good percentage of the fields have been planted and the wheat that is up looks fine.

The Cairo delegation returned from the national convention at St. Louis well pleased with the entertainment of the members of the St. Louis Merchants Exchange.

The receipts the last two weeks have been light. Shipments are increasing the past few days and dealers are more optimistic than they have been for some time, looking for an increased demand.

SIOUX CITY, IA.

Paul Larson, Correspondent.

Receipts of grain at this market continue light. Very little corn moving; some wheat and oats are being received. Wheat is in very good demand and not enough coming in to supply the mills.

A. O. Streator, of the Huntting Elevator Co., of Canton, S. Dak., was a visitor last week. Mr. Streator states that there will be some new corn handled at some of his stations in South Dakota in a week or ten days, and he believes that it will grade No. 4 corn.

Those who attended the National Grain Dealers' Convention from here were: M. King, president of the Western Terminal Elevator Co.; E. R. Warrick, of the Terminal Grain Corporation; J. C. Mullaney, secretary of the Board of Trade; Geo. Strom, manager of Taylor & Bournique Co.; L. C. Button, of L. C. Button Co.; Paul Larson, chief inspector and weighmaster; H. E. Miller, manager of the Globe Machinery & Supply Co.

OMAHA.

Leigh Leslie, Correspondent.

President J. T. Buchanan and Secretary Frank P. Manchester were the official delegates from the Omaha Grain Exchange to the annual convention of the Grain Dealers' National Ass'n at St. Louis this week. These Omaha grain men attended the convention in their private capacity: J. W. Holmquist of the Holmquist Elevator Co., S. P. Mason of the Nye-Schneider-Fowler Grain Co., J. A. Linderholm of the Crowell Elevator Co., E. A. Beardsley of the Merriam & Millard Co., C. W. Adams of the Flanley Grain Co., F. H. Brown of the F. H. Brown Co., Otis M. Smith of the Undike Grain Co., J. R. Welsh of the Butler-Welsh Grain Co., S. S. Carlisle of the S. S. Carlisle Grain Co., C. D. Sturtevant of the Trans-Mississippi Grain Co., and Frank Foltz of the Maney Grain Co.

A new farmers' union co-operative enterprise was launched in Omaha this week. It is the National Co-operative Co., with a capital stock of $2,000,000, held only by farmers' co-operative elevator associations. Its object is to sell and handle all kinds of grain on the co-operative plan. C. H. Gustafson is president of the new company. Gustafson heads the Farmers' Union of Nebraska and the Farmers' Union Livestock Commission companies of Omaha, St. Joseph and Sioux City. C. J. Osborn of Sidney, member of the state board of directors, is vice-president; E. L. Shoemaker of Union, head of the Cass County Farmers' Union, secretary-treasurer; J. O. Shoyer of Humboldt and Ben L. Peters of Albion, directors of the Farmers' Union of Nebraska, who also will serve on the board. Headquarters of the new company will be in Omaha. The company does not expect to confine its business to Nebraska, but will reach out for business in adjoining states. Articles of incorporation are now being filed. Delegates from eighty-two farmers' co-operative elevator asociations were represented at the meeting in which the National Co-operative Company was perfected.

Foreign Grain Freights
Grain Forwarding
NEW ORLEANS, LA.

RICHMOND, VA.

Aubrey Hawkins, Correspondent.

Richmond jobbers very busy.

Hay in very good demand, with prices quoted as follows: No. 1 timothy, $30@31; No. 2 timothy, $28@29; light, mixed, $30@31.

Millfeeds in good demand prompt and later shipment with prices quoted as follows: Bran, $40@41; middlings, $46@47; red dog, $67@68.

Grain has been very dull this week, with prices as follows: No. 2 red wheat, $2.35@2.36; No. 2 white corn, $1.50@1.51; No. 3 white oats, 75½@76½c.

DETROIT.

John Barr, Correspondent.

Beans recovered some strength and closed at $7.20 for immediate and prompt shipment. Buying is not so active as it was a week ago.

The rye deal was weak and inactive for several days, but shippers entered the market late in the week and boosted the price 1c. Shipping was active. The close was at $1.89 for cash No. 2.

Local consumers were good buyers of oats and shippers were buyers at times. The market gained in strength and closed with a steady tone at 74c for cash No. 2 white, 72½@3c for No. 3 white and 71½@2c for No. 4 white. Receipts were liberal early in the week, but dwindled later.

There is no activity in the corn market. It is not active enough to follow the changes in Chicago. Stocks are the smallest in years and receipts late in the week were unimportant. The market is nominal at $1.43 for cash No. 3, $1.45 for No. 2 and No. 3 yellow, $1.43 for No. 4 yellow, $1.42 for No. 5 yellow and $1.41 for No. 6 yellow.

James W. Flynn, 85 years of age, last of the old-time grain dealers of this city, died Wednesday evening. He had been living in retirement many years. He was a cautious and conservative dealer and did a large cash business. Getting in well on the "Old Hutch" deal, he made a large sum of money and retired. He was a lifelong Democrat and prominent at the time of the Cleveland campaigns.

SPOKANE, WASH.

J. B. Jones, Correspondent.

In spite of the prolonged drought of the summer, Washington's wheat crop averages 17.7 bushels per acre on 2,573,000 acres in crop. The total yield for the state is 45,462,000 bushels, according to the report of G. S. Ray and J. H. Jacobson of the Spokane offices of the federal bureau of crop estimates. The crop last year averaged 12.1 bushels per acre for a total of 21,429,000 from 2,191,000 acres.

Because eastern demand for Washington wheat is forcing Spokane millers to pay 20 to 25 cents more per bushel than the government coast basis price of $2.22 for hard wheat flour consumers must pay 40 cents more a barrel for high patent and 80 cents more for hard wheat flour. The price was advanced with high patent jumping from $11 to $11.40 a barrel and hard wheat from $11.20 to $12 a barrel.

More than $3,000,000 worth of this year's wheat has been purchased by the flour mills of Spokane. It is coming into the city by the carload and trainload, some of it coming from as far away as Dakota, to be ground by the electric energy furnished by the Spokane River, and to be distributed all over the world. Some of the mills have enough now on hand to last 60 days, while others have smaller supplies. Most of the purchases are above the government prices. The mills are paying around $2.10 and $2.15 a bushel for local wheat. Purchases by four mills of the city to date, of this year's crop, have been as follows: Centennial, 500,000 bus.; Sperry, 440,000 bus.; Spokane, 330,000 bus.; Portland, 170,000 bus. Total, 1,440,000 bus. Value, at $2.10 a bushel, $3,024,000.

Recommendations that federal grain trade standards be revised next year will be made by a special committee appointed by the agricultural bureau of the Chamber of Commerce. The committee was created as a result of the discusion before Julius H. Barnes, federal wheat director, when he was in Spokane Oct. 11. The discussion disclosed the fact that farmers and dealers are greatly dissatisfied with the present system of grading, and that much injustice is resulting. According to grain men, wheat which grades a fraction of a pound below a standard is discounted on the basis of wheat of the next lower grade, so that a farmer is often obliged to accept a discount of 3 cents a bushel because his grain lacks a tenth of a pound of being up to standard. The committee will probably recommend that fractional grades be established so that smaller discounts may be charged where the grain falls but slightly below a higher standard. Wheat buyers weighing wheat and finding it but a fraction of a pound below or above the standard may find when they turn it over to the miller that it falls slightly below the standard at which it was purchased, thereby entailing a straight loss of three cents per bushel, which must be borne by the dealer.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

Shipment of new ear corn is not advised by local dealers on account of curtailment in elevator facilities through the recent fire at the Central Elevator. Heavier receipts prevail and as buyers are not willing to take new corn there are no established quotations.

The demand for shelled corn is extremely light and the receipts, while light, are ample to meet all demands. Consignment notices are more liberal than for some time, according to local grain officials. Quotations follow: No. 1 yellow, $1.51@1.52 a bushel; No. 2 yellow, $1.50@1.51. Total receipts of corn amount to 27,300 bushels.

Some improvement is noted in the oats market the last week, with total receipts of 128,000 bushels for the period, as compared with 122,000 for the same week last year. This is not considered large for this time of the year and the yards are cleaned up of new arrivals each day. Quotations are advanced slightly, with No. 1 white selling around 77¼@77½c a bushel. Other grades about a cent lower. There is no great demand for oats at this time.

INDIANAPOLIS, IND.

Myron R. Green, Correspondent.

A new directory for the Indiana Millers' Ass'n is being prepared and will be ready for publication shortly.

The Noblesville Milling Co. was sued by Arthur McClelland, who asks $1,000 damages for injuries sustained when he was struck by a truck of the company in Indianapolis.

Charles B. Riley, secretary of the Indiana Grain Dealers' Ass'n and the Indiana Millers' Ass'n, took a short vacation after the close of the national convention in St. Louis.

Among the out-of-town millers and grain dealers in Indianapolis last week were George G. Klemm, Milton, Ind.; J. P. Shoemaker, Daleville, Ind., and O. W. Thomas of Marion, Ind.

The grain elevator of Kraus & Apfelbaum, at Princeton, Ind., was robbed of a large quantity of clover seed by Ralph W. Cole, who was later arrested after he had disposed of it for $456.

The Salem Milling Co. of Salem, Ind., filed a preliminary certificate of dissolution with the secretary of state of Indiana. The Farmers Co-operative Co. of Glenwood, Ind., incorporated with a capital stock of $40,000 to operate a grain elevator. The directors of the new company are J. C. Beaver, F. T. Reed and T. G. Richardson.

The present rainy spell is becoming alarming to the farmers in the southern part of Indiana, and is seriously interfering with their plans. Plowing was held up on account of the extended drought up to few weeks back which made the soil extremely hard, and now the continued rain will probably mean that the acreage will be very much reduced.

ST. JOSEPH, MO.

W. H. Moore, Correspondent.

The Shreiber Milling Co. are enlarging their elevator here at St. Joseph and will use some of the available space for the storage of grain.

All previous records for heavy loading of grain were broken when the Farmers' Elevator Company, of Leona, Kas., shipped to the Geiger Grain Co. car U. P. 78223, containing 126,200 pounds of No. 3 red wheat. At the present approximate price of $2.30 per bushel, the shipment represented an investment of $4,627.

St. Joseph was well represented at the National Grain Dealers' Convention at St. Louis. The following from here were in attendance: H. L. Dannen, St. Joseph Hay & Grain Co.; J. J. Flynn, Mid-West Grain Co.; W. H. Huff, Kellogg-Huff Grain Co.; Jno. Daley, J. L. Frederick Grain Co.; Chas. A. Geiger, Geiger Grain Co.; W. H. McKee, McKee-Lindley-Dunn Grain Co., and T. P. Gordon, Gordon Commission Co.

The following were registered on the exchange the past week: J. H. Martin, Kansas City; S. Trent, Hiawatha, Kans.; J. E. Andrews, Garden, Kas.; H. K. Frederick, Wichita, Kas.; F. L. Callicotte, Kansas City; J. A. James, El Paso, Texas; J. F. Cook, Maryville, Mo.; W. J. Kopp and O. T. Cook, Kansas City; Curtis Poe, Gower, Mo.; Chas. Liebst, Fort Sheridan, Ill.; A. Myers and A. E. Taylor, Kansas City; B. D. Williams, Pawnee City, Neb.; Guy Cleary, Clearmont, Mo., and C. W. Kelly, Clearmont, Mo.

Cash Markets.

Wheat—Receipts for the week ending Saturday were 316 cars, a gain of 600 per cent over receipts the corresponding week a year ago. Good milling grain has been in especially urgent demand, and local mills and shipping firms have been unusually active in securing supplies of this character. Orinary grades are generally slow. Hard wheat is selling at prices unchanged to about 5c over last week. Red wheat prices have advanced 6@7c better grades, with an increasing for choice samples. Cash wheat lows: No. 1 dark hard, $2.32@2.3 dark hard, $2.28@2.51; No. 3 dar $2.25@2.48; No. 4 dark hard, $2.2 No. 5 dark hard, $2.18@2.32; No. $2.22@2.40; No. 2 hard, $2.20@2.38; hard, $2.18@2.35; No. 4 hard, $2.1 No. 5 hard, $2.06@2.21; No. 1 yello $2.21@2.24; No. 2 yellow, hard, @2.20; No. 3 yellow hard, $2.1 No. 4 yellow hard, $2.11@2.14; No. 5 hard, $2.04@2.06; No. 1 red, $2.2 No. 2 red, $2.24@2.26; No. 3 red, $2.2 No. 4 red, $2.10@2.13; No. 5 red, $2.0

Corn—Both cash and option were narrow. Bears anticipate a heavy run of new corn, while this is offset by the rumor that the whe will be given preference in the m transportation service. All partie to be waiting developments, and meantime the market is inactiv cash demand is limited, although have regained some strength dur past few days. Cash follows: No low, $1.43@1.45; No. 3 yellow, $1.4 No. 4 yellow, $1.38@1.39; No. 5 yello @1.37; No. 2 white, $1.40@1.41; No. $1.38@1.39; No. 4 white, $1.35@1.36 white, $1.32@1.34; No. 2 mixed, $1. No. 3 mixed, $1.39@1.40; No. 4 mix @1.38; No. 5 mixed, $1.33@1.35.

Oats—Offerings extremely light. showed some improvement during ter part of the week, but was g dull. Good demand for No. 2 oats, but nothing coming to marke prices Saturday were 2½c to 3c o Saturday, due largely to the sca supplies and strength in option follows: No. 2 white, 71@72c; No. 70@71c; No. 2 mixed, 66@67c; No. 65@66c; No. 2 red, 67@68c; No. 3 @67c.

MEMPHIS.

George Williamson, Correspondent.

Business continues of hand-to-mouth character, with corn prices off some and oats up about as much. The interior is buying just as little as possible.

Trading on the call board has been very light, for there has been little offering. On Saturday nearly everything was bidding, sellers apparently being disposed to sit back and wait. Receipts have been light and stocks are small and will be until new corn begins to move. Oats have firmed up some and are a cent or so a bushel higher than they were two days ago, when No. 3 white sold at 74½c and No. 4 at 73c. On call today 75c was bid for No. 2 and 74½c for No. 3 and 72½c for No. 4.

Fire, which was thought due to a dust explosion, destroyed the old Riverside elevator and damaged the International Rice Mills at the corner of the Illinois Central Railroad and Nettleton avenue Monday night with a loss estimated at $75,000. The property is owned by the W. C. Early Co., wholesale grocers and dealers in grain and hog feeds and was the oldest elevator in the city. It was operated by J. T. Halbert. The public storage was used by a half dozen or more firms, but the chief losers were Lee D. Jones, who was at the convention in St. Louis, and S. E. Rison, of the United States Feed Co., but all losses were amply covered by insurance. Red oats were stored there in considerable quantity. The elevator was to have been occuiped by L. C. Cook & Co. on November 1.

Destruction of the Riverside elevator has brought again to the attention of the trade here the urgent need of this city for more storage and elevator room for the hay and grain interests. There has been a scarcity for a year or more and the situation is getting worse, resulting in checking the expansion of this as a market, for naturally the trade cannot handle the stuff satisfactorily when they must depend so much on buying and selling while shipments are in transit. Talk of having more room here has been plentiful for some time, but it looks like everybody is waiting for "George to do it." The high cost of building is the main reason why there has not been a response to the growing demand, but now that another elevator is gone there may be concrete steps taken to relieve the need.

CINCINNATI.

George Mossbacker, Correspondent.

Local hog prices dropped Saturday to $14 per 100 pounds, the lowest price in several years.

The demurrage charge of $10 a day recently ordered by the local Railroad Administrator on shipments held for reconsignment applies only to lumber and does not affect grain and hay.

A. H. Brackman, who is extensively engaged in the hay business at Sydney, Ohio, was a visitor on the exchange as a guest of "Jack" Gartner, manager of the hay department of the D. O. Cross Co.

George F. Munson, chief grain inspector of the Grain and Hay Exchange, who has achieved notable success as an inspector and who is regarded as an authority on federal rulings and all inspection subjects, has been appointed vice-president of the Chief Grain Inspectors' Association of the United States at their meeting held in St. Louis last week. His appointment gives gratification to his many friends in the grain trade and an increased prestige and popularity to the local office.

The first conference of the committees representing the Chamber of Commerce and the Cincinnnati Grain and Hay Exchange to consider propositions for the return of the Grain aand Hay Exchange to the Chamber of Commerce, was held at the chamber last Thursday. Nothing was given out officially with respect to the proceedings, but it is understood that the meeting was encouraging of good results, unwarped by bitterness of feeling, and that the differences existing between the two organizations, which caused an absolute severance of relations in April, 1918, and the establishment of the Grain and Hay Exchange as an independent organization, would soon be satisfactorily adjusted. The committee of the Grain and Hay Exchange consists of John De Molet, chairman; Charles S. Maguire and Lyman Perin. For the Chamber of Commerce, Andy Braun, Geo. Dieterle, Jr., and H. E. Siter. The chamber committee is expected to submit a written proposal in conformity with the demands of the Grain and Hay Exchange at the next meeting.

Load to Capacity.

H. D. Irwin, second vice-president of the U. S. Grain Corporation, has asked the attention and co-operation of the local exchange in the following communication, concerning the light loading of grain cars:

"The Railroad Administration advises that cars carrying grain and grain products are not being loaded to capacity; and, at the request of the United States Wheat Director, we respectfully suggest the observance by the trade of the former minimum weight as to loading, as established by the United States Food Administration.

"If this suggestion can be followed it

will result in a material increase in the existing car supply, with a corresponding great benefit to all concerned." S. S. Reeves, traffic manager of the Grain and Hay Exchange, explained the request to the members as follows: "The former minimum weights referred to above are commonly known as the wartime minimums, i. e., the marked capacity of the car or not to exceed 10 per cent above the market capacity, and observance in each case that grain must not be loaded within 30 inches of the roof of the car to permit drawing sample for inspection.

Cash Markets.

Wheat—The demand from local and nearby mills for good heavy wheat was more urgent the past week, and though no changes in prices for the No. 2 grade were recorded, No. 3 and No. 4 were advanced ½c to 1c. Receipts were comparatively fair, but almost entirely of No. 3, smutty and lower grades. These sold rather slowly, but sufficient demand was always present to absorb each day's offerings. No. 1 red winter, track, $2.29@2.30; No. 2 red winter, track, $2.28@2.29; No. 3 red winter, track, $2.23½@2.26½; No. 4 red winter, track, $2.19@2.21; No. 5 red winter, track, $2.16@2.18; sample, as to quality, $2.10@2.25. Smutty wheat discounted from 2c to 4c per bushel as to grade.

Corn—The corn market continued in a rut during the week, and the few arrivals sold only when concessions were allowed. Buyers appeared more to be holding off and await the new crop movement. The demand for white of top grades for milling was more active than for yellow and mixed and held to a premium, but not much of this was wanted. No. 1 white, $1.46@1.47; No. 2 white, $1.45@1.46; No. 3 white, $1.43@1.44; No. 4 white, $1.41@1.43; No. 5 white, $1.39@1.41; No. 6 white, $1.37@1.39. No. 1 yellow, $1.45@1.46; No. 2 yellow, $1.44@1.45; No. 3 yellow, $1.42@1.44; No. 4 yellow, $1.40@1.42; No. 5 yellow, $1.38@1.40; No. 6 yellow, $1.35@1.37; No. 1 mixed, $1.44@1.45; No. 2 mixed, $1.43@1.44; No. 3 mixed, $1.41@1.43; No. 4 mixed, $1.38@1.40; No. 5 mixed, $1.36@1.38; No. 6 mixed, $1.34@1.36.

Oats—The oats market was inactive though fairly steady as to prices throughout the week. The demand was limited to buying of an occasional car for retail feed interests. Good heavy grain alone brought full values. No. 2 white, 73½@74c; No. 3 white, 73@73½c; No. 4 white, 72½@73c; No. 2 mixed, 73@73½c; No. 3 mixed, 73@73c; No. 4 mixed, 70@72c.

New Ear Corn.

New ear corn, $1.20@1.22. There are numerous inquiries here for new ear corn, where samples show it to be in a forward condition as to dryness. It is inadvisable to ship corn that is heavy with moisture content this early in the season. Ear corn, old, sound corn, white ear, $1.43@1.45; yellow ear, $1.43@1.45; mixed ear, $1.40@1.42.

CHICAGO.

Robt. S. Wallace, with Chas. A. Rache, the Boston broker, visited their Chicago connections last week.

At a recent movement of Regional Directors of Railroad it was decided to give wheat the preference in cars and movement.

Ware & Leland have opened an office in the South Water street commission district at 134 W. Lake street. They will post grain, provision and live stock markets.

It is reported that bids for membership in the Chicago Board of Trade were made last week at $5,000, the highest price ever quoted. However, no offers were made.

Among recent visitors on the floor were R. S. Strong, of Earlville, Ill.; B. K. Smith, of Ft. Worth; H. F. Brazer and A. M. Rosecrans, of Philadelphia; G. A. Braux, of the Ballard Mills, Louisville; W. H. Beall, Jr., Princeton, Ill., and Emanuel and Geo. Strong, of Sioux City, Ia.

Many eastern attendants at the St. Louis grain convention returned via Chicago, having much valuable information on tap. All agreed that farmers are holding, which compared with insufficient car supplies over the entire country, will make impossible a heavy grain movement even under the most favorable conditions otherwise.

It is reported that the seaboard is purchasing oats freely from this market but dealers here only sell on condition that buyers have permits or are in position to get them within a short time. Most of the oat export business of late has been for the Wheat Export Co., who, unable to get the wheat, are filling up their chartered ocean space with the oats.

"Plate" oats are underselling ours in foreign markets, where the demand is not particularly heavy, partly influenced by the knowledge of foreign buyers that considerable Argentine old oats is still on hand there. Domestic corn trade has had enough worries contemplating the probable effect of Argentine corn and are not very keen about the bearish angle brought in by South American oats.

Banquet to Mr. Barnes.

Julius Barnes, wheat director and president of the Grain Corporation, on his way from St. Louis to Minneapolis, was entertained at a banquet at the Blackstone Hotel by the Chicago Board of Trade on Thursday evening, Oct. 16. The ballroom of the hotel was filled to its capacity with members of the Board and an exquisite dinner was served by the hotel which was enlivened by instrumental music, singing by professional entertainers and also by the assembled members.

When the cigars had been brought on, Leslie G. Gates, president of the Board, referring first to the co-operation of the grain trade of the country and more particularly of the Chicago Board of Trade with the Government during the war and its hearty accord with all matters connected with the distribution of the food crops of the country proposed by the Food Administration, paid a tribute to the patriotism of the trade, in general. Later on he paid a very graceful tribute to the character, abilities and fairness to the trade of the president of the Grain Corporation, Julius Barnes, the guest of the evening. He introduced, however, as the first speaker of the evening Geo. M. Reynolds, president of the Continental & Commercial National Bank of Chicago.

JULIUS BARNES,
United States Wheat Director.

Mr. Reynolds, as those who know him well were not surprised to find, proved a most delightful speaker. He told a number of very good stories and then proceeded to tell some of the unwritten history of the bankers' connection with the Food Administration during the past two years, the first year in the capacity of the loaner of money to the Corporation, which then required large sums at times, and during the past year as a receiver of the deposits of the corporation, which is no longer a borrower but a lender of money. Mr. Reynolds than paid a very handsome tribute to the character of Mr. Julius Barnes, giving what was to many a new insight into the personal history of the guest of the evening, a man who in himself was a type of man made by his grasp of the opportunities America offers to young men of brains and a disposition to work and to save, who, it appears, had come out of the western country a boy without means whatever, and who, like Mr. Reynolds himself, also a western country boy, had at one time done janitor service for the Y. M. C. A. of his local habitat, and who later was a newsboy on the streets of the Twin Cities, from which occupation, by pure force of character, industry and thrift, worked his way to the point where before the war began he was recognized as the largest single exporter of wheat perhaps in the world.

Mr. Gates then introduced to the members of the Board Mr. Barnes, himself a member of the Board, to whose administration of the Cereal Division of the Food Administration and of the Grain Corporation, now as official Wheat Director, Mr. Gates paid a glowing tribute. Mr. Barnes was received by the banqueters standing and with great enthusiasm.

The speech of Mr. Barnes, with some additions to fit the particular time and place, some slight recommendations and alterations of obvious value, was substantially the same address as printed elsewhere in this number, which he made at the St. Louis Convention. The address at the banquet, as it did at St. Louis, made a most favorable impression. Whatever some people may have erroneously supposed, from the procedure during the past of the Food Administration, as to Mr. Barnes' attitude towards the law of creating the Food Administration and the functioning of the Grain Corporation, Mr. Barnes himself made it very clear that his own predilections were and still are in favor of the utmost freedom of the trade in the handling of the grain crops of the world and against all efforts, direct or indirect, to fix prices or to influence prices artificially by means of legislation. As appears from other sources, Mr. Barnes believes in breaking down the tariff or embargo barriers between Canada and the United States for the handling of this grain crop of the continent and he believes also that the welfare of the farming industry of the United States in particular depends absolutely upon the normal methods of production and the making of prices on farm crops.

He said the Corporation would retire from one in every respect, Mr. Barnes' remarks control of wheat at the earliest possible moment; that all restrictions would be removed and the business returned to the grain trade with as little inconvenience as possible and that he had the authority of President Wilson for this statement. He said also that efforts were being made to continue the Government's control to the 1920 crop, but that he would oppose that. He said that price fixing on foods and commodities by law always has been a failure and always will fail and also that it ultimately results in reduction of production. The function was a most happy one in every respect Mr. Barnes' remarks being listened to with the keenest interest and frequently interrupted with enthusiastic approval. The impressions Mr. Barnes left behind were distinctly favorable.

NASHVILLE.

John Leiper, Correspondent.

The following Nashville grain and milling men were in St. Louis to attend the meeting of the National Grain Dealers' Ass'n: W. T. Hale, Jr., E. M. Kelly, J. B. McLemore, S. S. Kerr, J. N. Covington, F. M. Allen, Charles Vincent, Paul Pritchard, J. T. Roberts and J. T. Bennett, Jr.

Receipts of grain at Nashville last week were 154 cars. Stocks at the end of the week were as follows: Flour, 32,500 bbls., decrease of 4,800; wheat, 692,000 bus., increase of 105,000; corn, 29,000 bus., decrease of 13,000; oats, 410,500 bus., decrease of 105,500.

Two Nashville plants were sold at auction last week. The steel Elevator & Storage Co. plant in West Nashville, 325,000 bushels capacity, was sold to Chas. D. Jones Co. for $40,000. The Capitol Grain Company plant, including flour mill, was sold to H. H. Hughes for $29,500.

Some improvement is noted in demand for corn meal. Southeastern corn mills with capacity of 147,000 bus. had output last week of 17,632 bus., or 11.9 per cent of capacity, which compared with 7.1 per cent the preceding week. Prices: Bolted corn meal, sacked, per 100 lbs., f. o. b. Ohio river points, $3.40@3.50; plain meal, $3.30@3.40.

Grain trade was of routine volume last week. There were moderate receipts of wheat from St. Louis and the west, with price maintained. Corn is in light supply, and some demand noted. New corn is due to begin moving in a short time. Oats are in fair demand. Prices: Wheat—No. 2 red, $2.30. Corn—No. 2 white, $1.55@1.60; No. 3 white, $1.53@1.57; No. 3 mixed, $1.50@1.55. Oats—No. 3 white, 76½@77½c; No. 3 mixed, 75½@76½c; No. 3 red, 74@75c.

DULUTH.

S. J. Schulte, Correspondent.

A. Laird Goodman, manager of the Duluth Universal Milling Co. here, attended the annual congress of the Millers' National Association at Chicago on Friday and Saturday of last week.

Oats prices gained 1¼c on this market during the last six days at 67⅝@70⅛c for spot. Receipts for some time back have been limited to 5 or 6 cars daily, and stocks in store amount to less than 350,000 bushels. On account of the light movement of wheat, supplies of all grain on hand at the terminals here amount to just 7,900,000 bus., out of an elevator capacity of around 35,000,0000 bus.

Trading in rye was a feature on this market during the last week. Specialists in that grain reported a more active inquiry from the East, and it is understood that boat space was taken for more of that grain to go forward as soon as the present shipping restrictions are removed. With good receipts from day to day, stocks of rye in the elevators now aggregate over 4,350,000 bushels. The market in No. 2 barley closed ⅞c up at $1.37½.

W. P. Majo, of the Duluth Universal Milling Co.; Warren G. Starkey, of Randall-Gee & Mitchell, and Charles F. Macdonald, secretary of the Duluth Board of Trade, have returned from attending the annual convention of the Grain Dealers' National Association, held at St. Louis, Mo. They expressed gratification over the information gained regarding the problems confronting the trade as a result of the discussion that took place during the gathering. They asserted that they felt more optimistic regarding the outlook for the trade during the next few months through the exchange of ideas with dealers coming from all parts of the country.

That a larger run of grain to the of the Lake may be brought about t a diversion of a portion of the wheat now going to Chicago was formation conveyed by Julius H. L national wheat director, in a sta given out during a visit to this ma the end of last week. He said: "I as storage space is available at C for winter wheat taking the Omaha could not conscientiously recomme change in the present arrangeme marketing winter wheat from Oma ritory, as it costs more to move Duluth, while at the same time th there can make all-rail shipments East from Chicago, which could profitably undertaken from Duluth. derstand, however, that storage sp grain is now limited at Chicago, and event of the elevator facilities be plugged up there, it is quite possib an effort may be made to move w Duluth through placing quotations a a parity with Chicago at $2.26.

BALTIMORE.

Robert C. Neu, Correspondent

Stocks of wheat in Baltimore el are now past the four million bushe

Four new members to the Ba Chamber of Commerce were elected last regular meeting of the Board of ors, held Oct. 14.

J. Carroll Fahey, of John T. Fa Co., grain receivers and exporters market, returned last week from a ure trip to New Orleans, La.

Receipts of new water-borne wh the Baltimore market so far this amount to 1,250,000 bushels, compare 1,140,000 bushels arrived up to the sponding time last year.

At the regular monthly meeting board of directors of the Baltimore ber of Commerce, held last week organization went on record as f the daylight saving plan as proposed National Daylight Saving Associa New York.

The grain trade of Baltimore w week notified by George S. Jackson, vice-president of the United States Corporation, that applications for for moving wheat from nearby t will be approved daily to the extent number of cars loaded into ships t before."

John W. Snyder, president of Har Snyder Co., Inc., grain receivers a porters of this city, has been nam the representative of the Baltimore ber of Commerce to the annual con of the Atlantic deeper waterways tion, to be held at Charleston, S. November.

The Baltimore delegates to recent meeting of the Grain Dealers' N Association in St. Louis returned t homes at the close of last week an unanimous in their verdict that th vention was one of the "best eve that the St. Louis brand of hospital one that left a lingering "taste."

It is rumored that owing to th quantity of wheat in the Southwes of which is reported to be lying ground, steadily deteriorating in and condition, intensified efforts exerted to move this accumulation o to the nearest export markets, wh this case, are the Gulf ports; and consequence, very few full cargo shi of wheat will clear from Atlantic p the next few weeks.

Daniel Willard, president of the more and Ohio Railroad; Carl R. president of the Western M. Railway, and Henry Walters, ch of the board of directors of t lantic Coast Line Railroad, hav named as members of a committee cuss with Director General of Ra Hines the proposed deferment of an ment of rates until after the road been returned to their owners.

Members of 21 business organizat Baltimore, which make up the Bo Trade, together with the mayor a council will entertain about 80 repr tive business men of France, Englan

gian steamer Samland sailed delphia Friday for Antwerp with and choice registered Holstein cattle, including 200 bulls, eight hundred cows, 10 Percheron stallions and 40 Percheron mares. These horses and cattle have been purchased by the Belgian government for breeding purposes to replace the stock destroyed during the war.

Among the out-of-town visitors registered at the exchange during the week we note the following: H. L. Austrian, representing Rosenbaum Bros., grain dealers, Chicago; H. E. Brooks, Jr., eastern sales manager for the Harper Flour Mills Co., Harper, Kans.; A. N. Witt, of the Domestic Milling Products Company, Kansas City, Mo.; J. A. Lasseter, Miami, Fla.; J. C. Valentine, grain dealer, Coatesville, Pa., and C. D. Abbott, Clifton, Del.

A. B. Clemmer, secretary of the Commercial Exchange; Robert Maurice, Samuel L. McKnight and Jas. Rodgers, members of the Commercial Exchange party who attended the twenty-third annual convention at St. Louis this week have returned home much pleased with their trip and the interest shown in the convention. It is not definitely known when the other ten members will return, they having dropped off at other points on the route.

MILWAUKEE.

Erich E. Meyer, Correspondent.

Gerald A. Lynch is a new member of the Milwaukee Chamber of Commerce.

Receipts of grain at Milwaukee for the week ending Oct. 18 were 158 cars barley, 66 cars corn, 303 cars oats, 100 cars wheat, 47 cars rye; 8 cars flax; total, 682 cars, against 614 cars the week before, 1,574 cars a year ago and 1,191 cars in 1917.

Shipments of grain from Milwaukee for the week ending Oct. 18 were 209,550 bus. oats, 69,140 bus. corn, 78,440 bus. barley, 54,540 bus. wheat, 79,650 bus. rye; total, 491,326 bus., against 688,240 bus. the preceding week and 1,423,975 bus. a year ago.

H. W. Ladish and A. K. Taylor will be the delegates for the Milwaukee Chamber of Commerce at the international trade conference at Atlantic City. President H. M. Stratton will attend as national councilor of the Chamber of Commerce of the United States.

In the Milwaukee cash grain market values for the week ruled irregular, though generally weaker, foreign exchange being lower, and domestic conditions unsettled. Corn for the week is 3@4c lower, rye 3c, while wheat ruled firm and barley and oats are 1@2c higher. The movement is moderate and trade fair.

The Milwaukee Chamber of Commerce will replace the rye and corn silver cups, furnished to the Agricultural Experiment Association as prizes. If a winner gets a cup for three years he retains it permanently. The chamber maintains five prize cups for the best grain at Madison continually, and the agricultural college authorities reports the competition for them keen every year.

Harry M. Stratton, president of the Milwaukee Chamber of Commerce, has invited Julius H. Barnes, United States Wheat Director, who is making a tour of the West, to stop off at Milwaukee and address the members of the local chamber. The local body is very anxious to acquaint Mr. Barnes with the actual conditions in Milwaukee, relative to car shortage, which in a great part is due to the refusal of the wheat director to allow shipments of wheat from Milwaukee by lake steamers.

Twenty-four per cent, or practically one-quarter of the total number of cars unloaded at Milwaukee elevators during August and September were found to be in a leaking condition on arrival. This is an increase of 5 per cent over the four previous months, the average from April 1 to Aug. 1, 1919, being only 19 per cent. This increase in number of leaking cars can undoubetdly be attributed to the shortage of cars and to the poor condition of the carriers' rolling stock. Under these conditions it behooves every shipper of grain to give particular attention of each car intended for loading of bulk grain.

Visitors registering at the Milwaukee Chamber of Commerce during the past week included the following: E. F. Chaphan. R. J. Hardy, Boston, Mass.; Chas. Costentrocher, New York; H. D. Shaw, Buffalo, N. Y.; H. S. Klein, J. McGuigan, Chicago, Ill.; M. Strom, Soo City; Geo. Strom, Des Moines, Ia.; J. A. Streicher, Toledo, O.; H. J. Baker, Fond du Lac, Wis.; E. Dwyer, Ft. Dodge; H. D. Baldwin, Mason City, Ia.; W. G. Crocker, F. Ingold, Minneapolis, W. B. Webb, Wabasha, Minn.; Wm. Murphy, Sycamore, Ill.; J. Steenhone, Sioux Falls, S. D.; F. Melius, Adell. C. J. Kaiser, Palmyra, Wis.; Howard Brazer, Philadelphia, Pa.; H. L. Lamoreaux, J. Voelzke, Chicago, Ill.; E. L. Barnes, Milton. Wis.; F. Johnston, Marquette, Mich.; John Cronan, Rose Creek, Geo. Bromly, New Ulm, Minn.

The board of directors of the Milwaukee Chamber of Commerce adopted the following resolution: "That in case 'contents' of a car of a certain specified capacity is sold for shipment and a different sized car is shipped it shall be understood that the contract quantity is that designated as the capacity of car sold; e. g., contents of an 80,000-pound capacity car sold, and a 60,-000-pound capacity car shipped, the quantity sold is 80,000 pounds, any quantity over or under 80,000 pounds to be settled for as provided in Section 17 of Rule 1. When the same sized car is shipped as specified in the sale contract, and is loaded to full capacity, but owing to the light weight of the grain contains less than the quantity so specified, the contract shall be considered completed; e. g., on a sale of an 80,000-pound capacity car, and a car of that size shipped but containing only 60,-000 pounds of grain, contract is fulfilled."

BUFFALO.

E. Bangasser, Correspondent.

Rye was quoted at $1.43 for No. 2 on track but no sales were made. A car of No. 3 sold at $1.36 through billed.

Receipts of grain by lake as well as by rail have dropped off heavily this week and there seems to be little prospects of any improvement for some weeks.

Wheat offerings were extremely light and there was a good inquiry at stronger prices than last week. There was more smutty wheat than anything else. Straight No. 2 red sold at $1.30; No. 3 red, $2.26@2.27, on track, through billed.

There was a gradual creeping up of oats prices and just about enough demand to take all the offerings at close of each day's business. Good weights, however, were mostly wanted and a shading was necessary on the lighter offerings. The oatmeal mills were not in the market to any extent. Closing prices were 1¼c higher than last week. No. 1 white, 77¾c; No. 2 white, 77¼c; No. 3 white, 76¼c; No. 4 white, 75¼c on track, through billed.

There was a liberal supply of corn on the market following the holiday, but also a good demand and prices opened firm at $1.53 for No. 1 and No. 2 yellow. There was a break of 2c the next day and all the offerings were cleaned up. Yesterday the few cars offered brought 2¼c advance and the closing was firm for straight old corn at that advance, No. 1 or No. 2 yellow $1.53. Quite a few cars of new and old mixed arrived, some heating and others musty, a car of No. 6 yellow selling at $1.49 and one musty at the same price. It was difficult to move low color mixed corn, a car of No. 4 going at $1.45½ and considered a good price. There are several cars on the market today and no buyers.

Inspection track receipts for the week: Wheat—No. 2 red winter, 7 cars; No. 3 red winter, 14 cars; No. 4 red winter, 13 cars; No. 5 red winter, 1 car; sample, 1 car; No. 2 soft white, 1 car; No. 1 mixed winter, 7 cars; No. 2 mixed winter, 6 cars; No. 3 mixed winter, 8 cars; No. 4 mixed winter, 3 cars; No. 2 dark hard, 2 cars; No. 3 dark hard, 4 cars; No. 1 hard, 1 car; No. 2 hard, 28 cars; No. 3 hard, 24 cars; No. 4 hard, 4 cars; No. 5 hard, 4 cars; sample, 1 car; No. 1 Northern, 1 car; No. 2 Northern, 7 cars; No. 3 Northern, 20 cars; No. 4 Northern, 1 car; No. 5 Northern, 3 cars; No. 1 dark Northern, 2 cars; No. 2 dark Northern, 7 cars; No. 3 dark Northern, 17 cars; No. 4 dark Northern, 5 cars; sample, 2 cars. Corn—No. 1 yellow, 24 cars; No. 2 yellow, 60 cars; No. 3 yellow, 4 cars; No. 4 yellow, 3 cars; No. 6 yellow, 5 cars; sample, 4 cars; No. 1 mixed, 1 car; No. 2 mixed, 4 cars; No. 3 mixed, 3 cars; No. 4 mixed, 3 cars; No. 1 white, 3 cars; No. 2 white, 2 cars. Oats—No. 1 white, 18 cars; No. 2 white, 58 cars; No. 3 white, 100 cars; No. 4 white, 4 cars. Rye—No. 3, 1 car; sample, 2 cars.

CLEVELAND.

F. R. Sowers, Correspondent.

Miss Helen Barrows, formerly assistant secretary of the Grain and Hay Exchange, resigned her position the first part of September and has entered the Conservatory of Music, Oberlin University.

C. E. Arthur, former traffic manager of the Cleveland Milling Co., who is now representing a large Buffalo elevator company in Ohio, was a caller at the Grain and Hay Exchange one day last week.

Rumor has it that P. A. Murray, sales manager of the Cleveland Grains Drying Co., will soon be engaged in the sale of stocks and bonds and intends severing his connection with the Cleveland Grains Drying Co. in the near future.

Quite a representative delegation of Cleveland grain men left Cleveland Sunday, October 12th, for the Grain Dealers' National Convention in St. Louis. This delegation was headed by H. W. Robinson, president of the Grain and Hay Exchange of Cleveland.

Prices for the past week have held rather steady, covering grains and oats particularly, staying close to 74c per bushel in this market. Corn has shown a slight decline amounting to about 3c per bushel for the past week. A price of $1.48 per bushel prevailed on Wednesday.

Some new corn is being received in this market, the Union Elevator Co. having unloaded a few cars in the past week. This has been of especially fine quality and reports from the state in general indicate Ohio will have the second largest crop ever experienced and the finest quality of corn ever known.

We see in the Price Current-Grain Reporter of October 8th that Cincinnati has for secretary of her Grain and Hay Exchange one who served in the world war and is now a moving spirit in the great war organization, namely the American Legion. In this connection it may not be amiss to remark that the Cleveland Grain and Hay Exchange has for secretary one who served throughout the world war in every grade from buck-private to first lieutenant in the Field Artillery and has helped organize one post of the American Legion and is at the present time secretary of the Deckert-Waterson Post, which, by the way, is the largest regimental post now in the state of Ohio.

An interesting caller at the Grain and Hay Exchange in the past week was G. A. Collier, representing the Bureau of Markets, Washington, D. C., who is investigating the advisability of establishing federal grades of hay. It seems that there is considerable interest in this matter of federal grades for hay throughout the country and it has the endorsement of the National Hay Association. Mr. Collier investigated the trade in this locality and stated that he was satisfied with the information secured. He also accompanied the regular hay inspector of the exchange on one of his inspection trips to review the manner in which car-door inspection is made and stated on his return from this trip that he was confident our service was without fault.

KANSAS CITY.

T. J. Tanner, Correspondent.

Ear corn from the new crop in Oklahoma is selling on the basis of $1.10 a bushel.

Ninety delegates from Great Britain, France, Italy and Belgium to the International Trade Conference in Atlantic City, will spend November 7 and 8 in Kansas City while making a tour of the West.

L. W. Forbell, of L. W. Forbell & Co., grain commission merchants, New York City, visited the Kansas City Board of Trade Thursday after attending the convention of the Grain Dealers' National Association in St. Louis.

About 300,000 bus. of wheat and other grains have been removed from the Murray elevator, which was blown up in a grain dust explosion September 13. The remaining 700,000 bus. may be taken out by November 1 if cars prove as plentiful as now seems probable.

Major Moberly, for several years connected with the Moore-Seaver Grain Co. of Kansas City and first president of the Traveling Grain Men's Association, has gone to Des Moines, Iowa, where he will hereafter be associated with W. J. Bartz & Co., grain commission merchants.

George S. McClanahan, a Kansas City attorney, has been appointed receiver for the Missouri Farmers' Mutual Crop Insurance Co., which failed to pay losses of $1,000,000 on Missouri crops during the last year. Stockholders, in applying for the receivership, alleged that $200,000 paid in premiums was squandered or embezzled by the company's officers.

Delay in threshing the wheat crop west of Ellis and Plainville, Kans., has proved disastrous to many farmers, whose stacks were caught in the heavy rains of recent weeks and wet from top to bottom. William Schrenkler of Wakeeney, who was in Kan-

sas City this week, said the grain had sprouted and that many thousand bus. would be fit only for hog feed.

H. H. Watson of Longview, Tex., a miller, whose license was canceled under the Food Administration, was before D. F. Piazzek, zone agent, in Kansas City, Wednesday, with an application for a renewal under the United States Grain Corporation. Alfred Brandeis, head of the enforcement division of the corporation, was present and took the case under advisement.

The Board of Trade golf game at the Hillcrest links, in which 65 members and friends participated, was a big event. Winners of the low score contest were F. A. Theis, W. W. Marshall, Shannon Douglass and W. G. Dilts. In the blind hole event the successful players were W. M. Fible, E. O. Bragg and Harry Stephenson. Blind bogey honors went to John Fennelly, Oscar Cook, A. R. Aylsworth and G. G. Lee.

Announcement of the Railroad Administration's decision to heed the protests of the Kansas City Board of Trade and the grain interests of Kansas by providing immediately an ample supply of cars to relieve grain and flour congestion was received with pleasure by local wheat handlers and millers, as well as those of Kansas. However, in view of disappointments in the past, some dealers here said they would await sight of the cars before rejoicing. The new prospect was confusing to the corn traders, some of whom feared the preference to be given wheat would hold corn back, while others said that if more cars came to the southwest the corn shippers would demand their share.

Cash Grain Markets.

Wheat.—Receipts for the week, 684 cars, against 1,078 a week ago and 678 a year ago. Adverse transportation conditions in the southwest reached a climax this week, but at their worst the trade was given new hope by the decision of the United States Railroad Administration, at a meeting of regional directors and railroad heads in Chicago, to afford relief not only for Kansas but for Kansas City elevators. About 500 cars a day are to be sent to Kansas, and Kansas City is to have cars to relieve congestion here. By the end of the week the elevators here had begun to receive cars in larger numbers than for a month past. It is said that houses here have 2,000,000 bus. of wheat sold to mills eastward, and this grain will go out promptly after a long delay. The United States Grain Corporation owns 8,000,000 bus., or more than half of the local stocks, and some of this will be taken slowly. Reduction of stocks here is absolutely necessary to permit a larger movement from the country. The country stocks to be given first relief are those in an exposed condition. Demand this week was mainly for milling grades of hard and soft, which were inadequately offered. Hard wheat closed unchanged to 2c higher than a week ago, with the best quality 32c over the guarantee level. Soft wheat scored net gains of 4@6c, the best quality showing 10c premium over the minimum level. Anticipating a larger movement of wheat into the market, buyers Saturday were disposed to look for some concession in prices during the next few weeks. Closing quotations were: Hard wheat—No. 1, $2.22@2.52; No. 2, $2.20@2.51; No. 3, $2.15@2.50. Red wheat—No. 1, $2.26@2.28; No. 2, $2.26@2.28; No. 3, $2.18@2.24. Stocks were 15,168,000 bus., or 242,000 less than a week ago. A year ago the stocks were 13,674,000 bus.

Corn.—Receipts, 59 cars, against 83 a week ago and 168 in 1918. With offerings reduced and no new corn arriving, there was a stronger tone in the market, though buying was confined to scattered feeding and local orders. Yellow and white failed to maintain the sharp premiums which they had shown over mixed. The close on mixed corn was 2@3c higher, with No. 2 at $1.43 and No. 3 at $1.39@1.41. White ended unchanged to 1c lower, at $1.44@1.45 for No. 2 and $1.41@1.43 for No. 3. Final prices of yellow were unchanged to 1c higher, with No. 2 at $1.44@1.45 and No. 3 at $1.42@1.43. Preference to be given to the movement of wheat may hold back the new corn shipments. Stocks here increased 3,000 bus. to 56,000, against 457,000 a year ago. All corn in the southwest is believed to have been matured before the recent frosts. The quality of the new crop is generally admitted to be fine.

Oats—Receipts, 83 cars, against 153 a week ago and 89 a year ago. Though buying was mostly by local feed dealers and elevator men, there was a good demand for all oats of heavy and medium weights. Samples of light test were slow and hard to sell. White oats advanced 2½@3c, closing with No. 2 at 71@72c and No. 3 at 70@71c. The final prices of mixed were 66@67c for No. 2 and 65@66c for No. 3, showing 1c advance. Red oats were scarce, closing unchanged to 1c higher, at 67@68c for No. 2 and 66c for No. 3. Local stocks increased 73,000 bus., to 1,217,000 bus., against 2,774,000 a year ago.

Kafir and milo—Receipts, 19 cars, against 32 a week ago and nothing a year

ST. LOUIS.

E. Reeves, Correspondent.

lessian fly pest is so bad in the fields of St. Louis county and that federal and state agents are to eliminate the pest.

Hart of the Mid-West Consumers o., who was at the convention last as on 'Change trying to purchase ership certificate in the Merchants e.

Taupen, the well-known grain man Vasse, Mo., was much in evidence onvention, shaking hands with his iends. He was introduced to the did not know him, by Carroll of the Seele Bros. Grain Co.

barges were loaded with wheat y for the U. S. Grain Corporation. rt. One of hard winter was loaded Marshal Hall Grain Co. from the on elevator, and a barge of soft was loaded out of Elevator B.

unt Secretary Arthur Holthause, erchants Exchange, endeared him- he ladies who assisted in the reg- at the convention, by looking after their wants and seeing that they were provided with meals promptly.

Charles F. Rock, "attorney-in-fact and general manager" of the Millers Exchange of Kansas City, was on 'Change last week, shaking hands wtih his many friends who attended the convention and hustling for business for his organization.

W. P. Anderson, president of the W. P. Anderson & Co. Grain and Commission Co., of Chicago, a member of the Merchants Exchange of St. Louis, was at the convention last week in conference with his St. Louis representative, W. B. Taylor.

Eddie Loesch, who made many friends by his faithful and earnest work at the convention, has received several flattering offers to travel, from grain firms who wish to utilize his extensive acquaintance in the grain trade, but Mr. Loesch would not feel at home away from Secretary Smith and the Merchants Exchange.

Wires to local grain men from Texas say that because of big crops and intensive oil development, Texas faces a car shortage which promises a serious menace to the agricultural and commercial interests of the state, according to a statement issued by the State Railroad Commission. The wheat is rotting in the fields for want of cars.

Vice-President Charles L. Niemeier, of the Merchants Exchange, remarked that the most notable thing at the Grain Dealers' convention was the absence of nonsense. "I noticed," said Mr. Niemeier, "that the delegates were strictly business at all times and there was less horseplay than I ever saw before at a convention where so many delegates were assembled."

The folder issued by Harry Watson, of Ichtertz & Watson, on "Old Days and New" was one of the best things which were handed out at the convention, and a number of the delegates remarked that they would file it away for reference. It gives a brief history of the Merchants Exchange and compares its past glory with the present. It may be had on application to the firm, whose ad appears in this issue.

P. P. Connor, the veteran auctioneer for the Merchants Exchange, on Wednesday sold a car load of gray shorts "for the account of whom it may concern," and owing to his persuasive methods he received $52 per ton for the shorts, which was the highest price paid that day. Vest Lancaster said that if he could get that price for them, Mr. Conner could sell four cars for him.

Vice-President Charles L. Niemeier, of the Merchants Exchange, and John L. Messmore departed Sunday for Atlantic City to represent the exchange at the International Trade Conference, called by the United States Chamber of Commerce, to meet Oct. 22, 23 and 24. President E. C. Andrews, of the Exchange, who was chosen as one of the delegates, was unable to attend and delegated Vice-President Niemeier to attend in his stead.

William T. Hill of the J. H. Teasdale Com. Co., had a scare Wednesday when a $100 bill which he placed loose in his pocket became mixed with some telegraphic order blanks and slipped in the fold of one of the blanks. When Secretary Eugene Smith heard of the loss a notice was posted on the blackboard of the Merchants Exchange telling of the loss, but Mr. Hill, with his usual modesty, requested that his name be withheld. When checking up his trades, in the afternoon, Mr. Hill found the missing bill folded up in one of the order blanks. A number of the convention visitors who were on 'Change spent some time in trying to locate the missing bill.

On Monday, Oct. 20, the members of the Merchants Exchange voted upon a proposition to amend Paragraph 7 of Section 2, Rule VIII, so that when amended the paragraph will read as follows:

On and after Oct. 21, 1919, regular contracts for oats for future delivery shall be for "contract" oats, and on such contracts tender of any or all of the following grades shall be sufficient: No. 1 white oats, No. 2 white oats, No. 3 white oats. Provided, however, that on all No. 3 white oats so tendered one and one-half cent (1½c) per bushel shall be deducted from the contract price." This change was made necessary by the elimination of "standard oats."

Weekly Price Range.

John Mullally, who is identified with his father, Martin Mullally, in the Mullally Hay & Grain Co., has "gone and got married," assuring that John's pleasing personality during hay conventions prior to the great war will be in evidence from now on, as he was retired from the service sound in every limb.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

Charles E. Lewis, of C. E. Lewis, is visiting Chicago and eastern centers.

Frank Hurley, local manager for Shearson, Hammill & Co., returned today from a trip to Chicago.

The new part of the Minneapolis Chamber of Commerce trading floor is all inclosed and work on the interior is being rushed.

LeRoy D. Godfrey, of Godfrey-Blanchard Co., Minneapolis, was elected a director of the National Grain Dealers' Association at their St. Louis convention last week.

At the close of the market Friday Julius H. Barnes addressed the members of the Minneapolis Chamber of Commerce Association. He had nothing new to say and a lack of definite information in his speech was a disappointment to his audience.

Dan McKinnon, Minneapolis manager for Thomson & McKinnon, Chicago, returned to the trading floor today. He was enjoying a vacation with his wife, part of which was spent in New York City as guests of Mr. Brosnahan of the New York office of the company.

Cash Markets.

Wheat — The cash wheat situation is weaker again and the demand for low grades is not nearly as brisk as it was owing to the heavier supply running to market. More cars are being distributed through the Northwest and interior elevator stocks are being transferred to terminal markets in heavier volume. There is a good local demand for the most desirable types of wheat and there has been a rather sharp eastern demand for round lots that could be shipped to the head of the lakes in time to be shipped via the water route.

The demand for winter wheat lagged most of last week except where the semi-dark offerings were concerned. Today there was a good demand for most any kind owing to the car situation in the Southwest and indications that the movement will fall off again.

Durum wheat is sagging because of the heavier receipts. There is a fairly active demand for choice amber, but the buyers are not paying the premiums they bid last week. The government buyer is taking over some of the ordinary durum.

No. 1 dark northern closed today at $2.60 @2.75; No. 1 northern at $2.55@2.65; No. 2 drk northern at $2.55@2.70; No. 2 northern at $2.50@2.60; No. 3 dark northern at $2.45 @2.65; No. 3 northern at $2.40@2.50; No. 2

BARLEY MARKETS.

MILWAUKEE.—In the Milwaukee barley market, good malting and pearling qualities remain firm, being scarce and wanted by industries and shippers, while thin grades are hard to place and prices easy. Receipts are moderate, being greatly retarded by the shortage of cars. Prices for the week improved 1@2c. Receipts of barley for the week were 158 cars, against 176 cars a week ago and 253 cars in 1918. Current quotations are: Good to choice, 48 to 50 lb. test is quotable at $1.36@1.38; bright, $1.39@1.40; fair to good, 45 to 47 lb. test, $1.29@1.36; low, 41 to 44 lb. test, $1.21@1.33; 36@40 lbs., $1.15@1.20; feed, $1.15@1.25. Iowa quoted $1.20@1.36; for light to fancy; Wisconsin, $1.20@1.40; Minnesota, $1.20@1.35; Dakota, $1.20@1.35; feed and rejected, $1.15@1.25.

DULUTH.—Trade in barley fell away on this market during the last week. Eastern call was lacking and cash handlers experienced difficulty in disposing of the comparatively light movement from day to day. Receipts during the week aggregated 61 cars, against 38 last year, and prices eased off 2@7c at 95c @$1.27.

BUFFALO.—Barley dealers did practically nothing this week, maltsters holding off for the word to resume business or throw up the sponge. Dealers seem to have confidence in the outcome and held on to prices. Quoted: Old malting, $1.45@1.52; feed, $1.34@1.42; new malting, $1.35@1.42; feed, $1.29@1.33 on track, or in store, Buffalo.

CHICAGO.—The barley market all week was a very dull and listless affair. Some of the better qualities were taken by the pearlers early in the week, but for the most part the maltsters were the only buyers of any consequence and prices ruled rather lower almost through the entire week. On Saturday, however, there was a slight improvement in the tone of the market and prices went 1c higher, with a broader demand, not only for the better kinds but even for the poorer varieties. Possibly prices were pulled up by the strength in corn, although maltsters and the industries as well as the elevators were willing to take the better and even some of the lower grades. Monday's market had a good undertone although prices were not different from those reported on Saturday. The general demand, however, was better especially for the good qualities. During the day 14 cars were reported sold at a range of $1.23@1.34, and two cars reported to arrive at $1.22. Futures, however, were dull although firm; December selling up to $1.31¼ and closing at $1.30. May closed at $1.29½ asked. Exports for the week were 380,000 bus., compared with 31,000 a year ago.

PORTLAND.—There is very little business in barley passing. There seems to be no demand from anywhere and although sellers have had trouble in disposing of their holdings prices have not materially changed. The business there is done is largely outside the exchange and brokers are in hopes that with the coming of colder weather the market will take on a better tone, says the *Commercial Review*. Just now buyers are showing no interest in the samples and there is no demand from the East; in fact, eastern barley is offered on the coast markets. Local quotations for No. 3 blue barley: $63.50 per ton; feed quality, $62.50; eastern, $61.50.

SAN FRANCISCO.—The barley market is quiet and dull. Some cargoes have been recently dispatched to Europe and there is tonnage waiting for ships now. On the exchange, however, very little business is being done. Futures are slow; contracts are small. Feed values are quoted at $2.90@3 by the *Commercial Review;* shipping grades according to quality at $3@3.10 per cental.

KANSAS CITY.—Barley offerings increased 5 cars this week, receipts being 16 cars, against 45 a year ago. Though shipments reduced local stocks 6,000 bus., to 138,000 bus., there was no urgency in the demand for either manufacturing or feeding account. Milwaukee maltsters were not a factor in the market, owing to the generally poor quality of the samples here and the uncertainty of the prohibition case. Prices declined 4@7c, to $1.19@1.20 for No. 3 and $1.16@1.19 for No. 4, the shortage and the discount under No. 3, pound for pound, accounted for the continued light movement from the country. Local grinders quoted whole ground barley feed at about $2 per cwt.

MINNEAPOLIS.—There is a fair class of barley wanted every day, only a few cars are available. Maltsters pay fairly steady prices compared with the futures, provided the futures do not rally too sharply. Thin barley in slow demand and relatively easy. Daily offerings are light.

RECEIPTS AND PRICES OF RYE

Receipts of rye at the principal primary markets of the Central West for the week ended October 17, and for the corresponding week last year, as compiled by the *Minneapolis Market Record*, were:

	1919. cars.
Minneapolis	167
Duluth	248
Chicago	99
Omaha	33
Milwaukee	102
Total	749

Closing outside prices of rye of standard quality and spot cash for each day of the week beginning Oct. 10, were:

	Mpls.	Dul.	Chi.	Oma.
Oct. 10	$1.40	$1.40½	$1.42½	$1.30
Oct. 11	1.39⅝	1.40⅛	1.40	1.32
Oct. 13	1.39⅛	.....	.....	.....
Oct. 14	1.36	1.36⅝	1.39½	1.27
Oct. 15	1.34	1.34½	1.37	.....
Oct. 16	1.33⅛	1.33¼	1.36½	1.25
Oct. 17	1.35	1.35½	1.38¾	1.27

The price of bread in Italy has been increased by 10 centimes (2c) per kilo. This increase will enable the treasury to save about $100,000. Later on the price will be again advanced the same amount.

Going to Pre-War Basis.

So far as the grain markets are concerned, we are certainly approaching pre-war, or normal, conditions faster than the trade anticipated. Prices, as well as their range of fluctuation, are the basis for this assertion. The past week witnessed one of the dullest corn markets in many a year. The trade is maintaining a waiting attitude. The incentive to operate extensively on either side has been lacking of late and this may be assigned as the true cause for present dormancy.—*Simons, Day & Co., Chicago.*

More Wheat Cars.

As a result of the Chicago conference last week, Director General Hines says that the various railroads in the wheat territory are to be given more cars and that wheat will be given immediate preference in movement, so that what is on the ground or in farmers' bins can be marketed and further deterioration stopped. There has already been considerable loss by wheat getting out of condition on account of heating and live weevil, and this will grow to serious proportions to wheat in bins where it cannot be turned over and treated for weevil and kept in condition. The demand for wheat has been dull, no shipment being made, eastern lake ports being full. This may be relieved this week. Red winter has lost some of its premium but the hard is in fair demand and selling from 1 to 2c above the red. Some bin burnt wheat arriving and grading sample grade account heat damaged berries, also considerable live weevil but less trouble with the bran bugs.—*W. H. Perrine & Co., Chicago.*

Fall Meeting Ohio Association.

Secretary J. W. McCord has announced to the trade that the fall meeting of the Ohio Grain Dealers' Association will be held at Columbus on Friday, Oct. 31. A large turn-out is expected.

Wherever grain or hay is handled, there the firm of BRIDGE & LEONARD is well and favorably known.

BROOM CORN.

Field activity was retarded by additional rains in broom corn areas last week, says *The Broom Corn Review*, but reports from field points indicate a firm condition with prices as a whole ruling somewhat higher. With the exception of the Lindsay district, where marketing was principally by deliveries on street markets, the big end of the crops have been bought by driving and under present conditions this method will probably continue, as the tonnage in northwest sections is estimated at less than any previous year. In the Lindsay district, no deliveries are being made or country buying due to wet weather and reports are that 25 to 30 cars changed hands at various points in that section from warehouses this week at prices ranging from $200 to $275.

The Wichita market was firm and active, the range being from $125 to $300 with a bulk at $150@250, with best at $300. The central Illinois market is quiet but prices are strong at $200@360 for Illinois stock.

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

The Gibbons Grain & Elevator Co. of Kearney, Nebr., will erect a 600-bbl. flour mill at an estimated cost of $100,000. Contract has been let to the Burrell Engineering & Construction Co., of Chicago.

The Nebraska-Consolidated Mills Co. recently organized at Omaha, Nebr., has taken options on five flour mills, which it expects to take over and operate. The mills are the Omaha Milling Co. plant in Omaha; the Hastings Mills, Furry Mills at St. Edwards. The company is capitalized at $2,500,000 and A. R. Kinney of Ravenna is president and general manager, with offices in Omaha. The Omaha Flour Mills Co., in disposing of its plant, retains control of its brands and will use them when its new mill is erected.

J. K. Mullen of Denver, proposes to erect in Salt Lake City, Utah, within the next 18 months a flour mill of 1,000 bbls. daily capacity and an immense grain elevator, calling for the expenditure of a half million dollars.

A new 2,000-bbl. flour mill and other buildings are being planned by the Red Star Mill & Elevator Co. as an extension to the company's large milling plant in North Wickita, Kans. The improvements will cost close to $850,000. Site has been purchased. The mill at present has a daily capacity of 2,000 bbls., and a storage capacity of 1,200,000 bus.

Exports of Wheat and Flour.

Exports of wheat and flour in July and August as reported by the Department of Commerce of wheat and flour from Sept. 1 to Oct. 3 amount to 44,588,000 bus. of wheat and 4,322,000 bbls. of flour, equal to 64,037,000 bus. of wheat, compared with 44,865,000 bus. of wheat, and 4,828,618 bbls. of flour last year, September figures being prorated as well as three days in October, making a total equal to 65,990,000 bus. Last year's official figures are supplemented by army and Red Cross shipments.

Flour Market.

While there was more milling activity in the Northwest and West last week and a good demand for flour, especially the clears at the leading distributing centers in the East the trade was rather lifeless. Of course in the face of the longshoremen's strike, the difficulty of securing deliveries may have had its influence. Eastern stocks are large, however, and there is no reason to press buyings. The request of Wheat Director Barnes to remove the embargo on Canadian wheat also had its effect on the market, both the uncertainty of the President's action and of the market effects of such action being somewhat problematical. Mr. Barnes evidently has no fear that the effect would be adverse to American holders or we may be sure he would have made no recommendation. Wheat, in his opinion, seems likely to "stay put" at present prices, at least through this crop year.

FLOUR MARKETS.

MILWAUKEE.

Milwaukee, Oct. 18.—The local flour market is steady to lower, with spring wheat patent showing a decline of 50c and straight 40@80c lower. The industry generally is greatly handicapped by the shortage of cars, which is steadily becoming more acute, due to the refusal of Julius H. Barnes, wheat director, to allow shipments of wheat from Milwaukee by lake steamers. Business in wheat is reported as only fair, while rye, also showed a slight slackening. The Milwaukee mills during the past week produced a total of 19,320 barrels of flour, of which 14,000 barrels were wheat flour representing 58 per cent of total capacity, and 5,320 barrels were rye flour. Current quotations, in car lots, per bbl., in cotton, are:

Spring wheat patent, $12.1[illegible] straight, $11.20@11.30; first clear, [illegible] rye flour, pure, white, $7.75@7.35; [illegible] straight, $7.15@7.30; rye flour, da[illegible] 6.25. Corn flour is nominally qu[illegible] $3.80; cornmeal, white, $3.70; a[illegible] grits, $3.70, all in 100-lb. cotton s[illegible]

PHILADELPHIA.

Philadelphia, Oct. 18.—Flour rece[illegible] the week were 1200 bbls. and 1[illegible] pounds in sacks. The market c[illegible] dull, with buyers and sellers apart. [illegible] is very little demand for winter wh[illegible] a fair inquiry for spring products, [illegible] record advance in mill quotations [illegible] goods restricts business as sufficien[illegible] hand flour for present use is avai[illegible] 50 to 75 per bbl. less than prices [illegible] by the mills.

Soft winter straight, western, $1[illegible] soft winter straight, nearby, $9.75@[illegible] winter straight, $11.35@11.55; hard [illegible] short patent, $11.75@12.25; sprin[illegible] clear, $9.25@9.75; spring patent, [illegible] 12.35; spring short patent, $12.5[illegible]

BALTIMORE.

ore, Oct. 18.—The general flour
is dull and featureless, with the
orporation not in the market for
and domestic buying of a spas-
d indifferent character. It is re-
hat the Grain Corporation will not
the market as a buyer until No-
Rye flour is particularly hard to
Quotations, per 98-lb. cotton or jute sacks, follow: Spring patent, $12@12.25; spring straight, $11.50@11.75; winter patent, $10.50@10.75; winter straight, $9.75@10.25; rye flour, pure to blended, $6.75@7.50.

NEW YORK.

New York, Oct. 18.—There were two main disturbing factors in the flour situation last week, both of which had a tendency to restrict business. The longshoremen's strike, which effectively reduced the movement of flour from the Jersey side of the river, and for a time the trader here felt rather apprehensive of a shortage in supplies, as the storage capacity in the city proper takes care of requirements for only about a week or ten days. The situation improved somewhat toward the end of the week, but conditions here were far from normal and flour moved slowly. Supplies on the Jersey side were large and it was simply a question of the ability of the railroads to lighter it over.

The other important factor was the proposed removal of the import and export restrictions on wheat by the Grain Corporation. It is believed that if this is done it will also apply to flour, and the feeling of uncertainty as to what effect it will have on prices caused buyers to hold off for further developments before making purchases. Prices were to a large extent nominal owing to the lack of business, and while mill quotations were still firm, flour was offered by resellers at concessions. Spring patents were offered by the mills at $11.85@12.50, winter straights at $10@10.40, and Kansas straights $11.25@11.75 per 196 lbs. in 140-lb. jute sacks.

DES MOINES, IA.

Des Moines, Oct. 18.—Quotations on hard winter wheat flour basis 98s f. o. b. Des Moines: Patent, fancy, $11.20@12; patent, straight, $10@11; first clear, $8.50@9.50; second clear, $6.25@8. Flour is moving readily at the present prices.

KANSAS CITY.

Kansas City, Oct. 18.—Flour trade, as reported by local millers, suffered a further restriction during the week, owing to labor difficulties at the ports of New York and New Orleans. Exporting to the West Indies and other destinations on this side of the Atlantic ocean was curtailed, and the United States Grain Corporation made no purchases for European account. There were fair domestic orders for patent grades of both hard and soft wheat flour, the latter going chiefly to the south at 60 cents to $1 a barrel discount under short patent hard wheat flour. The mills, in their weekly output report, showed a reduction of 8,700 barrels, with a total of 75,200 bar-

conditions improving and a more plentiful supply of cars promised, a better flour trade is expected. The interior Kansas mills have been badly congested with undelivered flour, but they will soon have relief. Recent receipts of wheat in Kansas City were too light to afford proper selection for the use of local mills, which operated mainly in grinding grain on hand to fill old bookings.

Wheat millfeeds were very dull and weak until late this week, when the demand for bran in the east and southeast improved. Bran closed at $1.70@1.75 per cwt., sacked; brown shorts, $2.20@2.25; gray shorts, $2.30@2.40.

Prices of flour in carlots, sacked, in 98-lb. cotton bags, per bbl.:

Hard wheat—	Oct. 18.	Oct. 11.
Short patent	$11.40@12.00	$11.20@11.60
Long patent	11.00@11.50	10.80@11.50
Straight	10.50@11.00	10.50@11.00
1st clear	9.50@10 50	9.50@10.50
2nd clear	7.50@ 8.50	8.50@ 9.50
Low grade	6.50@ 7.50	6.50@ 7.50
Soft wheat—		
Fancy patent	10.80@11.00	10.70@11.00
Standard patent	10.30@10.60	10.20@10.50
Straight	9.70@ 9.90	9.60@10.00
Clear	9.00@ 9.40	9.10@ 9.40
Low grade	6.50@ 7.50	6.50@ 7.50

New York Oats Market.

Oats receipts at New York last week, 415,000 bushels. Continued inactivity in the domestic situation was responsible for the narrow range fluctuations of the past few weeks. A recent revival of export business stimulated conditions somewhat, with a demand for the cash grain greatly improved. A better undertone prevailed generally, accompanied by domestic country point commitments of fair volume the latter part of the week. The general strike conditions surrounding the port, which had paralyzed transportation of all commodities, created a critical aspect for both export and domestic receivers of grain, and which, while partially settled, is still to be considered a handicap until a definite conclusion of the varied grievances are adjusted. Permits for grain are still being withheld and only in a few instances have they been granted, where the actual necessity demanded action. The improved railroad port situation, however, has warranted assurances from the Freight Traffic Committee of a resumption of permits within a day or two.—*L. W. Forbell & Co., New York.*

Movement of Wheat.

Government Control in England.

One argument that is being used almost day by day as a plea for the indefinite prolongation of the Ministry of Food is found in the alleged increase during recent years, and especially during the war, of what are termed trusts, which are combinations of wholesalers for controlling the price of essential foods, or of raw materials that are in constant request by the distributors and retailers of such goods. There is no doubt as to the spread of combination among large producers, and also middlemen, in such countries as the United States and Argentina. But it is quite another question whether the only way to defeat their machinations is a permanent retention of what may be termed economic bureaucracy in London. Why should Government officials, who have no particular interest in life beyond drawing handsome salaries which seem to increase in inverse proportion to the actual amount of their work, be better fitted for defeating the fell designs of meat packers, or grain manipulators, than men with whom it has been the business of a lifetime to watch every turn of the market for the double purpose of benefiting the public and themselves?"—*London Corn Circular.*

We don't agree with our contem
ries that "there is no doubt as t
spread of combination" in the U
States. In grain the fact is ex
the opposite. The opening of int
markets has made that impossible
if it ever were possible.

Steinhart in Business.

It has been previously mentioned in these columns that A. N. Steinhart, originally manager of the Farmers' Elevator Co., at Ransom, Ill., and more recently secretary of the Farmers Grain Dealers Ass'n of this state, with headquarters at Bloomington, has gone into business on his own account at Indianapolis. His resignation as secretary of the state association will take effect on Nov. 1.

It appears from later information coming to us that Mr. Steinhart and Homer Bell, manager of the Farmers Elevator Co. of Watseka, Ill., have formed a partnership and will operate at Indianapolis as the Steinhart-Bell Grain Co., the firm having purchased membership on the Indianapolis Board of Trade.

Lawrence Farlow, formerly manager of the Fisher Farmers Elevator Co., who has been acting as Mr. Steinhart's assistant in the secretary's office at Bloomington, is mentioned as the probable successor to that office.

Stokes-Barkley, St. Louis.

The business of A. H. Stokes, a member of the Merchants' Exchange, St. Louis, and that of F. H. Barkley of Decatur, Ill., were consolidated recently and the new firm, Stokes-Barkley Grain Co., is announced. Their business in grain, hay and seeds will be conducted from the main office in the Pierce Bldg., St. Louis, with a branch office at Decatur, Ill. The merging of these firms gives in the present combination an advantage to country shippers through their knowledge of terminal market and shipping details of the business. Mr. Stokes has for some time handled a consignment business in St. Louis of considerable volume and Mr. Barkley has been closely identified with the Central Illinois grain trade for many years. Their business clientele assures an excellent basis for the start of the new firm and they are quite justified in expecting the geographic market and financial arrangements of St. Louis will build the business up nicely.

An Expanding New England Firm.

Much has appeared herein regarding the interesting business in our line in New England territory, known but little in a personal way to the great grain producing countries of our Central and Western states. There is an old firm, established in 1871, at Middletown, Conn., Meech & Stoddard. They have been operating in the Connecticut valley with steady growth and have now completed two other plants, the progress of which has been reported from time to time in THE PRICE CURRENT-GRAIN REPORTER. They are the Middlefield Grain & Coal Co., and the Meech Grain Co. of Middlefield and Hartford, Conn., respectively. Each is equipped with its own grinding plant to manufacture feeds in a big way and to do a general merchandising business in grain, flour and hay as well.

Mr. Meech, while in attendance at the Grain Dealers' National Convention at St. Louis last week, volunteered a very fine commendation of the scales and packers so widely installed and distributed by the Richardson Scale Co., whose home office is in Passaic, N. J., with Western stock and branch managers in many cities. It seems that one of the first installations of a Richardson Scale was made in the Meech & Stoddard plant, and its satisfactory service led to the purchase of others, again proving that the best salesman of any commodity or machine is the satisfactory results of the first sale.

Taylor & Bournique Banquet.

The annual banquet of the branch managers and the home folks of Taylor & Bournique Co. was held in Milwaukee, Friday, Oct. 17. About 25 of the boys were present, the Eastern fellows on the way home from the St. Louis Grain Dealers' National Convention, and in addition to a discussion of business for the coming season, "A good time was had by all."

Chicago Grain Stocks.

Wheat stocks in all positions in Chicago increased 1,400,000 bus. last week, oats, 14,000 bus.; rye, 5,000 bus., and barley 28,000 bus. Corn decreased 179,000 bus. Details follow, the last three ciphers omitted, except in the totals:

	Public.	Private.	Total.	Last year.
Wheat	5,215	13,024	18,239,000	18,316,000
Corn	279	447	726,000	2,667,000
Oats	2,491	4,450	6,941,000	6,647,000
Rye	1,505	1,031	2,536,000	423,000
Barley	82	190	272,000	742,000

Field Seeds

Seed houses are said to be scouring South Dakota for seed corn.

The Midland Seed Co., of Billings, Mont., has been incorporated under the laws of Montana with a capital stock of $50,000.

A number of Iowa farmers have found Sudan grass quite profitable this year, returns as high as $110 an acre from the seed being reported.

An alfalfa seed grower near Pierre, S. D., reports that although the seed crop was light this year his yield made him a return of $45.80 per acre.

The Canadian government is said to be planning the purchase of 2,000,000 acres of seed wheat as a guarantee against shortage on the prairies next spring.

Up to the end of September about 80 per cent of the Iowa timothy seed crop and about 70 per cent of the Missouri crop is said to have been moved from the farms.

The current crop of medium red is reported to have been about 25 per cent sold in the Eastern-Central division of the United States, with quality about the same as last year.

An Illinois seed merchant writes C. A. King & Co. that he has been traveling quite a bit and everywhere finds more tendency to reduce the acreage of small grains. There is a tremendous demand for timothy and clover seeds and the excess grain lands will be seeded to various grasses.

Toledo Seed Prices.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy seed for the week ending Oct. 18:

	Rng. for wk. High.	Low.	Close Oct. 18.	Close Oct. 11.
Clover—				
Oct. and cash.	$31.90	$31.00	$31.00	$31.00
Dec.	30.95	29.90	30.00	30.30
Jan.	31.15	30.05	30.05	30.45
Feb.	31.35	30.30	30.30	30.60
March	31.10	29.95	30.02½	30.50
Alsike—				
Oct. and cash.	29.70	29.00	29.50	29.50
Dec.	29.60	29.00	29.50	29.30
March	29.80	29.25	29.75	29.50
Timothy—				
Cash, old	5.40	5.35	5.37½	5.35
Oct. and new.	5.67½	5.62½	5.62½	5.60
Dec.	5.72½	5.67½	5.67½	5.65
March	5.85	5.77½	5.77½	5.75
April	5.82½	5.75	5.75	5.70

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during week ending Oct. 18, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce:

	Receipts. 1919.	1918.	Shipments. 1919.	1918.
Timothy, lbs.	17,768	208,000	90,000	74,250
Clover, lbs.	121,568	47,118	69,326	90,954

Timothy Seed at Toledo.

Timothy attracted little attention last week. It was fairly strong and a shade higher early, with fair trade, then it shaded off a bit, say J. F. Zahm & Co. The big receipts are main factor. All in all, the market took it pretty well, with prices back to the close on Oct. 11 and 10 cents from the top for the week. Week's receipts 6,276 bags, quite a healthy amount, but none of it was offered for sale.

Monthly Prices of Timothy Seed.

The following table gives the United States estimated average price per bushel to producers of timothy seed on the 15th of last month for seven years:

	1919.	1918.	1917.	1916.	1915.	1914.	1913.
Jan.	$4.34	$3.57	$2.44	$3.05	$2.63	$2.07	$1.75
Feb.	4.51	3.78	2.46	3.19	2.66	2.12	1.78
Mar.	4.54	3.84	2.70	3.28	2.78	2.30	1.72
Apr.	4.69	3.74	2.76	3.51	2.69	2.28	1.74
May	5.05	3.84	3.09	3.33	2.75	2.38	1.76
June	4.63	3.56	3.09	3.26	2.65	2.23	1.77

Dec.	.....	9.65	9.58	.....	20.67	13.53

Duluth Flaxseed Market.

DULUTH, Oct. 18.—Weakness in spot and strength in the distant futures, was the outstanding feature in the flaxseed market during the last week. As a net result of the five days' trading, the spot figure dropped 7@11 cents, October broke 9 cents, and November 2 cents. December gained 2 cents, and May advanced 7 cents.

It was noted that crushers appeared to have lost interest in the market, and it was in fact reported that a prominent operator had closed out a line of October seed, and had switched into the May future. It was asserted in some quarters that the demand for linseed oil had been falling off of late, and that crushers had covered their seed requirements for some time ahead. A close eye is being maintained on the Argentine situation and the probability of substantial imports from that country in the near future, taking into account the quantity of seed on passage. The statement was reiterated that Argentine seed could be brought into this country at around $1.15 cheaper than the American product could be laid down from here in the East.

In view of the general situation, some of the specialists in the flaxseed trade deem it prudent to curtail their operations in view of bearish conditions possibly developing later on. On that account, some of the operators are asserted to have been reducing their lines lately. The show of strength at the end of the week was attributed to covering operations rather than to any new buying.

Receipts were light during the week, amounting to 68,566 bushels, and shipments were confined to one lot of 15,634 bushels, which went down to Minneapolis. Stocks in the elevators were reported at 157,000 bushels.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track	$4.33-37	$4.40-8	$4.23-28
To arrive	4.33-37	4.40-8	4.24-28
October	4.29	4.38	3.38
November	4.26	4.28	3.37½
December	4.24	4.22	3.33½
May	4.21	4.14	3.36

Weekly Linseed Review.

After decided firmness in the early part of the week, the situation in linseed in the United Kingdom has now turned easier and part of the early advance has been lost. Further good arrivals of plate seed are noted, and offerings of the Argentine grade appear to l larging. Indian sorts, however, r comparatively firm. Linseed oil United Kingdom displays an easie dency with prices declining. Th mand for oil has fallen off to extent. Continental enquiry is als active.

INDIA.—Arrivals of seed at the continue rather light, and ship naturally are on a small scale. week's outward movement amou to 140,000 bushels. Weather has good, and new crop prospects c considered generally favorable.

ARGENTINE.—Weather has b somewhat colder in sections, bu new crop condition is still gen good. February seed has firmed. in this option cover on the slight dication of unfavorable weather. ican interests, apparently, have

is stronger and is quoted at ents in carlots, and 18 cents s. Bluegrass is stronger and lemand, carlots being quoted .50, and less cars at $3.50@ 1 lb. seed; and ten cents a for 1919 grade. Timothy car- th $11.75@12, L. C. L., $12.50. ass is quiet at $3.25 a bushel.

SEED SITUATION.

GRASS SEED LARGELY SOLD.

TEXAS.—Lubbock and sur- ounties are producing a won- of high grade field seeds as the continued rains, shortage nd congested freight condi- is part will delay movement

an grass seed crop, which is ly harvested, is a very fine bulk of which has been sold delivery at a fair price.—

Seed Trade Difficulties.

e Current-Grain Reporter:
confirm today, Oct. 2, our th ult. and to add:
ER.—Offers have been some- abundant for the last few notwithstanding this prices every day, so that during t the buyers withdrew be- fore the impossibility of quoting reasonable prices. Moreover, there are very strong fluctuations in the exchange rate, which threaten to check the whole business, as there is no solid base now for quotations. Some offers have been made today at $45 per 100 lbs. c. i. f. New York.

CRIMSON CLOVER.—The farmers don't make any more offers, though they have still a good part of the crop on hand. They prefer to carry the seed over till spring, considering present prices as not advantageous enough. We believe, however, that another decline of the dollar would easily bring the prices to this summer's level.

The French trade has been painfully impressed by the incidents connected with crimson shipments by S. S. *Portuguese Prince*, which carried practically all the seed sold to the United States during the month of July. On account of the dockers' strike at Le Havre, the *Portuguese Prince*, which was supposed to sail on July 25th, had to stay alongside quays owing to the impossibility of completing her cargo. In fact, she could only leave in the course of August, being besides the only vessel which was able to embark goods. Some buyers simply refused to take delivery of their consignments; some others required very heavy deductions.

The difficulties are not yet straightened out at this time, because some exporters want to go to the courts with their claims, in order to prevent the return of similar facts. The Federation of French Wholesale Dealers, in their assembly of this week, consequently decided to examine the making of a sales contract for the export of French seed, in which it would be specially stated that foreign buyers will have to open a bank credit in Paris when passing their orders. It has been remarked also that among the French exporters only the seed merchants maintained their pre-war conditions, and that on the other side the American firms request themselves the above-mentioned conditions for the sales they make in France. Very truly yours.—*H. Fauchet & Cie. Paris, France.*

Toledo Clover Seed Market.

Receipts of clover are light with good demand for cash seed and consignments are advised. Receipts are very light to date for this time of year; some seed has been bought to come here this month that has not yet been received.

The total amount of seed available is not large. That is the outstanding market feature. Little help can be expected from extreme West. Oregon and Idaho did ship a large quantity East the year of their bumper crop. This year it can't be done. Their yield is small. As the hulling progresses in Idaho ideas of a large outturn there are diminishing. Buyers in that district are buying up all the seed they can get. On account of the expense of bringing the seed here it would take very high prices in this market to tease out any of the Western seed. Foreign situation continues strong. Lower prices not expected there later in the season. U. S. will not likely be "on its own" this season.—*Southworth & Co.*

Kansas City Seed Market.

KANSAS CITY, Oct. 20.—Secrecy surrounds the movement of the new crop of alfalfa seed, but some dealers admit that they have been receiving limited quantities of seed during the last two weeks. In certain localities of Kansas there were good yields, while in other normal producing spots there is none. Early matured fields have been harvested and threshed, but there are others in which no threshing has been attempted, owing to rains. Frost caught a very small percentage of late unharvested alfalfa. Seed received thus far shows good quality, on the average. Demand is excellent, as the total supply is known to be short. Prices are firm and higher. Seed, as from first hands, is quoted on a range of $22@28 per cwt.

Millet and Sudan grass seeds continue to move slowly, due to car scarcity and a holding tendency on the part of farmers. Dealers here are inclined to bid low on millet because of the bearish feeling regarding the ultimate markets for cane, kafirs and corn. It is reported that Kansas farmers want $15 per cwt. for their Sudan grass seed, which is about $5 more than Texas seed can be bought for.

No movement of new-crop cane seed is expected before November or December. Dealers are confident that a liberal-sized crop has escaped frost and is safe for harvest. No tentative prices have been submitted.

Receipts of timothy seed continue to indicate that Missouri secured a better crop than was expected, in view of the small acreage. The market is steady, with prices unchanged.

It is conceded that the Missouri crop of clover seed was light and confined to the eastern part of the state. There will not be enough for home uses, but prices are so high that the demand for sowing with wheat will be curtailed.

Blue grass seed trade, as from first hands, is practically all in the past. Dealers are bullish regarding the supply which they secured from the big crop of Missouri and have sold much of their holdings at a good profit. It is expected that pastures will be greatly enlarged next year.

Seed quotations in Kansas City are given as follows:

Alfalfa—Per cwt., $22@28; timothy—per cwt., $9.50@10.50; blue grass—per cwt., rough, $10@15, cleaned, $17@27; clover—per cwt., $35@42; millet—per cwt., $2@3; sudan—per cwt., $8.50@10.

Minneapolis Flaxseed Market.

MINNEAPOLIS, Oct. 20.—There is a sharp demand for flax and prices are strong compared with the futures. Offerings are light. During the week two outside crushers were in the market and paid 15c over for some choice seed. All they wanted was a few cars, but their bidding upset the market and caused local crushers to advance their premiums several cents. The demand for oil is rather keen and all of the crushers are in the market for what seed they can get. There is a good demand for seed to arrive also, but very little is offered. Farmers are not delivering any supplies to speak of and stocks in interior elevators are light. No. 1 seed on spot sells at 10@12c over Duluth October, to arrive at 8@10c over.

St. Louis Seed Market.

ST. LOUIS, Mo., Oct. 18.—Offerings of seeds are light and the demand is fairly active, making the market strong on all

kinds. Choice clover seed is scarce and fancy Northern seed is higher. Red top also is scarce and wanted. Quotations per 100 lbs. are as follows: Clover. choice clean Northern seed, $50@50.50; choice country seed, $46@48; average country lots, $35@45.50; buckhorn mixed, $20@34; poor and trashy, $5@18; alsike—choice, $40@45; fair $30@35; poor, $18@25; timothy—choice, $11@11.50; fair, $10.25@10.75; low grade, $8@9; red top—fancy solid seed, $16; fair machine cleaned, $12@15; chaffy-less millet, golden, $2.75@3.25; Siberian. $3@3.10; common and hog, $2.75@3; alfalfa, $18@25.

Clover and Timothy Seed.

The test of the quality of clover, alfalfa, alsike and timothy seeds made at Ames, Ia., show considerable variation. Many new seeds are being introduced with impure seed. The vitality in some cases is low say C. M. King and L. H. Pammel. Those who want seed tested without cost may send small samples (2 ounces) to the Botanical Section of Iowa State College, Ames, Iowa.

On account of the present attractive prices, much clover and timothy seed of inferior grade is finding its way in the spring market. Such seed frequently contains dangerous weed seed, such as Canada thistle, quack grass, horsenettle, dodder, wild carrot and chicory, and the seed is often of low vitality. The college had some samples so old or poorly cared for that tests showed almost no germination. Some samples also, carry a heavy percentage of dirt and waste. These conditions emphasize the need of inspecting seed before buying it.

In case of regular dealers thruout the state, interest in good seed may be depended upon; the difficulty is in reaching that considerable quantity of seed which comes into the market from miscellaneous sources, often seed of forgotten history, or seed from outside of the state, sent in by parties who fail to conform to the Iowa Seed Law.

Visible Supply of Oats.

Official statement of the visible supply of oats weekly, compared with same weeks of previous three years:

McAllen, Tex., is on the map as having shipped 85 cars of corn to date valued at $180,000. This represents but 40 per cent of the crop in the surrounding territory.

CLIMAX SUPERFINE BRAND.

Readers of our recent advertisement, a little one act play, laid under the open sky, will recall that it repeated a dialogue between a farmer and his son.

In continuing the story, we offer another drawing showing two farms, one very prosperous looking, the other run down, and the owner of the former is tactfully but nevertheless seriously asking the other, "Bill, did you ever buy seeds, put out in convenient size bags by W. H. Small & Co.?"

The owner of the poor farm says, "Yes, one time, 17 years ago, and I guess I shall go back to their seeds and make some money."

The successful farmer replied, "Yes, Bill, you will have to if you expect to run with me in producing bumper crops. I buy all my seeds from them, six different brands, and their bushel bags make a hit with me, as there is no loss of time or seed in buying from my dealer."

PAMPHLETS RECEIVED.

"The Verdict of Public Opinion on the Railroad Question" published by the Association of Railway Executives, 61 Broadway, New York City. This pamphlet is a digest of American newspaper opinion regarding Government ownership of railroads. The press generally has taken a position hostile to this policy and is opposed not only to a specific plan for Government ownership but to the principle itself. This digest contains a rather remarkable paucity of quotations from agricultural publications, which quite justifies the statement often made that the agricultural papers as a rule are singularly lacking in nerve to express opinions which are liable to come in conflict with the private opinions of their readers. Agricultural editors seldom undertake to educate their people in political and economic affairs for reasons that are not entirely creditable to them.

"Representation in Industry," by John D. Rockefeller, Jr. This is a reprint of an address before the War Emergency and Reconstruction Conference of the Chamber of Commerce of the United States at Atlanti Sept. 5, 1918. Mr. Rockefell the strike, two years ago, of coal miners and steel worker Colorado and was instrumen justing the difficulties whic time seemed to be impossibl factory adjustment. The bas adjustment was representati men in the industries involv least until the Fitzpatrick-Fo in the steel industry two week proved very satisfactory. T moving principles of Mr. Ro methods are presented in th here printed.

The Bean Market.

George Forrester of the E. B. Slawson Co., Toledo, says of the bean market: "The movement has been delayed by rainy weather over Michigan and growers are not free sellers of beans when price goes below current levels. From the buyers' standpoint the impression has developed from some source that the market will work lower, and they have held off buying, awaiting the lower price. Increased buying and the better export inquiry lately should stimulate the advance. We are bidding $7.25 for Michigan choice hand picked."

Want a New Bean Tariff.

Michigan and New York bean growers have told the Ways and Means Committee that a tariff of 4 cents a pound is necessary to prevent the extermination of the American bean industry. Nathan Simpson, president of the Michigan Farmers' organization, and S. L. Stridings, president of the New York State Federation of Farm Bureaus Associations, said that American growers have lost heavily on the crops of the last three years.

Mr. Stridings declared that an embargo during the war prevented New York growers from selling the kidney bean in its normal market—the West Indies. "We lost that trade, and Japan took it, has it now and probably will keep it," he said.

Mr. Sapiro, concluding the hearings, said that the Oriental beans now in storage in this country are dumped on the American bean market whenever it shows a rising tendency, causing the price to go down. Oriental bean prices he said have dropped from $4.28 a bushel to $2.75 this year.

Marking Potato Bags.

R. Cuming, secretary of the American Fruit and Vegetable Shippers' Ass'n at Chicago, advises members of the association shipping potatoes that potatoes in barrels, crates and hampers and in sacks of uniform quantity of contents must be marked in terms of weight or dry measure or when packed in barrels in terms of the U. S. Standard barrel. "At a conference with officials of the Bureau of Markets in Washington," he says, "we were advised of the intention of the Bureau to insist upon a strict compliance with this rule, and that action would be taken in connection with any failure to so comply whenever such failure was discovered."

Feedstuffs

Cottonseed Meal for the Hair.

"With corn selling at its present levels a feeder of stock must place a great deal of dependence in some good sack feed as an expense reducer," said C. C. Deardorff of Callaway county, Mo., who sold baby beeves here recently at $16.00, the top of the market the week he disposed of his yearling cattle. "A good many cattlemen figure, 'Oh, well, I raised this corn and I will feed it out this winter, make a little money or be nothing much out on the deal'; this, I believe, is the biggest mistake of the feeder's life. He must figure his grain costing him $1.25 per bushel if it's worth that on the market and he can sell it that way. My choice of feeds is cottonseed, makes little difference, cake or meal, it's all according to whether a man is using it in the corn or outside. I feed it to all my cattle and would not know how to make a dollar without it. More rapid and more satisfactory gains cannot be made with other feeds. Getting the hair into shape is one of the hardest things a feeder has to do and the value of the skin puts much more worth on the animal and has a great deal to do with the selling of the animal. There is always a reason for everything and those are mine for feeding nothing but cottonseed products to cattle."

FEED SITUATION.

FEED IN ACTIVE DEMAND.

GOSHEN, IND. (7).—Feed of every description is in active demand at what seem to be high prices but in reality at very reasonable prices, considering the prices of things in general. There has been some decline in corn but none to speak of in oats, rye and grains. Mill feed is also somewhat lower, but we think that the bottom has been reached.

Farmers everywhere are growing more intelligent and appreciate the importance of keeping stock in order to keep up the fertility of the soil. For that matter, however, they make money by raising and selling the stock. The value of meat as a food the world over is increasing. The wide-awake, active man, no matter where located, cannot get along without it and it is essential to his life and happiness.

Stocks of feed everywhere are comparatively light, owing to the fact that pasturage everywhere in the Middle West and West was scant during the past season on account of the prevailing drouth. Nowhere were there abundant rains in the past few months, with the exception of along the Atlantic coast, as nearly as we can learn. The stock of feed everywhere was therefore used up closely and there is a scant supply everywhere. For that reason, although there may be low prices for corn for a month or two, eventually it will sell at much higher figures and so will all kinds of feed.—*The Goshen Milling Company, per F. E. C. Clark, Pres.*

SHORTAGE OF COTTONSEED AND PEANUT MEALS.

MONTGOMERY, ALA.—As to conditions in this section relative to cottonseed products, we should say that the cotton crop in Alabama and southern Georgia is much smaller this season—compared to previous years on account of excessive rains during the summer and the effects of the boll weevil. In consequence of this, the tonnage of seed garnered this season will be by comparison smaller and as a result the mills are paying from $75 to $85 per ton for the seed, selling their products from $68 to $70 for 36 per cent protein cottonseed meal and $9 to $10 per ton bulk for hulls, all for prompt and thirty days' shipment.

Up to this year southern Alabama and southwestern Georgia raised splendid crops of peanuts of good variety, but by reason of the rainfall of last summer the crops have been considerably reduced, and, too, the acreage was not as great as last year on account of the high prices prevailing for cotton, which induced the farmers to increase their cotton planting, resulting in smaller area being planted in peanuts. Further, the high prices being paid now by the shellers (from $150 to $175 per ton) will not permit of crushing the peanuts for oil or meal; hence there will be only a small quantity of peanut meal produced this season.—*Cantelou Bros.*

FEED MARKETS.

MONTREAL.

Montreal, Oct. 17.—Straight cars of bran are quoted at $45@46 per ton, and shorts at $54@55. The demand is by no means active as buyers are expecting lower prices and are only buying from hand to mouth. Corn feed is steady and sales are reported at $80@82 per ton, mouille at $69@71, and pure barley meal at $69@70, and dairy feed $48@50 per ton including bags delivered.—Trade Bulletin.

LOUISVILLE, KY.

Louisville, Ky., Oct. 18.—The feed market is a little quiet but demand is showing some slight improvement and cold weather will start a better movement. Mills are quoting full lines of mill feed. Prices are somewhat weaker than last week.

Principal quotations, carlots, cotton, Louisville: Bran, $42 a ton; mixed feed, $58; middlings, $60; scratch feed, $70 a ton in jutes; cracked corn, $61; corn and oat feed, $60; corn and oat chop, $60; hominy feed meal, cotton, $55.

TOLEDO.

Toledo, Oct. 18.—The demand for mill feeds shows improvement with the arrival of cold weather this week. Mills here produced only 37,000 bbls. of flour, or 78 per cent of capacity, as compared with 42,500 bbls. the previous week. Supplies of bran and middlings are sold as fast as they can be produced. Dealers look for higher prices from now on as continued cold weather will stimulate demand from feeders. Bran price, $45, and middlings, $57, bag basis, f. o. b. Toledo.

MEMPHIS.

Memphis, Oct. 18.—In mill feeds there continues to be very limited activity and prices are without change, except that shorts are a little easier. In cottonseed meal and feeds there has been sharp rise and prices are still much unsettled. The bad weather in so much of the cotton belt, resulting in damaging seed and lessening the prospective value for feeding purposes, accounts for the rising tendency. At the mill today 7 per cent meal is quoted at $67.50@68, with sellers not urgent. Hulls are up to $7.50 and $8. There is not much buying yet but prospects are for a good demand later.

PITTSBURGH.

Pittsburgh, Oct. 18.—The receipts of feed for the last period show a remarkable contrast to the receipts for the same period a year ago when only 20 tons were bulletined. Last week there was a total of 500 tons. In all 45 cars of feed arrived in the local market, which is a record for many months. Most of this was No. 1 and No. 2 white middlings. There were 12 cars of bran, also a record for some time. Prices are good but nothing in the way of regular quotations have yet been established on the local exchange.

NEW ORLEANS, LA.

New Orleans, La., Oct. 18.—Bran offerings scarce but at the same time enough to take care of the demand. Quote market at $1.85 per hundred, tagged; buyers have been offering $1.90 per hundred. Shorts worth from 60c to 70c per hundred more for brown and gray, respectively. Little or no buying of shorts.

CLEVELAND.

Cleveland, Oct. 18.—Feed prices have shown a slight decline, as for instance, flour middlings are now quoted at $58 per ton in carlots f. o. b. Cleveland in sacks; standard middlings at $48.50; winter bran, $41; spring bran, $40; mixed feed, $49.50; hominy feed, $58; oil meal, $72; cottonseed meal, $71.50; gluten, $65.68; hog meal, $68.68.

NEW YORK.

New York, Oct. 18.—The situation in mill feed during the week was very unsatisfactory to the seller. Offers were again large and, as the demand continued of small proportions, prices experienced a further reduction without attracting much business. Middlings were again comparatively weaker than bran, and this was thought to denote that the mills have a large surplus of this feed on hand

Western spring bran was quoted at $41.50@42; standard middlings, $46.75@47.50; red dog, $68@69; while city bran ruled at $42; middlings $54, and red dog $68.

BOSTON.

Boston, Oct. 18.—Wheat feeds of all kinds were quoted generally lower than last week with the exception of cottonseed meal. There was a little better demand noted from jobbers but hardly any trade reported from the country. The following prices were quoted at the closing: Bran, spring, sacked, $43 per ton; bran, winter, sacked, $44; middlings, sacked, $49; mixed feed, sacked, $49@50; gluten feed, sacked, $69.12; red dog, sacked, $69; second clear, sacked, $69; stock feed, sacked, $59; oat hulls, reground, sacked, $29; hominy feed, sacked, $58.40; cottonseed meal, sacked, $75@77. Receipts for the week ending Oct. 18 were 50 tons.

PHILADELPHIA.

Philadelphia, Oct. 18.—Feedstuf better request and with moderate prices are firm and in some instar material advances over a week a tations represent carlots, to arriv lb. sacks, at cost, per ton: Win $42.50@43.50; spring bran, $42. standard wheat middlings, $47@ middlings, $57@58; red dog, $68@6 $47@48; low grade flour, $68@69; dlings, $46.50@47.50; fine yellow $57.50@58.50; fine white hominy, 59.50; reground oats feed, $26. cottonseed meal, 36% protein, $73. cottonseed meal, 41% protein, cottonseed meal, 20% protein, $60

MILWAUKEE.

Milwaukee, Wis., Oct. 18.—A tone prevailed in the local mill fee during the past week. Bran ha fair demand, with bids somew ranging not more than $36, howe ket prices are holding steady. are very slow and showed a drop ard middlings of $1.50@2, while f dlings declined $3@4. Hominy fe quoted at 2@4 lower. Oilmeal Current quotations are:

Bran, per ton, $36.50@37; stanc dlings, $42.50@43; flour middlings 52; red dog, $62.50@63.50; hom $55@57; rye feed, $42@43; old-pr meal, $75; cottonseed meal, $75@ ers' dried grains, $60@61; gluten all in 100-lb. sacks.

DULUTH.

Duluth, Oct. 18.—Weakness w in the feeds market here during week. Shorts declined $4, red and Boston mixed $2. Other pr unchanged. Dealers reported a quiry with the trade not dispos crease their stocks. Supplies in fi are light on account of the mills being operated at only part capaci per ton follow: Bran, $37.50; gr $48.25; No. 1 ground feed, $53. ground feed, $52.50; No. 3 ground shorts, $43.50 flour middlings, $55 $64; Boston mixed, $44.50; crac $56.75; rye feed, $38.

ECONOMICAL STOCK FEEDING.

In feeding stock for profit the chief consideration is a choice of feeding stuffs from which one gets the greatest production of energy for the investment. Our only guides in these selections are the chemical analyses and feeding experiments. If either one of these factors are missing the other shrinks in value. Only by actual feeding experiments can the digestibility of the material be determined.

Much experimental work has been done to determine the correct amounts and proportions of protein, carbohydrates and fat necessary to insure economical production. These have been compiled into tables known as feeding standards. A ration which fits the feeding standard exactly might fail in result if no attention were given the item "ash." In our common feeding standards no consideration is given this important food substance. Lack of ash makes weak bones and irritable nerves and no animal can return a profit to the feeder when in such a condition. Hence we must select feeds for our ration containing plenty of ash. The corn plant as a whole is low in ash, while the legume hays are high. Animals which do not eat hay may be supplied ash in tankage.

During the period of the war much change in the quality of feeding stuffs has been noted. More intense milling of wheat has resulted in lowering the quality of middlings and bran. This made analyses and feeding experiments reported in past years of doubtful value in connection with these feeding stuffs. Some feeds, especially those by-products of the manufacture of liquor, have become a thing of the past. This upset the entire feeding program on many farms where these feeds had ranked high in importance. New price ratios were a result of the war and made necessary frequent changes in the feeding in order.

The feeder who does not change his ration with price changes is most of the time feeding a non-economical ration. He perhaps would not hesitate to change the brand of gasoline he uses in his automobile, if it were shown that he could cover more miles per dollar with a different brand, but he has often developed a sentiment in favor of some particular feed or has inherited one from his father which is hard to break. Many men hold such a prejudice regarding tankage and go on producing pork at $18 per hundred weight on corn alone, when they might produce it at $13 by using tankage.

Few feeders have exactly the same problem to solve in deciding upon a ration. The roughage raised on the farm should in most cases be consumed there, to save the expense of handling. If this is from leguminous plants the type of concentrates which should be fed will be quite different from that on a farm affording only corn stover and timothy hay as a roughage basis. In the former case where leguminous roughage furnishes a considerable proportion of the required protein the concentrates fed need not be high in protein, which usually results in reducing their cost. In the latter case with a non-leguminous roughage as a basis the concentrate must be high in protein to supply enough without furnishing an excess of total digestible nutrients.

Another consideration in selecting a feed is the relative costive or laxative effect of a feed. Some feeds have a marked loosening effect; others have the opposite. In general, succulent feeds are desirable because of their loosening effect. Cottonseed meal and oil meal, while both high in protein, have opposite effects in this respect. Molasses from beets has a marked laxative effect, often excessive; while that from cane does not. This, however, is somewhat of an individual problem and must be regulated to the needs of each animal.

Some feeds, notably cottonseed meal, contains poisonous substances, which are detrimental if fed in large amounts. Two pounds of cottonseed meal per day per one-thousand-pound animal is usually considered safe for cattle, but cottonseed meal cannot be safely fed to hogs.

With all the data and experimental results at hand the feeder may fail in results unless he is a close observer and adapts his ration individually to his animals. Experimental data are the result of averages, and while of inestimable value, one cannot apply them to the exclusion of individual tastes. Palatability is as important in a feed as any other item, and animals vary greatly in their likes and dislikes. —*Bourbon Stock Journal.*

HORSES VS. MOTORS.

The New York Hay & Grain Dealers' Ass'n has begun an advertising campaign to "Save the Horse," and the first proposition advanced is that 80 per cent of commercial hauling can be done with horses 50 per cent cheaper than with motor trucks. This is held to be true also for farm work

The association has come to believe that it has become necessary to offset misleading propaganda which has been put out by automobile, truck and tractor manufacturers, and says:

"Millions of dollars have been appropriated by New York and other states during the last fifteen years for the construction of up-to-date roads. This has resulted in a network of magnificent highways throughout the country.

"The majority of these roads have been so constructed that it is almost impossible to move horse-drawn vehicles over them with any degree of satisfaction. At certain seasons of the year, when they are covered with ice and snow, particularly on grades, they cannot be negotiated by the horse-drawn vehicle at all. And yet no provision has been made or contemplated for the horse.

"What should have been done at the outset must be done in the future. Construct improved dirt roads alongside of the finished motor roads. This matter is going to be taken up with the highway commissions of every state in the Union.

"Statistics furnished by the Department of Agriculture show a pronounced decrease in the number of colts bred on the farm during the past five years. Previous to this time there was a colt bred on every farm yearly. Recent figures show that there is now only one colt bred to every three farms. This shows that the farmer as well as the rest of the people have been intoxicated with the idea of the gasoline horse to such an extent that he has completely lost sight of his own interests.

"It is up to the shipper, when conferring with the farmer, to introduce this most important subject. Something must be done to bring the breeding of horses back to normal, or it will only be a question of a very few years when we will be confronted with a most dangerous horse shortage. Fine upstanding horses cannot be procured overnight nor manufactured by thousands on demand."

Swift & Co. in a "Foreword" say in part: "The investigation of the packing industry by the Federal Trade Commission was one-sided. The charge that the packers have a monopoly is not founded upon fact. The Trade Commission had free access to Swift & Company's files, and in publishing letters and telegrams taken therefrom, the Commission has actually failed to reproduce in its report letters and telegrams, and even parts of telegrams, which controvert some of the very contentions that it tries to establish. In many cases, the Trade Commission has described perfectly proper practices and transactions in such a way as to make them appear illegitimate; it has given undue importance to trivial matters, and has failed to even mention other matters of vital importance; by a subtle method of insinuation and suggestion, the Trade Commission has in many instances given the effect of dogmatic assertion. Proof of the foregoing statements may be found in this analysis."

With corn silage and alfalfa hay it is an easy matter to make a good ration for dairy cows. We would feed each cow about 30 lbs. of corn silage daily and all the alfalfa she will consume. To supplement this it is well to make a mixture of at least three kinds of meal. Just what these should be will depend upon what crops are raised and what feeds can be obtained in the market and their prices. A mixture consisting of 400 lbs. ground corn or barley, 300 lbs. ground oats or bran, and 100 lbs. cottonseed meal, oil meal, or gluten meal will supplement the roughage very well. Feed one pound of this mixture for each 3½ to 4 lbs. of average testing milk produced.—*Hoard's.*

EXPORTS AND CREDIT.

Reference is made in another column to the rather surprising large tonnage of wheat and feedstuffs held in Australian ports on order and only awaiting delivery to Great Britain which government in its effort to reduce living costs is said by officials of the packers to have reduced meat products on import from the United States around 75 per cent. The Chicago packers offset this by reporting substantial business with Germany, the basis of Exchange not being quite clear. There is possibly a closer parallel in considering meats with grain and other feedstuffs than normally in contemplating this export situation. The credits governing all transactions will of course be arranged in some way, but in commenting again on Mr. Hoover's bearish news release we must remind our friends that this exact situation, without, it is true, the guarantee of an official pen, has been offered our readers and those of other well informed publishers for the past several months. It was absolutely borne out by cables and large export operators who have cautioned Western connections against excess shipments of oats and barley, exceeding the present foreign demand. They urge the engagement of the most limited ship space, referring to the cancellation of export orders as a result of declining foreign exchange and the belief that prices would work lower. The latter has been borne out in actual fact by the declining markets of last week and those who follow the above suggestions have profited.

Barley as Feed.

Purdue University has just finished tests of barley as hog feed. The results show that:

The usual rating of 90 per cent of corn efficiency is a safe standard for barley when fattening hogs. In this trial, barley was more than 90 per cent as efficient as corn.

Hogs fed tankage according to appetite (in separate compartments of the self-feeder) ate an excessive amount of tankage. Combinations of corn, barley and tankage have excellent feeding values. If barley is cheaper per cwt. than corn, a greater reduction in cost of gains results from forcing the hogs to eat more barley by mixing it with corn and tankage.

These facts were brought out by the experimental work:

That barley should be ground, rolled or soaked when used as a hog feed; that finely ground barley is not palatable to hogs; they like it medium or coarsely ground; that barley is a good feed for growing shoats or stock hogs; that it produces a good, firm quality of pork.

Barley when ground, rolled or soaked is not injurious in any way. If soaked it should be fed while in fresh condition—rule which applies to all hog feeds.

It cost $13.39 to produce a hundred pounds of pork on one lot receiving corn and tankage and $14.11 on the other, and those receiving barley and tankage consumed $13.10 and $13.17 worth of feed respectively for each 100 pounds gain, while those receiving the corn, tankage and barley, free choice, ate $13.61 for every 100 pounds of fat they put on and those with the mixed feed ate only $13.09 worth. The lot making the greatest daily gain, 1.71 pounds, received a mixed ration of 6 parts corn, 46 parts barley and 8 parts tankage, and the cost for this lot was $13.09 per 100, the lowest of any lot.

Send us the news from your neighborhood—changes, crops, local conditions, etc.

Movement of Corn.

lfa growers in the vicinity of k n, Ky., made their fourth cut- g alfalfa early this month.
la s are being made for the erec- n an alfalfa mill at Lindsay, Okla., 0 being invested in the business.
h alfalfa mill recently destroyed fr at Clinton, Okla., will be rebuilt, W Church being owner of the enter- e.

Vermilyea of Dunlap, Kans., re- s crop of over 250 tons of alfalfa yr from 30 acres, which he esti- es be worth $5,000.

ck shipper from Onaga reports ops of alfalfa and other feeds h neighborhood with pastures at t e in good shape.

crop of hay in Ottawa County, s this year not so large as last account of the heavy acreage of at However, for the coming sea- th wheat acreage seems to be less th land will be returned to alfalfa ot r grasses. Hay of this growth is xcellent quality.

e tto Weiss Milling Co. has pur- ed site for an alfalfa mill at Ft. s, Colo. The mill will have a ca- y of 8 cars of meal per day. This a has branch mills in Kansas O ahoma, as well as at Wichita, e quarters, but this is the first in- ne in Colorado. About $35,000 id o be involved.

th sheep range of the valleys of e ern slope of the Rockies of Colo- c siderable hay and other feed ere raised, but although alfalfa in ng no more money than was at his date last year the demand very large and it is expected ri will advance. A week ago the a worth $15 a ton to feeders.

E/ OF THE ALFALFA SITUATION.

rd Wilson of the Denver Alfalfa g nd Products Co., Lamar, Colo., it on an Eastern swing among , said when in St. Louis:

e uestion of the hour among the ed mixers is, Why doesn't the a alfa market break and make r neal?

th other markets on feedstuffs g heavy declines, the Kansas a d hay market not only held it showed slight advances. h shown some weakness due c a glutting of the markets fol- eal grinding weather in the b with winter coming on and n s" feeding before a new crop, a a farmer is not bearish nor e e until he feels spring com- a . A break will surely come u we think not until March, or e o affect the meal supply this

a e filling our warehouses and eady for our shut-down pe-

ri ection with Mr. Wilson's re- a l as published in THE PRICE T RAIN REPORTER, on Oct. 15, it id that the great alfalfa pro- a tes show, according to the " Crop Estimates, 19,181,000 ,397,000 tons more than in s is offset by somewhat re- ds in other territory and a e ral falling off of color and lue of the entire crop.

ING ALFALFA SUBSTITUTES.

CHES, TEXAS (7).—The de- rulfalfa in this section is very g will be perhaps until Decem- J uary. The offerings are al- l n account of the continued l New Mexico. a difficulty of obtaining sup- d the tendency to higher val- d s are substituting Johnson n prairie hay for alfalfa and re grain. o and oats are selling on a parity with alfalfa, and feeders find it more economical to feed a heavier ration of grain with Johnson and prairie for roughness, than to feed alfalfa and oats, which have been the favorite ration in this section for some time.—*F. R. Penman.*

PROWERS COUNTY ALFALFA.

LAMAR, COLO. (9).—The alfalfa crop was about 75 per cent of normal and about half of it has been sold or contracted for at prices lower than 60 days ago. The rains have delayed handling somewhat.—*E. J. Wagner.*

NEW MEXICO ALFALFA.

HAGERMAN, N. M.—The hay season is practically over with for us. Owing to the high prices which prevailed during the summer, there was very little hay put in storage, farmers selling as fast as it was put up, rather than take a chance on the future market.

Thirty days ago our fourth crop promised to be one of the largest in our history; however, owing to unfavorable weather, there has been no choice hay harvested so far, and the hay which is still standing is deteriorating rapidly. The present indications are that the crop will be very short, not more than a normal fifth crop.

The demand for alfalfa is not as heavy as usual at this time of the year, but sufficient to take all the available hay that grades No. 1 or better at around $25 f. o. b.

We have also suffered a very heavy loss in the seed crop, very little having been threshed, with most of the seed hay still in the stacks and standing, and practically all the seed sprouting.—*Pecos Valley Alfalfa Mill Co., Roy Lochhead, Manager.*

Alfalfa Meal Demand Light.

KANSAS CITY, Oct. 18.—A continued quiet tone marked the trade in alfalfa meal in Kansas City this week. Some millers and jobbing interests described demand as fair, and local plants generally are operating at capacity on old orders. Still, it is apparent that the current volume of business is far below normal for this period. Inquiries were more numerous during the week, and hope was manifest that demand will improve with the cooler weather. The East, Southeast and Middle West bought small supplies of meal. Mill operations in the West were restricted by rains.

Prices show little change for the week. Choice alfalfa meal, in carlots, new sacks, per ton, closed at $37.50@39; No. 1, $34.50@36.50; No. 2, $29.50@31; brown, $27.50@28.

Alfalfa mixed feed manufacturers described demand as moderate, with some improvement in the volume of business. Excellent condition of fall pastures is a serious restricting influence in the mixed feed trade. Hog feeders are taking more of the balanced rations, despite liberal new corn supplies. Prices were unchanged, closing as follows: No. 1 alfalfa molasses feed, $40@42; No. 2, $37@39; brown, $35@37; alfalfa grain molasses feed, $42@52.

Molasses is a very good feed and two pounds may be fed daily to each cow without injuring her breeding power. It is rich in carbohydrates and if fed in too large quantities and at the exclusion of feeds rich in protein there would be danger of affecting the animal's breeding. There would be no danger of molasses proving injurious in any way fed at the rate of two pounds daily per cow and with the feeds mentioned. We consider it a good feed to use with cottonseed meal and alfalfa hay.—*Hoard's.*

Pasturage in Indiana in many places reported entirely burned out and farmers are compelled to feed stock. In no sections of the state do the pastures have any great feeding value.

Value of the Legumes.

Good, properly cured hay from any of the common legumes has a high percentage of digestible protein. The following table, per acre basis, shows the comparative vales of several common roughages and concentrates:

Hays.	Yield, tons.	(1)	(2)	(3)	(4)
Alfalfa	2½	530	1,950	45	2,581
Cowpea	1½	393	1,011	30	1,471
Red clover	1¼	190	982	45	1,273
Soy bean	1¼	292	980	30	1,339
Sweet clover	2	436	1,538	28	2,337
Oat and pea	1¼	207	917	38	1,209
Timothy	1	60	850	24	970
Peanut vines, nuts removed	1	132	740	60	1,007
Corn silage	8	176	2,400	112	2,828
1 ton bran	...	250	832	60	1,217
1 ton corn meal	...	138	1,380	70	1,676
Velvet beans	1½	360	1,209	42	1,663

[1]Digestible protein per acre lbs. [2]Digestible carbohydrates per acre. [3]Digestible fat per acre. [4]Total nutrients per acre.

This table shows that an acre of alfalfa furnishes twice as much protein as a ton of bran, four times as much as a ton of cornmeal, and nine times as much as an acre of timothy. When the ration consists of an abundance of silage and good legume hay, cows of moderate production often require but little grain. Cows which give more than 25 or 30 pounds of milk daily require the addition of concentrates if high production is to be maintained. In view of the probable shortage in grains, every dairyman should make every effort to provide an abundance of leguminous hay by growing legumes suitable to their soils and sections.—*United States Department of Agriculture.*

Owing to good rains the states of Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Nebraska, Ohio and Wisconsin, have improved pasturage conditions. These same states report corn as ranging from only fair to extra good, according to the areas affected by drought and temperature conditions earlier in the year.—*Am. Steel & Wire Co. Report.*

Hog Sense Makes Dollars For Dealers

No feed dealer can afford to be without a protein feed. Hog instinct demands it as part of the ration. Experienced breeders always feed it. It is in demand in every experimental station. Any hog knows that

Standard Digester Tankage

Ask Your County Agent

is the most perfect balance for his corn. Guaranteed sixty per cent protein, combined with phosphate, lime, ash and fibre. Put it in a trough and he feeds himself just the right amount.

Hay Department

Cowgill, Mo., reports plenty of cheap forage feed on hand in that neighborhood.

A stock shipper from Shelby County, Ia., reports that county well supplied with hay and forage feed with pastures still good.

Feeders in the Arkansas and Kansas Valleys of Kansas report an abundance of rough feed this year with good pastures at the present time.

Douglas County, Kans., reports a heavy supply of hay both in the bale and in the stack. The quality of alfalfa is the best ever known in that section.

Arkansas is said to have a very good crop of hay this year and it is not unusual to find the farmer with more hay than he has barn space to take care of it.

Butler County, Kans., in the drought section, will have no surplus of hay this season. In the immediate neighborhood, however, particularly the districts containing low lands there will be an abundance.

Arkansas valley is reported to have a good crop of hay, both of alfalfa and the native grasses. Alfalfa has sold so far at $23@28 per ton. Those well informed are inclined to think the valley will finish the season with a surplus.

The Sand Hill country of northwestern Nebraska is said by old residents to really never have failed to furnish ample feed. Grass grows in the valleys and at this time there is a heavy crop of hay in the stack all over that part of the state.

A stock shipper from Mullin, Nebr., says the livestock are drifting into the Sand Hills country from the drought districts of Wyoming and Montana to absorb considerable of the local hay. The latter has been contracted for within the past two months at $12@15 a ton in the stack but more recently the prices have been settling down a little and at the present time about $10 is the maximum.

Hay dealers at Newport, Neb., reported to be shipping most of their hay west into Wyoming and other mountain districts which suffered from drought this season, the demand from that quarter being better than in Missouri river markets. Dealers are paying $15 a ton for good hay and there is said to be a considerable accumulation of baled stock at Newport at this time, the demand having slackened somewhat in the past few weeks.

A Kansas City hay buyer returning from a trip through Oklahoma and Kansas says the country has an enormous stock of hay in the stack and already baled but the movement is being delayed on account of transportation difficulties. The farmers generally, he finds, are holding the best hay and will not consider selling anything at all except the low and inferior grades. It is the same travelers' opinion that if the transportation system should be relieved soon there will be a lot of farmers selling good hay for less money than they now receive for the junk.

Soya Bean Hay.

Henry and Morrison, in "Feeds and Feeding," give 100 lb. of soybean hay as containing 91.4 lb. of dry matter, 11.7 lb. of digestible protein and 53.6 lb. total digestible nutrients, being richer than an equal amount of alfalfa hay. Where conditions are not favorable for alfalfa I think no hay crop can equal soybeans for quantity, quality and improvement of the soil in southeastern Ohio. We find, from the same authors, the daily maintenance ration for our Jersey cows averaging about 800 lb. to be .56 lb. digestible protein and 6.34 lb. total digestible nutrients. By feeding 25 lb. of good mature silage and 10 lb. of soybean hay daily we get 1.345 lb. of digestible protein and 9.78 lb. total digestible nutrients, leaving a surplus above maintenance of .78 lb. of protein and 3.44 lb. of total digestible nutrients and giving our roughage a feeding ration of 1:6.2. With this roughage and some corn-and-cob meal we find no need of buying any concentrates except some oilmeal and cottonseed meal which we feed according to production.

While this ration may not be ideal or produce a maximum flow of milk we find it satisfactory as a "war ration," and it brings us more net income than when buying a lot of high-priced concentrates. The farmer-dairyman—shipping cream as we are here—must raise more of his feeds, especially those high in protein or he will be forced to make a "strategic retreat."—*Ohio Farmer.*

THE HAY SITUATION.

HAY GOOD QUALITY.

GREELEY, COLO.—We have a very fine hay crop, so far as quality goes, as it has been a very good season for making hay. The tonnage, however, is short by 25 or 30 per cent. Feeders are paying very stiff prices for the hay, making it hard for shippers to compete. Just at present labor also is very short for baling on account of the sugar beet harvest and potato digging.—*D. D. Dunn.*

SURPLUS HAY PICKED UP.

SEDGWICK, KANS. (5).—The surplus hay is about all picked up, barely enough left in the hands of the farmers to feed them through.

SEED CROP.—The alfalfa seed crop was very light in this section and it is about all in the hands of the dealers now, there will be but very little sown this fall or next spring owing to the high price of seed.—*The Sedgwick Alfalfa Mill.*

Canadian Hay in Cincinnati.

Owing to the large quantities of Canadian hay now arriving at the local plugging yard and expected increased movement during the winter, Cincinnati hay dealers deemed it advisable to caution Canadian shippers, through their daily market circular, to exercise more care and closer attention to the details of proper baling and loading of cars so as to secure more profitable results. The very careless manner of loading hay in cars with dirty floors, which previously contained soft coal and other material, discolors so many bales as to affect the value of the entire shipment. Baling in inclement weather, as was the case a year ago, and loading in cars that have more or less snow and ice in them should also be avoided, as bales so loaded after being in transit and reaching a warmer climate become out of condition, heated and so badly caked as to sell only for fertilizer and at heavy discounts. The trade here also shows a decided preference for small bal the heavy Canadian bale of 17x22 ing from 160 to 200 pounds, is discounted from $1 to $2.50 un light weight and better pressed d article.

Omaha Hay Notes.

TOLEDO.

Over and heavy mixed hay big demand. Timothy and y easier. Demand for alfalfa in sight. Receipts slightly s: No. 1 timothy, $27; No. 2, mixed, $26; No. 1 clover, do rate point.

LOUISVILLE, KY.

Hay is in fair demand, with ly better due to rainy he fact that farmers have do much work in the field. tations are: Baled, carlots, $31 a ton; No. 2, $29.50; No. 3, $25.50; No. 1 clover, $31; No. 2, $28; light mixed, $29.50; No. 1 mixed, $28.50; No. 2, $27; wheat straw, $11; rye straw, $13.

BUFFALO.

Oct. 18.—Dealers in hay are beginning to take hold and quite a few cars were reported sold this week. Prices have not, however, settled down to their figures. Quoted: No. 1, $27; No. 2, $25@26; and No. 3, $22@23 per ton on track.

DES MOINES, IA.

Oct. 18.—Receipts light on all the better grades of hay but were sufficient to supply the demand with the exceptions No. 1 to choice pea green alfalfa hay which is quoted $1@2 higher.

Receipts of off grades continue to arrive in quite large quantity and move slow at unsatisfactory prices.

Choice pea green alfalfa, $32@33; timothy, $24@25; standard, $23@24; prairie, No. 1, $19@20; No. 2, $17@18.

MILWAUKEE.

Oct. 18.—The movement of hay at the local market has been somewhat larger during the past week and generally showed a firmer tone. The demand has not taken its customary stride for this time of the year, due to the still ideal condition of pasturage for outside feeding. Choice timothy is steady, while No. 2 and light clover mixed showed a slight decrease of 50c to $1. Receipts are fair. Current quotations are: Choice timothy, $28@28.50; No. 1, $27@27.50; No. 2, $25@26; No. 1 clover, $22@23; light clover mixed, $24@25; red top and timothy mixed, $24@25; marsh feeding, $14@15; packing, $10.50@11; rye straw, $10.50@11; oat straw, $8.50@9.

DETROIT.

Oct. 18.—Demand for hay is moderate and the market is quoted easy. Receipts are increasing and a good deal is coming from Canada. Straw is firm and 50c higher. Quote: No. 1 timothy, $28.50@29; standard and light mixed, $27.50@28; No. 2 timothy, $26.50@27; No. 3 timothy, $22@23; No. 1 mixed, $24@25; No. 1 clover, $24@25.

NASHVILLE.

Oct. 20.—Demand for hay was fair last week. Receipts at Nashville were 14 cars. Prices: No. 1 timothy, $34; No. 2 timothy, $32; No. 1 clover, $33; No. 2 clover, $31.

BOSTON.

Oct. 18.—There was a slight increase in the receipts of hay in the Boston market the past week, but there is a decrease reported in offerings of the top and poor grades as compared with a week ago. The comparatively low range of prices quoted local has caused shippers to show a lack of interest in this market and shipments to Boston have fallen off in consequence. The general situation is firm and a better demand for the best hay, the supply of which is extremely light. The poor grades are also in better demand, but medium grades are slow with prices favoring the buyer. No Canadian hay, especially, is in excessive supply and slow demand. No. 1 timothy hay in large bales is held at a little wider range of prices, most of the offerings ranging at $33@34 per ton. Occasionally a fancy car brings a little more. Small bales are held at $31@32.50. No. 2 timothy ranges at $30.50@31.50 for large bales and $29@30 for small bales. No. 1 Eastern is held $1 per ton higher, at $29@31, and No. 2 Eastern at $26@28. No. 3 hay is $25@27. Clover mixed and fine hay held about $1 per ton higher. Poor to damaged takes a wider range at $18@21. Packing hay in light supply and steady at $18@20 per ton. Receipts for the week ending Oct. 18 were: Local, 134 cars.

The straw market is firmly held with light offerings and prices generally higher. Choice rye straw is quoted at $17@17.50 per ton, with oat straw held a shade higher at $14@15. Receipts for the week ending Oct. 18 were: Local, 5 cars.

OMAHA.

Oct. 18.—Receipts of prairie hay light and the demand better causing the market to advance on all grades. Alfalfa firm and steady. Oat and wheat straw some higher.

Upland prairie—No. 1, $20@21; No. 2, $16@18; No. 3, $12@15. Midland prairie—No. 1, $19@20; No. 2, $16@18. Lowland prairie—No. 1, $15@16; No. 2, $11@13; No. 3, $8@9. Alfalfa—Choice, $30@31; No. 1, $27@29; standard, $25@27; No. 2, $22@24; No. 3, $17@19. Straw—Oat, $9@11; wheat, $8@10.

DULUTH.

Oct. 18.—A better call turned up in hay on this market during the last week. Dealers met with a good demand for the better grades of hay but the poorer qualities were difficult to move. Pasturage over this territory is good as a result of the fall rains. Quotations are unchanged as follows: Timothy—No. 1, $25@26; No. 2, $23@24. Mixed timothy—No. 1, $24@25; No. 2, $16@20. Prairie—No. 1, $23@24; No. 2, $21@22; No. 3, $16@18. Midland—No. 1, $15@16; No. 2, $10@12. Straw—Rye, $9@10; oat, $9@10.

ST. JOSEPH.

Oct. 18.—The hay market continued steady with an advance of 50c to $1 on top grades. The demand for good grades of hay is stronger and the supply being hardly sufficient to take care of the demand. The coming week will no doubt see strong prices on all grades, as rainy weather has retarded the shipping of hay. Nominal quotations are as follows: Prairie—Choice, $21@22; No. 1, $18.50@20; No. 2, $16.50@18; No. 3, $12@16. Midland—No. 1, $14@15; No. 2, $10@12. Alfalfa—Choice, $30@31; No. 1, $28.50@29.50; standard, $26.50@28.50; No. 2, $21@25.50; No. 3, $18@20. Timothy—No. 1, $25.50@26; standard, $23@25; No. 2, $21@23. Clover light mixed—No. 1, $25@26; No. 2, $20@22. Clover—No. 1, $25@26; No. 2, $20@23. Straw, $8.50@9.

BALTIMORE.

Oct. 18.—There is no over-supply of the better grades of timothy and good mixed hay offering, and for such stock there is a fair demand at full quotations. Receipts of hay and the quantity in transit are very moderate, although of common, low grade, and "sample hay" there is an ample quantity on sale, the demand for the poorer grades being very indifferent.

Straw of all descriptions is in fair request in a jobbing way and the general market is about steady at former range of prices. We quote, per ton: Timothy—No. 1, $31; standard, $30@30.50; No. 2, $30; No. 3, $25@27. Light clover mixed—No. 1, $29.50@30; No. 2, $27@28.50. Clover mixed—No. 1, $27.50@28; No. 2, $25@27. Clover, nominal—No. 1, $27; No. 2, $25. Sample hay, $20@22. Straw—No. 1 straight rye, $17@18; No. 1 tangled rye, $14@14.50; No. 1 wheat $12@13; No. 1 oat, $14@15.

PHILADELPHIA.

Oct. 17.—Hay was steady on choice qualities which were in fair request and light supply but there were liberal offerings of the under grades which were pressed for sale at low and irregular prices. Straw quiet but steady under moderate receipts.

Timothy hay—No. 1, $32; No. 2, $28@30; No. 3, $24@27.

Clover mixed hay—Light mixed, $28@30; No. 1 mixed, $26@27.

Straw—No. 1 straight rye, $14.50; No. 2, $12.50@13; No. 1 tangled rye, $13; No. 2, $12@12.50; No. 1 wheat straw, $12.50@13; No. 2, $11.50@12; No. 1 oat straw, $12.50@13; No. 2, $11.50@12.

NEW YORK.

Oct. 12.—The New York Hay Exchange reports the hay situation as follows:

	Hay tons	Straw tons
Receipts for week	3,460	260
Receipts last week	4,735	390
Receipts Sept. 1 to date	28,953	2,000
Receipts same time last year	41,513	2,180

Labor troubles have had a considerable effect on the market during the past week and values have advanced about $2 a ton on all grades, though trade is quieter at the close and the course of values is uncertain. Quotations:

	Largebales per ton	Small bales per ton
No. 1 hay	@35.00	$34.00@35.00
No. 2 hay	32.00@33.00	31.00@33.00

WIRE FOR BIDS STRICTLY COMMISSION SPECIALIZING HAY CONSIGNMENT

the U. S. Railroad Administration has placed the transportation of hay and straw intended for delivery at Brooklyn Eastern District Terminal under the "permit" plan. Application for "permits" are to be made by the receiver and if approved will be sent to the shipper who in turn should surrender same to the railroad agent as authority to ship. Shippers should keep in touch with their receivers and endeavor to use every "permit" sent them; in case "permit" is not used, it should be returned to the receiver immediately.

CINCINNATI.

Oct. 22.—Receipts to the plugging yards though comparatively light, again exceeded the requirements of the trade and an easier market prevailed with losses of $2 to $2.75 for timothy, and $1.50 for mixed. Pure clover and good alfalfa, however, held up well, the former advancing $2 and the latter ruling steady. A liberal percentage of the week's receipts consisted of Canadian hay of rather poor quality. Rains also interfered with trading on two days. The market suggests little of encouragement of better prices and shippers are advised not to purchase on too close a margin.

The market Saturday was duller than ever and only 15 cars of 49 at the yards were sold. Cars in the terminals for Monday's plug, 27 cars.

Copious rains have been instrumental in bringing about a prolonged pasturage for stock, and a decreased demand for cattle hay prevails. The country shipper of hay is up against the farmer who not only has become accustomed to high prices but who has money to hold his produce for later marketing, coupled with a car scarcity limiting the movements from those who are believers in current values, consequently prices for hay so far on this crop have been fairly well maintained, but sentiment is changing and although the receipts have not been burdensome, the demand shows a slackening tendency, and indications are for a larger movement soon at lower prices. Supply and demand must eventually rule, and the supply this year is largely in excess of last, while the demand is greatly lessened, and it would be wisdom on the part of the farmer to accept a situation that cannot be avoided and market his hay now while values are still good.

Timothy—No. 1, $27@28; standard, $26@27; No. 2, $25@26; No. 3, $21@24; threshed, $13@15. Light clover mixed, $27@28. Clover mixed—No. 1, $26@27; No. 2, $23@25. Clover—No. 1, $30@32; No. 2, $27@29. Alfalfa—No. 1 western, $38@39; No. 1 local, $34@35. Straw—Wheat, $8@9; rye, $11@12; oat, $8@9.

CHICAGO.

Oct. 21.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Oct. 18, also the total receipts and shipments of hay from Jan. 1, 1919:

	Oct. 18, 1919.	Oct. 11, 1919.	Oct. 19, 1918
Total receipts.....	3,914	4,631	5,898
Total shipments....	280	486	4,443
Rcpts. since Jan. 1..	193,484	189,570	257,786
Shpts. since Jan. 1.	38,566	38,286	75,155

Receipts continue light and the demand is excellent, especially so for the better grade of timothy. Even the second grade stock was taken freely, but the lower grades were very hard to get rid of. There is every chance now for shippers to get top prices for good hay, and shipments can be made with a reasonable certainty of good results. We quote:

Timothy—No. 1, $30@32; standard, $29@30; No. 2, $26@28; No. 3, $22@24; sample, $18@20; threshed, $10@13.

Clover—No. 1 light, $27@28; No. 1 mixed, $25@26; clover, $23@26.

Prairie—Kansas and Oklahoma, $20@24; Iowa, Minnesota and Dakota, $15@24.

Marsh hay—Feeding, $13@15; packing, $10@12.

Straw—Rye and oat, $16@12; wheat, $8@9.

KANSAS CITY.

Oct. 18—Strength continued in the market for hay in Kansas City. With the exception of an advance of $2 to $3 a ton on clover, the market closed unchanged for the week. Receipts were light, amounting to 607 cars, compared with 672 cars a week ago and 926 a year ago. Shortage of cars at interior producing points continues to seriously restrict the movement of hay to market. Demand is sufficiently strong to absorb the current arrivals, and in instances keen competition develops for supplies. The Southeast is a better buyer of alfalfa than in recent weeks; in fact, demand as a whole is described as the largest on record for this period of the year. An acute shortage of clover prevails, which forced an advance in prices this week. Straw was unchanged.

Prairie—Choice, $21@22; No. 1, $18.50@20.50; No. 2, $16@18; No. 3, $10@15.50; packing hay, $8.50@9.50.

Midland prairie—No. 1, $13.50@15; No. 2, $8.50@13.

Alfalfa—Choice, $30.50@31; No. 1, $29@30; standard, $26.50@28.50; No. 2, $21@26; No. 3, $18@20.50.

Timothy—No. 1, $25.50@26; standard, $23@25; No. 2, $21@23; No. 3, $16@20.50.

Clover mixed — Light, $25@26; No. 1, $23.50@24.50; No. 2, $17@23.

Clover—No. 1, $24@26; No. 2, $15@15.50.

Straw, $10@10.50.

KANSAS CITY HAY NOTES.

SANDERS SOSLAND, CORRESPONDENT.

Fire last week destroyed the hay warehouse of H. F. Tighe & Co., retail forage handlers in Kansas City. A large quantity of choice prairie hay was included in the blaze, the damage to the contents and structure amounting to about $15,000. The building was damaged to the extent of approximately $5,000.

Hay trade interests of Kansas City are displaying increasing enthusiasm over the work undertaken by the Horse Publicity Ass'n, an organization recently launched in New York under the leadership of hay dealers in that state. The inroads of the motor truck have reduced the volume of prairie hay trade in Kansas City. While this has been more than offset by the large alfalfa trade, hay dealers feel that uneconomic progress of the motor truck to the detriment of the horse should be checked for the good of the country. C. D. Carlisle, of the Carlisle Commission Co., has joined the association, and has also issued an interesting booklet showing how more hay and less gasoline would contribute to a great saving in many delivery costs.

"The hay market displays a strong tone despite the excellent condition of fall pastures," declared Dan Tilson, of Dyer & Co. "Normally weakness in the market for forage would result from a fall pasture season such as has been witnessed to date. Feeders are pasturing their late alfalfa, and in scattered districts where wheat is up the plant is being utilized for pasturage. But there is light movement of hay to market, owing to acute shortage of transportation equipment, and, as a result, values are being maintained at their present high levels. Good quality hay, alfalfa, prairie and tame, meet with a particularly strong demand. I anticipate no reaction in hay prices unless marked improvement develops in the car situation."

Prairie hay is still being cut in districts of Kansas and the wild hay producing areas of northern Oklahoma, according to advices received by market interests in Kansas City. Arrivals of prairie hay include a marked predominance of the cheaper grades, and receipts of this character are expected to continue throughout the fall.

"An extensive demand for feed is in prospect in the Southeast," said Walter M. Browne of Memphis, Tenn., while visiting in Kansas City the past week. Mr. Browne met local dealers in hay after a trip to Wichita, Kans., which he made following the convention of the Grain Dealers' National Association at St. Louis. "The Southeast is short of feed," added Mr. Brown. Lately there has not been much demand, but in January and February, when planters will be busy at work in fields, their requirements will be considerable. Until then I do not expect much business in feed in the Southeast. Alfalfa is one of the feeds which I believe the Southeast will require in liberal volume. If cotton prices continue as high as at present, the purchasing power of the entire South in feed and other markets will be favorable for the country as a whole. High prices for cotton such as producers are now receiving do not tend to encourage feed production in the Southeast, and less progress than expected is evident in enlarging the output of crops other than the staple for which the South is famous."

"Alfalfa will reach a top of $35 a ton within the next three months," forecasts W. H. North, of North Bros., who manifests bullish enthusiasm regarding the outlook for prices on all varieties of good quality hay. "There is an enormous scattered demand for alfalfa; in fact, I have never before witnessed in my long experience on the Kansas City hay market so extensive a demand at this period of the year as prevails on the current market. Alfalfa is moving to the South and Southeast, and the demand from the East is of surprisingly large volume. The production of clover hay in the East is seriously short this year, and dairy feeders, who require either clover or alfalfa, are forced to come to Kansas City for their abnormally large require-
